Group Six of the Ky. Bankers Association will meet in Newport next Tuesday, Judge John M. Loe will deliver the principal address.

The "Barrel Opening" of the Walton Baptist church was held at the church building last Thursday. Some time ago small wooden barrels were distributed among the people in which to deposit small coin to be contributed toward the liquidation of the debt on the new Baptist church building. \$225 were taken from the barrels and a number of barrels have not yet been returned. The large auditorium was well filled with ladies at the annual barrel opening, and the contest was called to order by Mrs. Susie Norman, president of the Ladies Aid Society, when the following program was given:

Our Slogan, "Be not weary in well doing."
Song by the choir.
Scripture reading and prayer, Rev. Ollis Hamilton, the pastor.
Song, Quartette.
Welcome address, Mrs. Susie Norman.

Collection of barrels.
Aunt Emily's "Mighty Box," Miss Morris.
"A Tenth of a Tramp," Mrs. A. B. Tompkins.
Solo, Miss India Morris.
"Take my Silver and Gold," Miss Stephenson.

Song, Quartette.
"Over the Hill from the Poor House," Mrs. D. M. Bagby.

After the program had been rendered all were invited to the dining room of the church building, where ice cream and cake were served by the ladies.

Walton Electric Light Company has its plant in fine operation and much of its success is due to the energetic efforts of the proprietor, E. L. Kelly, and the generosity of the citizens who contributed so liberally to his fund without which it would have been impossible to rebuild the plant which was destroyed by fire several months ago. It is now one of the best plants in the State. On account of Mr. Kelly's financial condition he was unable to rebuild without help, and 75 of our citizens gave and paid \$1,658.50 toward rebuilding the plant.

The money was paid into the Equitable Bank and Trust Co., and so that all may know that due credit has been given the list of donors is published as follows: \$100 each—J. C. Ringer, J. G. Tomlin, D. B. Wallace, \$50 each—Alphon and Hudson, Richey & Renaker, Wm. Ransler & Son, S. L. Edwards & Son, Britten Bros., Dr. J. Daugherty, Robt. W. Jones, Dr. D. J. Rankins, Geo. P. Nicholson, Walton Garage, W. Lee Gaines, A. M. Edwards, \$25 each—W. S. Wayland, Geo. W. Bauer, H. C. Diers, Dr. G. F. Holloway, Chas. Strother, Thos. K. Curley, E. K. Stephens, T. O. Ballard, E. S. West, J. C. Gordon, Thomas Harvill, J. D. Mayhugh, C. Scott Chambers, Equitable Bank, John C. Miller, J. J. Hudson, \$20 in painting, John Fluk, \$15 each—M. E. Hance, R. D. Starnier, Dr. A. N. Jones, Thos. Elroy, W. T. Dudgeon, Harry Simmons (work), \$10 each—E. P. Northcutt, Mrs. Sallie G. Hughes, Mrs. D. M. Bagby, John L. Vest, W. B. Johnson, Rev. E. C. Loyce, Wm. D. Wayland, Mrs. Harry Dixon, Nicholas Sanning, Ernest Hartman, J. M. Arnold, A. Records Johnson, Chas. L. Griffith, P. C. Yowell, Mart Benson (work), W. W. Roberts (work), Robt. Whitcomb (work), \$7.50. \$5.00 each—A. H. Smith, W. H. Senour, H. R. Watson, Rev. R. F. DeMolsey, W. B. Norrington, J. M. Starnier, W. P. Rogers, S. W. Beavary, R. L. Ratcliff, Mrs. J. W. Thomas, Nicholas Welsh, L. P. Vallandigham, Thos. Griffin, W. O. Jones, Eastern Star Chapter, \$4. C. M. Emral and J. R. Cluser, \$3 each. Hugh Roberts, \$1. Total, \$1,658.50. Mr. Kelly is deserving of all because of his nice treatment of our citizens at all times, his efficiency in his work, his industry and his merits as a man. He desires us to express his heartfelt appreciation of the kindness shown him and the very liberal contributions of our citizens, which we might say is the way Walton does for every deserving enterprise.

Men--Here Is Your Chance to Buy
A Dependable "Dressy" Shoe
at a Very Low Price.

DON'T HOARD
There is Absolutely No Chance of a Famine in This Country.
(Baltimore American)
Don't hoard money, don't hoard food, don't hoard anything! Of all the deluded obstructionists along the ways of life's activities, the hoarders are the most pernicious. The housewife who hides away sugar or beans or bacon--takes them out of the retail market and puts them out of reach--is a miser just the same as the miser who hoards gold. The individual who buries his gold in a corner of the cellar, do something that will help increase the food supply, but don't do anything that will tend to produce artificial scarcity. Economy in foods is a right idea. Hoarding foods, keeping them out of the reach of others who need them--forcing the cost of foods up by a multiplied process of hoarding, is immoral--it is criminal selfishness. There is no reason for hoarding foods. There is not going to be anything having the semblance of a famine in this prolific U. S. As long as Europe, this country has been doing that to a very large extent for more than a half century. As to the potato shortage--that was a 1916 trouble--and the potato trouble was soon passed over. Which is to say the 1917 potato yield will probably be more than twice as large as that of last year. Now potatoes are all ready coming to market--they will be coming with a rush 60 days from now.
wheat is just being seeded in Canada and the great northern wheat zone of the U. S. An enormously increased acreage will be put to corn this year, and corn spells out into pork, beef, poultry and eggs. Even the amateur farmers will be planting beans this year. Cheer up, the worst is past! Don't hoard anything! Don't hoard--lend a hand, help to make this a fat year. Be a producing optimizer! don't be a hoarding pessimist!
C. E. McNeely, cashier of the Citizens Bank, of Bellevue, was a business visitor to Burlington, Monday.

OUR EXCHANGES.
In Montgomery county the cold snap retarded the growth of corn wheat and rye and has made grain very backward. Garden truck seems to be coming nicely. Corn planting has been going on rapidly.
Bourbon county tobacco plants are not thriving. In some places cut worms have made their appearance utterly destroying peas, beans, lettuce and even onions.
In Fleming county tobacco plants seem to be about the only things that are thriving at present. Wheat is at more or less of a standstill as well as bluegrass, but notwithstanding the fact that the ground is very dry, much corn has already been planted. The outlook at present is that the corn crop in this county will probably show the largest acreage ever grown here.
In Nicholas county continued cool weather has greatly retarded the early gardens. Many truck raisers report that their early beans have been frosted and plants which have been set out are injured. The farmers are well up with their plowing, and the work of planting is being pushed. Tobacco plant beds are showing up nicely.
In Jessamine county farmers are not discouraged. Quite a good deal of corn has been planted. The outlook for a good wheat crop is very encouraging. While the wheat is thin on the ground it has stood unusually well and is growing fast.
A coal famine has been on in Owen for two weeks with no probability of securing any coal. If there is a 400 bushels of coal in the entire city of Owen, The News-Herald happened on the last proposition all last summer and fall, but our mine wood nor coal the folks are comfortable, all trading that a cold May may bring with a warm June--Owenites say.

Mother's why buy Boys Clothes--You will find Appreciate this Display of Real Values

BOONE CO. RECORDER

W. L. RIDDELL, Publisher.

Last Sunday was dark and very gloomy.

No demand as yet, this season for moth balls.

Evidence of the black bird nuisance is seen in Burlington again.

A special session of the Boone Fiscal Court will be held next Friday.

It is said cut worms are devouring everything that is green in some localities.

So far there is no candidate for jailer unless some one is running as a dark horse.

William Carpenter, of Locust Grove neighborhood, has purchased a Ford auto.

A large crowd attended the Red Cross lecture at the court house last Saturday night.

There was some frost last Friday night, and some say they saw ice Saturday morning.

Fishermen who have been on the job along Gunpowder creek have been catching some very fine fish.

Some tobacco plant beds are said to have an abundance of plants while in others there are very few.

Woodie Sullivan, of Commissary, was in town with a load of livestock, last Saturday, for which he received long prices.

Dudley Blythe was quite ill of gripe several days last week. Grover Jarrell handled Mr. Kelly's truck while he was off of duty.

The cool weather this month retarded the growth of tobacco plants, but in some beds they are nearly large enough to transplant.

There are 400 empty coal cars in the yards at Louisville. No wonder the city is short on fuel, there hasn't been no effort to return the empties to the mines.

If the price of gasoline climbs much higher automobiling will become less popular, and many machines will be taken off of the road and put on the market.

A gentleman was in Burlington, last Saturday, conferring with the members of the local Yvonne organization, but nothing definite in regard to the matter was done.

Be ready to combat the threat should it attack your cattle this spring. It may not be as prevalent as it was last spring when it was the worst ever.

By invitation Rev. David Blythe occupied the pulpit at the Baptist church last Sunday morning and preached a very able sermon which was enjoyed by a large congregation.

A very large per cent of the acreage of corn to be cultivated in this county will be planted this week, which will be in time for the young corn to make a start with the warm weather.

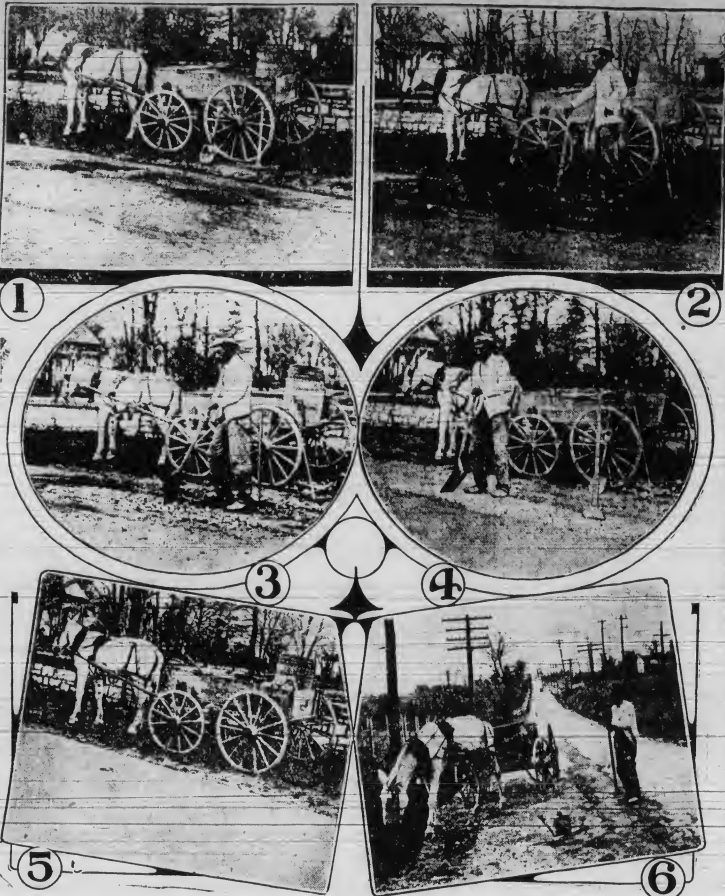

County Road Engineer Chas. W. Goodridge is experiencing trouble trying to secure the services of a man who is competent to operate the county's steam roller. The machine is not as easy to handle as a lawn mower, and requires both skill and judgment to handle it properly.

William Darravainville, of Newport, bought of Prof. Muntz, early last Monday morning, his house and lot in the north part of Burlington, the consideration being \$800, possession to be given June 15. Sorry to lose Prof. Muntz but the town will get another good citizen in his place.

Renewing his subscription to the Recorder, J. W. Kennedy writes from Cornish, Grant county: "Enclosed find check for which send my paper up, and continue to send it to Centinias as at present, as it is the first thing I look for when I go over. I spend about half my time there and try to keep up with Boone county happenings."

Elzie Poston, of Limaburg neighborhood, and Miss Alice Kelly, daughter of Mr. and Mrs. B. T. Kelly, who reside out on the East Bend road, were married at the residence of Rev. Edgar C. Riley in Burlington, the afternoon of the 6th inst. The groom is a young man who stands very high in the community where he was raised, and has the pluck and industry to make life a success, while the bride is a young lady of many admirable qualities that will make her a most desirable life companion. The Recorder extends congratulations to Mr. and Mrs. Poston.

PATROL SYSTEM OF MAINTAINING MACADAM ROADS, FRANKFORT AND VERSAILLES PIKE, FRANKLIN COUNTY

No. 1. Showing holes in macadam road. No. 2. Hole cleaned out. Note vertical sides to retain material. No. 3. Hole filled with new material same size and kind of material as used in building road. No. 4. Hole after being properly tamped, screened and watered, being left about a quarter of inch above former surface. Hole practically completed. No. 5. Completed patch in road. No. 6. Showing repair of deep rut on same road.

A Causeless Coal Panic.

The production of coal last year was greater than any previous record.

The production of coal in Kentucky last year was greater than ever before.

The demand in a growing country steadily increases, but just before the war there was talk about the "over production of coal."

Last week the Federal Trade Commission declared there was abundant coal mined in the country, and that there was no ground for a panic in coal, and warned the consumer against being stampeded into paying fast winter's prices for coal this summer.

Last winter the railroads announced a "coal shortage," and some of the roads did all they could to increase the difficulty.

In September they placed an embargo on traffic, as explained, "in anticipation of a strike."

That gave another boost to prices, and when the embargo was lifted prices did not decline.

Later the Interstate Commerce Commission undertook to relieve the "coal shortage." Orders were issued which, if obeyed, would have given coal roads better control of coal cars.

Some roads obeyed, while some evaded the orders, and the condition so profitable to coal dealers was indefinitely continued.

One of the innumerable Defense Commissions at Washington has undertaken to handle the transportation problem "for the war" and has the right of way.

Alarmists are asking the public to consider what the effect would be if the country went into the next winter with the fuel problem acute.

One can imagine all sorts of calamities in regard to food, fire, cyclones, floods and famine, but business men are not justified in giving publicity to any such dreams of disaster.

The coal market is being manipulated by a gigantic combination, it will be destroyed or it will override the courts and defy the government. In which case anarchy prevails.

Anarchy will not prevail. Law will rule. The plundering of the public will cease. Neither in peace nor in war will any nation consent to be plundered as the people of the United States are being plundered today.

The price of coal will come down. All the power that the government and the financial world can command will be exhausted to destroy this unholy combine.

DISTRIBUTE BURDENS EVENLY

Great Danger to Country Lies in an Unjust Taxation.

Chairman E. H. Gary, addressing the stockholders at the recent annual meeting of the United States Steel Corporation, spoke, both as an American patriot and as a practical business man. It would be well for Congress now preparing a plan of taxation to take to heart the substance of declaration. It is, of course, a foregone conclusion that heavier burdens are to be placed upon the corporations of the country, as well as upon its citizens, and as Judge Gary says: "No loyal citizen can object provided there is a fair and equitable distribution of the burden."

Great danger to the economic and military life of the United States lies in unjust taxation. It is extremely important, therefore, that Congress use the highest discretion possible in adjusting levies with a view to making the burden light in every direction.

Perhaps one of the greatest problems will be that of arranging a higher excess profits tax. Present indications are that this tax will be increased to 25 per cent on all profits in excess of 8 per cent of the net capital less 5 per cent and the first \$5,000 of profits. That tax is high in itself, yet it is low when compared with the excess profit rates prevailing in Europe, particularly in England.

To inordinately raise the percentage of this form of taxation in this country under the plan of Government by which it regulates prices at which it is buying material from steel manufacturers, etc., would be ruinous. Further, unemployment has been laid on the amount of revenue that would be netted from this course. As a concrete example, the shipbuilders' limit to a profit of 10 per cent on Government work may be cited. If the Government does conclude to impose a tax of 25 per cent on all profits in excess of eight per cent, less eight per cent of the net capital and the first \$5,000 of profits, it becomes plain that revenue from this source would be relatively small. The levy necessarily would be 25 per cent on a great deal less than 2 per cent of the profits. The Government, in consequence, is restricting its own revenue sources by its system of limiting profits. Great corporations which have been paying substantial excess profits will be turning in but little by reason of such a system of taxation. The taxable returns from steel manufacturers on Government sales of plates at 250 and shapes and bars at 250 undoubtedly will be appreciably reduced.

The point is that, while profits may be held down to a reasonable sum, the Government must not cripple economic and in fact it is doing so and interfering with its own welfare by any taxation scheme.

And in arranging an excess profits tax it must not, under its system of price regulation, depend too much on the revenue to be derived from that plant.

Wheat Must Be Plowed Up.

Reports from different sources indicate that there is some winter killing of wheat in this country due to the January blizzard, though it is not known—at this time—that the extent of the damage is more than usual.

Where there has been winter-killing, the question arises as to the best course for the farmer to pursue. The following procedure is recommended by the specialists of the U. S. Department of Agriculture:

"If the crop is not more than half killed, it may not be advisable to let it grow and depend upon natural stooling or tillering of the remaining plants to produce a crop. Even fields in which a majority of the plants have been killed may give a profitable yield. It should be borne in mind that hard winter wheat tillers early, and in that way a thin stand will be unusually increased."

In case of severe injury, where wheat is largely or entirely destroyed, it is better to plant some other crop, which should be corn.

In the western portions of Kansas, Oklahoma and Nebraska, the spring wheat, particularly durum, may be profitably sown instead of fall crops. The durum wheat will give better results in these districts than any spring common wheats. Durum wheats, however, should never be sown as a mixture in fields of winter wheat which has been partly winter-killed, as it is difficult or impossible to sell the mixture under normal market conditions. It should be sown only where the winter wheat field is plowed and completely re-sown.

Mr. Foraker was twice elected Governor of Ohio, and was defeated in 1902 for the Governorship of Ohio, while he served two terms in the United States Senate from 1897 to 1905. He had the honor of introducing the name of Wm. McKinley to the Republican convention in 1896 and 1900.

SELECTING BEST HERD BOAR

Why Is It Important for Breeder to Choose Animal With Much Care—Some Suggestions.

(By W. T. WARE, Colorado Agricultural College, Fort Collins.)

The time is approaching when the hog breeder must select and mate his breeding herd. It is of prime importance that the boar be selected with care. The expression "The male is half of the herd," is often quoted. This by experience has been found true. There is a uniform prepotency in both sexes; thus, the influence of the two

Duroc-Jersey Boar.

parents on the offspring is theoretically equal. However, the boar has the greater influence on the herd. Each pig in the herd is sired by the one boar, but there are several dams.

A well-selected male used on a herd of inferior sows will make a great improvement in the offspring. However, the use of an inferior boar on wellbred sows will have a correspondingly bad result. The breeder should select his herd boar at an early date, and get him accustomed to his new surroundings. The system of feeding and management is very important in getting the male into the best condition before mating.

PROBLEM OF WARMING FEED

Resourceful Farmer Makes Use of Two Barrels and Fresh Manure to Heat Slop for Hogs.

(By R. C. ASHBY, University Farm, St. Paul.)

A resourceful Minnesota farmer reports that he has solved the problem of warming the slop-feed for his hogs. Two barrels are placed near the feeding troughs and a day's supply of feed is placed in each. The barrels are heavily banked with fresh manure from the horse barn. The heating of the pile warms the feed in the barrels as each day's supply stands for 24 hours before using. Whenever necessary the banking is hauled away and a new supply packed about the barrels.

Opinions differ as to the relative efficiency of slop-feeding and dry-feeding, but disregarding the matter of efficiency, some hog raisers prefer slop-feeding for brood sows in winter for another reason. In winter hogs do not drink enough water unless the water is warm or supplied at frequent intervals. By mixing water with the grain the feeder controls the amount of water consumed by his hogs.

MAKING USE OF ROUGH LAND

Acres Not Suitable for Regular Farm Crops Will Support Sheep With Little Expense.

Every farmer with a few acres of pasture has a good chance to raise sheep. On many farms there are a few acres of rough lands not suitable for regular farm crops. This land with the proper attention would support a few sheep perhaps with very little extra expense for feed.

GARDEN WASTES ARE USEFUL

Pig Is Primary Waste-User and Must Be Kept in Its Place—Avoid Buying Feeds.

The pig that has to live exclusively on bought foods will cost more than its pork is worth, unless it is given a special valuation for home use.

The pig is primarily a waste user, and it must be kept in its place. Make it use the garden wastes.

ALFALFA IS CHEAPEST FEED

Profitable to Have Rack Filled With Third or Fourth Cutting Available All the Time.

It is without doubt profitable to have a rack filled with good third or fourth cutting of alfalfa available all the time as every bunch of hogs on the farm can eat this hay at its pleasure. It is the cheapest feed we have.

KEEPING BULL IN CONDITION

As General Rule Animals Are Altogether Too Thin in Flesh to Do Justice to Themselves.

Many a breeder of improved stock has fallen just a little short a success through a wrong notion of what constitutes breeding condition. When we visit a breeder for the purpose of buying a young bull, and he remarks on the way to the barn: "I don't panper my young cattle; I keep them in just good breeding condition," we find as a rule that his bulls are altogether too thin in flesh to do justice to themselves or to him.

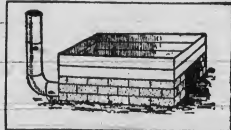

He is a rare man who can form an accurate judgment of a young bull when he is thin. The average buyer wants to see young stuff in good, smooth flesh. This does not mean over-fat; but there are very few young bulls which have been injured by carrying too much flesh during the first year of their life. It takes feed, and plenty of it, to present a young bull in attractive sale condition; but it pays even in these days of high-priced feed; and the sensible buyer will demand it, first, because it indicates that the bull is a good feeder, and, second, because it gives him a fair opportunity to judge of its quality. Improved stock is fetching good prices, and those who are preparing young stuff for sale can well afford to feed liberally. In fact, they can much better afford to do this than not. It is all well enough to carry through the breeding cows in just good, strong breeding condition, but with young stuff a liberal hand has its reward.—Waltham's Farmer.

WARMING WATER FOR CATTLE

Tank May Be Built With Board Sides and Galvanized Iron Bottom on a Brick Foundation.

Have you noticed that your stock drink less water when it is ice cold? Yet plenty of water is necessary for their well-being. Water can be kept at a sufficiently high temperature for cattle at a very little expense in a properly-constructed tank.

The tank may be built with board sides and galvanized iron bottom so

Warm Water Tank.

that it can be placed on a brick foundation and a small fire built under it. The stovepipe should come through the foundation close to the bottom of the tank and ought to give plenty of clearance to the board side.

REMEDY THAT ALWAYS CURES

Very Best Treatment for Pig-Eating Sow Is to Fatten Her Up and Sell Her for Pork.

Experts in hog psychology have offered many recipes for curing the pig-eating sow. They vary all the way from a liberal ration of salt pork to a liberal application of a club.

The very best treatment for such a sow, says our old friend, experience, is to feed liberally on corn, run a sharp knife into her throat at a point well known to all her best friends, dash the carcass into scalding hot water, clean outside and in, trim, salt and smoke, and serve with eggs right off the nest and skillet. It is a sure and happy cure.

TREATMENT FOR CHILLED PIG

Young Animals May Be Quickly Revived by Immersing in Water of About Blood Heat.

Pigs that have been chilled may be quickly revived by immersing them to the mouth in warm water (not hot, but about blood heat). This is much to be preferred to warming them by a fire because the heat is applied so much more uniformly and quickly. The sun position that such pigs never amount to anything is altogether incorrect; for they generally will live and thrive. Failure to get results has usually been due to the pig's having been actually frozen or to the use of water that was too hot.

LOSSES IN SPRING LITTERS

Much Can Be Avoided by Having Sow Farrow in April—Time of Mating Will Regulate This.

Heavy loss in spring litters can be avoided by not having the sows farrow too early. If you have not fresh class facilities to take care of them, then hold the mating until December 6, which will bring farrowing April 1. The period of gestation in sows is 110 days.

Make Us Responsible For Your Tires

You don't have to "shop" among tire dealers to get the exact tire you want,

—nor buy one make of tire for your rear wheels and another make for your front wheels;

—but you can get exactly the tires which will give you the lowest-cost-per-mile of service among the five different types of United States Tires.

And then you can hold one company—the United States Tire Company—responsible for the result,

—which is much simpler than trying to fix the responsibility on two tire companies through two different dealers.

There are five to choose from,

—one for every need of price and use,

—and every one a tire of supreme service and low-mileage-cost.

United States Tires Are Good Tires

A Tire for Every Need of Price and Use—
 'Nobby' 'Chain'
 'Royal Cord'
 'Usco' 'Plain'

United States Tubes and Tire Accessories Have All the Sterling Worth and Wear that Make United States Tires Supreme.

United States Tires are carried by the following Sales and Service Depots—who can tell you which of the five types of United States Tires exactly suits your needs.—EDDINS & BAKER, Burlington, Ky.

B. L. CLEEK, of Union precinct, is a Democratic candidate for Sheriff of Boone County, subject to the action of the Democratic party at the primary election, August 4th, 1917. Menter Martin to be his deputy if he is elected.

For Assessor.

HARRY W. RILEY of Union precinct, is a Democratic candidate for Assessor of Boone County, subject to the action of the Democratic party at the primary election, August 4th, 1917.

J. S. CASON, of Walton precinct, is a Democratic candidate for Assessor of Boone County, subject to the action of the Democratic party at the primary election, August 4th, 1917.

BOONE F. ROGERS of Bellevue precinct, is a Democratic candidate for Assessor of Boone County, subject to the action of the Democratic party at the primary election, August 4th, 1917.

For Superintendent.

J. C. GORDON, of Walton precinct, is a Democratic candidate for Superintendent of Schools in Boone County, subject to the action of the Democratic party at the primary election, Saturday, August 4th, 1917.

For Representative.

W. P. CROPPER, of Bullittsville precinct, is a candidate for the Democratic nomination for reelection to the office of County Representative in the next General Assembly of Kentucky, subject to the action of the Democratic party in Boone County at the primary election, Saturday, August 4th, 1917.

For Jailor.

CHAS. A. FOWLER, of Burlington, is a candidate for Jailor of Boone County, subject to the action of the Democratic party at the primary election, Saturday, August 4th, 1917.

In this issue Charles A. Fowler, of Burlington, announces as a candidate for Jailor of Boone County. He is a son of the late Edward Fowler, who held the office of assessor several terms under the old constitution. Mr. Fowler says if elected he will give the office the best of attention and will keep the service up to the high standard jailer Adams has brought it.

Ten million men in the United States will be subject to the selective conscription.

This number of men between the ages of 21 and 30, inclusive, represents very nearly 10 per cent of the total estimated population of between 103,000,000 and 104,000,000 on July 1, 1917.

Of these conscription eligible the bureau estimates New York State will have 1,068,000, Pennsylvania, 874,000, Illinois, 839,500, Ohio 494,300 and Texas 420,000. In the eight states which have more than half a million population in 1910 the conscription eligibles on July 1 are estimated at: New York 624,700; Chicago 300,500; Philadelphia 171,800; St. Louis 152,000; Boston 178,000; Cleveland 82,600; Baltimore 57,600 and Pittsburgh 67,200.

The number of available as estimated by the Census Bureau for Kentucky are 292,200.

According to statistics about 5,000 people died in Kentucky of tuberculosis in 1916. In Boone County, by the observation of very simple rules of treatment a large majority of these lives might have been saved. The cures, when cases are taken in time showing nearly \$5 in 100 to awaken public sentiment to the importance of the tuberculosis disease, the Tuberculosis Commission will wage a most vigorous campaign to educate the masses to the fact that consumption is no longer regarded as a necessarily fatal disease but is both curable and preventable. In this endeavor citizens of every class are urged to help Boone County will no longer suffer from the fact that there are more deaths from consumption in it yearly than in any other state, population considered.

Dr. W. L. Heizer, executive secretary, of the commission, will gladly furnish any information on the care and treatment of the disease and with the assistance of your physician insure you of cure if it is taken in time and directions are followed. Plenty of fresh fruit, cleanliness and the observance of simple health rules have cured thousands of cases of tuberculosis. Do not despair, but communicate at once with the Tuberculosis Commission at Frankfort.

There are 6,000,000 in a breeding cattle in the United States today than there were 12 years ago. Experts report, if these fourths of those produce a calf each year, the annual increase would be 4,500,000 calves annually. A low estimate in weight for a three-year-old is 1,000 pounds. The annual production in beef is therefore tremendous. Receipts of cattle at the seven principal markets show an increase of 330,000, but the increase was due, the experts say to premature marketing. High cost of feed has caused farmers to strip their herds and send the stock to market.

The hog market shows the same conditions. The first four months of the present year show that 1,000 fewer hogs came on the market than the same four months of last year. This is a decrease of 10 per cent.

From sheep showed an increase in the winter principal markets during January, February, March

and April, 45,000 more head being received than during the same months last year. However, 90 per cent of the sheep fed last winter has already been marketed, and as a consequence, the receipts will necessarily be very light for the next three or four months. There were serious losses of both sheep and lambs in the West during the last winter and the lambing season has been poor everywhere.

THE NEIGHBORHOOD MILL

The present price of flour and meal causes many Kentuckians to recall the day when the neighborhood mill served the neighborhood, and when the boy going to mill sitting upon a sack of shelled corn laid across the back of a horse was a familiar figure in the country. A "turn of corn" taken to the mill got for the owner a quantity of meal representing the amount made from the corn less the toll charged by the miller for grinding. The miller may have played the game sharply. The takout for the house has been the usual "poker percentage," but freight both ways was saved by the farmer. The boy was not sent to the mill when there was pressing work to do. The horse was not needed in the furrow or at the wagon tongue. The ride along the woods road was a pleasant one. The horse was galloped in cotton trousers and hickory shirt. The mill in action was a thrilling exhibition of mechanical power to one unacquainted with machinery. The chimes, the ground hog thresher, the cider press and the corn sheller.

The ideal mill horse was an elderly slow moving awayback farm pig lifting by nature or by long servitude to carry a sack of corn securely. No hogbacked young stock, restive or inclined to shy at fancied dangers, could be used for this purpose. Such animals rear and let the boy and the turn of corn slip over the crupper of seat and jump sideways, getting back to the miller's house and leaving it in a muddle.

There was a temptation to smuggle a little fishing tackle aboard the gently ambling nag and fish for redfish, sunfish and suckers in some eddying bend of the mill stream frequented by rosy kingfishers made bold by consciousness of divine right, and visited by the ungodly and thrush whose irreverent song brought flashing before the eyes of the barefooted angler the glint of the sun upon the "ruffles," the gold of the lady-epper blossom in the forest glade, the sparkle of raindrops upon the leaves of tulip poplars, the flaming red of the cardinal flower, the mingling upon the silver gray of the dead sycamore. If fish were caught the string was boasted and the "meat" turned over to the kitchen. If none were caught the desquency went unconfessed. The difference between the time in which the round trip could be made, Kentucky style, and the time actually consumed was not of consequence and was not noted.

When the "turn" of new corn was taken to the mill the meal that went into the sack was not invariable made of the grain received, but it was payment in kind. There is an appreciable difference between the value of meal made from new corn and that made from grain that has been long in storage. The farmer who brought new corn to the neighborhood mill in early autumn gets meal made from new-crop corn, his own or that of neighbors, is assured of corn dodgers and is not likely to be deceived. He can make of meal made from old corn, dry and flavorless before it reaches the boiling cloth in a wooden mill. New-corn cornbread was in Kentucky, and still it is a few remaining favored neighborhoods, a seasonal country delicacy, although the period of its superiority has long since passed. The season for June apples or dewberries in the country, or the season of hock beer in town.

Mr. Hoover and others, tell us that those who ate cornbread in America save lives in Belgium and put heart into the soldier's of the front. Because Europeans do not know how to make bread without flour and rely on "cattle feed" when they are expected to consume cornmeal.

To many Kentuckians a sack of so of unloved meal as unloved as picturesque and as effective as a wine press of the Biblical period, would make all the more enjoyable the elimination of the asked to die in smitten Belgium and the strengthening of the arm and steadying of the trigger finger of the French and French soldiers in France, of the music of the rushing water in the millraces and the whirling wheels of the crossblades should be a motive force of speculation and freight from the problem of turning corn into corn dodgers, hockbeers, spoon feed, fried mush and a dozen and one other benign manifestations of the spirit of Mondamin—the deity of Indian corn—reduce the cost of living in rural neighborhoods? Would not the pungent flavor and aroma of new-crop cornmeal in some measure revive the spirit of true patriotism and send him to the native American, and send him to the plowman next spring with a keener appreciation of the blessings bestowed upon him by a river of corn? Would not the realization of turning over the bounty of Kentucky flint and turning up the treasures of acres and the contents of the sacks which dashed the eyes of All Baba?

Commissioner's Sale.

Boone Circuit Court, Kentucky.
B. F. Zimmer, Plaintiff,
Against
Henry Kottmeyer admr. of
Fred Zimmer, dec'd, &c. Defs.

For the purchase price the purchaser, with approved security or securities, must execute bond, bearing legal interest from the day of sale until paid, and having the force and effect of a judgment, with a lien retained therein until all the purchase money is paid. Bidders will be prepared to comply promptly with these terms.

CHARLES MAURER,
Master Commissioner.

A Genuine American Citizen.

Franklin, Ky., May 14.—Across the Tennessee line, near Rapid, in this county, lives a farmer, Cyrus Schultz, for whom the Federal government has never been able to appoint a Food-Conservation Committee. When corn advanced to \$10 per barrel Mr. Schultz refused to sell a grain except to those who needed it for bread and then he would accept only \$2.50 per barrel, or fifty cents per bushel. Already he has disposed of half his surplus at the figures quoted and absolutely refuses to sell to those who would feed hogs or cattle for speculative purposes. He could have sold the entire quantity for \$1,000, but already has allowed many of his poor neighbors to cart away a bushel upon their promise to pay. Mr. Schultz is a small farmer and possessed of only moderate means.

The town of Burlington got its first glimpse of the war, last Monday day, when an auto carrying several members of the Navy rolled into town. They were doing the advertising act and did not remain very long.

Commissioner's Sale.

Boone Circuit Court, Plaintiff,
John W. Rice, Plaintiff,
Against
William Stahl, Defendant.

By virtue of a judgment and order of sale rendered by the Boone Circuit Court at its April term, 1917, in the above styled cause, I shall proceed to offer for sale to the highest bidder, at public sale, on Monday, the 4th day of June, 1917, at 1 o'clock p. m. or thereabouts being Court day, upon a credit of six months, the following property, to-wit:

The said land is on Gunpowder creek in Boone County, Kentucky and bounded generally as follows: Beginning at the mouth of Gunpowder creek on the Ohio River, thence with said creek to P. Hager's corner thence with Hager's line to corner of A. P. Marshall, thence with it to the Ohio River thence, with the river to the beginning, containing seven acres be the same more or less.

For the purchase price the purchaser of said real estate, with approved security or securities, must execute bond, bearing 6 per cent interest from the day of sale until paid, and having the force and effect of a judgment, with a lien retained therein until all the purchase money is paid. Bidders will be prepared to comply with these terms.

CHAS. MAURER,
Master Commissioner.

Notice to Road Contractors.

Office of the Fiscal Court of Boone County:
Sealed proposals addressed to the Fiscal Court of Boone County will be received up to 12 o'clock, noon, May 18th, 1917, when they will be publicly opened and read, for the construction and improvement of the following county roads:

The East Ben road from Burlington to the line of Gray School, a distance of 5.63 miles. The work to be done involves approximately: 5483 cubic yards earth excavation, 1087 cubic yards borrowed excavation.

10,000 cubic yards crushed stone, measured loose.

58.5 cubic yards 1, 2, 4 concrete for culverts.

3205 lbs. reinforcing steel.

21 lineal feet 24 inch corrugated pipe—county to furnish pipe.

22 lineal feet 15 inch corrugated pipe—county to furnish pipe.

146 lineal feet 18 inch corrugated pipe—county to furnish pipe.

346 lineal feet 12 inch corrugated pipe—county to furnish pipe.

The road from the Burlington and Florence road at J. J. Tanner's to the line of Hill near Gunpowder creek at W. H. House's gate, a distance of 2.04 miles. The work proposed to be done involves approximately:

3600 cubic yards crushed stone, measured loose.

2692 cubic yards earth excavation.

108 lineal feet 12 inch corrugated culvert pipe—county to furnish pipe.

22 lineal feet 15 inch corrugated culvert pipe—county to furnish pipe.

72 lineal feet 18 inch corrugated culvert pipe—county to furnish pipe.

25 cubic yards stone culvert masonry 1 acre clearing and grubbing.

Hathaway road, from Gunpowder creek to Waterloo and Rabbit Hash pike, 3.75 miles.

Bids will be accepted on this road in sections of one half (1/2) mile.

Plans and specifications may be seen at the office of the County Road Engineer.

Bids must be for work done in accordance with the plans and specifications approved by the Fiscal Court and the County Road Engineer, on file at the Board Engineer's Office in Burlington, Boone County.

The Fiscal Court of Boone County expressly reserves the right to reject any or all bids.

Each bid must be accompanied by cash or certified check for \$250.00, which check will be held until the execution of the contract.

Before the contract is awarded the successful bidder or bidders will be required to furnish a bond equal to the amount of the proposal for the performance of the work in accordance with aforesaid plans and specifications.

All work to be done under the direction and supervision of the County Road Engineer.

By order of the Fiscal Court of Boone County.

W. R. ROGERS,
County Clerk of Boone County.

Commissioner's Notice.

Boone Circuit Court.
James F. Cullom, &c., plaintiffs,
vs. J. Notice.
Montgomery Anderson, Administrator of James S. Cullom, deceased, &c., defendants.

By order of the Boone Circuit Court, I will rent April 28th, 1917, the lands of Jas. S. Cullom, deceased, until January 1, 1918, for cash or note with good security. The lands to rent contain 197 acres, 3 roads and 20 poles, and one tract contains 12 acres, 1 road and 23 poles.

I will be on the 197 acre tract at 11 o'clock a. m., April 28th, 1917 to rent same.

CHAS. MAURER, Receiver
Boone Circuit Court.

Albert Conner, of Burlington, candidate for sheriff, was mixing with the people at Hume Thursday. As he is an excellent gentleman, well qualified for the office, he will be hard to beat.
PETERSBURG.
M. F. Vangate is in Louisville.
Wood Sullivan has finished painting.
F. J. Rue and son are painting Luce Cropper's house.
J. M. Botts & Son are building a silo for Leo Cropper.
Our supply of garden truck is coming from the South.
L. E. Keim is laid up with rheumatism.
Petersburg Coal Co. has fertilizers for corn, wheat, tobacco, and potatoes.
L. S. Chambers has his garage and automobile repair shop in fine order.
Frost played havoc with vegetation. Lot of seeds are rotting in the ground.
The stores here are receiving their supplies by Hood's truck, which is giving satisfaction.
John Bradburn and wife left last week to spend the summer with their children in Toledo, Ohio.
H. E. Arnold, O. N. Scott and E. L. Grant from near Bellevue, were business callers here Saturday.
We have not been in very close communication with the candidates as yet. They know Pete is a right.
R. P. Shinkle after several weeks suffering was relieved by death at 12:30 o'clock last Saturday the 12th. He was 77 years old. Funeral at 2 o'clock Sunday by Elder H. H. Carter.
The Baptist congregation held meeting in their new church Saturday night, Sunday morning and evening. They will dedicate the church the Sunday in June. Everybody is cordially invited to attend.
J. C. O. McWehly, a veteran of the Civil War and for years one of the best known carpenters in central Illinois, is dead. He passed away at the home of his sister, Mrs. Mary Yecker, in Petersburg, after an illness of only two days. He had been a resident of Urbana, Illinois, for 15 years, but spent the last days of his life with his sister, whom he had seen only a few times since his early life. Mr. McWehly was born January 21, 1839, in Dearborn county, Ind., and was the son of Ithamer and Mary McWehly. He was married to Miss Sarah Hamilton in 1854, to which union 12 children were born, five of whom are living. His wife died several years ago. He married Mrs. Irene Winers in June, 1912, who died in May 1914. The body was taken to Urbana for burial.
Card of Thanks.—We wish to extend to our friends and neighbors our heartfelt thanks for the many kindnesses shown during the illness and death of our brother and uncle, J. C. O. McWehly. The Family.

BELLEVUE.
Miss Cynthia Kelly remains very ill.
Len Stewart is doing some repair work on H. D. Brady's house.
Miss Neva Rice visited Mrs. Fred Klausinger and last week.
Mrs. Eliza Riddell has been suffering with sore eyes the past week.
Mrs. C. S. Smith returned last Sunday from a week's visit with relatives on Gunpowder.
Rev. C. E. Baker was able to fill his regular appointment last Sunday morning and evening.
County Clerk R. W. Rogers and Circuit Clerk Maurer, of Burlington, were callers here one day last week.
Carlos Cason and sister, Miss Anna, Ewing Flick and sister, Miss Mazella, were shopping in Aurora, last Saturday.
Lennie Love and family, of Union, and Ralph Cason and family, of Middle creek, spent Sunday at Mrs. Belle Cason's.
Chas. Smith and children, of Lawrenceburg, spent last Saturday and Sunday with his parents, Mr. and Mrs. Jas. Smith.
Misses Edna and Myrtle Simpson, of Corinth, spent several days the past week with their sister, Mrs. J. A. Richmond.
Relative and friends to the number of thirty-five gathered at the home of E. H. Clure last Sunday and gave him an agreeable surprise, that day being his birth day.
Xen Scott had a narrow escape last week, when a young mule he was leading became unmanageable and dragged him quite a distance before he was released. He was bruised considerably, but at this time is improving rapidly.
R. S. Hensley and family who have been visiting relatives here, started for their new home in Federal Hill Sunday.
Jerry accompanied them for several months stay. They carry the best wishes of their friends to the new home.
Last Monday Mrs. Nat Rogers threw some scraps of rubbish in the fire, not knowing there was a load of cartridges among it. The cartridges exploded and part of the shell was imbedded in the back of her hand. Dr. Richmond extracted it and it is hoped there will be no serious results.

STATE NEWS.

Maysville.—The outcrops are playing havoc with early vegetables. Onion beds are attacked, something never seen before.
Lebanon.—Miss Rhoda Lent Hunt, aged seventeen, and R. J. Peaslee, aged 72, were married in the county clerk's office in this city.
Mrs. Wm. Graham, aged 73, died at her home near Loretta, this county, after a long illness of dropsy.
Elizabethtown.—A number of local people have made arrangements for a carload of cans to can tomatoes, to be shipped here for the Girls' Canning Club. A carload consists of about 3,000 cans and costs at the present time \$2.00. The girls are expected to pay for them when they receive them.
Harrodsburg.—Citizens have subscribed several hundred dollars to have a Mercer County Patriotic Day on June 6. A steel flag pole 100 feet high will be erected with appropriate ceremonies. June 6 was selected because it is the 143rd anniversary of the convention which met here and passed resolutions urging Patrick Henry, Governor of Virginia, to advocate the annexation to the Old Dominion of what is now Kentucky, which was carried out and was known as Kentucky county.
Ashland.—Recruiting officers of the local regular army station were surprised when a man and a fine looking youth walked in and the youth said to Sgt. Baker: "What was the greatest thing you ever did?" Before Sgt. Baker could recover from the unusual question, the man continued: "I have come to you, and I love you, and there he is," pointing toward his seventeen-year old son. "I want you to offer my son to you. He may serve our country," continued the speaker, John P. Cordell, of Pollard. "I feel that ought to do as God did. God so loved the world that He gave His only son. I love my country that I have brought my son to your service."

GOOD PRUNING POINTS

Orchard May Be Put on Paying Basis by Proper Work.

Strive to Secure Low, Broad-Spreading Branching System, With Open Center to Admit Sunlight—Cut Limbs Close.

Farmers who wish to put their orchards in shape for profitable production should begin pruning, whenever the wood is not frozen, in midwinter. Trees in heavy-bearing condition will make stronger growth if pruning is done during late winter and early spring. Pruning during June and July will slightly check the rank growth on trees that are making too much wood growth and tend to throw them into bearing for the following year. Dr. J. C. Whitten, professor of horticulture in the Missouri College of Agriculture, gives directions for winter pruning.

Remove all dead or badly diseased limbs. Clean out all canker wounds on

Improperly Pruned Tree.

the trunk and main limbs with a tree scraper. Cut well into the rim of healthy wood on all sides of the wound, to get rid of the disease. Then paint the wound with common white lead and oil paint, to each quart of which has been added one teaspoonful of bichloride of mercury dissolved in turpentine (about one ounce). Paint all canker and pruning wounds as soon as made.

Begin at the top and prune the tree to secure a low, broad-spreading branching system, with open center, to admit sunlight and air from above. Do not remove strong lower limbs if they can be given sufficient light from above. Aim to secure bearing branches throughout the main body of the tree. If the tree is shaded by too much growth at the top, the inner and lower twigs will weaken and die instead of bearing fruit.

Cut back the strong, upward-growing central limbs to outward-growing side branches. This induces the tree to spread instead of growing too high. It admits light through the center to fruiting branches below. If limbs cross each other or crowd badly, thin them out enough to admit filtered sunlight to all parts of the tree.

In pruning cut limbs close, so as to leave no stub or knot. A protruding knot will not heal. A wound cut close will allow the growing layer to close over the wound.

Paint all wounds over one-half inch in diameter with the disinfecting paint.

MONEY IN SUNFLOWER SEEDS

In Demand in England for Manufacture of Oil—Brightens Plumage of Various Fowls.

There is a possibility that the sunflower will be included among our regular field crops and that instead of struggling for a place in the rear end of the garden it will be carefully cultivated and harvested for sake of its seed.

From England there comes the report that a big demand exists for the seed from which to manufacture oil. It has long been recognized that the plant is both hardy and productive and if a means of utilizing the seed could be discovered it would take rank with the grain. Poultry keepers have not a certain value upon the seed for keeping hens in condition and brightening the plumage.

It has even been claimed that the stalks could be preserved in a silage like corn fodder and make a rich food for cattle. In neither case, however, has any wide field of usefulness been found.

FOR EXTRA EARLY POTATOES

Plan Outlined for Working Small Patch Before Danger of Spring Frosts Has Passed.

The extra early potatoes, miniature in size, are a few rows in the hill and with an inch or two of manure, or even all with four or five inches of soil.

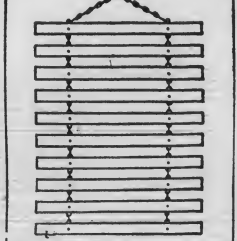

In this manner a small patch may be planted without danger before the spring frosts are past, and new potatoes will be coming on before others of having any.

OUTLINE OF LITTER CARRIER

Device Holds Big Load and Dumps Automatically by Reversing Horse—Handy in Stable.

Here is an outline of a litter carrier sketched from the plan of the one I use. This is a very simple device, but it has more merit than one could imagine, writes J. W. Butcher of Yankton county in Dakota Farmer.

The slats are 1 by 4 inches and are bolted to the chain with 3/4 by 2-inch bolts. The first slat behind

Handy Litter Carrier.

the even is a 2 by 4 to maintain spread, and bored for the chain. A light log chain about 10 1/2 feet long is needed for a carrier this size—3 feet wide by 6 feet long. This carrier is easy to load, will hold a big load, and dumps automatically by reversing horse, the carrier rolling until it is bottom-side up. When not in use it can be rolled up and made to occupy but little space. It is invaluable for cleaning a stable that has a wide floor and level floor.

VARIETIES OF HORSE-RADISH

Maliner Kren or Bohemian Are Considered Superior—Time For Planting Is In Spring.

The best variety of horse-radish is the Maliner Kren or Bohemian. The root cuttings can be had from any of the leading seedmen. The cuttings are made cut straight across at top and sloping at the lower end, so that it is easy to distinguish between them in planting.

The time for planting is in the earliest spring, and the early cabbage plantation is one of the best places. Punch holes in the rows midway between the cabbage plants with a crowbar and put the root cutting in perfectly straight. Then, after the cabbages are cut, the horse-radishes are cultivated through the season.

An application between the rows of 150 pounds of nitrate of soda per acre will promote the rapid growth of the roots.

The crop is dug in late fall and the roots trimmed, the side roots cut properly and buried in bundles for the winter, and the main roots put on the market. The roots are at their best at one season's growth, and will decrease in value if left longer. The main roots are sold by the ton usually.

RIGHT ROUGHAGE FOR SHEEP

Alfalfa or Clover Hay Contains Large Amounts of Protein Which Balance Carbonaceous Grains.

Sheep are ruminant animals and in the main will use the same kind of roughages that are eaten by cattle. Either alfalfa or clover hay makes the very best roughage for sheep, since they are both palatable to them and contain a relatively large amount of protein which balances the more carbonaceous grains commonly fed. Sugar cane or sorghum and millet are both distinctly carbonaceous roughages, and if used for sheep feeding, other breeding flocks or in fattening sheep for market, must be supplemented with some concentrate rich in protein such as linseed oil or cottonseed meal.

Ordinarily either of these concentrates need not compose to exceed 10 percent of the total grain ration. The millet is not so much in favor with sheep feeders, because of the fact that unless it is cut at exactly the right time it is liable to produce scours. A good quality of millet, however, cut early, will form a fit roughage for sheep if properly supplemented with either some additional roughage rich in protein, like alfalfa or clover, or grain ration with a protein supplement.

POISON GOPHERS AND MOLES

Best Time for Work Is in Spring and Early Summer—Use Strychine With Utmost Care.

Spring and early summer is the best time to get rid of gophers and moles. For early spring poisoned corn is good bait. Place some of it out early in April, some more about May and a third lot a little later. Poisoned corn may be prepared by soaking for 24 hours in a solution made by dissolving strychnine in water at the rate of about one-tenth ounce to the quart.

Where the pests are unusually bad, all planting time, seed corn can be treated in this way without injuring its germinating qualities. Of course the planter will have to be regulated to drop this soaked corn.

Strychnine is deadly poison. It should be handled with extreme care and both the solution and the soaked corn kept out of the way of children and animals.

This fine stock will make the season of 1917 at Florence Fair Grounds, Florence, Ky., from May to July 15. You are invited to examine this stock before booking your mares.

JIM WILKES,

2:17 1/4

Will make the season at \$15.00 to insure a living colt.

JIM WILKES is a mahogany bay, 15 1/2 hands high, weighs 1100 pounds, was sired by Thredkeld's Jim Wilkes; dam by Conner's Almont.

MAJOR

The Percheron Draft Stallion will make the season at \$10.00 to insure a living colt.

Major is a beautiful black, 17 hands high and weighs 1700 pounds in ordinary condition; bred by Joseph Moore, of Ottawa, Illinois.

THE FINE BREEDING JACK, MIKE

MIKE, known as the James A. Huey Jack, will make the season at \$10 to insure a living colt.

Mike is a black Jack, 15 hands high, has heavy bone, large head and ears. He was sired by Mike, known as the Riddell & Bodie Jack by Bourbon Chief.

All reasonable care will be taken to prevent accidents in handling the above stock, but we will not be responsible should any occur.

A lien will be retained on all colts until season money is paid, money due when mare is parted with or bred to other stock without our consent.

A. F. CONNER, ED McHEL'S,
J. G. RENAKER, C. H. TANNER.
Phone, 116, Florence, Ky.

THE PERCHERON STALLION,

MAGNETTE

Will make the present season on Thursday Friday and Saturday of each week at my stable 1/2 mile below McVine, Boone County, Ky., and on Monday, Tuesday and Wednesday of each week from 9 a. m. to 4 p. m. at my farm near Commissary on the Burlington & Bellevue pike, and his service fee will be \$10.00 to insure a colt to stand up and suck, but if the said fee be not paid within sixty days after due it will be \$12.00.

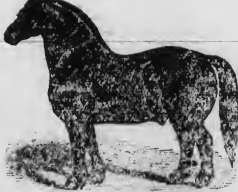

THE FINE YOUNG JACKS, Bob Starlight and Jim.

The fine young Jack Bob Starlight, will make the season at my stable at McVine on the same terms as those of Magnette.

The splendid Jack, Jim, will make the season at my farm near Commissary on the same terms as those of Magnette.

In handling the above stock care will be taken to prevent accidents, but I will not be responsible for any that may occur.

No business done on Sunday.
XEN SCOTT, Grant, Ky., R. D.

To Farmers and Breeders

The Percheron Stallion, Prince, will make the present season at my stable on the old W. T. Winston farm on the Minnesota pike, at \$10.00 to insure a live colt to stand up and suck. Care will be taken to prevent accidents but we will not be responsible should any occur.

DESCRIPTION AND PEDIGREE.
Prince is a handsome 8-year-old black, with white star in forehead, weighs 1600 pounds, was foaled April 1909, owned by Joseph Moore, of Ottumwa, Illinois. 1st sire: Voltair 2553, 2nd sire: Phosphorus 45002, 3rd sire: Norcross 21922, 4th sire: Paul Bert 51453. Dam: Fashion 6008, 2d dam: Lena B 26280, 3d dam: Anellion 18988, 4th dam: Pride of Sarah 1841. B. J. & EDWARD MICHEL'S.

University of Pennsylvania scholars have just translated a Babylonian baked brick letter written 2,200 years ago and found it to be an order for a barrel of flour. It was man's duty and privilege then as now to keep full the flour barrel.

EGGS for the 10-12 months, oysters for the 10-12 months, that's a fair division. Why try to fly in the face of nature?

The Fine Belgian Stallion,

Don Degozee

Belgian Draft Stallion will make the present season at my stable one and a half miles north of Helron, Boone county, Kentucky, at \$10 to insure a colt to stand up and suck, money due when colt comes or the mare is parted with or leaves the county.

Don Degozee, despite his great size and weight, is well balanced, rough-out, and perfectly proportioned and symmetrically built. He has a light action as a stallion of much smaller type, and his disposition is much better than is usually found in a horse of his blood. He is a beautiful dark sorrel, 17 hands high, weighs 1,800, has a broad forehead, heavy bone, fine style and action. For official pedigree call on the undersigned.

Great care will be taken to prevent accidents, but I will not be responsible for any that may occur.

Hal McGregor.

Record (2) 2:26 1/4, will be allowed 15 approved mares at \$20 to insure a living foal, at W. B. Arnold's stable, near Bellevue, Boone county, Ky.

Hal McGregor, 2:26 1/4 is by Hal Dillard 2:04 1/4, 1st dam by Wilstar 2:17 1/4; 2nd dam by Oscar Williams 2:12 1/4; 3d dam by Ohio Volunteer 2:26 1/4.

The sire of Hal Dillard is Brown Hal 2:12 1/4 (world's record when made); also the sire of Star Pointer 1:59 1/4, the first horse to beat 2:00.

Be not misled a successful sire comes from a successful sire line. Hal Dillard has sired Zulu Hal 2:03 1/4, Fannie Dillard 2:03 1/4, Hal B. 2:04, Hal C. 2:05, Hal Leaf 2:07 1/4, Hal Clipper 2:07 1/4, Cinnamon 2:07 1/4, Dillard Online 2:07 1/4, Butter Bowl 2:08 1/4, Cambria 2:08 1/4, Vera B. 2:07 1/4, Hal Grey 2:05, Hallock M. 2:09 1/4, M. 2:09, Dillard S. 2:05, Hal J. 2:09, Jerry Dillard 2:09, Della H. 2:10, Dillard Onward 2:10, Helen B. 2:10 1/4.

Hal McGregor with only 70 days track work last year trotted one-eighth in 15 1/2 seconds, 1/4 in 31 seconds, and is by his record the fastest colt ever sired by Hal Dillard.

Approved mares must be bred by June 1st as horse goes in training then.

Care will be taken to prevent accidents but I will not be responsible for any that may occur. Will farm a few good mares. W. B. ARNOLD, Petersburg, Ky., R. D. 1

THE FINE SADDLE HORSE

Harrison Prince No. 3340

Will make the present season at the stable of G. T. Gaines one mile from Burlington, Ky., on the Petersburg pike, at \$10 to insure a living colt, I will not be responsible for any accident that may occur.

Harrison Prince is a chestnut stallion, 16 hands high, 8 years old, has a large blaze face, two white feet, and is a perfect type of a saddle horse with a fine finish and action, a champion in his class from a colt. He sire is Dandy Grey, the well known show horse. For official pedigree call on the undersigned.

H. T. GAINES.

Reasons!

Why you should use Cardui, the woman's tonic, for your troubles, have been shown in thousands of letters from actual users of this medicine, who speak from personal experience. If the results obtained by other women for so many years have been so uniformly good, why not give Cardui a trial?

Take
CARDUI

The Woman's Tonic

Mrs. Mary J. Irvin, of Cullen, Va., writes: "About 11 years ago, I suffered untold misery with female trouble, bearing-down pains, headache, numbness, etc. I would go for three weeks almost bed-ridden. My husband went to Dr. Cardui. After taking about two bottles I began going around and when I took three bottles I could do all my work." E-80

is always difficult to make a read-
ment after custom has settled down,
any fixed habit, says Milwaukee V.
consin. The daylight saving plan c-
fronts a formidable obstacle due to
this fact. But its advocates are en-
thusiastic, and if the public in general
comes around to their way of thinking
something substantial may result from
the agitation.

The London Economist has calcu-
lated the United Kingdom's imports
and export trade for 1916, in terms of
the prices prevailing in foreign trade
in 1915. While total imports in 1915
were \$4,459,000,000 and in 1916 \$4,746,000,
000, yet the imports of 1916, if valued
in 1915 prices, were only \$3,715,000,000
—indicating an actual falling off in
volume from the preceding year. Ex-
ports and re-exports increased in val-
ue from \$2,420,000,000 in 1915 to \$3,
020,000,000 in 1916, but last year's ex-
ports in 1915 prices were only \$2,507,
000,000.

Doctor Laubach of Johns Hopkins
university, after exhaustive experi-
ments, has been unable to discover any
bacteria on much-hunted schoolbooks
and library books except those which
are commonly found in the air. One
hundred and fifty of the volumes that
he examined had come from homes in
which diphtheria existed. There is
nothing in his conclusions which need
deter anyone with a thirst for knowl-
edge from learning how to read.

A Toronto dog who proved himself
a hero in the trenches with the Prin-
cess Patricia regiment, is to have a
medal awarded him. He would much
prefer the substantial reward of a fat,
juicy bone to this shadowy glory,
wherein he shows himself wiser than
his human co-stars, but such is life
and the rewards of its fame.

It is impossible for America not to
experience some of the horrors of war.
Thus, the shortage of dyes is said to
have spread to the hairdressing estab-
lishments and poor grandmother may
have to remain gray. Still, one would
then be able to distinguish her from
her granddaughter, a thing impossible
now.

A wife asks divorcee because her hus-
band beat her if anything in the house
was out of place in the slightest de-
gree. Another woman wants a di-
vorce because her husband smokes too
many cigarettes. It takes all kinds of
people to make a world, especially a
matrimonial world.

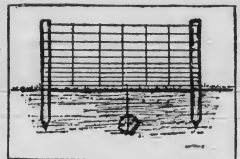

It is said that 2,800 cannons, bayonets
and lords have been killed in battle
since the European war started, but
more than 5,000,000 of the common
people have fallen, so we can't see
where democracy has made any star-
tling gains.

HOLDING DOWN WIRE FENCES

Instead of Using Stakes Iowa Man At-
taches Stone Which Is Sunk Into
the Ground.

A railroad company has paid Frank
Justice of Polk county, Iowa, more
than \$150 damages for hogs killed on
its tracks. The wire fence was strung
down time and again, but the hogs
continued to root it up and crawl un-
der it. The stakes driven to hold it
down would not stick for any length
of time, says Wallace's Farmer. Mr.
Justice told the claim agent that if
he would follow his advice in hold-
ing down the fence, that the railroad
company would be saved future dam-
ages. The advice was followed, and
since that time no hogs have got un-
der the fence.

Instead of a stake to hold down the
wire, Mr. Justice uses a stone, which
is sunk into the ground. A wire is

Holding Down Fence.

wrapped around the bottom strand of
the fence, and then around the stone.
Instead of a stone, a concrete block,
an old piece of iron, or any other
heavy weight may be used. Mr. Jus-
tice says this device will hold down a
fence till the wire rusts in two. While
it takes more time to wrap a wire
around a stone and attach it to the
bottom wire of the fence, and then
bury the stone in the ground, it is per-
manent.

MATERIAL FOR MAKING EGGS

Grit, Charcoal and Crushed Oyster or
Clam Shells Are Three Big Es-
sentials for Hens.

A poultry breeder wonders why hens
lay soft-shelled eggs. "Is it because
they are all pullets or is it a lack of
something in their feed? They have
grits before them all the time, so it
cannot come from that."

The cause of soft-shelled eggs is a
lack of lime in the feed. Unless hens
have a variety of range they must be
supplied with crushed oyster shells or
clam shells to provide material for
making shells. Even the flock on
range must in winter have these shells
provided. Grits do not answer the
purpose for providing lime for
making egg shells. The grits are for
the use of the hen in grinding her
feed.

There are three things very essen-
tial in the poultry house. They are:
1. (small stones), charcoal and
oyster or clam shells. Many
poultry keepers preserve the shells
from eggs used during the summer
and use them for the winter. These
shells are pre-browned and crushed
in a mill. Twenty-five cents of
loose crushed oyster or clam shells
will keep a dozen hens supplied with
lime for a year. Watch the laying hens
a reward often they visit the hop-
dash each of these crushed shells.

Class Day Exercises.

The Annual Class Day Exer-
cises of the Boone County High Sch-
were held in Library Hall last Fri-
day morning, in the presence of a
number of the parents of the pu-
pils and friends of the school, all
of whom were more than pleased
with the program given.

The exercises were opened by
joining in singing "America," af-
ter which Prof. Muntz made the
introductory address in which he
spoke of all the classes making a
step upward, and to illustrate this
point he had the Senior Class
make the step upward in view of
the audience. Following this was a
short speech by a representa-
tive of each class in which he or
she outlined what the class had
done during the preceding year,
and what it expected to do in the
future. The Seniors were rep-
resented by Mr. Ralph White, the
Juniors by Miss Gwendolyn Good-
ridge, and the Sophomores by
Miss Howard Acra spoke for the
Sophomore class and the coor-
dinating speech for the Freshmen
was given by Miss Kathryn Kelly.

The next number on the program
was the reading of the Class Poem
by Mr. Frank Milner. The poem
was written by Mr. Horace
Cleveland, Class Poet, and his
work shows much merit. Prince
Caywood next gave a short ad-
dress, which was enjoyed by all,
in which he emphasized the import-
ant individual responsibility which
rests upon the shoulders of each
and every pupil in regard to what
each pupil should do to make
their school bigger and better in
every way. He then went on to speak
at all times to bring new pupils to
old B. C. H. S. and to so conduct
their own school life that the local
school would be of such worth
and merit that it will appeal to all
parents as a most suitable place
of learning to which they can

DAIRY
FACTS

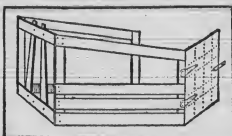

CRATES FOR SHIPPING COWS

If Animal Comes Within 1,000-Pound
Limit Make Device Strong and
Light as Possible.

In answer to a query as to the best
way of crating a cow for shipment by
express, J. Grant Morse, in Rural New
Yorker, makes the following reply:

If one is thinking of shipping a cow
by express the first thing necessary is
to weigh the cow. The express com-
panies have made a ruling that no ex-
press package (including live stock)
will be accepted that weighs over 1,000
pounds.

But, if your cow comes within the
limit, it is necessary to make your
crate as light as possible and insure
its holding her. Measure your cow
as to length from the middle of her
neck back to her tail. (Allow a little
so that she can move a little). Then
get the width of her through the
widest part. Next get the height. Cut
three pieces of 2-by-4, or other lum-
ber, for the sills the width of
the cow. Then cut the floor boards

Cow-Shipping Crate.

from inch hard pine or spruce, the
length of the cow. Nail these to the
three sills and then turn your floor
over so that the sills will be on the in-
side. This gives a smooth bottom to
the crate, and is very essential in mov-
ing it with the cow inside.

Next cut two 2-by-4's the height
of the cow for the hind posts of the
crate, and two more, six inches long-
er, for the fore posts. The fore posts
are longer for the cross pieces of the
stanchion to be nailed to. Nail the
corner posts to the bottom. Now place
a stanchion in front, which should be
of good strong material, as this alone
keeps the cow from escaping. The
back end may be boarded up after
the cow is in position.

If the cow is going far, send along a
food supply, which may be chopped
hay and grain mixed. Also send a
pail to water her, and the pail can
be used to feed her from also.

ROUGHAGE FOR DAIRY FEEDS

Dairyman Cannot Hope for Success
Unless He Pays More Attention
to Home-Grown Crops.

(Clemson College Bulletin.)

The past year has demonstrated
one thing to the satisfaction of every
man in the state who is engaged in
dairy farming, and that is that he can-
not hope for success unless he pro-
duces at least some of the roughage
needed and most of the grain feeds.
In every instance where farmers have
become discouraged with the business
the underlying cause has been the lack
of sufficient home-grown feeds. To
meet this requirement the following
feed requirement for one cow has been
worked out by the extension division
for the information of farmers during
the coming year.

One ton legume hay,
Four tons mangel or silage,
One ton sorghum.

One-half acre velvet beans and corn,
One-half acre ryegrass for winter pasture,
One acre permanent Bermuda pas-
ture.

has a ration table, will furnish suf-
ficient d for one cow for one year,
lost taxation of 200 pounds of
energy "real or soy bean-meal which
the Europe to the grain mixture,
Germany at least two months of
universal milk 700 pounds of
quivered, have d and 700 pounds
ages.

Unless the Uni be mixed with
become a low-powered cottonseed
must take steps the grain mix-
tured average to maintain it at par, S-
public.

A Good Disinfectant.

Is your poultry house, etc.,
dark barn infested with in-
sects? Do you want to have clean, at-
tractive interiors in your bu-
dings? Then try the following
mixture: Slake 5 quarts of lime
with water to form a consistency
of cream. To this add one pint
of zeolite or a coal tar product
and one pint of kerosene. Dilute
with hot water to the consistency
of brush or spray pump. The coal tar
product kills disease germs, the
kerosene destroys mites and the
lime whitens the walls.

POULTRY

LAYING QUALITIES OF HENS

American Breeds, Most Desirable for
Producing Winter Eggs, Should
Be Hatched in April.

Experience has taught that the lay-
ing qualities of any breed of fowls can
be much improved by always breeding
from the best layers as well as can
the milking qualities of cows be
brought to high standard by always
breeding from the best milkers. In
selecting your flock for winter laying
get a good bred-to-day strain of which
ever breed you choose to keep. Fowls
of the American breeds, which are per-

Silver Laced Wyandotte Hen.

haps the most desirable for producing
winter eggs, should be hatched in
April. They then will have ample
time to mature before winter sets in.
If possible the pullets should have
free range during the summer to en-
able them to grow strong and hardy
frames.

present stock must, of
course, be healthy and it is better if
they have a reputation as winter lay-
ers. Select the earlier hatched pullets
and one-year-old hens that molt
early in the season so their new feath-
ers will get ripened up by November.
This is the foundation of your winter
egg production.

RAISING PIGEONS FOR PROFIT

Unless Houses Are Comfortably Warm
It Is Not Wise to Grow Squabs
In Cold Weather.

It is not best to attempt to grow
squabs during the colder months unless
your houses are warm enough to pre-
vent the freezing of the eggs, or the
young after being hatched.

When the young are hatched during
the cold months they are very likely to
become chilled when the parent bird
leaves them for food. Once they are
chilled through, they are quite likely
not to seek a food supply, and chilled
through, they are a lost product which
cannot be regained or replaced.

"I wouldn't raise pigeons, they're too
dirty," is the complaint often made
against these beautiful birds; while, as
a matter of fact, it is far less work to
keep a pigeon loft and far free from
filth-smelling odors than a poultry house.
Step into a pigeon loft where litter has
been allowed to accumulate two or
three weeks and you will notice merely
a slight ammonia odor; but allow the

Homer Pigeon.

same condition in your poultry house
and—well, you'll fully realize that it
is time to clean up.

The color of the feathers of a pigeon
has little to do with its utility value;
but the color of its skin is of much im-
portance, as the dark-skinned squabs
are sold at a very low figure. It pays
to watch one's flock very carefully and
cull out all pairs producing such birds.

LOOK FOR RUNNING NOSES

Colds Usually Caused by Poor Ventila-
tion, Overcrowding and Drafts—
Good Cure Given.

Do your chickens have running
noses? Look at the flock as they eat
and note whether the nostrils are
clogged with dirt or show a slimy
discharge. If they do, and if the under side
of the wing is soiled, you may know
the birds have taken a slight cold,
is additions need changing.
Little flies these colds come from
so pollution; sometimes from over-
crowding and chilling up; sometimes
from drafts. Whatever is the cause,
the running noses must be cleaned
and the cause removed, or there will
be trouble with your flock.

Say! Answer Our Question!

Do You Believe in Figures? We Do. Therefore We
Wish to Show You a Few:

From May 1st, 1916, to May 1st, 1917, we have received
400,000 pounds, in round figures of milk and cream, from
which 86,975.8 pounds of butter-fat were derived for which was
paid the sum of \$29,571.11. Each month has shown a decided
increase in receipts, which means that our large list of more
than satisfied patrons is growing rapidly. What is our system?
You are paid Elgin quotations for your cream, and, in addition,
you receive absolutely correct weight and a test that is ac-
curate to the finest degree. 80 per cent. of our patrons' tests for
last year have averaged 82. They are invited to witness, person-
ally, the weighing and testing of their cream at any time they
choose. We seek at all times to advise with them as to how to
secure the best results from their product.

You receive honest and courteous treatment the year 'round
whether you ship a pint, gallon or ten gallon can. Can the
same be said of other creameries? Think it over! When your
cream is hauled you undoubtedly pay for it in some way. Why
not earn it yourself? A penny saved is a penny earned.

Do not accept our word. All we ask is a trial,
and we will convince you. If we don't—nuf ced; but
we will.

You will remain a member of our permanent patron list, any-
one of which we are more than glad to refer a prospective ship-
per to. Why? Results speak for themselves. Our patrons
know they are not only supporting a home industry which is
rapidly growing and thereby strengthening the community;
they realize the more important fact that they are securing as
good and better returns than they can elsewhere. Any
cream producer, patron or not, is welcome to an accurate test
free of charge, at any time. We have, at all times, tried to be
of material assistance to the farmers and dairymen. Their pro-
duct was handled by us during the strike of last spring, which
was the saving of many dollars to them.

We conduct business on a basis of a fair deal to all
concerned. You get all that is coming to you. No
more, no less. Any mistake at any time gladly cor-
rected. Could you ask more? You cannot realize
fullest results by handling your product at home.
Give us a chance to show you why. You will stick.

Clover Leaf Creamery,

Burlington, Kentucky.

J. O. HUEY, Manager.

J. L. FOWLER, Sec'y.

For reference we offer the word of anyone of our present
patrons. We could ask no better recommendation.

Your Protection

You not only protect your
savings, but you get paid for doing
so when you have a time deposit at
this bank.

Money that's idle means money
wasted. Put your savings to work and
watch the interest grow. We watch
both the principal and interest for you
and relieve you of all the banking wor-
ries.

GOOD PRUNING POINTS

Orchard May Be Put on Paying Basis by Proper Work.

Strive to Secure Low, Broad-Spreading Branching System, With Open Center to Admit Sunlight—Cut Limbs Close.

Farmers who wish to put their orchards in shape for profitable production should begin pruning, whenever the wood is not frozen, in midwinter. Trees in heavy-bearing condition will make stronger growth if pruning is done during late winter and early spring. Pruning during June and July will slightly check the rank growth on trees that are making too much wood growth and tend to throw them into bearing for the following year. Dr. J. C. Whitten, professor of horticulture in the Missouri College of Agriculture, gives directions for winter pruning.

Improperly Pruned Tree.

the trunk and main limbs with a tree scraper. Cut well into the rim of healthy wood on all sides of the wound, to get rid of the disease. Then paint the wound with common white lead and oil paint, to each quart of which has been added one teaspoonful of bichloride of mercury dissolved in turpentine (about one ounce). Paint all canker and pruning wounds as soon as made.

Begin at the top and prune the tree to secure a low, broad-spreading branching system, with open center, to admit sunlight and air from above. Do not remove young lower limbs if they can be given sufficient light from above. Aim to secure bearing branches throughout the main body of the tree. If the tree is shaded by too much growth at the top, the inner and lower twigs will weaken and die instead of bearing fruit.

Cut back the strong, upward-growing central limbs to outward-growing side branches. This induces the tree to spread instead of growing too high. If it admits light through the center to fruiting branches below, if limbs cross each other or crowd badly, thin them out enough to admit filtered sunlight to all parts of the tree.

In pruning cut limbs close, so as to leave no stub or knot. A protruding knot will not heal. A wound cut close will allow the growing layer to close over the wound.

Paint all wounds over one-half inch in diameter with the disinfecting paint.

MONEY IN SUNFLOWER SEEDS

In Demand in England for Manufacture of Oil—Brightens Plumage of Various Fowls.

There is a possibility that the sunflower will be included among our regular field crops and that instead of struggling for a place in the rear end of the garden it will be carefully cultivated and harvested for sake of its seed.

From England there comes the report that a big demand exists for the seed from which to manufacture oil. It has long been recognized that the plant is both hardy and productive and if a means of utilizing the seed could be discovered it would rank with the grain. Poultry keepers have set a certain value upon the seed for keeping hens in condition and brightening the plumage.

It has even been claimed that the stalks could be preserved in a silo like corn fodder and make a rich food for cattle. In neither case, however, has any wide field of usefulness been found.

FOR EXTRA EARLY POTATOES

Plan Outlined for Working Small Patch Before Danger of Spring Frosts Has Passed.

For extra early potatoes, immerse a few rows in the hill and with an inch or two of manure, cover all with four or five inches

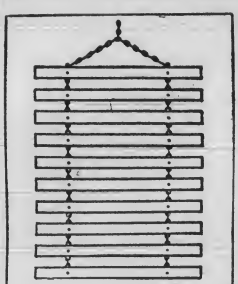

in this manner a small patch may be planted without danger before the spring frosts are past, and new potatoes will be coming on before others think of having any.

OUTLINE OF LITTER CARRIER

Device Holds Big Load and Dumps Automatically by Reversing Horse—Handy in Stable.

Here is an outline of a litter carrier sketched from the plan of the one I use. This is a very simple device, but it has more merit than one could imagine, writes J. W. Butcher of Yankton county in Dakota Farmer.

The slats are 1 by 4 inches and are bolted to the chain with 3/4 by 2-inch bolts. The first slat behind

Handy Litter Carrier.

the even is a 2 by 4 to maintain spread, and bored for the chain. A light log chain about 10 1/2 feet long is needed for a carrier this size—5 feet wide by 6 feet long.

This carrier is easy to load, will hold a big load, and dumps automatically by reversing horse, the carrier rolling until it is bottom-side up. When not in use it can be rolled up and made to occupy but little space. It is invaluable for cleaning a stable that has a wide door and level floor.

VARIETIES OF HORSE-RADISH

Maliner Kren or Bohemian Are Considered Superior—Time For Planting Is in Spring.

The best variety of horse-radish is the Maliner Kren or Bohemian. The root cuttings can be had from any of the leading seedsmen. The cuttings are made cut straight across at top and sloping at the lower end, so that it is easy to distinguish between them in planting.

The time for planting is in the earliest spring, and the early cabbage plantation is one of the best places. Punch holes in the rows midway between the cabbage plants with a crowbar and put the root cutting in perfectly straight. Then, after the cabbages are cut, the horse-radishes are cultivated through the season. An application between the rows of 150 pounds of nitrate of soda per acre will promote the rapid growth of the roots.

The crop is dug in late fall and the roots trimmed, the side roots cut properly and hauled in bundles for the winter, and the main roots put on the market. The roots are at their best at one season's growth, and will decrease in value if left longer. The main roots are sold by the ton usually.

RIGHT ROUGHAGE FOR SHEEP

Alfalfa or Clover Hay Contains Large Amounts of Protein Which Balance Carbonaceous Grains.

Sheep are ruminant animals and in the main will use the same kind of roughages that are eaten by cattle. Either alfalfa or clover hay makes the very best roughage for sheep, since they are both palatable to them and contain a relatively large amount of protein which balances the more carbonaceous grains commonly fed.

Sugar cane or sorghum and millet are both distinctly carbonaceous roughages, and if used for sheep feeding, other breeding flocks or in fattening sheep for market, must be supplemented with some concentrate rich in protein such as linseed oil or cottonseed meal.

Ordinarily either of these concentrates need not compose to exceed 10 per cent of the total grain ration. The millet is not so much in favor with sheep feeders, because of the fact that unless it is cut at exactly the right time it is liable to produce scours. A good quality of millet, however, cut early, will form a fit roughage for sheep if properly supplemented with either some additional roughage rich in protein, like alfalfa or clover, or grain rations with a protein supplement.

POISON GOPHERS AND MOLES

Best Time for Work Is in Spring and Early Summer—Use Strychnine With Utmost Care.

Spring and early summer is the best time to get rid of gophers and moles. For early spring poisoned corn is good bait. Place some of it out early in April, some more about May and a third lot a little later. Poisoned corn may be prepared by soaking for 24 hours in a solution made by dissolving strychnine in water at the rate of about one-tenth ounce to the quart.

Where the pests are unusually bad at planting time, seed corn can be treated in this way without injuring its germinating qualities, or course the planter will have to be regulated to drop this soaked corn.

Strychnine is deadly poison. It should be handled with extreme care and both the solution and the soaked corn kept out of the way of children and animals.

SEASON OF 1917.

This fine stock will make the season of 1917 at Florence Fair Grounds, Florence, Ky., from May to July 15. You are invited to examine this stock before booking your mares.

JIM WILKES,
2:17 1/4

Will make the season at \$15.00 to insure a living colt.

JIM WILKES is a mahogany bay, 15 1/2 hands high, weighs 1100 pounds, was sired by Threlkeld's Jim Wilkes; dam by Conner's Almont.

MAJOR

The Percheron Draft Stallion will make the season at \$10.00 to insure a living colt.

Major is a beautiful black, 17 hands high and weighs 1700 pounds in ordinary condition: bred by Joseph Moore, of Ottawa, Illinois.

THE FINE BREEDING JACK, MIKE

MIKE, known as the James A. Huey Jack, will make the season at \$10 to insure a living colt.

Mike is a black Jack, 15 hands high, has heavy bone, large head and ears. He was sired by Mike, known as the Riddell & Bodie Jack by Bourbon Chief.

All reasonable care will be taken to prevent accidents in handling the above stock, but we will not be responsible should any occur.

A lien will be retained on all colts until season money is paid, money due when mare is parted with or bred to other stock without our consent.

A. F. CONNER, ED MICHELS,
J. G. RENAKER, C. H. TANNER.
Phone, 116, Florence, Ky.

THE PERCHERON STALLION,

MAGNETTE

Will make the present season on Thursday Friday and Saturday of each week at my stable 1/2 mile below McVie, Boone County, Ky., and on Monday, Tuesday and Wednesday of each week from 9 a. m. to 4 p. m. at my farm near Commissary on the Burlington & Bellevue pike, and his service fee will be \$10.00 to insure a colt to stand up and suck, but if the said fee be not paid within sixty days after due it will be \$12.00.

THE FINE YOUNG JACKS, Bob Starlight and Jim.

The fine young Jack Bob Starlight, will make the season at my Stable at McVie on the same terms as those of Magnette.

The splendid Jack, Jim, will make the season at my farm near Commissary on the same terms as those of Magnette.

In handling the above stock care will be taken to prevent accidents, but I will not be responsible for any that may occur.

No business done on Sunday.

XEN SCOTT, Grant, Ky., R. D.

The Fine Belgian Stallion, Don D. Tebbes,
Leburg, Indiana.

To Farmers and Breeders

The Percheron Stallion, Prince, will make the present season at my stable on the old W. T. Winston farm on the Minneola pike, at \$10.00 to insure a live colt to stand up and suck. Care will be taken to prevent accidents but we will not be responsible should any occur.

DESCRIPTION AND PEDIGREE.
Prince is a handsome 8 year old black, with white star in forehead, weighs 1800 pounds, was foaled April 1st, 1909, owned by Joseph Moore, of Ottaway, Illinois. 1st sire: Volt, 2:23 1/4, 2nd sire: Phobius 4:00 1/4, 3rd sire: Narcissus 2:19 1/4, 4th sire: Ben Bert 3:19 1/4, dam: Fashion 4:40, grandam: Lena B 2:28 1/4, 3d dam, arising 1908, 1st dam: Pride of 84, B. "What is the annual corn crop in Kentucky?" asked a foreign tourist of a Kentuckian. "I can't exactly say," replied the Kentuckian, "but I know it is enough to make all the whisky we want besides what is wasted for bread."

Just think! 40 cents per pound for Butter fat at the Tri-State this week. No commissions—No middlemen to accommodate. The farmers most valuable product fully 10c higher than any preceding year. See the advertisement in this paper of the Tri-State Butter Co., Cincinnati, Ohio.

The Royal Order of Crabs, of Covington, had an outing last Saturday at Thos Cody's home near Erlanger. The First Ky. Regiment band furnished music for the merry makers, and Col Tom Colston delivered the address at the flag raising. Burgoo was prepared, steaks cooked and served under the direction of Mr. Cody and everybody enjoyed the occasion.

Dr. Geo. F. Smith, of Lawrenceburg, was among the Recorder's Monday callers. The doctor is a native of the Plattsburg neighborhood and his wife is a daughter of the late John H. Moody, of Bellevue, consequently Boone county people will be glad to hear of his continued success in his adopted home, where he is one of the big men influentially as well as physically.

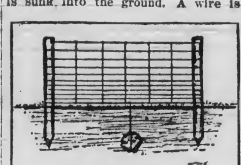

A letter received from T. J. McNeal, of Ludlow, directed the Recorder forwarded from this date on to him at Hotel Cumberland, Carlisle, Penn., to which place he and his going, who gone to make their home with their son, who is proprietor of the hotel. Mr. McNeal writes, "we realize it is a venture after spending nearly 73 years of our lives in our native State to go to a strange State to make our future home." Mr. and Mrs. McNeal leave behind many friends who wish for them a long and happy journey in their new home, and among them is the editor of the Recorder.

HOLDING DOWN WIRE FENCES

Instead of Using Stakes Iowa Man Attaches Stone Which Is Sunk into the Ground.

A railroad company has paid Frank Justice of Folk county, Iowa, more than \$150 damages for hogs killed on its tracks. The wire fence was staked down time and again, but the hogs continued to root it up and crawl under it. The stakes driven to hold it down would not stick for any length of time, says Wallace's Farmer. Mr. Justice told the claim agent that if he would follow his advice in holding down the fence, that the railroad company would be saved future damages. The advice was followed, and since that time no hogs have got under the fence.

Instead of a stake to hold down the wire, Mr. Justice uses a stone, which is sunk into the ground. A wire is

Holding Down Fence.

wrapped around the bottom strand of the fence, and then around the stone. Instead of a stone, a concrete block, an old piece of iron, or any other heavy weight may be used. Mr. Justice says this device will hold down a fence of the wire runs in two. While it takes more time to wrap a wire around a stone and attach it to the bottom wire of the fence, and then bury the stone in the ground, it is permanent.

MATERIAL FOR MAKING EGGS

Grit, Charcoal and Crushed Oyster or Clam Shells Are Three Big Es-

A poultry breeder wonders why heas lay soft-shelled eggs. "Is it because they are all pullets or is it a lack of something in their feed? They have eggs before them all the time, so it cannot come from that."

The cause of soft-shelled eggs is a lack of lime in the feed. Unless hens have a very wide range they must be supplied with crushed oyster shells or clam shells to provide material for making shells. Even the flock on range must in some way have these shells provided. Grits do not answer the purpose for providing lime for making egg shells. The grits are for the use of the hen in grinding her feed.

If there are three things very essential in the poultry house. They are: (small stones), charcoal and crushed oyster or clam shells. Many hood keepers preserve the shells burg eggs used during the summer.

Caddis are browned and crushed for use. Twenty-five cents' to look crushed oyster or clam shells in the egg average-sized flock for Experiments. Watch the laying hens Monday morning for the fact.

Mrs. Richard Stephens and son, Benjamin, have returned to their home in the Rabbit Hash neighborhood. Benjamin is a student in the Cowden House last Sunday. His mother will return again n- fall. They would be very welcome as permanent citizens of the town.

J. E. Ransom, J. C. Hume and Joseph Fisher, of Verona, and O. O. Clock, of Beaver, were callers at this office last Thursday and renewed their allegiance to the Recorder. Mr. Ransom is one of the county's substantial and progressive citizens, who, the longer he lives the younger he grows.

Mr. J. G. Crisler, of Walton, was the guest of his daughter, Mrs. J. S. Adams, from last Saturday afternoon until Monday morning. Mr. Crisler is engaged exclusively in law culture, going into it last winter with a colonias, ten of which he lost. He is afraid this will not be much of a honey year.

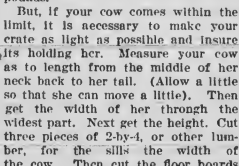

CRATES FOR SHIPPING COWS

If Animal Comes Within 1,000-Pound Limit Make Device Strong and Light as Possible.

In answer to a query as to the best way of crating a cow for shipment by express J. Grant Morse, of Rural New Yorker, makes the following reply:

If one is thinking of shipping a cow by express the first thing necessary is to weigh the cow. The express companies have made a ruling that no express package (including live stock) will be accepted that weighs over 1,000 pounds.

But, if your cow comes within the limit, it is necessary to make your crate as light as possible and insure its holding her. Measure your cow as to length from the middle of her neck back to her tail. (Allow a little so that she can move a little). Then get the width of her through the widest part. Next get the height. Cut three pieces of 2-by-4, or other lumber, for the sill the width of the cow. Then cut the floor boards

Cow-Shipping Crate.

from inch hard pine or spruce, the length of the cow. Nail these to the three sills and then turn your floor over so that the sills will be on the inside. This gives a smooth bottom to the crate, and is very essential in moving it with the cow inside.

Next cut two 2-by-4's the height of the cow for the hind posts of the crate, and two more, six inches longer, for the fore posts. The fore posts are longer for the cross pieces of the stanchion to be nailed to. Nail the corner posts to the bottom. Now place a stanchion in front, which should be of good strong material, as this alone keeps the cow from escaping. The back end may be boarded up after the cow is in position.

If the cow is going far, send along a food supply, which may be chopped hay and grain mixed. Also send a pail to water her, and the pail can be used to feed her from also.

ROUGHAGE FOR DAIRY FEEDS

Dairymen Cannot Hope for Success Unless He Pays More Attention to Home-Grown Crops.

(Clemson College Bulletin)

The past year has demonstrated one thing to the satisfaction of every man in the state who is engaged in dairy farming, and that is that he cannot hope for success unless he produces at home all of the roughage needed and most of the grain feeds.

In every instance where farmers have become discouraged with the business the underlying cause has been the lack of sufficient home-grown feeds. To meet this requirement the following feed requirement for one cow has been worked out by the extension division for the information of farmers during the coming year.

One ton legume hay, Four tons mangles or silage, One ton sorghum, One-half acre velvet beans and corn, One-half acre rye for winter pasture, tione acre permanent Bermuda pasture.

The above ration will furnish sufficient feed for one cow for one year, Capt. A. B. exception of 200 pounds of corn, will meet or say near-meal which is usually in the feed mixture.

ration. It is here of velvet beans go along way at least two months of submarine attached 700 pounds of ta is a practice pod and 700 pounds it may appear bad to be mixed with has to do with a vi and cottonseed is not in the grain mixture.

Keeping the Price a Secret

The price the Boone-co., pool wool brought has not been given out, but it is generally believed it was not below 65 cents a pound, as the Boone county wool product is classed among the best in the State by large dealers in wool.

Anticipating a Big Time

The pupils of the local High School, who will attend the Educational Tournament at Owenton, Owen county, are looking forward with much pleasure to their journey to the capital of "Sweet Owen."

FARM POULTRY

LAYING QUALITIES OF HENS

American Breeds, Most Desirable for Producing Winter Eggs, Should Be Hatched in April.

Experience has taught that the laying qualities of any breed of fowls can be much improved by always breeding from the best layers as well as can the milking qualities of cows be brought to high standard by always breeding from the best milkers. In selecting your flock for winter laying get a good bred-to-lay strain of which ever breed you choose to keep. Fowls of the American breeds, which are per-

haps the most desirable for producing winter eggs, should be hatched in April. They then will have ample time to mature before winter sets in. If possible the pullets should have free range during the summer to enable them to grow strong and hardy frames. The parent stock must, of course, be healthy and it is better if they have a reputation as winter layers. Select the earlier hatched pullets and one-year-old hens that molt early in the season so their new feathers will get ripened up by November. This is the foundation of your winter egg production.

Silver Laced Wyandotte Hen.

RAISING PIGEONS FOR PROFIT

Unless Houses Are Comfortably Warm It Is Not Wise to Grow Squabs in Cold Weather.

It is not best to attempt to grow squabs during the colder months unless your houses are warm enough to prevent the freezing of the eggs, or the young after being hatched.

When the young are hatched during the cold months they are very likely to become chilled when the parent bird leaves them for food. Once they are chilled through, they are quite likely not to seek a food supply, and chilled through, they are a lost product which cannot be regained or replaced.

"I wouldn't raise pigeons, they're too dirty," is the complaint often made against these beautiful birds; while, as a matter of fact, it is far less trouble to keep a pigeon loft and fly free from ill-smelling odors than a poultry house. Step into a pigeon loft where litter has been allowed to accumulate two or three weeks and you will notice merely a slight ammonia odor; but allow the

LOOK FOR RUNNING NOSES

Colds Usually Caused by Poor Ventilation, Overcrowding and Drafts—Good Cure Given.

Do your chickens have running noses? Look at the flock as they eat and note whether the nostrils are clogged with dirt or show a slimy ooze. If they do, and if the under side of the wing is soiled, you may know if the birds have taken a slight cold. If conditions need changing, you sometimes these colds come from 708 ventilation; sometimes from over-olts, filth and piling up; sometimes from drafts. Whatever is the cause, losing running noses must be cleaned if the cause removed, or there will be constant trouble with cough, Birkbe and colds.

The sixteenth month of penmanship in the State and dissolve in a bucket of water. The little fellow who is a stock soldier but patient and steady a run tint, have the sympathy of the

Say! Answer Our Question!

Do You Believe in Figures? We Do. Therefore We

Wish to Show You a Few:

From May 1st, 1916, to May 1st, 1917, we have received 400,000 pounds, in round figures of milk and cream, from which 86,975.8 pounds of butter-fat were derived for which was paid the sum of \$29,571.11. Each month has shown a decided increase in receipts, which means that our large list of more than satisfied patrons is growing rapidly. What is our system? You are paid Elgin quotations for your cream, and, in addition, you receive absolutely correct weights and a test that is accurate to the finest degree. 80 per cent. of our patrons' tests for last year have averaged 82. They are invited to witness, personally, the weighing and testing of their cream at any time they choose. We seek at all times to advise with them as to how to secure the best results from their product.

You receive honest and courteous treatment the year 'round whether you ship a pint, gallon or ten gallon can. Can the same be said of other creameries? Think it over! When your cream is hauled you undoubtedly pay for it in some way. Why not earn it yourself? A penny saved is a penny earned.

Do not accept our word. All we ask is a trial, and we will convince you. If we don't—nuf ced; but we will.

You will remain a member of our permanent patron list, any one of which we are more than glad to refer a prospective shipper to. Why? Results speak for themselves. Our patrons know they are not only supporting a home industry which is rapidly growing and thereby strengthening the community; they realize the more important fact that they are securing as good as better returns than they can elsewhere. Any cream producer, patron or not, is welcome to an accurate test free of charge, at any time. We have, at all times, tried to be of material assistance to the farmers and dairymen. Their product was handled by us during the like of last spring, which was the saving of many dollars to them.

We conduct business on a basis of a fair deal to all concerned. You get all that is coming to you. No more, no less. Any mistake at any time gladly corrected. Could you ask more? You cannot realize fullest results by handling your product at home. Give us a chance to show you why. You will stick.

Clover Leaf Creamery, Burlington, Kentucky.

J. O. HUEY, Manager. J. L. FOWLER, Sect'y.

For reference we offer the word of anyone of our present patrons. We could ask no better recommendation.

Your Protection

You not only protect your savings, but you get paid for doing so when you have a time deposit at this bank.

Money that's idle means money wasted. Put your savings to work and watch the interest grow. We watch both the principal and interest for you and relieve you of all the banking worries.

GOOD PRUNING POINTS

Orchard May Be Put on Paying Basis by Proper Work.

Strive to Secure Low, Broad-Spreading Branching System, With Open Center to Admit Sunlight—Cut Limbs Close.

Farmers who wish to put their orchards in shape for profitable production should begin pruning, whenever the wood is not frozen, in midwinter. Trees in heavy-bearing condition will make stronger growth if pruning is done during late winter and early spring. Pruning during June and July will slightly check the rank growth on trees that are making too much wood growth and tend to throw them into bearing for the following year. Dr. J. C. Whitton, professor of horticulture in the Missouri College of Agriculture, gives directions for winter pruning.

Remove all dead or badly diseased limbs. Clean out all canker wounds on

Improperly Pruned Tree.

the trunk and main limbs with a tree scraper. Cut well into the rim of healthy wood on all sides of the wound, to get rid of the disease. Then paint the wound with common white lead and oil paint, to each quart of which has been added one teaspoonful of bl- chloride of mercury dissolved in turpentine (about one ounce). Paint all canker and pruning wounds as soon as made.

Begin at the top and prune the tree to secure a low, broad-spreading branching system, with open center, to admit sunlight and air from above. Do not remove strong lower limbs if they can be given sufficient light from above. Aim to secure bearing branches throughout the main body of the tree. If the tree is shaded by too much growth at the top, the inner and lower twigs will weaken and die instead of bearing fruit.

Cut back the strong, upward-growing central limbs to outward-growing side branches. This induces the tree to spread laterally instead of growing too high. It admits light through the center to fruiting branches below. If limbs cross each other or crowd badly, thin them out enough to admit filtered sunlight to all parts of the tree.

In pruning cut limbs close, so as to leave no stub or knot. A protruding knot will not heal. A wound cut close will allow the growing layer to close over the wound.

Paint all wounds over one-half inch in diameter with the disinfecting paint.

MONEY IN SUNFLOWER SEEDS

In Demand in England for Manufacture of Oil—Brightens Plumage of Various Fowls.

There is a possibility that the sunflower will be included among our regular field crops and that instead of struggling for a place in the rear end of the garden it will be carefully cultivated and harvested for sake of its seed.

From England there comes the report that a big demand exists for the seed from which to manufacture oil. It has long been recognized that the plant is both hardy and productive and if a means of utilizing the seed could be discovered it would take rank with the grain. Poultry keepers have set a certain value upon the seed for keeping hens in condition and brightening the plumage.

It has even been claimed that the stalks could be preserved in a silo like corn fodder and make a rich food for cattle. In neither case, however, has any wide field of usefulness been found.

FOR EXTRA EARLY POTATOES

Plan Outlined for Working Small Patch Before Danger of Spring Frosts Has Passed.

Extra early potatoes, numerous varieties, few weeks in the hill and with an inch or two of manure, will be ready to dig in five or six weeks.

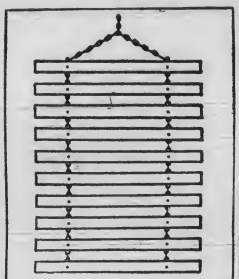

In this manner a small patch may be planted without danger before the spring frosts are past, and new potatoes will be coming on before others think of having any.

OUTLINE OF LITTER CARRIER

Device Holds Big Load and Dumps Automatically by Reversing Horse—Handy in Stable.

Here is an outline of a litter carrier sketched from the plan of the one I use. This is a very simple device, but it has more merit than one could imagine, writes J. W. Butcher of Yankton county in Dakota Farmer.

The slats are 1 by 4 inches and are bolted to the chain with 3/4 by 2-inch bolts. The first slat behind

Handy Litter Carrier.

the even is a 2 by 4 to maintain spread, and bored for the chain. A light log chain about 10 1/2 feet long is needed for a carrier this size—3 feet wide by 6 feet long.

This carrier is easy to load, will hold a big load, and dumps automatically by reversing horse, the carrier rolling until it is bottom-side up. When not in use it can be rolled up and made to occupy but little space. It is invaluable for cleaning a stable that has a wide door and level floor.

VARIETIES OF HORSE-RADISH

Maliner Kren or Bohemian Are Considered Superior—Time For Planting Is In Spring.

The best variety of horse-radish is the Maliner Kren or Bohemian. The root cuttings can be had from any of the leading seedsmen. The cuttings are made cut straight across at top and sloping at the lower end, so that it is easy to distinguish between them in planting.

The time for planting is in the earliest spring, and the early cabbage plantation is one of the best places. Punch holes in the rows midway between the cabbage plants with a crowbar and put the root cutting in perfectly straight. Then, after the cabbages are cut, the horse-radishes are cultivated through the season. An application between the rows of 150 pounds of sulfate of soda per acre will promote the rapid growth of the roots.

The crop is dug in late fall and the roots trimmed, the bundles cut properly and buried in sand for the winter, and the main roots put on the market. The roots are at their best at one season's growth, and will decrease in value if left longer. The main roots are sold by the ton usually.

RIGHT ROUGHAGE FOR SHEEP

Alfalfa or Clover Hay Contains Large Amounts of Protein Which Balance Carbonaceous Grains.

Sheep are ruminant animals and in the main will use the same kind of roughages that are eaten by cattle. Either alfalfa or clover hay makes the very best roughage for sheep, since they are both palatable to them and contain a relatively large amount of protein which balances the more carbonaceous grains commonly fed.

Sugar cane or sorghum and millet are both distinctly carbonaceous roughages, and if used for sheep feeding, either breeding flocks or in fattening sheep for market, must be supplemented with some concentrate rich in protein such as linseed oil or cottonseed meal.

Ordinarily either of these concentrates need not compose to exceed 10 per cent of the total grain ration. The millet is not so much in favor with sheep feeders, because of the fact that unless it is cut at exactly the right time it is liable to produce scours. A good quality of millet, however, cut early, will form a fit roughage for sheep if properly supplemented with either some additional roughage rich in protein, like alfalfa or clover, or grain rations with a protein supplement.

POISON GOPHERS AND MOLES

Best Time for Work Is in Spring and Early Summer—Use Strichnine With Utmost Care.

Spring and early summer is the best time to get rid of gophers and moles. For early spring poisoned corn is good bait. Place some of it out early in April, some more about May and a third lot a little later. Poisoned corn may be prepared by soaking for 21 hours in a solution made by dissolving strichnine in water at the rate of about one-tenth ounce to the quart.

Where the pests are unusually bad at planting time, seed corn can be treated in this way without injuring its germinating qualities. Of course the planter will have to be regulated to drop this soaked corn.

Strichnine is deadly poison. It should be handled with extreme care and both the solution and the soaked corn kept out of the way of children and animals.

This fine stock will make the season of 1917 at Florence Fair Grounds, Florence, Ky., from May to July 15. You are invited to examine this stock before booking your mares.

MAJOR

The Percheron Draft Stallion will make the season at \$10.00 to insure a living colt.

Major is a beautiful black, 17 hands high and weighs 1700 pounds in ordinary condition: bred by Joseph Moore, of Ottawa, Illinois.

THE FINE BREEDING JACK, MIKE

MIKE, known as the James A. Huey Jack, will make the season at \$10 to insure a living colt.

Mike is a black Jack, 15 hands high, has heavy bone, large head and ears. He was sired by Mike, known as the Riddell & Bodie Jack by Bourbon Chief.

All reasonable care will be taken to prevent accidents in handling the above stock, but we will not be responsible should any occur.

A lien will be retained on all colts until season money is paid, money due when mare is parted with or bred to other stock without our consent.

A. F. CONNER, ED MICHELS,
J. G. RENAKER, C. H. TANNER.
Phone, 116, Florence, Ky.

THE PERCHERON STALLION,

MAGNETTE

Will make the present season on Thursday Friday and Saturday of each week at my stable 1/2 mile below McVie, Boone County, Ky., and on Monday, Tuesday and Wednesday of each week from 9 a. m. to 4 p. m. at my farm near Commissary on the Burlington & Bellevue pike, and his service fee will be \$10.00 to insure a colt to stand up and suck, but if the said fee be not paid within sixty days after due it will be \$12.00.

THE FINE YOUNG JACKS, Bob Starlight and Jim.

The fine young Jack Bob Starlight, will make the season at my stable at McVie on the same terms as those of Magnette. The splendid Jack, Jim, will make the season at my farm near Commissary on the same terms as those of Magnette.

In handling the above stock care will be taken to prevent accidents, but I will not be responsible for any that may occur. No business done on Sunday.

XEN SCOTT, Grant, Ky., R. D.

To Farmers and Breeders

The Percheron Stallion, Prince, will make the present season at my stable on the old W. T. Winston farm on the Minerva pike, at \$10.00 to insure a live colt to stand up and suck. Care will be taken to prevent accidents but we will not be responsible should any occur.

DESCRIPTION AND PEDIGREE. Prince is a handsome 8 year old black, with white star in forehead. Weighs 1600 pounds, was foaled April 1909, owned by Joseph Moore, of Tawney, Illinois. 1st sire: Vol. 2nd sire: Phobus 3rd sire: Nureiss 4th sire: Bori 5th sire: Danit 6th sire: Lema 7th sire: Pride of Shen 8th sire: B. J. A. EDWARD Moore.

University of Pennsylvania. I have just translated a wrong book and found it to be a barrel of dung. It is to support and privilege those points on the other barrel, the client of the University of Labor.

Most Excellent in Rating of Laying Hens in Winter—Job of Sprouting Is Not Difficult.

Sprouted oats are excellent feed for hens in the winter time. It matters not how long the sprouts get. The longer they get the more green food they furnish. They are easily arranged in the house in pens or in a large flat box that can be placed over the range by hanging it from the ceiling.

The Fine Belgian Stallion,

Don

Belgian Drafts slopped over un- present scathoroughly wet; the a half mile a dry place to sleep colt to stay go lame as a natur- when e's, their owners wonder with e's has attacked them.

Require a dry bed. They can ap' good deal of cold, and some q' as to food, but dryness at night must have if they are to thrive, no other cause of lameness in ducks is careles handling. Do not pick up the neck by the legs. Grasp it by the neck if you would avoid lameness.

MAN WANTED. Good farm hand, married man, house, garden and pasture for cow or horse furnished.

SUNFLOWER SEED USE

Given Count as Poultry Feed by Professor Lippincott.

Its Good for Molting Period, but Not Practicable at Other Times on Average Farm—Too Much Fiber and Too Expensive.

Sunflower seed because of its cost and high fiber content is not so desirable a poultry feed as is generally supposed, according to W. A. Lippincott, professor of poultry husbandry in the Kansas State Agricultural college.

"In the first place it is too expensive," says Professor Lippincott, "and then, too, it contains a large amount of crude fiber. It is a good feed, however, for the molting period. The oil seems to aid in giving gloss to the feathers. Protein is essential to feather growth and the sunflower is rich in protein.

Birds for Show Purposes.

"Sunflower seed is used by poultry men when they are preparing birds for show purposes as the feed apparently gives the bird a better appearance. Showmen use the seed extensively as feed but it is not practical for the farmer unless the seed can be bought much cheaper than the ordinary market price."

Oats are better feed for chickens than sunflower seed, in the opinion of Mr. Lippincott. Sunflower seeds have approximately 21 per cent fat content and 30 per cent fiber content, while oats have 42 per cent fat content and only 10.8 per cent fiber content. It is not wise to use oats as a feed for chickens too extensively because the digestive apparatus of the fowls is not designed to handle such a large amount of crude fiber.

Best Fiber Content.

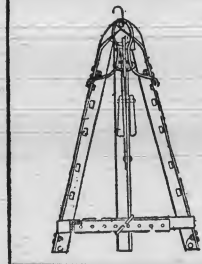

The best fiber content in a ration for fowls is approximately 3.5 per cent. Too much fiber upsets the bird. If some feeds, low in fiber, are used in combination with feeds high in fiber, the content is brought down to about the required amount.

Meat scraps and milk are the only common poultry feeds having absolutely no crude fiber. Broken rice has but 2 per cent, gluten meal 2 per cent, corn 2.2 per cent, and kafir 2 per cent.

FAVOR ANGLE IRON HARROWS

Teeth Carrying Bars Are Pivotal Connected at Their Front End in V-Shaped Implement.

Angle iron harrows are giving such general satisfaction in the farming business that the number of patents on this type of soil pulverizer and weed killer is growing larger every year. This one was recently patented by a Georgia man. The harrow teeth carrying bars are pivotally connected at their front end in a V-shaped implement, means being provided for detachably securing teeth. Adjustable

Angle Iron Harrow.

teeth, carrying bars at the rear and at right angles to the central brace that bisects the V-shaped main part, hold the main bars in variously adjusted positions.—Farming Business.

EXERCISE FOR YOUNG CHICKS

Cool Room Is Better Than Warm One for This Purpose—Avoid Leg Weakness by Giving Bone.

Early hatched chicks should be given plenty of room in which to exercise. A cool or slightly cold room is better than a warm one for this purpose. It hardens the chick and there is little danger from chilling if properly handled. As soon as the youngsters get cold they will run back under the hovers and warm up, then run out again to work in the fresh air. Brooding in a cold room produces stronger chicks, with better appetites.

Indoor chicks should be allowed access at all times to dried bone, small size. They need this to maintain strength in the legs; otherwise, when closely housed, leg weakness results. Fresh, green-cut bone fed in limited quantities once per day will ward off this trouble.

SWEET CORN STOVER SILAGE

Has Feeding Value Comparable With Ordinary Corn Stover—Desirable Dairy Ration.

Sweet corn stover in the field, that is, the fodder without the grain, has a feeding value comparable with ordinary corn stover.

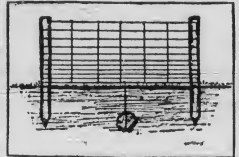

The silage which may be made from it while a very palatable and a desirable addition to the dairy ration, has a lower feeding value than corn silage or pro-silage.

HOLDING DOWN WIRE FENCES

Instead of Using Stakes Iowa Man Attaches Stone Which Is Sunk into the Ground.

A railroad company has paid Frank Justice of Polk county, Iowa, more than \$100 damages for hogs killed on its tracks. The wire fence was strung down time and again, but the hogs continued to root it up and crawl under it. The stakes driven to hold it down would not stick for any length of time, says Wallace's Farmer. Mr. Justice told the claim agent that if he would follow his advice in holding down the fence, that the railroad company would be saved future damages. The advice was followed, and since that time no hogs have got under the fence.

Instead of a stake to hold down the wire, Mr. Justice uses a stone, which is sunk into the ground. A wire is

Holding Down Fence.

wrapped around the bottom strand of the fence, and then the stone, instead of a stake, a concrete block, an old piece of iron, or any other heavy weight may be used. Mr. Justice says this device will hold down a fence till the wire rusts in two. While it takes more time to wrap a wire around a stone and attach it to the bottom wire of the fence, and then bury the stone in the ground, it is permanent.

MATERIAL FOR MAKING EGGS

Grit, Charcoal and Crushed Oyster or Clam Shells Are Three Big Essentials.

A poultry breeder wonders why hens lay soft-shelled eggs. "Is it because they are all pullets or is it a lack of something in their feed?" They have grits before them all the time, so it cannot come from that."

The cause of soft-shelled eggs is a lack of lime in the feed. Unless hens have a very wide range they must be supplied with crushed oyster shells or clam shells to provide material for making shells. Even the flock-on-range must in winter have these shells provided. Grits do not answer the purpose for providing lime for making egg shells. The grits are for the use of the hen in grinding her feed.

There are three things very essential in the poultry house. They are: Grits (small stones), charcoal and crushed oyster or clam shells. Many poultry keepers preserve the shells from eggs used during the summer and these are browned and crushed for winter use. Twenty-five cents' worth of crushed oyster or clam shells will last an average-sized flock for many weeks. Watch the laying hens and note how often they visit the hopper containing these crushed shells.

COLD FRAMES VERY POPULAR

Being Used More Extensively in Various Parts of Country Than Formerly—Use Fine Soil.

Frames are used much more largely in all parts of the country than a few years ago, notwithstanding the fact that greenhouse construction has been more active. A great many gardeners have realized that it pays to grow some vegetables under 5 by 8-foot sash. This makes it a good business proposition, and when frames are used on a large scale too much care cannot be exercised in the preparation of the soil. It should be fine, fairly level and contain liberal amounts of sand and humus. If it is to be used in the summer the cross-bar hoes or horse cultivators can be used without difficulty, running from end to end of the long frames. The sash should fit snugly on the side boards, so that as little cold as possible will be admitted under the sash. Lettuce and radish are especially desirable for frame culture.

BEST GRADES OF FERTILIZER

Much Higher Than Last Year and Farmers Are Using More Lime and Taking Care of Manure.

The best grades of fertilizers are much higher than last year. Farmers are using more lime and taking better care of the manure. For heavy old-ground plowed in the fall, a dressing of 60 bushels of air-slacked lime per acre is the average dressing favored by farmers. The lime is spread as soon as air-slacked, and then harrowed in.

FIELDS UNSUITED FOR CORN

Early Spring Plowing Is Advisable Under Many Conditions—Avoid Clogs, Weeds or Grass.

Corn should never be planted in a cloudy field or in one where a nice growth of weeds or grass is already either started or ready to start. Early spring plowing is certainly advisable under a great many conditions. Some soils must be worked down with the disk or harrow, and on some the pucker should be used before the planting season.

DAIRY FACTS

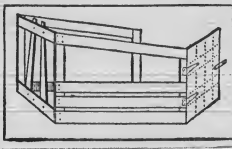

CRATES FOR SHIPPING COWS

If Animal Comes Within 1,000-Pound Limit Make Device Strong and Light as Possible.

In answer to a query as to the best way of crating a cow for shipment by express J. Grant Morse, of Rural New Yorker, makes the following reply:

If one is thinking of shipping a cow by express the first thing necessary is to weigh the cow. The express companies have made a ruling that no express package (including live stock) will be accepted that weighs over 1,000 pounds.

But, if your cow comes within the limit, it is necessary to make your crate as light as possible and insure its holding her. Measure your cow as to length from the middle of her neck back to her tail. (Allow a little so that she can move a little). Then get the width of her through the widest part. Next get the height. Cut three pieces of 2-by-4, or other lumber, for the sills the width of the cow. Then cut the floor boards

Cow-Shipping Crate.

from inch hard pine or spruce, the length of the cow. Nail these to the three sills and then turn your floor over so that the sills will be on the inside. This gives a smooth bottom to the crate, and is very essential in moving it with the cow inside.

Next cut two 2-by-4's the height of the cow for the hind posts of the crate, and two more, six inches longer, for the fore posts. The fore posts are long for the cross pieces of the stanchion to be nailed to. Nail the corner posts to the bottom. Now place a stanchion in front, which should be of good strong material, as this alone keeps the cow from escaping. The back end may be boarded up after the cow is in position.

If the cow is going far, send along a food supply, which may be chopped hay and grain mixed. Also send a pail to water her, and the pail can be used to feed her from also.

ROUGHAGE FOR DAIRY FEEDS

Dairyman Cannot Hope for Success Unless He Pays More Attention to Home-Grown Crops.

(Clemson College Bulletin.) The past year has demonstrated one thing to the satisfaction of every man in the state who is engaged in dairy farming, and that is that he cannot hope for success unless he produces at home all of the roughage needed and most of the grain feeds. In every instance where farmers have become discouraged with the business the underlying cause has been the lack of sufficient home-grown feeds. To meet this requirement the following feed requirement for one cow has been worked out by the extension division for the information of farmers during the coming year.

One ton legume hay.
Four tons mangel or silage.
One ton sorghum.
One-half acre velvet beans and corn.
One-half acre rye for winter pasture.
One acre permanent Bermuda pasture.

The above ration will furnish sufficient feed for one cow for one year, with the exception of 200 pounds of cottonseed meal or soy bean meal which should be added to the grain mixture. The one-half acre of velvet beans should furnish at least two months of winter grazing, besides 700 pounds of velvet beans in the pod and 700 pounds of corn and cob meal to be mixed with the velvet bean meal and cottonseed or soy bean meal for the grain mixture.

FLIES CARRY DISEASE GERMS

Most Practical Plan to Keep Pests Out of Barn and Milk Room—Don't Let Manure Accumulate.

Keep flies out of the barn and milk room. One fly may carry as many as 150,000 germs to the milk. They may be disease germs.

Manure should not be allowed to accumulate around the barn—it is a breeding place for flies.

FEED GRAIN TO YOUNG CALF

No More Should Be Given Than Will Be Eaten Up Clean Twice a Day, About Half-Pound.

After a calf begins to eat considerable grain should not be kept in a feed lot. No more should be given than will be eaten up twice each day which will not be over one-half pound daily for the first two months.

FARM POULTRY

LAYING QUALITIES OF HENS

American Breeds, Most Desirable for Producing Winter Eggs, Should Be Hatched in April.

Experience has taught that the laying qualities of any breed of fowls can be much improved by always breeding from the best layers as well as can the milking qualities of cows be brought to high standard by always breeding from the best milkers. In selecting your flock for winter laying get a good bred-to-lay strain of which ever breed you choose to keep. Fowls of the American breeds, which are per-

Silver Laced Wyandotte Hen.

haps the most desirable for producing winter eggs, should be hatched in April. They then will have ample time to mature before winter sets in. If possible the pullets should have free range during the summer to enable them to grow strong and hardy frames. They will be healthy and it is better if they have a reputation as winter layers. Select the earlier hatched pullets and one-year-old hens that molt early in the season so their new feathers will get ripened up by November. This is the foundation of your winter egg production.

RAISING PIGEONS FOR PROFIT

Unless Houses Are Comfortably Warm It Is Not Wise to Grow Squabs in Cold Weather.

It is not best to attempt to grow squabs during the colder months unless your houses are warm enough to prevent the freezing of the eggs, or the young after being hatched.

When the young are hatched during the cold months they are very likely to become chilled when the parent bird leaves them for food. Once they are chilled through, they are quite likely not to seek a food supply, and chilled through, they are a lost product which cannot be regained or replaced.

"I wouldn't raise pigeons, they're too dirty," is the complaint often made against these beautiful birds; while, as a matter of fact, it is far less work to keep a pigeon loft and fly free from ill-smelling odors than a poultry house. Step into a pigeon loft where litter has been allowed to accumulate two or three weeks and you will notice merely a slight ammonia odor; but allow the

Homer Pigeon.

same condition in your poultry house and—well, you'll fully realize that it is time to clean up.

The color of the feathers of a pigeon has little to do with its utility value; but the color of its skin is of much importance, as the dark-skinned squabs are sold at a very low figure. It pays to watch one's flock very carefully and cull out all pairs producing such birds.

LOOK FOR RUNNING NOSES

Colds Usually Caused by Poor Ventilation, Overcrowding and Drafts—Good Cure Given.

Do your chickens have running noses? Look at the flock as they eat and note whether the nostrils are clogged with dirt or show a slimy ooze. If they do, and if the under side of the wing is soiled, you may know that the birds have taken a slight cold, and conditions need changing.

Sometimes these colds come from poor ventilation; sometimes from overcrowding and chilling up; sometimes from drafts. Whatever is the cause, these running noses must be cleaned up and the cause removed, or they will be constant trouble with foul and empty crops.

Get a dish a worth of permanganate of potash crystals and dissolve in a pint of bottled water for a stock solution, using enough each day to color all the drinking water, a tea-spoon

Say! Answer Our Question!

Do You Believe in Figures? We Do. Therefore We

Wish to Show You a Few:

From May 1st, 1916, to May 1st, 1917, we have received 400,000 pounds, in round figures of milk and cream, from which 86,975.8 pounds of butter-fat were derived for which was paid the sum of \$29,571.11. Each month has shown a decided increase in receipts, which means that our large list of more than satisfied patrons is growing rapidly. What is our system? You are paid Elgin quotations for your cream, and, in addition, you receive absolutely correct weight and a test that is accurate to the finest degree. 80 per cent. of our patrons' tests for last year have averaged 82. They are invited to witness, personally, the weighing and testing of their cream at any time they choose. We seek at all times to advise with them as to how to secure the best results from their product.

You receive honest and courteous treatment the year round whether you ship a pint, gallon or ten gallon can. Can the same be said of other creameries? Think it over! When your cream is hauled you undoubtedly pay for it in some way. Why not earn it yourself? A penny saved is a penny earned.

Do not accept our word. All we ask is a trial, and we will convince you. If we don't—nuf ced; but we will.

You will remain a member of our permanent patron list, any one of which we are more than glad to refer a prospective shipper to. Why? Results speak for themselves. Our patrons know they are not only supporting a home industry which is rapidly growing and thereby strengthening the community; they realize the more important fact that they are securing as good and better returns than they can elsewhere. Any cream producer, patron or not, is welcome to an accurate test free of charge, at any time. We have, at all times, tried to be of material assistance to the farmers and dairymen. Their product was handled by us during the strike of last spring, which was the saving of many dollars to them.

We conduct business on a basis of a fair deal to all concerned. You get all that is coming to you. No more, no less. Any mistake at any time gladly corrected. Could you ask more? You cannot realize fullest results by handling your product at home. Give us a chance to show you why. You will stick.

Clover Leaf Creamery,

Burlington, Kentucky.

J. O. HUEY, Manager.

J. L. FOWLER, Sec'y.

For reference we offer the word of anyone of our present patrons. We could ask no better recommendation.

Your Protection

You not only protect your savings, but you get paid for doing so when you have a time deposit at this bank.

Money that's idle means money wasted. Put your savings to work and watch the interest grow. We watch both the principal and interest for you and relieve you of all the banking worries.

L. A. CONNER, of Burlington precinct, is a Democratic candidate for Sheriff of Boone county, subject to the action of the Democratic party at the primary election Saturday, August 4th, 1917.

B. L. CLEEK, of Union precinct, is a Democratic candidate for Sheriff of Boone county, subject to the action of the Democratic party at the primary election, August 4th, 1917. Menter Martin to be his deputy if he is elected.

For Assessor.

HARRY W. RILEY of Union precinct, is a Democratic candidate for Assessor of Boone county, subject to the action of the Democratic party at the primary election, August 4th, 1917.

J. S. CASON, of Walton precinct, is a Democratic candidate for Assessor of Boone county, subject to the action of the Democratic party at the primary election, August 4th, 1917.

BOONE F. ROGERS of Bellevue precinct, is a Democratic candidate for Assessor of Boone county, subject to the action of the Democratic party at the primary election August 4th, 1917.

For Superintendent.

J. C. GORDON, of Walton precinct, is a Democratic candidate for Superintendent of Schools in Boone county, subject to the action of the Democratic party at the primary election Saturday, August 4th, 1917.

For Representative.

W. P. CROPPER, of Bullittsville precinct, is a candidate for the Democratic nomination for reelection to the office of County Representative in the next General Assembly of Kentucky, subject to the action of the Democratic party in Boone county at the primary election, Saturday, August 4, 1917.

For Jailor.

CHAS. A. FOWLER, of Burlington, is a candidate for Jailor of Boone county, subject to the action of the Democratic party at the primary election Saturday, August 4th, 1917.

For County Clerk.

W. R. ROGERS is a candidate for reelection to the office of Clerk of the Boone County Court, subject to the action of the Democratic party at the primary election, August 4th, 1917.

W. F. BRADFORD, of Florence precinct, is a candidate for clerk of the Boone County Court, subject to the action of the Democratic party at the primary election August 4th, 1917.

Strawberries Galore

The strawberry growers of Warren county, who have marshaled an army of 15,000 pickers, in readiness for a crop expressed in train loads, are rejoicing in the arrival of belated sunshine, like the carolling birds who had feared the fate of their fledglings under gray skies and during a succession of chilly days. While the crimson tide of slaughter surges in embattled Europe the crimson tide of plenty will flow northward from the loamy Kingdom of Warren, which might be called, with analogies to Senator "Joe" Blackburn for the paraphrase, the strawberry patch of the garden spot of the world. Locomotives soon will be trembling with suppressed steam, and with suppressed excitement, upon the banks of the shimmering Barren, ready to play their part in conveying to the consumer in Chicago the Kentucky strawberry in its rarest perfection, retaining the purity and freshness of the dew distilled by the peculiar fragrance which humiliates the rose and discourages the Cape Jessamine, and the flavor which makes Oliver avert for more.—C. J.

The following young people will graduate June 1 from Erlanger High School: Misses Katherine Wagner, Ardenne Terrill, Louis Sanders, Russell Ransom, Josephine Bird, Ada Young and Mr. Orville Riggs. The baccalaureate sermon will be delivered next Sunday night by Rev. J. N. Irvin.

The RECORDER is in receipt of a poem entitled "The Flag We Love," by Joseph Reed, of Walton, which he will have set to music. It bids fair to become very popular, as it is a warning to the Kaiser.

Walker Gaines, colored, dug out a den of five ground hogs in his garden one day last week. He does not think this locality will be annoyed with ground hog weather next spring.

Prof. Caywood will remain in Burlington during the greater part of his vacation, taking recreation in the garden he is cultivating.

County Road Engineer Chas. W. Goodridge has a force of hands at work repairing the Burlington and Petersburg pike.

Robt. Strouse has a cuf button he found on the street in Burlington, and he now desires to find its owner.

Jesse Jones, of Walton, is plastering Mr. Bucher's new building out on the Bellevue pike.

There has been no change for the better in the condition of J. C. Revill for many weeks.

A big picnic for the afternoon of Saturday, June 1, is advertised in this issue.

The maple trees about town have shed a considerable crop of seed.

Gossip of the Press.

Mr. Hoover says wheat may go to \$5 a bushel. Say, wouldn't it be better to keep wheat in the class of food products instead of transferring it to the jewelry class?—Houston Post.

The German Crown Prince is 35 years old. If he manages to keep out of danger in the future as he has in the past, he may live to see the end of the war.—Detroit Free Press.

Correspondent objects to any one throwing cold water on Col. Roosevelt's patriotism. Don't worry. As soon as ice water hits the Colonel it boils.—New York Telegram.

It is understood that Secretary Baker is taking steps to prevent the army from descending to the low plane of Washington's scalliwags at Valley Forge.—Boston Transcript.

Bryan is addressing the prisoners in the penitentiaries out West. Has it come to the point where he does not care to trust himself to draw an audience?—Indianapolis Star.

There's one subject on which Marshal Joffre is discreetly silent. He won't say what he thinks about the way Americans pronounce his name.—Charleston News and Courier.

A Berlin committee is offering a prize for a new national anthem, as the present one "is not stirring enough." Oh, is that what the trouble on the west front?—Indianapolis Star.

Reports from Washington make it distinctly clear that there is a decided objection to any tax that can be passed on to the consumer.—Indianapolis News.

The Russian situation is so critical that there is almost as much confusion and ineptness in Petrograd now as there is in Washington.—Boston Transcript.

Colonel Roosevelt continued his grins on the West Front last week. He is now as far as the White House.—St. Louis Post-Dispatch.

It is hard to say whether Russia wants peace or not. It is hard to say whether she is fighting for something.—Memphis Commercial Appeal.

"The Kaiser must follow the Czar," says the Philadelphia Inquirer. "Must" is very good, but when?—Birmingham Age-Herald.

The question is whether there will be any peace movement when the Roof commission reaches Petrograd.—Pittsburgh Dispatch.

President Wilson is determined to speed up Congress. Fine! There's no speed limit, Mr. President.—New York Sun.

If the Russian strikers do not get on their feet, the government will get it from the Kaiser.—St. Louis Republic.

Congress is working fearfully hard—that is to say, the tongue of the members are.—Charleston News and Courier.

Roosevelt wants to make himself useful, and he is about to open a way to do it.—Knoxville Journal.

Why Bernstein should desire to be Chancellor of Germany at this time is beyond us.—St. Louis Republic.

The Colonel is willing to fight but he wants some trenches of his own to fight in.—Houston Post.

Hohenzollernism doesn't know where it is going, but it is on its way.—Philadelphia Ledger.

The president may appoint Col. Roosevelt to succeed him.—St. Louis Globe-Democrat.

T. R. is going to the front if he has to swim over.—Detroit Free Press.

High Price for Wheat.

Wheat now sold at \$3 a bushel, reached the highest price known in the country's history. Very little wheat is being brought in to the local market, however, and dealers say that they believe very little is being held back by the farmers.

The highest price recorded previously was in March, 1887, when it sold for \$3.85, government note, valued at \$2.53 in gold.

Before the opening of the present war, in July, 1914, wheat sold for 77 cents a bushel. Soon after it dropped to 75 cents a bushel, and soon after began its gradual rise, reaching a climax about ten days ago.

At the opening of the war of the Revolution, wheat sold for 93 cents a bushel. After the close of the war it advanced to \$3. After the close of the war of 1812, wheat sold for \$2.25 a bushel, this price being paid by millers in 1817.

In 1861 wheat was selling for 62 cents a bushel. In 1865 it had advanced to \$2. At the end of the war, in 1865, it sold for \$1.64, but before the end of the year advanced to \$2.85.

Corn is retailing at \$9.25 a barrel and no doubt reach the \$10.00 mark.

Will Receive Wool

To the Wool Poolers: The pooled wool has been sold to Isaac Rosenbaum & Sons, of Louisville. By request of purchasers, price will not be given out till day of delivery.

The weather permitting the wool will be baled at Bullittsville, Monday, May 28th, in the morning, at Petersburg in the afternoon. At Burlington, Tuesday, May 29th, in the morning; at Bellevue in the afternoon, at Walton, Thursday, May 31st.

In case shipping is delayed on account of rain, the above dates will be changed to the following: Thursday morning and continue the same rotation as above.

J. H. STEVENS.

ENROLLMENT

Day Set For June 5th.—Sheriff

W. D. Cropper and County Clerk Rogers Will Conduct The Enrollment In This County.

Sheriff W. D. Cropper and County Clerk W. R. Rogers received a telegram from Governor Stanley, Tuesday evening, asking them if they would serve as county enrolling officers without compensation and they responded they would. An enrolling poll will be opened in each precinct in the county on the 5th day of June and for this work Messrs. Cropper and Rogers will have to organize the enrolling force by appointing officers having no authority to excuse anyone. The draft will follow in a reasonable time after the enrollment when exemption from service will be granted those entitled.

Commissioner's Sale.

Boone Circuit Court.

John W. Rice, Plaintiff,

Against, Equity,

William Shunkle, Defendant.

By virtue of a judgment and order of sale rendered by the Boone Circuit Court at its April term, 1917, in the above cause, the following property is offered for sale to the highest bidder, at public sale, on Monday, the 4th day of June, 1917, at 1 o'clock p. m., or thereabouts, being County Court day, upon a credit of six months, the following property, to-wit:

The said land is on Gunpowder creek in Boone County, Kentucky and bounded generally as follows: Beginning at the mouth of Gunpowder creek on the Ohio River, thence with said creek to the corner of A. P. Marshall, thence with it to the Ohio River thence, with the river to the beginning, containing seven acres be the same more or less.

For the purchase price the purchaser of said real estate, with approved security or securities, must execute bond, bearing 6 per cent interest from the day of sale until paid, and having the force and effect of a judgment, until all the purchase money is paid. Bidders will be prepared to comply with these terms.

CHAS. MAURER,

Master Commissioner.

Commissioner's Sale.

Boone Circuit Court, Kentucky.

B. F. Zimmer, Plaintiff,

Against, Equity,

Henry Kottmeyer adm'r. of Fred Zimmer, dec'd, &c. Defts.

By virtue of a judgment and order of sale of the Boone Circuit Court, rendered at the April term thereof, 1917, in the above cause, I shall proceed to offer for sale at the Court House door in the town of Burlington, Boone county, Ky., to the highest bidder at public sale, on Monday, the 4th day of June, 1917, at 1 o'clock p. m., or thereabouts, being County Court day, upon a credit of six months the following property, to-wit:

Lying and being in Boone County, Kentucky, beginning at a stone the most southern corner of William F. Hankins; thence N 31 W 4 poles and 4 links to a stone; thence with a line of Samuel P. Anderson northwardly to the south edge of the Plank Road; thence along the edge of said road to the line of said Hankins; thence S 20 W with the said Hankins to the beginning. Same lot purchased by Fred Zimmer from Barney Delehite.

For the purchase price the purchaser, with approved security or securities, must execute bonds bearing legal interest from the day of sale until paid, and having the force and effect of a judgment, with a lien thereon until all the purchase money is paid. Bidders will be prepared to comply promptly with these terms.

CHAS. MAURER,

Master Commissioner.

Commissioner's Sale.

Boone Circuit Court, Ky.

Eugene Ogden's Adm'r. &c. Plaft.

Against, Equity,

Eugene Ogden's heirs, &c. Defts.

By virtue of a judgment and order of sale of the Boone Circuit Court, rendered at the April term thereof, 1917, in the above cause, I shall proceed to offer for sale at the Court House door in Burlington, Ky., to the highest bidder at public sale on Monday, the 4th day of June, 1917, at 1 o'clock p. m., or thereabouts, being County Court day, upon a credit of six months the following property to-wit:

Lying and being in Boone county, Ky., near Gunpowder Creek and known as part of the Rice farm, Beginning at a Rock and a tree in J. B. and R. W. Allen's line a corner between said Allen and B. W. and Fannie B. Adams; thence with said Adams line N 88 E 20 poles to a stone, a corner with D. G. Rice; thence with his line S 28 W 114 7-10 poles to a stone in the Gunpowder and Hamilton roads; thence with the meanders of said road S 61 E 31 3-10 S 22 W 104-10 poles, a 46 E 16 poles to where Harse Harris' line crosses said road; thence with said Harris' line S 28 E 30 poles to a stone on a branch; thence N 33 E 30 poles to a stake near a Mulberry east of said branch; thence N 11 E 30 links to Oak Sugar tree and Beech stump; thence with J. B. and R. W. Allen's line N 54 W 64 poles to the beginning containing 33 acres more or less.

The interest of the non compos mentis John Ogden and the infant defendant Dallas Ogden in the proceeds of sale if any remaining after the payment of all costs, indebtedness and interest shall not be paid, but shall remain a lien upon the land until the said infant defendant arrives at the age of 21 years, or until the guardian of said infant or the guardian or committee of the non compos mentis defendant shall execute bond as required by Section 493 of the Civil Code.

For the purchase price the purchaser, with approved security or securities, must execute bond, bearing legal interest from the day of sale until paid, and having the force and effect of a judgment, with a lien thereon until all the purchase money is paid. Bidders will be prepared to comply promptly with these terms.

CHARLES MAURER,

Master Commissioner.

For Sale.

5-ton Wagon and Stock Scales. Butcher's Ice Box, also 4x6x8. Building Pen. White Burlington. Children. E. A. STOTT, Petersburg, Ky.

Public Sale!

The Burlington and Bellevue Turnpike Road Co. will offer for public sale at the Court House door in Burlington, Ky., to the highest bidder at public auction on

Monday, June 4th, 1917.

at 1 o'clock p. m., or thereabouts,

for cash, the following tracts of land in this county:

Tract No. 1 contains about one-half an acre, on the north side of the said pike, about one-half mile west of Burlington, Ky. A three room dwelling and other out buildings are on this tract.

Tract No. 2, near Bellevue, contains about one-fourth of an acre, on the north side of the pike, at the junction of the Petersburg road. A two room dwelling and other out buildings are on this lot.

Tract No. 3 contains two and three-quarter acres, on the west side of the pike and just west of the toll-house property, and is bounded by the lands of F. H. Brown, W. S. Huey, Isaac Flick and the turnpike.

These tracts will be sold separately and the deeds will be made conveying the property to the purchasers immediately after the sale.

By order of the board of directors of the Burlington and Bellevue Turnpike Road Company.

R. A. BRADY, President. WM. WALTON, Secty.

Will make present season on Monday and Tuesday of next week at Waterloo, this county, and the remainder of the week

THRIFT.

Thrift does not mean putting a little money in the bank, nor does it mean miserliness. It means more than these; it stands for prudence, foresight, getting value for what one spends, personal efficiency, looking out that nothing is wasted, proportioning expense to income. Thrift has never been one of our national characteristics, says Detroit Free Press. We are notoriously extravagant, in both our public and private expenditures. It is a shame to us that the saying, "A French family could live on what an American family throws away," should have passed into a proverb, and that we should actually place ourselves on our freehandness—as if wants were a virtue. Certain of "Poor Richard's" sayings are seen on the posters Great Britain is using in its "thrift campaign." "You may think a little tea, or a little punch, or diet a little more costly and clothes a little finer can be no great matter, but remember 'Poor Richard.' Many mickles make a muckle." How many of us know the foolishness of laying out money in Poor Richard's "purchase of repentance." Other maxims remind us that "Always taking out and never putting in soon comes to the bottom of the tub." "A fat kitchen makes a lean will." "What maintains one vice would bring up two children." And at this moment there is especial significance in his maxim: "For age and want save while you may. No morning sun lasts the whole day."

Nobody loves the sagebrush, yet somebody is always trying to uplift it. This is a difficult task since its antecedents are so bad. Nevada complained a long time because she was called the "Sagebrush state," hunters hated the plant because of the bitter flavor it imparted to the grouse, prospectors, settlers, stockmen despised it because it encumbered the earth, says New York Sun. It was fit only for rattlesnakes to coil in and strike or for coyotes to blend their tawny skins into vanishment. Not long ago an Oregon man cried "ureka." He said the sagebrush was the best road building material in the West. Now Idaho claims in the despoiled weed a source of great wealth and the solution of the problem of potato shortage: "The average acre produces three tons of sagebrush at a cost of \$25. The sagebrush burned in the kiln gives from 25 to 30 per cent potato. The supply is inexhaustible." The Idaho poet, who called for a festival "to lift the curse from the plant we know so well and should love," may now consider himself even with those who jeered and refused to foregather with him.

The total of American exports for 1916 was \$3,451,000,000. On the authority of the bureau of foreign and domestic commerce of the department of commerce, it is stated that this exceeds the total for 1915 by \$1,926,000,000 and the total for 1913 by \$2,997,000,000. The exports for December are announced as \$521,000,000, which exceeds the previous high monthly total by \$5,000,000. The December average for the five years previous was \$263,000,000. Imports in 1916 also made a new record, though not so impressive. The aggregate value of 1916's imports was \$2,392,000,000, compared with \$1,779,000,000 for 1915, and \$1,818,000,000 in 1912, the year of the previous high mark.

The native women of Yukon are not a whit behind their sisters in Eastern Canada in seeking political equality with their fathers and brothers and husbands. They base their demand for the franchise, however, on peculiar grounds, says the Christian Science monitor. While they claim the vote as a right, they are asking for it at this time as a matter of expediency in that they believe it to be essential to the future of the territory that the alien male vote which has grown very strong, will not dominate its politics.

Immigration in the closing months of last year showed an increase over the corresponding period in 1915 and 1914. The births in the United States in 1915 were 78 per cent in excess of the deaths. No danger of Uncle Sam's farm reverting to howling wilderness! Not just at the present moment!

Measured in dollars the farm output of the United States amounted to five billions in 1900 and eleven billions in 1916. The advance is not a bad thing for the farmer, and as the money gets into circulation it helps general business.

Now that we are learning new ways to spell the names of European countries, perhaps Roumania will soon become Romania.

LIST OF BOONE CO. PUPILS

Who Will Take Part In The Tournament In Session At Owenton.

Following are the entries of the Boone schools in the Educational Tournament in session this week in Owenton, Owen county, Burlington, Union and Walton being the only schools in this county taking part in the Tournament:

Seventh and Eighth Grade Reading Union—Jennie Cleek.
Walton—Edna Gordon.
Female Declamation Union—Norma Rachal.
Burlington—Maude Tanner.
Walton—Jennie Mayhugh.
Male Declamation Union—J. D. Moore.
Burlington—Frank Minner.
Walton—Frank Daugherty.
Chorus—12 voices.
Furlington.
Arithmetic, 7th Grade Union—Robert Miller.
Walton—Halley Aylor.
Arithmetic, 8th Grade Burlington—Robert Cleek.
Walton—Lellie Readnour.
Ancient History Burlington—Wayne Phipps.
Walton—Marie Vest.
M. & H. History Burlington—Robert Newman.
Burlington—Elizabeth Kelly.
Walton—Brookie Thompson.
Cicero Walton—Frank Daugherty.
Vigil Burlington—Mary Gordon.
English and American Classics Burlington—Agnes Carver.
Union—Nancy Scour.
Walton—Mary Gordon.
Civics—H. S. Union—Matson Rachal.
Burlington—Frank Minner.
Walton—Ray Kenny.
History, 8th Grade Union—Howard Adams.
Burlington—Robert Slayback.
Walton—Charles Neumister.
Algebra, 1st Year Burlington—Wayne Phipps.
Walton—Virginia Beavly.
Algebra, 2nd Year Burlington—Denzel Carpenter.
Walton—Julia Moss Hance.
Physics Burlington—Walter Hall.
Walton—Kylie Nicholson.
English Literature Burlington—Jennie Cleek.
Burlington—Galen Kelly.
German, 1st Year Union—Anna Huey.
Burlington—Agnes Carver.
Walton—Lawrence McCortt.
German, 2nd Year Union—Elizabeth Friedman.
Burlington—Norma McGlasson.
Walton—Mary J. Houston.
Biology Burlington—Alice Walton.
Agriculture, 8th Grade Union—John Rachal.
Walton—Lellie Readnour.
Civics, 8th Grade Union—Howard Adams.
Walton—Marie Vest.
Latin, 1st Year Burlington—Wayne Phipps.
Walton—Jennie Lee Gaines.
Cecilia Burlington—Bovena Carpenter.
Burlington—Elizabeth Kelly.
Walton—Emel English.
English History Walton—Kylie Nicholson.
U. S. History, High School Union—Reuben Conner.
Walton—Ray Kenny.
Mental Arithmetic Union—Matson Rachal.

Walton—Zoe Callender.

FORTY YEARS AGO TODAY

Items Taken From the Issue of The Recorder of May 31st, 1877

Russia is mobilizing a reserve of 150,000 Cossacks.
Last Thursday Ten Brock ran a mile in 1:41 the fastest time on record.
James W. Tate is a candidate for reelection as State Treasurer. He is holding the office for the fifth term.
Corn has grown very slowly.
Preparations are being made for growing a large crop of tobacco.
C. W. Saxton's fine stallion, Rollin, died near Verona, last Saturday.
Mr. F. Smith has purchased R. K. Graves' house and lot.
Frost laid Thursday night.
There will be a fish fry at Big Bone the second Saturday in June.
Orrie Percival, Sr., died of cancer last Sunday night. He resided in Kenton county near Walton.
O. P. Conner and wife and W. M. Conner were baptized by Rev. S. P. Carlton, Universalist, last Sunday.
Miss Riskley Brittenheim, of Walton, and Fred Shafen, of Cincinnati, were married in Walton Baptist church last Thursday, by Rev. J. H. Beasley. A big wedding feast was served.
Candidates for State Senate and Representative addressed a large crowd at Hebron last Saturday afternoon.
Waterloo—Rumored that M. J. Corbin, of Bellevue, is preparing to desert the American army to have his name registered on the list of benedictines. Leonard Corbin, local blacksmith, did forty cents worth of work last week—Eorn to Moses Rice, Jr., and wife, a daughter.
Walton—School children are making great preparations for their examination June 5.—There was a grand display of new hats and dresses at the Baptist church, last Sunday.
Florence—Farmers are complaining of cut worms, potato bugs and drought.—Felix Schaefer shipped 2,600 pounds of wool this week. James Henderson was here Saturday and delivered his lecture on "The Old Dispensation."—There was a big picnic at St. John's Orphans' Asylum one day last week.
Verona—Paddy Johnson and Miss Fannie Vee were married last Wednesday. Rev. L. Johnson officiating. Attendants, Mr. Omer Cleek and Miss Mollie Hume, Robt. Powers and Miss Marcie Osman.
Petersburg.—Last Wednesday Ulrich Bruner was seized with a sudden and violent cough, and in an effort to clear his lungs, ruptured a blood vessel in his lungs, and bled to death in a very few moments.—One of Joseph Mahan's children died of whooping cough last Friday.—Capt. Hyatt and family have moved to Indianapolis.—John Kennedy and Miss Josephine Cothran were married last Sunday. Bro. Bristow officiated. The happy couple will reside on Mr. E. R. Gaines' place.

Wants a Loose Leaf Market.

An effort is being made by some of the leading business men of Aurora to establish a loose leaf tobacco market there to begin with the handling of the 1917 crop. They have interested some of the citizens on this side of the river in the enterprise and there is every indication that the market will be in operation in time to handle this year's crop. The Indiana farmers, in many acres of Aurora grow a large amount of tobacco every year, about all of which is believed to be sent to the floor of a loose leaf market in that city, besides drawing on this county for many crops. The Boone county men who are becoming interested in it, also there because that the loose leaf market will run its course in a few years, and that the growers will finally drop back to the old way of disposing of his product.

YOU MUST REGISTER.

War Department Guide for Call to Colors Day—Only One Day, Tuesday, June 5.

1. There is only ONE day for registration—June 5, 1917.
2. Every male resident of the United States who has reached his twenty-first birthday and has not reached his thirty-first birthday MUST register on that day. The only exceptions are officers and enlisted men of the regular army, navy, marine corps, national guard and militia officers, reserve corps and enlisted reserve corps.
3. Registration is distinct from selection. No matter what just claim you have for exemption you must register.
4. Registration is a public DUTY. For those not responsive to this sense of duty, the penalty of imprisonment, not fine, is provided in the law.
5. Those who, through sickness, shall be unable to register should cause a representative to apply to the county or city clerk for a copy of the registration card. The clerk will give instructions as to how to fill out the card, be filled out. The card should then be mailed by the sick person, or delivered by his agent, to the registrar of his voting precinct. The sick person will enclose a self-addressed stamped envelope for the return to him of his registration card.
6. Any person who expects to be absent from his voting precinct on registration day should apply as soon as practicable, for a registration card to the county clerk of the county where he may be stopping, or if he is in a city over 30,000, to the city clerk. The clerk will record the answers on the card and turn it over to the absentee. The absentee should mail this card to the registrar of his home voting precinct so that it will reach that official by registration day. A self-addressed stamped envelope should be enclosed and returned to insure the return to the absentee of a registration certificate.
7. Registration booths will be open from 7 a. m. to 9 p. m. on registration day.

AMERICA IN WORLD CRISIS.

The Three Outstanding Qualities For Which Our People are Noted.

(Chicago Tribune)
The American people have been distinguished in their history by three outstanding qualities, their initiative, their energy and their ability in organization and their objective energy.
The American inventor has led the world since Columbus, he has become a proverb from his spinning jenny to the talking machine, during a century which has transformed the material aspect of life, the Yankee, the American, has been the most conspicuous figure. In the organization of vast enterprises and in the confident and resourceful energy which he has conquered a vast continent in a few generations, he has made the world wonder.
And now the American stands at the crucial point of the greatest struggle of all human history, these great qualities are called for from us as never before. The world is looking on the scales of fate are trembling in the balance, what will the American do? Is he worthy of his potent name, his unique fame, the American? We believe he certainly is. We believe American creative genius, the gift of invention, the gift of swift and masterful organization, the gift of enterprising energy, inspired by the nation's and the world's need, will prove them selves now.
America has passed the age of brag. It is in the full flush of mature and confident power. No people have had a greater opportunity to emblazon its name forever on the greatest page of history, and America will do it.
The American people should should wake to their great moment. This is the birthtime of vast changes in civilization. It is our privilege to play a foremost part in the molding of the future. American ought to realize this. Every citizen has his place in the mighty task. Every American has such a place from youth to old age. From the housewife in her kitchen to the President in the White House, all have their share to do, and we believe they will do it well.
We Americans have many faults and shortcomings. There are many defects in our house. But we do not hide them from ourselves. There is greatness in the American heart and brain, and it will be itself as never before in this crisis time.
That strikes the note of our service at this time. We are called upon for a gigantic act of disinterested love and faith which is as swift as it is well ordered and overwhelming. We must labor with the grasp of our own genius.
Several acres of tobacco were not cut until Tuesday following the splendid rain—Milton News.

ALL IN SIX WEEKS.

Rapidity With Which Government Has Moved Considered Phenomenal.

(Philadelphia Record.)
When it is remembered that war against Germany was declared only six weeks ago the rapidity with which the Government at Washington has moved must be considered phenomenal, judged by all previous American records. Even greater progress would have been made but for the loquacity of our Senators and Congressmen—a vice from which democracies especially suffer. Notwithstanding this drawback, the warlike preparations have been astonishing when viewed as a whole. Here are some of them:
1. Adoption of conscription as a military policy—a step never which Great Britain portered and wrangled for two years.
2. Passage of the \$7,000,000,000 bill, providing for our own war expenses and immense loans to allies.
3. Invitation to, and arrival of, British, French and Italian Commissioners, who have given invaluable information to our Government and arranged for close and harmonious co-operation in operations against Germany.
4. Dispatch of a flotilla of destroyers to European waters, where they are taking an active part in the warfare against Teutonic submarines.
5. Preparations under way to send a large force of the regular army to fight in France.
6. Readjustment of Federal taxation, to raise necessary funds.
7. Food control urged as a national policy, and the best fitted man in the world chosen to put it in operation.
8. Plans designed and put into effect for the construction of shipping on a vast scale.
9. Coordination of the industrial forces of the country, so as to secure the best results for both the Government and private enterprise.
10. Railroads brought under Federal control through a Central Board of Management.
Other important steps could also be named. But these are enough to show that Woodrow Wilson is not sleeping on his job.

CORN ACREAGE

Increased By Plowing Under Abandoned Wheat Fields.

Washington, May 25.—Decidedly favorable weather for the advance of vegetation over almost all portions of the corn belt, in most of the Western Cotton States and in several of the Atlantic Coast States prevailed during the week just ended, the national crop bulletin today announced. From Colorado northward and in much of the Pacific Coast States the week largely was favorable also.
Sowing of corn is practically completed, and the weather was favorable for germination and growth, with prospects very promising in most districts, although somewhat late in some sections of the West.
Conditions were much more favorable for corn in the principal producing states. Corn acreage growth, especially in the Southwestern corn states. The crop is eliminating poorly, however, in the Northeastern States. The acreage of abandoned wheat fields planted to corn is large in the central great plains region.
Settling of general ground improvement, but weather has been too dry in some parts of the eastern belt. In some sections the cotton stand is being plowed up and devoted to food crops.

Prices for Tobacco Not Very Promising.

R. J. Reynolds, the old tobacco man, has issued a statement to the growers in which he predicts that low prices will prevail next season. He bases his belief on the fact that we will not have any crop in trade in tobacco. His conclusion seems to us to be a most reasonable one. Although the same demand for tobacco will exist in foreign countries, we will be too everlastingly busy getting foodstuffs to our allies to furnish bottoms for the purpose of exporting tobacco. Consequently the large tobacco buyers will find themselves with more weed on hand than can be profitably disposed of at the buying prices that prevailed this year, and inevitably in such a case the prices paid the farmers will tumble. We fear that many farmers encouraged by the high prices of the season just closed, will double their acreage of tobacco; add additional barn room; pay for high priced labor and then have the crops knocked under their houses of cards by a slump in the loose leaf market. To rely on our opinion, but it is an honest one, for having the will or a farm this year, he would steer clear of tobacco for more reason than one.—Ex.

Defeated Two to One.

The proposition to consolidate two or more school districts in Richwood neighborhood to establish a graded school at Richwood had a most with favor on the part of a majority of those who would have to put up with the consolidation, consequently the proposition was defeated about two to one at the polls.

WALTON DEPARTMENT.

D. B. WALLACE, Manager.

Hand your news items to Mr. D. B. Wallace at the Walton Equitable Bank and Trust Co.'s building. He is also authorized to receive subscriptions and collect other accounts.

Mrs. Ernest DeMoisey of Ludlow, spent the week here with friends and relatives.
For Sale—2 horse platform wagon and one horse survey. M. L. Lucas, Walton, Ky., R. D. 1.
Wm. Holden who was stricken with paralysis a couple of weeks ago is improving slowly.
C. K. Wood of Big Bone Springs, spent Friday here with friends and on business.

Mr. and Mrs. George L. Miller of Landing, spent this week here with their son John C. Miller and family.
D. B. Wallace and son Bruce left Saturday for Chicago to spend several days in relation to some property he owns there.

Mrs. G. C. Rankins and two children are spending a couple of weeks in Mason county visiting relatives and friends.
Mrs. W. T. McKenzie, of La-Grange, spent the past week here the guest of her son-in-law Prof. J. C. Gordon and daughters.

Robert P. Coffman left last week for Holden, West Virginia to take charge of one of the stores of the Island Creek Coal company.
Mrs. Howard Christy of Chicago, arrived here Thursday on a visit of a couple of weeks to her sister Mrs. Henry C. Diers and husband.

Fred Miller who is visiting his uncle Chas. Slater in his grocery at Ludlow, attended the grade-school commencement here Thursday night, being the clerk of the school board.
Emery Hill Johnson who recently moved from Walton to Covington with his parents, Mr. and Mrs. W. Lee Johnson, has enlisted in Co. C, First Ohio Regiment at Cincinnati, and expects to see service at the war front.

Mrs. Ray Ratterman of Louisville, Mr. and Mrs. L. R. Miller, Mrs. Jno. Jones, Mr. and Mrs. Harry F. Jones of Big Bone neighborhood, were visitors here Thursday and attended the High School commencement exercises.

Rev. W. C. Garriott closed a successful week at the residence of Mr. and Mrs. E. C. Lacy, church members with eight additions. Rev. Garriott and family will shortly move into the handsome parsonage at Walton which is now receiving the finishing touches.
The project for a large tobacco crop is not very encouraging as there is a failure in the tobacco plants in this section and those who have plants report them as being very small. The same conditions are reported from other sections of the tobacco growing district.

The seventh district convention of the Christian church held at this place last week, decided to hold the next convention at Morgan, Pendleton county.
President, Rev. E. C. Lacy states that with the addition of four more counties to the district it will be the largest convention ever held in the district.

Dr. W. A. Lewis, dental specialist and veterinarian, of Cincinnati, was here last Friday looking over some real estate in the hands of Geo. B. Powers, the realty man, with a view to buying a good sized tract of land for a syndicate to operate in farming and sheep raising. Dr. Lewis has several tracts under consideration.

Married—Wm. Robert Crutcher and Miss Doris Percival were united in the bonds of holy matrimony at the residence of the bride's parents Mr. and Mrs. Melvin Percival at Bank Lick, May 17. Rev. E. C. Lacy of the Walton Christian church performed the ceremony. They will make their home at Holden, West Virginia, where Mr. Crutcher has charge of the Island Creek Coal company stores.

A. M. Edwards has about completed his handsome public garage, rebuilding his livery stable for the purpose as the livery business has diminished to such extent as to make the business unprofitable and the automobile trade has increased to an extent to justify a modern building. This has been supplied by Mr. Edwards and he has a very handsome garage, fire proof, and attached thereto is a comfortable rest room and all the auxiliary essential to the attractiveness of the business.

The Kenton county pooled wool was delivered here last Friday and Saturday to M. S. & Son of Louisville, and comprised about five thousand fleeces. The price paid was \$4.60 with a deduction of 25 cents per cwt. to cover expense leaving the net price \$4.35 per cwt. There was no complaint over the quality of the wool as it all graded high in quality and was well handled. The Boone county pooled wool is to be received at Walton, May 31st.

The Commencement exercises of the Walton High School were held Thursday evening at the Walton Baptist church and the large auditorium was filled to overflowing to enjoy the splendid program rendered. Special music by harp and violin rendered by musicians from Cincinnati contributed greatly to the enjoyment of the evening. Prof. J. C. Gordon, principal of the high school presided and the location was over the address of the Methodist Rev. W. B. Garriott of the Methodist church. The graduates were Dewey Benson, Wendell Rouse, Misses Emma Jane Miller, Rowena Carpenter, Mary Jean Houston, Mary Gordon, Marie Menefee, Isabelle Dickey. The class address was delivered by Dr. R. H. Crossfield of the Transylvania University, Lexington, and was a masterly one that was appreciated by all. Following the delivery of the diploma to the graduates by Prof. Gordon the exercises were pronounced by Rev. E. C. Lacy of the Walton Christian church.

Monthly Grain Report.

Senator Nelson declares, in discussing the pending Food Survey Bill, that the crop reports of the Department of Agriculture, instead of being a benefit to farmers, are used by speculators to influence the market.

Of course, they are so used. Let us suppose, for example, that there is an April report showing a great shortage in fall sown wheat, which will be harvested in July. The speculators can use, and do use, that report to lift the prices of wheat. Or what use is it to the farmer? Of what use is it to anybody? Or what use is it to anybody? The result of guesswork based upon general survey. Farmer Jones does not know just how his own crop of wheat will pan out. He has been farming since the Department of Agriculture was in swaddling clothes. He has observed his wheat field every day. Yet he cannot say positively in April what his yield will be. He cannot say what it will be approximately. He can only guess. The speculators sit on the fence and return a verdict upon the evidence before them could not say what the crop would be. The same jury sitting on the same fence after the bumper has cut the wheat and bound it into bundles cannot say what the yield will be. The wheat hands who have watched the wheat and shocked the wheat cannot say what the yield will be. The threshermen and his crew can tell the yield of the wheat. He has been threshed can anyone tell what the yield will be. But in April a crop report can tell the yield of the wheat. It is a normal crop, or 75, and speculators can use the report.

The exact figures given in crop reports must be guesswork. They must be, otherwise, the guesswork of inexperienced guessers. They must be, largely, poppycock. But in a market which is responsive to a rumor that the crop is great or small in Australia or the Argentine Republic the reports have a positive value to the speculating fraternity. They can be used to keep wheat up in the spring. If the crop turns out in July to be much larger than the report, the crop can be sold at a low price. The farmer is defeated in the market by his good fortune in the field. During the next 44 months there are crop reports, war reports, rumors and what not upon which the speculators can manipulate wheat until the home harrow is in the grain.

Farmers, no doubt, pitch crop reports into the waste basket when they get them.
Or do they get them?—C. J.

Offers Reward for Lynchers

Frankfort, May 17.—Circumstances surrounding the lynching of the negro, Lawrence Dempsey, by a mob early last Sunday morning, are so curious as to evoke comment from Gov. Stanley in a letter to Circuit Judge Bunk Gardner.

For Sale—High grade Holstein calf; also five pigs. All good. Burlington, Ky., R. D. No. 3, Holston phone.

For Sale—Two year old colts 1 saddle and harness bred, 1 draft, one yearling general purpose. Also two buck lambs, well bred. C. C. Ralston, M. O. Martin, Florence, R. D. 4.

SUMMER IS HERE!

AND IT'S GOING TO BE SOME HOT

The high price of coal coupled with the inconvenience of using it in hot weather should make some other method of cooking appeal to you. Especially so when in buying one of our

COAL OIL STOVES

you are securing something which spells Economy, Safety and Comfort in full. We have them in all makes—

Blue Ribbon, Success and New Perfection

and they all represent the highest point of efficiency in construction and durability. Surely you will own one if you see our stock, for the price is too moderate and the superiority over coal and gasoline so evident that you can not hesitate to take advantage of such a good opportunity to make the coming hot days comfortable. They BURN WITH A STEADY BLUE FLAME, have perfect cooking qualities and are absolutely safe. Practically no heat and with ordinary care will last a lifetime.

In One of These Stoves

You will secure a bargain, as has always been the case in our other large line of Groceries and Dry Goods.

E. E. Kelly,

Burlington, Ky.

These facts about Red Star Flour:

It is absolutely pure.

It is not bleached to make it white.

It contains all the nourishment of the wheat berry.

It will not dry out but holds its moisture longer.

It has an exceptionally sweet flavor.

It is the best flour you can buy regardless of name or price.

Your grocer can supply you. Insist on Red Star Flour and do not take a substitute.

MANUFACTURED BY

W. T. BURNS

RISEING SUN, INDIANA.

Local Happenings.

We have another lot of those fine banded Sailor and Sport Hats that sold last week up to \$5.00. Your choice this week for..... **\$1.00**
The John R. Copping Co.
7th and Madison Ave.
Covington, Ky.

Chautauqua Planning.

Mr. Mullins, an advance agent for the Chautauqua people, arrived last Friday to consult with the local Chautauqua boosters, and make arrangements for the entertainment to be given here in July.

Sheep all Sheared.

There are very few sheep in this county that have not been sheared. Most of the shearing was done last week and the sheep were subjected to several chilly nights after having been relieved of their fleeces.

Prof. Munz and His Hammer.

Prof. Munz has gone into the building business since his school closed, and is putting up a nice tool house and store room for L. T. Clore. The professor is brim full of industry and lets no grass grow under his feet.

Concrete too Expensive.

It is said the Erlanger property owners have decided that a concrete street through their town is too rich for their blood, and will content themselves with a thoroughfare not so expensive but of first-class construction.

Work Resumed.

The work of converting the Lexington pike into a concrete highway has been resumed at the end of the work done two years ago and will continue towards Covington to the city limits, a distance of something over a mile.

Keeps Things in Good Shape.

C. W. Myers, of Florence, has done a good job of street repairing on the street that passes his business house on north 1st. Mr. Myers keeps his premises in good shape at all times, and looks after their environments as well.

Made a Tour of the North End.

L. H. Vossell and Thos. Judge, of Union, were seen at several points in this part of the county one day last week, but it is not known which of the gentlemen was investigating his political standing.

Wheat Looks Good.

Ben Berkshire, of Petersburg, has forty acres of fine looking wheat. He sowed fifty acres, for ten acres of which he bought seed, not a grain of which ever sprouted. He thinks the wheat had been heated and the germ thereby destroyed.

Corn About All Planted.

About all the corn in this county is planted, and the work of preparing tobacco ground will be pushed to the limit as plants are coming on very fast and will soon begin to be transplanted. Cut worms are said to be numerous in some fields, and may cause the farmers considerable trouble in both corn and tobacco fields.

Struck by Lightning.

Lightning struck Bert Sullivan's large barn out on his farm Tuesday of last week and splintered a post or two badly, but, fortunately, the building did not take fire. A short time before the building was struck Mr. Sullivan left it, taking his team with him. The probability is his team would have been killed if they been in the barn as one of the posts that was shattered was the one to which he always tied them.

A Plague of Rabbits.

Hopkinsville, May 21. — North Christian farmers are fretting over a plague of rabbits. They are greatly damaging young corn, beans, sweet potatoes and tender vegetation generally. The farmers are seeking a law to permit them to kill rabbits when they are destructive to crops. At present they can be shot only from Nov. 15 to Jan. 1. An appeal will be made to the State Game Warden for relief.

They Tried Alfalfa.

The early American colonists made several attempts to grow alfalfa, but without great success. George Washington grew alfalfa on his Virginia farm, and Thomas Jefferson gave considerable attention and care to its cultivation. The efforts, however, proved unsatisfactory since they did not understand all of the requirements for the successful growth of the plant.

Boone's Probable Quota.

There are, probably, 300 men in this county within the draft age. Of this number, it is safe to say, 300 will be exempt from one cause and another, which will bring the number of men to 500 out of which Boone's quota will have to be selected. The county's quota will be close to 75 men, which will give each man one chance in about seven to become a conscript. The county quota has not been announced yet, and the above is only speculation, but is believed to be somewhere in the neighborhood of correct.

GERMANY'S STRENGTH.

Prussia Not as Near Defeat as We Have Been Told.

(Leslie's.)
Millions fail to recognize that this is not a play war, but a conflict of life and death; that unless we put forth our best efforts and do so immediately there is a possibility of its terminating disastrously to us.

We have not felt how, extremely important it is for us to act now, unitedly and patriotically, if we wish to avoid bearing the brunt of a war against a nation of trained soldiers. Unless we can quickly and resolutely meet the horrors of war may be brought direct to our shores. The conditions abroad are not as rosy as we have been led to believe. We have been lulled into a sense of security by the false impression that "all is well." The strict British censorship has told us the good things, but has kept from us a knowledge of how serious the true condition is.

Germany is not as near defeat as we have been told. She is not starved, nor is there a probability of starvation. Herbert C. Hoover, who has been in Belgium directing the distribution of food supplies and is thoroughly conversant with the condition of affairs in Germany, says that the Central Powers have enough food to enable them to carry on the war for two years longer.

Germany recognized from the beginning that this war was to be one of exhaustion. She also recognized that the English fleet would cut off her supplies from abroad, therefore she planted every acre of tillable soil. She utilized her women, her old men, her children and her prisoners to produce provisions for her people. While the English blockade has been fairly successful, so that little foodstuffs has reached Germany from neutral countries, her supply, though short, is sufficient to last until the harvest, her autocratic government having limited the rations that the crisis may be bridged.

THE GOVERNMENT HAS TWO METHODS OF RAISING MONEY.

The Government of the United States has two methods of raising money. One is by taxation. The other is by the sale of bonds, which is a method of borrowing money.

The Government bond is the printed promise of the Government to pay back the borrowed sum of money at a certain time, and to pay interest on it at regular intervals until it is paid.

The Government borrows money in this way only after it has been given the right to do so by act of Congress approved by the President, and the terms of the loan are set out in the act.

Back of the promise of the Government stands the honor of the Government and all its taxing resources. Really the whole wealth of the Nation stands behind this solemn promise of the Government to pay.

This makes a United States Government bond the safest investment in the world. If the bond is not safe, no property in the United States is safe. If the U. S. can not pay its bonds, it is hardly probable that it will be able to protect the citizens in their other rights.

The Liberty Loan Bonds of 1917 are especially attractive investments. Not only have they this absolute safety characteristic of all United States bonds but they are tax free not only from all existing taxes but from any war tax that may subsequently be levied. No State, city, nor county may tax them. The inheritance tax of the United States and of some States may affect them, or rather, affect their transfer after death of the owner by will or by inheritance.

Another advantage these Liberty Loan Bonds possess is that if the Government issue bonds later on during this war at a higher rate of interest the holders of Liberty Loan Bonds will be allowed to exchange at par their bonds for bonds bearing the higher rate of interest.

Missionary and Aid Society Met.

The Women's Missionary and Aid Society of the Baptist church met, Wednesday afternoon at the home of Mrs. J. W. Campbell. After devotional exercises and business meeting the following program was rendered:

"The Home Base" was the subject for discussion. Several articles were read from the Mission Journal. "The Urgency of the Situation," "The Mountain Mission Schools," "A Task worth while," "A Glimpse of the Lives of the Mountain People,"—Mattie Kreylich. Solo—Cheerful Giving—Mrs. Flossie Martin. A Parable—Madison Campbell. If I go to the Foreign Field—Mrs. J. W. Campbell.

Valuable Pullets.

J. P. Hamilton, of Bachelor's Rest, bought a little over a dozen of the Black Leg pullets in December at a cost of \$7, and kept them until April 20, when he sold them for \$16.50, and during that time he received 73 and one-half dozen eggs, bringing him \$23.95. The feed cost him \$16. His profit on the nineteen pullets for loss than five months is \$23.95. This is the best record Mr. Hamilton ever had with chickens. He sold eggs from 25 cents to 18 cents per dozen, and averaged 30 cents. Who can beat this record?—Fairmount Outlook.

Registrars for Boone County.

The following have been appointed registrars in this county for their respective precincts to make the enrollment on June 5th for national conscription, and have agreed to serve without compensation:

Burlington—B. H. Riley, chief; G. W. Tolin, assistant. Place of Registration—court house.

Battleville—W. C. Watts, chief; Jonas Stevens, assistant. Place of Registration—school house.

Bellevue—Al Rogers, Place of Registration—I. O. O. F. Hall.

Beaver—J. W. Conley, Place of Registration—A. A. Roter's election room.

Carlton—Robt. C. McNeely, Place of Registration—K. of P. Hall.

Constance—John Hogan, chief; A. F. Miller, assistant. Place of Registration—A. F. Miller's election room.

Florence—A. M. Year, chief; J. S. Surface, assistant. Place of Registration—I. O. O. F. Hall.

Hamilton—Thomas Hury, Place of Registration—School House.

Petersburg—R. H. Carter, chief; J. T. Blackburn, assistant. Place of Registration—Town Hall.

Union—M. J. Crouch, chief; J. T. Judge, assistant. Place of Registration—Voter Marsh's election room.

Verona—J. C. Hume, chief; W. H. Blessing, assistant. Place of Registration—Jesse Hamilton's election room.

Walton—A. R. Johnson, chief; R. E. McElroy, assistant. Place of Registration—A. R. Edward's election room.

Tobacco Plants Scarce.

According to the latest reports of many of the tobacco producing counties in this State there is a great shortage in plants, which will result in a considerable reduction in the acreage planted as compared with that of 1916, but as some of the leading tobacco men in the United States are predicting that the export trade next year will be very limited and that in consequence the next crop will not bring a very good price, it may pay the farmer better to cut out the tobacco crop entirely and devote his time and labor to the production of food crops, which would be considered the more patriotic.

Liberty Bonds Allotted this County.

Liberty Bonds to the amount of \$25,000 has been apportioned this county, and N. E. Kiddell, president of the Boone County Deposit Bank, has been appointed to place them. It is believed that the banks and citizens of this county would take care of many times that amount, but as the allotment to the amount of \$18,000,000 only have been set aside for Kentucky, some counties will not get all of them they can take care of.

Price of Property Advancing.

Mrs. Mallie Beemon has sold to Geo. E. Rouse her house and lots in Florence at a very handsome price, over what they cost her a few years ago. Recent sales of Florence property indicate that the price of real estate there is advancing, due largely, no doubt to the establishment of the Dixie Highway through there, and the proposition to make it one of the best highways in Kentucky.

He was Always Loyal to His party.

In response to a postal card inquiry the Recorder states that ex-County Judge Benj. Stephens was a member of the legislature during the Goebel-Taylor trouble; and, further, Mr. Stephens was never an independent candidate against any person for any office. He has always been a Simon-pure Democrat, and was never known to falter in his devotion to his party.

Contract Let for Electric Lights.

The town of Florence has contracted for the electric street lamps at \$3 each per year, while several of the citizens have agreed to have electric lights installed in their residences. Florence is properly located to be among the first to take advantage of many modern improvements that will be reaching out for other localities in the future.

Ground Thoroughly Wet.

Since the last issue of the Recorder the land in this part of the county has been thoroughly wet, and warm weather is all that is needed to bring on vegetation with a rush. Corn is not all planted yet and considerable of that which came up nicely has been destroyed by cutworms which are as thick in some fields as fleas on a dog's back.

He Likes Tampa.

W. T. Davis visits the Recorder from Tampa, Florida, that he is well pleased with his new location, is feeding on fresh vegetables of all kinds, that land is selling as high as \$1,000 an acre, and that everything is on a boom. Mr. Davis' letter got misplaced, otherwise it would have been published in its entirety.

Lost Two Calves of Black Leg.

Two calves belonging to A. W. Gaines, who resides a little over a mile out on the Florence pike, lost a black leg last week. From whence the disease came Mr. Gaines has no idea. No other cases have been reported from this neighborhood, nor is there any elsewhere in the county so far as is known.

'Rah for Adams.

Atty. Samuel W. Adams, of Erlanger, is a candidate for County Attorney in Kenton county. Mr. Adams is a native of this county, all of whose people want to see him with the office.

H. Eilerman & Sons

Covington, Ky. Newport, Ky.

Foremost Makers and Distributors of Men's and Boys' Clothes

Every Day Sees Added Value

For Your Money at Eilerman's. With Every article of Merchandise Sold Here Goes a Guarantee of Value—of Satisfaction. Many Special Demonstrations of Extra Value Giving.

CLOTHES FOR WELL-DRESSED BOYS

Here's something you'd better not overlook; Boys' High Grade Norfolk Suits; ages 8 to 18. At

Boys' Wash Suits, 50c to \$3

Every known style, all the good and washable kind. Unusual values, at \$1 and \$1.50.

Extra Trousers at \$2.50

Here's an opportunity to get extra trouser values at \$2.50. Trousers made of splendid Cassimeres and Worsteds. Others at \$1.50 to \$5.

Made of very fine fabrics, in this season's patterns and colorings. Values up to \$6.50

Others at \$2.50, \$3.50 to \$7.50.

Greatest Stock of

STRAW HATS

Hats of straw, in more styles than have ever been assembled during one season. This store is prepared this season with a wonderful assortment ranging from \$1 Straws made in this country to the exquisite Panama from Ecuador—all styles in all straws, at—

\$1, \$1.50, \$2 to \$5

Leghorns \$2 and \$3. Panamas \$2 to \$5. Bangkoks \$3.50.

Unmatchable Values in Furnishings. The Savings in this section are from 15 to 30 per cent.

The cow has a special plan to fill in the farm economy and no other animal can take her place. Of all animals the dairy cow is the most economical producer of human food. The beef steer cannot be classed as an economical food producer, for he shares with the cow the ability to convert coarse roughage, which, no other animal would use, into food for men; and wherever sufficient roughage is available, such foodstuffs are not available the beef animal is called for.

The hog gives a much greater return in human food for the grain he consumes than does the steer; but the steer can be fed and finished on less grain than can the hog, and he has a great advantage there. Less grain than usual will be fed to stock next winter. This calls for more cattle. Corn stalks, the straw from soy beans and cowpeas as well as from the grain crops, all sorts of hays can be combined with cottonseed and velvet bean meal and fed to cattle. Without cattle these feeds can scarcely be utilized to advantage. Don't sell the cows or veal the calves just because seemingly high prices are offered for them. There is no prospect that prices will be lower, and a larger number of cattle on the farms of this section is required both to insure an adequate food supply and to enable farming to pay as it should. Keep up your supply of cattle—you will not regret it.

Some Wind Saturday Night.

A considerable wind storm prevailed in some localities in this county last Saturday about 3:30 p. m. Very little damage resulted, but some people were very much alarmed, fearing a repetition of the storm of the 7th of last July.

Those who planted their corn this spring have made no progress with their crop, but, on the other hand, have increased the amount of work to be done.

Why Ready for? Service Clothes?

Because you see the finished suit, you know how it looks on you. Because you know it fits you. Because you can select from any number of good styles to suit your preference. Because you buy them at half a good tailors price.

Why, Buy Men's and Boys' Clothes at this Store?

—Because a reliable guarantee stands behind every purchase. —Because our price is the price that you can pay. —Because our clothes stand for service, style and workmanship.

SUITS, PANTS, WORK CLOTHES.

Agricultural Unpreparedness.

Had America entered the war when Germany committed the Lusitania murders this country would now be somewhat prepared agriculturally. At present it is not at all prepared.

Now is planting time. The goose is pilled by seed dealers as briskly as they can get it. It is being piled by coal miners and by food purveyors whose business the Federal Government proposes to regulate. Seed control will follow, as a matter of course, with a view to insuring the country—fairly—against a seed famine, and against the robbery of planters by the holders of seed. In the meantime farmers are finding it hard to secure some varieties of seed, and hard to pay for the varieties that may be secured. It is stated that the canners bought up the soy beans, using them to mix with navy beans and paying prices higher than the market price. That may be true, and again it may be an excuse for charging \$6 a bushel for soy beans. It matters not, insofar as agricultural preparedness is concerned, whether the man who would plant cannot find seed at reasonable prices, and cannot find some varieties at any price whatever. The fact is that while everyone is urging everyone to plant more than ever before was planted the list of available varieties of seed has gaps in it, and prices are so high that cautious farmers are wondering whether they will make a profit upon some of their crops, even if the season should prove favorable.

The Department of Agriculture is on the stump with the slogan "Plant, Everything everywhere, everywhere, every minute, every man." A Louisville—who would be proud as an amateur gardener goes to a seed store and asks for a packet of lima beans, or black-eyed peas—having grown modest in his demands, and willing to eat black-eyed peas next winter if he can get them—he is told, as often as not, that the dealer has sold out, and that if he goes to a grocery and buys he may get dried beans or peas in which the germ has been killed.

The farmer inquires for this or that and the seed dealer replies that he hasn't heard of the commodity being in the market for some time. When the dealer has three bushels left which he can sell today for twice its normal cost, but for which he will have to charge more tomorrow.

Had we gone into the war when the Lusitania murders were committed we should have begun the necessary stimulation of production before the needs of the Allies had drained our markets of agricultural products. We should have begun seed control, along with food and fuel control in time to have secured a sufficient supply of seed before the beginning of the planting season of 1917; in time to have avoided the sale of seed as food if that has occurred to an extent sufficient to avoid the embarrassment of agriculture, this year.

Germany gained in many ways by feeling out American sentiment by means of the Lusitania murders in advance of the general submarine onslaught, so as to know exactly what to expect of America when the real submarine campaign should be inaugurated. Germany could not come to market, to help the Allies drain America of supplies, but she could observe with pleasure the increasing prices in America, the cut-throat gambling in all necessities which proceeded merrily while Kaiserism pacified the pacifists united in crying aloud that there was no probability of war; no necessity for war; no defense of war, involving America.

Fortunately the greatest American crop to be planted this spring is one upon which seed dealers can have little effect. A majority of farmers save their own seed corn. They did so for reasons of economy long before Federal and State agricultural agents advised them to do so for reason of safety. Few of them, comparatively, have been forced to buy seed corn, at above \$3 a bushel, from seed stores this spring. All of them, virtually, will guard against having to buy it next spring, but few of them are equipped to save their own peas, soy beans or clover seed, where the crop produced is not large enough for the hulling to be undertaken upon a commercial scale. The 1917 corn crop, practically the only spring planted 1917 crop that is unaffected by famine prices for seed.—Courier-Journal.

Be Careful With Dynamite.

To Whom It May Concern:—In view of the present emergency confronting the country, it is of the greatest importance that all those who have dynamite or explosives of any kind for sale, make a record of such sales, as to amount sold, purpose and the person to whom sold, and date. Attention is called to Section 1374, Kentucky Statutes, which reads as follows:

"Dynamite—Selling or giving without keeping register. That it shall be unlawful for any person to sell, loan or give any dynamite or caps therefor, within this Commonwealth, without keeping a register of the same, and of the date of sale, and for what purpose, to be used. Any person violating any of the provisions of this section shall be fined in a sum not less than twenty-five dollars nor more than one hundred dollars for each offense."

It is requested that copies of these records be furnished the County Attorney of your county, and copies will be sent by him to the Governor.

J. TANDY ELLIS,
The Adjutant General.

POULTRY

BREEDING GEESSE FOR PROFIT

Fowls Should Have Considerable Exercise and Be Kept Moderately Thin During Winter.

Old geese lay a greater number and larger eggs and are more reliable than young geese. Nevertheless, if geese must be purchased it often saves time to buy young geese rather than to attempt to secure any number of old ones. Young geese are better for breeding purposes than young geese. Young geese do not lay as many fertile eggs or produce as many goslings in the first breeding season as they do in the second. If geese are often changed

Emden Gander.

from one place to another they are apt not to breed well, and other conditions being equal, they breed better the third season they are in a locality than the second.

Breeding geese should have considerable exercise and be kept moderately thin in flesh through the winter by light feeding and a free range of facilities for exercising. The Emden geese lay few eggs but make mothers. Geese are grazers and too much grain is not good for them. To insure fertile eggs they should have an abundance of green food and have access to a pond or other body of water. If this is not possible a tub of water set level with the surface of the ground may be substituted.

Very early hatching is not desirable, since the goslings do not thrive well unless they have an abundance of grass. For the first two or three days they should be given nothing except grass and water. Later a little feed of scalded cracked corn should be given in addition three times a day. The goslings are liable to be overcome by the heat, and should always have some place of retreat where they may escape the sun's rays. The eggs may be hatched advantageously under hens, but the goslings should be immediately taken away from them. They may be brooded for a short time in outdoor brooders and after that confined in houses at night.

TURKEYS LACK IN VITALITY

White Holland Breed as Hardy as Any Other—All Fowls Easily Susceptible to Disease.

White Holland turkeys are, as a rule, as healthy and hardy as any other

White Holland Turkey.

variety, but the great trouble with turkey raising in the United States has been the tendency to too close inbreeding. The present stock lacks vitality and stamina, are easily susceptible to disease, and hence the losses sustained by those who breed them. Observation shows that the birds raised by farmers having free range of the grass fields are the profitable birds. Why? They get exercise, uncontaminated ground usually roost in trees and get their drinking water at some branch or near by stream. All the causative agents are avoided. The present effort to correct the tendency to weakness in turkeys, because of inbreeding, through the introduction of wild blood, is meeting with some success.

ANIMAL FOOD FOR CHICKENS

During Winter Something Must Be Provided to Take Place of Grass, Hoppers and Other Bugs.

In the summer when the hens lay well they have bugs, worms, grasshoppers and other insects. In the winter they need something to take the place of this kind of food. Cut fresh bone is very good. Half an ounce daily per hen supplies all she needs of this food. High-grade beef scrap is good and is a very convenient form for feeding. —North Dakota Experiment Station.

PLANTS ARE FACTORIES

PLANTFOOD IS FOUND IN THE SOIL.

Railroad trains run through the land, collecting and hauling material to the factories in different cities and towns. Likewise the plant roots gather up raw available plant food of the soil and carry it to the stalk where it passes up to the leaves and is digested in the green matter or chlorophyll with the help of the power that comes from the sun. The leaves of all plants are the factories that manufacture the raw plantfood of the soil into digested food that is used to build up every part of the plant, including stalks, leaves, roots, fruit, grain, etc. The wider the leaf and the more leaves on the plant the greater the stomach—digestive surface—consequently the more plantfood that can be digested. This reason so many farmers get small crops is that they do not have enough leaf surface to digest plantfood.

Peter J. Lux, the champion grower of Indiana, was well aware of this important fact when he selected his corn alone for the ear but for a wide leaf to digest more plantfood. As a result of this fact he won many premiums and medals on his corn, including a \$500 prize at Whiteville, Mo.

In selecting any seed, care should be exercised to see that its different characteristics suit it to the particular region where you want to grow it. Then see that the seeds are supplied with humus and plantfood by adding both manure and fertilizers. The larger the leaf or stomach of the plant the larger the quantity of plantfood that can be digested if it is at hand consequently the larger and better the crop that can be grown. This is efficiency and efficiency is what we as farmers should ever keep before us this year.

MORE MONEY FROM WHEAT

Wartime Prices Mean Big Top-Dressing Profits.

Wheat has brought wartime prices for the past two years. Most of the 1916 wheat crop was sold for over twice as much per bushel as was obtained by farmers a few years ago. Every extra bushel counted double last year. The world must be fed, and the continued demand upon the American producers must mean high prices for 1917 wheat.

Early reports show that the condition of the winter wheat planted for 1917 was from 15 to 20 per cent below normal and that the crop went into the winter in bad condition. The outlook for big yields is not glowing. Crop experts assert that the 1917 wheat crop is bound to bring excellent prices. You cannot increase your 1917 winter wheat average now, but you can increase your yield from 15 to 50 per cent by spending a little more money on each acre. Extra bushels mean extra dollars. Labor costs and other overhead charges per bushel are kept down, and net profits showed up when greater yields per acre are obtained. This year of all years, spending a little more money than usual on the wheat crop will pay big returns.

Less than two bushels of wheat at present prices will pay for actual money outlay per acre for top-dressing; five to ten more bushels per acre from top-dressing with fertilizers is not unusual. Figure your average, estimate for yourself next fall prices, and watch the subject of top-dressing on its merits as an investment that will bring large returns.

Plantfood Makes Crops. The tiny wheat plant must have special nourishment as soon as it wakes up in the spring, which is before much of the plantfood in the soil becomes available. Big crops demand enormous quantities of plantfood. The biggest help you can give your wheat crop this spring is to apply a top-dressing of 100 to 300 pounds per acre of fertilizer, analyzing 2 to 4 per cent of ammonia, 8 to 12 per cent phosphoric acid in an available form.

The fertilizer should be broadcasted or distributed on the wheat through the fertilizer attachment of the wheel drill, with the lime spreader, or other fertilizer distributor. If the wheat drill is used, leave the disks suspended so that they will not cut the wheat plants. Apply this fertilizer before the field is rolled or harrowed. Harrowing will work it into the soil where the roots can get the plantfood. You can carry on these operations until the wheat is up four inches in height without injury to the crop.

Top-dress, grow more bushels per acre and increase your bank account.

TOP DRESSING It is possible, by POSSIBILITIES, top dressing to bring back enough run-down meadow and rough hillside in the country, and this with the one dollar investment in the cost of spreading the fertilizer. Results obtained at the Rothamsted station can be duplicated in this country and are being duplicated in increasing measure.

Oats appear to be making a very slow growth.

Clover Leaf Creamery is paying 43 cents for cream this week.

It seems that primary political campaign contests are made up.

Big picnic at the Harvest Home grounds next Saturday afternoon.

Attribute the unfavorable crop conditions to the war in Europe.

Grass has been of very slow growth this spring on account of the cool weather.

Bullittsville Christian church will have Children's Day exercises at 3 p. m. next Sunday. All are invited to attend.

Chas. Cline has everything in readiness for the big picnic at Harvest Home grounds next Saturday afternoon.

Five dollars spent on kitchen utensils would make the difference between drudgery and pleasure to many a housewife.

Monday is county court day and the next day is enrollment day, for which everything in this county is in readiness.

Prof. Garnett Huey and wife, of Middleburg, this State, are guests of his parents, Mr. and Mrs. R. B. Huey, out on the Woolper pike.

Mrs. Kate Lewis and sister, Miss Cora Stevenson, of Newport, Ind., were guests of Mrs. Eliza Rouse, last Saturday night and Sunday.

Mrs. Babe Riddell returned last Sunday afternoon, from a Cincinnati hospital somewhat benefited by a two weeks' treatment.

Texas began the harvesting of a 15,000,000 bushel wheat crop last week, said to be 10 per cent more than that State produced last year.

That cold wind that prevailed Easter day is disposed to stay on the job all summer, not letting up at the end of the forty days, its allotted time.

J. M. Eddins says that on his potato vines are young potatoes as large as a partridge egg, and the indications are there will be plenty in a hill.

Caddie Maurer is very much pleased with the performance of the pullets he has in egg laying contest in progress at Lexington. They are consistent layers.

Mrs. John M. Lassing and son John, of Newport, were guests of her parents, Mr. and Mrs. R. A. Brady, of Bellevue neighborhood, last week. She returned from Fla. the week before.

It may be that Boone county has no more than the usual acreage of broken corn this year, but if that is the case the broken fields are more in evidence than for several years.

Prepare to call all the fruits and vegetables it is possible to get hold of. Everything eatable will be in demand before the 1918 crop is produced according to prediction of those who claim to be food wise.

Representatives of the Stewart's Iron Works, Covington, were in Burlington a few days since looking over the ground preparatory to making a bid for putting an iron fence around the old cemetery for R. W. Campbell, of Cincinnati.

Joseph Love was slightly injured by a fall received while leaving the bus at Bellevue Lane Wednesday morning. His foot was caught while the bus was in motion, throwing him to the ground bruising and wrenching his knee.—Rising Sun Recorder.

Jeff Williamson, one of the contractors on the Rabbit Hash and Gunpowder creek road, known as the Union Grade, was in Burlington last Friday. He is one of the county's best road men, and will do a good job in the construction of his road, which he wants to hasten to completion.

A plan to destroy the German crops by setting them on fire by means of fireballs dropped from Zeppelin aeroplanes is suggested by Lord Calthorpe, a former member of the British army who has given much thought to the food situation brought about by this war. Lord Calthorpe married a daughter of Ogden Hoffman Brown, of Newport, R. I. The idea is not altogether original with Lord Calthorpe. The wheat fields of the Philippines were burned as a war measure but the fireballs were attached to the tails of foxes.—Hopkinsville Kentuckian.

KEEPING INSECTS OUT

Where Possible, Make Building Foundations of Stone.

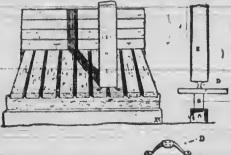

Dryness Is Important Factor in Rendering Structure Safe From Attack of White Ants—Protection of Living Trees.

(By T. E. SNYDER.)

To avoid a plague of white ants, make the foundations of all buildings entirely of stone, brick or concrete, including stone columns or pillars in the basement to support the floor above; make the walls and flooring in the basement or cellar also of concrete, and lay concrete floors on a gravel base. Fill in and round off points of juncture between concrete walls and flooring so that these will not meet at right angles.

Where stone or concrete foundations are impracticable, use timber impregnated with coal-tar creosote.

Complete dryness of the foundation and basement walls and flooring is an

Properly Laid Platform Planking and Foundations for Pillars. A, Concrete Base; B, Stringers; C, Planking; D, Iron Rest; E, Pillar.

Important means of rendering buildings safe from attack; therefore, provide for air spaces between the ground and wooden flooring and lay concrete floors on a gravel base.

In greenhouses, replace woodwork, wherever possible, with iron frames and concrete work. Treat necessary woodwork, before use, with a 1 per cent solution of bichloride of mercury.

Owing to the subterranean habits of white ants, it is extremely difficult to prevent or remedy injury to living forest, fruit or shade trees. Care should be taken that the trees do not become scorched near the base, in order to prevent heartrot and subsequent infestation. Clean forest, orchard and horticultural management is to be recommended. Properly executed tree surgery sometimes may be effective in repairing damage to valuable old trees. Dead and dying infested trees should be removed and burned. Prunings should be burned promptly.

Injury to nursery stock will be most serious on recently cleared land where there is abundant decaying wood. Such debris, in which the insects breed, should be removed. In general, the use of recently cleared land should be avoided in planting nursery stock. Care should be taken not to allow the roots to dry out before planting; such weakened stock is liable to attack. In the case of the pecan, it is recommended that two or three cereal crops be grown on newly cleared land before the young trees are set out. The use of commercial fertilizers instead of stable manure is suggested. Deep late-fall plowing should be of value in breaking up subterranean nests. The practice of better farming methods, with rotation of crops, will prevent damage to field crops.

In vineyards care should be taken in pruning operations; all dead or diseased vines should be removed. All pruned areas should be painted with coal tar, and the prunings should be burned promptly.

AVERAGE FOR DAY'S PLOWING

Much Depends on Size of Plow and Number of Horses Used—Figures by Missouri College.

Farmers frequently want to know how much land can be plowed in a day and how much work it requires to break an acre. Records at the Missouri college of agriculture, on 2,122 acres of land, show that it required 3.4 hours of man labor and 9.3 hours of horse labor for each acre. Of course, the time required to plow an acre will depend on the size of the plow and the number of horses used. A four-horse gang plow with two 12-inch bottoms will average about 4.12 acres a day of 9.6 hours, when it is running 6 inches deep. The same plow running 8 inches deep will break a quarter of an acre less. A three-horse sulky with a 14 or 16-inch bottom will average about 2.5 acres at a 6-inch depth, and about 2 of an acre less for the 8-inch depth. A two-horse, 14-inch walking plow will break about 1.75 acres a day at a 6-inch depth, and about .2 of an acre less at the 8-inch depth.

FIGHT CONTAGIOUS ABORTION

Annual Losses From Disease Amount to Millions of Dollars—Bulletin Gives Details.

Stockmen and Dairymen are urged in a new Farmers' Bulletin, No. 700, to inaugurate a systematic campaign against contagious abortion.

Already the annual losses from this disease amount to millions of dollars, and unless its ravages are checked it is apt to equal tuberculosis, which is now thought to stand first among animals in point of economic loss.

Details of the disease and its treatment are given in the bulletin referred to, which may be secured upon application of the United States department of agriculture, Washington, D. C.

POULTRY PROVERBS

A laying hen is better than a standing infill.
A large rooster does not suffer a small one to crow.
A setting hen never grows fat.
Black hens lay white eggs.
Every rooster scratches toward himself.
Every hen knows how not to tread on her own chickens.

TOADS ARE VALUABLE ASSET

Of Special Value to Gardener Because of Cutworms It Devours—They Are Not Poisonous.

That toads are of economic value, particularly to the gardener, is the assertion of Dr. J. E. Ackert, associate professor of zoology in the Kansas state agricultural college.

"It has been estimated that one toad is worth \$19.44 in a single season because of the cutworms it devours," said Doctor Ackert. "Approximately 88 per cent of the food of the toad consists of garden pests."

"The toad is nocturnal in habit, coming out in the dusk to search for food, which consists mostly of insects and their larvae. During the day it sleeps in its burrow, made by bucking into the soft earth or dense vegetation."

"Toads are of special value, since they are accustomed to live in gardens, where insects are most injurious. In some sections of the United States the gardeners even buy them to aid in keeping obnoxious insects under control."

"The popular belief that toads are poisonous is erroneous. They possess a rough, warty skin, which, however, does not cause the formation of warts upon the hands of those who handle them, as is often supposed."

BEANS NOT DIFFICULT CROP

Trouble Comes at Harvest Time When Work Must Be Done by Hand or Special Harvester.

Beans will grow well on almost any good corn soil. They are fairly easy to plant and cultivate, and would be grown in far larger quantities than they are, were it not for difficulties at harvest time. At that time, beans must either be pulled and hunched by hand, or the work must be done by a special bean harvester. The vines must be left in the field for several days, to dry out, and during that time there is the risk of wet weather. Beans may be threshed by hand, but that is slow work. Some have tried threshing them with the ordinary grain thresher, but that breaks too many beans. The only satisfactory method seems to be to use a special bean thresher. Special bean machinery which is really necessary for properly harvesting the crop, costs several hundred dollars.

PRODUCTION OF GOOD FRUIT

Making of Honey Is Side Issue in Important Work of Bees—Necessary for Strawberry.

The making of honey is a side issue in the important work of bees, according to Dr. J. H. Merrill, assistant professor of entomology in the Kansas State Agricultural college. Without bees, there would be little fruit and little alfalfa or clover seed.

"The strawberry is a plant for which insects are necessary to produce good fruit," said Doctor Merrill. "In some varieties the staminate and pistillate flowers are born on different plants. Experiments have been undertaken to determine whether the wind could carry pollen. Gelatin plates were exposed which would contain pollen grains if

Easy to Handle Bees.

carried by the wind. In not a single case were pollen grains of the strawberry found. The regular pollinators of the strawberry are honey bees and other small bees.

"Bees are important in pollinating the cucumber. Tomatoes are sometimes self-pollinated, but bees are an important factor in producing good fruit. The size of the fruit is slightly increased."

BEES IMPORTANT IN ORCHARD

Wind Cannot Be Relied Upon to Carry Pollen From One Tree to Another—Insects Do It.

The wind cannot be relied upon as an agency to transfer pollen from apple tree to apple tree throughout the orchard.

This work must be accomplished by the insects, and the honey bee is by all odds the most important of them all.

Endurance—the Supreme Tire Quality

United States Tires have proved that they have that supreme quality,

—that miles are packed into their structure the way endurance is packed into steel.

A vast number of the motoring public know that by experience,

—and they have answered in the only way that the buying public can answer,

—by giving United States Tires tremendous sales increases,

—sales increases that are vastly greater than even the sensational increase in the number of automobiles this year over last.

United States Tires Are Good Tires

A Tire for Every Need of Price and Use—

W. F. BRADFORD, of Florence precinct, is a candidate for clerk of the Boone County Court, subject to the action of the Democratic party at the primary election August 4th, 1917.

The editor of the Falmouth Outlook took a stroll to the Falmouth depot a few mornings ago, and here is what he says of his visit:

"The morning we happened there J. R. Earle, the accommodating agent of the road, was having his men line up six big trucks loaded with milk cans filled with milk, brought in from the sweet clover hills around town, that a great many of their owners used to, instead of bringing milk to ship, went home loaded with beer. As the reporter has an inquiring mind, and likes to figure, he asked Mr. Earle if the movement that morning was an average one, and he said it was. And we pulled out our stub of a pencil that belonged to some of the office force, and began to figure. The number of ten-gallon cans shipped was one hundred and twenty-eight, containing one thousand two hundred and eighty gallons of milk; and at twenty cents a gallon amounts to two hundred and fifty-six dollars. This shipment is made seven days in a week, bringing over one thousand seven hundred and ninety-two dollars; and fifty-two weeks in the year the grand total for milk shipped from the Falmouth depot is ninety-three thousand one hundred and eighty-four dollars—more money than the first bank established in Falmouth had on deposit. This amount of money brought in from milk does not include cream and butter fat shipped to Cincinnati. To make a reasonable estimate from inquiries from the shippers and the railroad agent, fifty thousand dollars a year is received by the farmers for cream, making for both milk and cream over one hundred and forty thousand dollars a year. This is the Aladdin lamp, that has changed the farmers. They now come to town in automobiles instead of horse-back or in the old phaeton."

Because the number of turkeys in the United States has constantly decreased in the last few years while the demand has perhaps increased, a more profitable side line than turkey raising for those favorably situated for the work could hardly be found. Given plenty of range, it is pointed out by the United States Department of Agriculture in Farmers' Bulletin No. 791, turkeys will readily find grasshoppers and other insects, green vegetation, the seeds of weeds and grasses, waste grains, and acorns and nuts of various kinds. In this way the cost of raising them is small and the profits large. Grain and stock farms are particularly well adapted to turkey raising, and it is in such places that most of the turkeys are found. Little has ever been done in the way of selling turkeys in confinement and when it has been tried the results have been discouraging.

Uncle Sam would make a hit were he to conscript a regiment of crows that are so destructive of life and property in this country. He would send the regiment to the front in behalf of the allies. The Germans would retreat immediately following the attack and the regiment would be kept up indefinitely.

County News Items

Interesting Facts Gathered During the Week by Our Regular Correspondents.

PETERSBURG.

A Red Cross demonstration was held here Saturday night under the auspices of the Knights of Pythias. About 6:30 a number of machines, decorated with flags and bunting, joined in a parade led by Mr. Chas. Shinkle on horse back, carrying the K. of P. flag. Next in line was a wagon decorated in white and loaded with children, appropriately dressed as Red Cross nurses grouped around "Uncle Sam." The machines followed. After the parade was over the crowd went to the Christian church where a patriotic service was held. The first number was "America," sung by the audience. The children saluted the flag and Rev. Carter made a fine talk, then introduced the first speaker, Mrs. Bernard Gaines, who came in the interest of the Red Cross work. Mrs. Gaines' address was extremely interesting and instructive and all of the points in the work were brought out in a most forceful manner. She emphasized the fact that the Red Cross work was NOT a "fad," as it is called by so many. Caring for wounded soldiers and suffering from all kinds of calamities, a fact? Indeed, No! Her closing remark was, "Let it not be said that the American women are behind the flag and women in caring for and standing by their men in this great war."

Rev. E. C. Riley addressed the audience on the same subject and closed with an appeal for members for the Red Cross. "Who knows but what the bandages made by the Petersburg women may be used to bind the wounds of a Boone county boy. Application blanks were passed through the audience and in a few minutes 61 members were secured. Enthusiasm ran high and "The Song to the Flag" by Mrs. R. E. Berkshire was received with great applause. A meeting for organization was held in the Christian church Sunday afternoon. Miss Elizabeth Walton was elected chairman; Miss Edna Berkshire, vice-chairman; Miss Ruth Snyder, secretary; Dr. J. M. Grant treasurer. Several more members were secured and the society expects to start to work in the next few days.

Mrs. J. M. Botts, Misses Agnes Thompson, Thelma Lyons and Ruth Snyder, Henry Matthews, Albert Stephens and Karl Botts, spent Sunday afternoon in Burlington.

Miss Cordie Early, who has been the home of Lloyd Vories near Union for the past few weeks, returned home Sunday.

Mr. and Mrs. M. L. Riddell and daughter, Miss Ruth Snyder, were Sunday guests of Rev. and Mrs. R. H. Carter.

John J. Cleek, who has been ill, is improving, his many friends are glad to hear.

J. C. Griffith ate home grown strawberries with Mr. and Mrs. C. Johnson, Sunday.

Mr. and Mrs. John Delahaunt and Miss Emma Cleek spent Saturday in the city.

Reva Hall and his Clure are holding a very interesting meeting at Hughes Chapel. Come out and hear them. Services at 7:15 every evening.

J. Hughes Johnson, of Memphis, Tenn., who is in the lumber business there, visited his parents, Mr. and Mrs. W. C. Johnson, last week.

Nearly all the young folks and some of the older ones attended the ice cream and strawberry supper at Big Bone, last Saturday night.

Mr. and Mrs. O. W. Cleek's daughter Catherine, was operated on Saturday afternoon at Bethesda hospital for mastoid and is doing nicely.

C. C. Sleet had the misfortune to lose six good Alderney heifers, nearly two years old a few days ago from his farm. One of his tenants had built some on the ground in burying it.

All the Christian Sunday schools in the county except two were represented at an interesting conference held by the Sunday school teachers of that denomination at the Methodist church in Burlington last Saturday.

The weather is very much to the liking of cutworms.

Mrs. Mary Hume remains in a very feeble condition.

The wire worm is getting in its devastating work in some corn fields.

The trouble with scandal is that people are all so willing to believe it.

Campbell-co., strawberries have been on sale in Burlington for several days.

Road builders have been delayed in their work by the weather the past week.

You can always tell what a man thinks of money by the things he will do to get it.

The temperature dropped Monday afternoon until overcoats became comfortable.

R. O. Smith and grandson, of Union, were callers at this office Tuesday morning.

Mrs. Dudley Blyth is in Petersburg, guest of her parents, Mr. and Mrs. J. M. Botts.

Several of the young people about town had the twenty-four hour measles last week.

Special price on Paris green this week, and cents a pound at Bentler's Drug Store, Erlanger, Ky.

For Sale—230 pound Duroc Jersey sow and eight pigs. Apply to Cabel Beemon, Burlington, E. B. 1.

Rain the first of the week knocked out several fishing parties arranged for on Decoration Day.

A. L. Nichols and wife visited her mother, Mrs. Mollie Clure, in Covington, the latter part of last week.

Kentuckians are booked to buy Liberty Bonds to the amount of \$15,000,000. How many have you bought?

If \$15 tobacco, \$16 hogs, \$14 ducks and \$14 calves don't make fat bank accounts for the farmers what will?

The local colored lodge K. of P. are planning to have a big picnic July 4th in J. E. Smith's woodland pasture.

A man can get himself liked by admitting that he was wrong, but few want that sort of popularity.

Dr. Carlyle and Rev. McNeely, of Rabbit Hash, were in Burlington Saturday afternoon enroute home from Cincinnati.

If you are of the required age and don't register June 5th, the Government will soon be after you for an explanation.

The mail auto went out of commission Monday evening between Burlington and Florence and had to be beached for repairs.

F. H. Rouse broke considerable land with his tractor this spring and was pleased with the work it did. This fall it will be used baling hay.

Those who will conduct the registration June 5th, should read closely several times the printed instructions with which they will be furnished.

A married woman will tell you that all men are alike, but what she means is that she has given up looking for a different one.—Detroit Free Press.

If individuals had to go thru with as much red tape in the transaction of their business as Uncle Sam does in his they would never accomplish anything.

Warm weather now would make everything grow, and the potatoes in the hill would soon begin to show one to the other. "Can't you lay over there a little more?"

The local trucks have been doing a big business the past few weeks. Some of the calves brought as high as \$24, as much as 2-year old steers used to sell for.

The Burlington tournament delegation had a nice day for their departure for Owenton. The conveyances consisted of E. E. Kelly's truck and two or three autos, and were routed by the way of Dry Ridge, Jonesville, etc.

Automobile tires 5,000 miles for \$3.00 each, good, don't lift. Well, it is just as good as it sounds. We are selling the famous Timexco auto tires, guaranteed 5,000 miles; \$2.95; \$11.90; \$20.35. Bentler's Drug Store, Erlanger, Ky.

The Recorder neglected to notify its correspondents last week to get their contributions in by Monday night, this week, as the force wanted to observe Decoration Day, consequently some of the correspondence is omitted this week, for which accept an apology.

We will have an all day meeting at Gunpowder church, next Sunday, June 3rd, and Saturday afternoon, June 4th, and Saturday evening, June 5th. The speakers will be Rev. W. A. M. Wood, Newport, Ky.; Rev. C. Connolly, Covington, Ky.; Rev. Albert Maddox, Union, Ky. Dinner on the ground. Come and bring a lunch.

C. T. Claggett

The Best Price Ever For Wool.

To say that the members of the Boone County Wool Pool are delighted with the price they will receive for their wool this year does not begin to convey any idea of the satisfaction the big sale affords them. When the bids were opened and among them was found one of 67.51 cents per pound it took the breath of the sales committee, but they remained on the job and were not long in awarding the purchase to that bidder who had broken several times over all previous offers made on Boone county wool. There is at least 45,000 pounds in the pool, and it will not the flock-masters of this county 67 cents a pound, bringing to their bank accounts the handsome sum of \$30,000.

On account of the unfavorable weather the delivery of the wool was not begun last Monday, but will begin today, Thursday, at Bullittsville and proceed in the order of delivery as published last week, the delivery being completed at Walton next Saturday.

Rhubarb Leaves Are Poisonous.

Because rhubarb leaves contain certain substances which make them poisonous to a great many persons, specialists of the U. S. Department of Agriculture warn housewives against using this portion of the plant for food. A number of letters have been received by the department calling attention to the fact that certain newspapers and magazines are advocating the use of rhubarb leaves for greens, and that disastrous results have followed the acceptance of the advice.

Paducah, May 27.—Owing to an favorable weather the movement of tobacco the past week was light. Recent rains, however, promises a good handling season this week. Buyers have continued light in the country and have purchased some tobacco, at prices a little higher than had prevailed for several weeks. About 20 per cent of last year's acreage has been planted, but worms are playing havoc with plants after they are set and will do so until the weather becomes hot.

To Kill Sorrel.

Sorrel can be destroyed by spraying with a solution of sulphate of iron, copperas, made at the rate of two pounds per gallon of water. The treatment will not permanently injure grass and will destroy the weed if repeated as often as the sorrel tries to set out new leaves. Iron sulphate is deadly to clovers and to many broad-leaved weeds, but is not injurious to animals or to the soil. The spraying method is useful where the sorrel occurs simply as patches in a good stand of grass, or for working around trucks and fences.

Georgetown, May 27.—A heavy hailstorm visited Scott county early this morning, devastating many wheat fields and other vegetation. The hailstones were the size of pigeon eggs.

The Louisville Tobacco Warehouse Company sustained a \$50,000 fire loss, and various local and foreign tobacco brokers lost well over \$100,000 worth of stored tobacco in a Main-street blaze early Sunday morning.

FARM ANIMALS

CHANGE TYPE OF LIVE STOCK

Except in Improvement of Dairy Herd It Is Tedious Process—Strive for Uniformity.

If one wishes to change the type of his live stock he will find various roads open to him and he may be confused as to which to take. First and most common, a sire of the desired type may be bought for the herd and year after year improvements may go on in this manner. But it is at best a tedious process, and, except in the improvement of the dairy herd, it had better be avoided. Life at best is not long enough to observe very marked results by this method.

A much better method in the case of beef cattle, sheep and swine, if many are kept, is to provide a few females of the desired type and also a few from them, the progeny of which shall be kept while the old type are gradually disposed of. It is surprising how quickly the type of the herd will be changed. Then again it is possible to sell off the entire lot of cattle or other live stock on the farm and to procure three of the desired type at one time. This is the ideal method if it is financially practicable.

The one great thing to be desired in a herd is uniform excellence and the easiest and least expensive method of bringing this about is the one to be adopted.

RATION FOR GROWING COLTS

Two Parts Oats and One Part Bran Makes Suitable Feed—Add Little Corn in Winter.

Two parts of oats (preferably crushed) and one part of bran make a very suitable feed for growing colts. In cold weather a little corn may be added not to exceed 25 per cent of the ration. If clover or alfalfa is used as half of the roughage ration, no oil meal will be needed, but if the roughage consists of wild hay or corn stover, about 8 per cent of oil meal should be added to the grain ration. Where oats are high in price and barley is plentiful, a ration of crushed barley 60 per cent, bran 30 per cent, and oil meal 10 per cent should give good results.

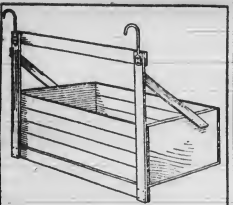

There is a little danger of overfeeding a colt if it is properly exercised. A colt should receive at least one pound daily for each 100 pounds of live weight, and if out in the cold a little more may be used to advantage.

Growth can be made more rapidly and cheaply during the first year than at any other time, and feed should not be spared at this time.

GOOD FEED BOX FOR HORSES

Device Arranged to Fit on Wagon for Feeding Work Animals—Prevents Waste of Grain.

A teamster who is obliged to feed his horses during the noon hour at the wagon has devised a feed box to take the place of a nose bag, writes Kanin, V. Dettler of Manhattan, Kan., in Popular Mechanics. When the box

Wagon Feed Box.

is hooked over the top edge of the wagon box the height is just right for the horses. The box prevents waste of grain and provides a better way to feed the horses than in the wagon box.

FATTENING RATION IN IOWA

By Reducing Corn and Increasing Silage Rapid Gains Were Made With Less Expense.

Silage has cheapened the fattening ration for steers in Iowa. One lot, receiving each per day 17 pounds of silage, 29 pounds of corn, 2 pounds of alfalfa and 1 1/2 pounds of alfalfa, made gains at a cost of \$9.57 while another lot, receiving 8 1/2 pounds of corn, 51 pounds of silage, 2 pounds of alfalfa and 1 1/2 pounds of alfalfa, made gains at a cost of \$7.57. The first lot averaged 2.94 pounds gain per day while the second lot averaged 3.04 pounds. Reducing the corn and increasing the silage increased the gains and cut down the cost of making gains.—North Dakota Agricultural College.

PREVENT WASTE OF MANURES

Careful Attention Should Be Given to Barn Yards and Other Places Occupied by Cattle.

Careful attention should be given to the prevention of waste of manure in the barn lot and other yards occupied by the cattle. With the high price of potash now prevailing, it is also important that all good manure be saved and applied.

THE DAIRY

HAY SUPPLY FOR DAIRY COWS

Roughages Are Relatively Cheaper Than Grain, but Should Not Be Fed Exclusively.

"Because of the large hay crop and the small demand for it now, roughages should be fed to the limit of the dairy cow's capacity," says Prof. C. C. Hayden of the Ohio experiment station. "Relatively, the roughages, like hay and corn stover, are much cheaper than grains, and hay is of unusually good quality. Roughage, of course, should not be fed exclusively, as such feeding might lead to compaction and death, even in dry cows and heifers. Some grain is needed in every dairy ration." This dairy specialist also declares "choice alfalfa hay at \$20 a ton is cheaper than bran at \$30. Our experiments show that soy bean hay is in the same class as alfalfa, and clover is third. With corn at \$1 a bushel, clover hay should be worth about \$20 a ton, or \$5 more than it is now quoted."

"Timothy hay is recommended for milking cows only in small quantities, to replace such grains as corn and timothy. Leguminous roughages have proved far superior in numerous experiments to timothy for cows in milk."

PROFIT IN DAIRYING

To make dollars in dairying, keep cows that are money makers.

Feed silage or other succulences, plenty of good roughage and grain in proportion to production. Supply plenty of fresh water. Ventilate barn thoroughly. Produce the best possible products.

RECORDS OF BIG ASSISTANCE

Help Breeder Answer Questions From Prospective Buyer of Herd Sire—Write for Details.

The present sharp competition in the dairy business and the increased price of feed force the successful dairyman to secure the greatest return possible from his outlay. If he has registered cows he expects more for his progeny than if he had only grades. But to obtain more and to charge for it properly he must have a record. L. W. Wing, Jr., of the Missouri college of

Champion Shorthorn Bull.

agriculture, reminds the dairymen that he must be able to answer the following questions from the prospective buyer of a herd sire. Is the sire registered? What is the record of his dam? How many advance registry daughters and proved sons has his sire? And what are the records of his granddaughters and grandsons? If the breeder is selling a registered cow he must answer: What is her record, the record of her dams and granddaughters and the ability of her sire and grandsons to produce advance registry daughters and proved sons.

To answer these questions and meet the demands of buyer the breeder of purebred cattle must do official testing. This testing is under the supervision of the various state colleges of agriculture. Breeders ready to take up this work or wishing further information, should write to the dairy department of the college of agriculture of their respective states.

CORK-BRICK BARN FLOORING

Non-Absorbent and Adapted to Needs of Farm Animals—Laid in Cement Over Concrete Base.

The search for a warm, non-absorbent flooring suited to the needs of horses, cows, hogs and sheep has led to the adoption of cork brick. The brick as described in Popular Science Monthly, consists of finely granulated cork and refined asphalt, heated and thoroughly mixed, and then molded under pressure into bricks nine by four by two inches. The flooring is laid in cement mortar over a sub-base of concrete and crushed stones or ashes.

MILK ALL COWS THOROUGHLY

Little Extra Time Required After Usual Amount Has Been Secured Will Pay Dividends.

Sufficient time ought to be taken to milk the cows thoroughly even if so much other work on the farm cannot be accomplished.

A little extra time required to work and milk the cows to the point where milk has been obtained will pay dividends and sometimes make a profit where otherwise there would have been a loss.

SEASON OF 1917.

This fine stock will make the season of 1917 at Florence Fair Grounds, Florence, Ky., from May to July 15. You are invited to examine this stock before booking your mares.

JIM WILKES,

2:17 1/4

Will make the season at \$15.00 to insure a living colt.

JIM WILKES is a mahogany bay, 15 1/2 hands high, weighs 1100 pounds, was sired by Thredkeld's Jim Wilkes; dam by Conner's Almost.

MAJOR

The Percheron Draft Stallion will make the season at \$10.00 to insure a living colt.

Major is a beautiful black, 17 hands high and weighs 1700 pounds in ordinary condition; bred by Joseph Moore, of Ottawa, Illinois.

THE FINE BREEDING JACK, MIKE

MIKE, known as the James A. Huey Jack, will make the season at \$10 to insure a living colt.

Mike is a black Jack, 15 hands high, has heavy bone, large head and ears. He was sired by Mike, known as the Riddell & Bodie Jack by Bourbon Chief.

All reasonable care will be taken to prevent accidents in handling the above stock, but we will not be responsible should any occur.

A lien will be retained on all colts until season money is paid, money due when mare is parted with or bred to other stock without our consent.

A. F. CONNER, ED MICHELS,

J. G. RENAKER, C. H. TANNER.

Phone, 116, Florence, Ky.

THE PERCHERON STALLION,

MAGNETTE

Will make the present season on Thursday Friday and Saturday of each week at my stable 1/2 mile below McVillie, Boone County, Ky., and on Monday, Tuesday and Wednesday of each week from 9 a. m. to 4 p. m. at my farm near Commissary on the Burlington & Bellevue pike, and his service fee will be \$10.00 to insure a colt to stand up and suck, but if the said fee be not paid within sixty days after due it will be \$12.00.

THE FINE YOUNG JACKS, Bob Starlight and Jim,

The fine young Jack Bob Starlight, will make the season at my stable at McVillie on the same terms as those of Magnette.

The splendid Jack, Jim, will make the season at my farm near Commissary on the same terms as those of Magnette.

In handling the above stock care will be taken to prevent accidents, but I will not be responsible for any that may occur.

No business done on Sunday.

XEN SCOTT, Grant, Ky., R. D.

To Farmers and Breeders

The Percheron Stallion, Prince, will make the present season at my stable on the old W. T. Winston farm on the Mingo pike, at \$10.00 to insure a live colt to stand up and suck. Care will be taken to prevent accidents but we will not be responsible should any occur.

DESCRIPTION AND PEDIGREE. Prince is a handsome 8 year old black, with white star in forehead, weighs 1600 pounds, was foaled April 1909, owned by Joseph Moore, of Ottumwa, Illinois. 1st sire: Voltair 2257, 2nd sire: Phoebe 4542, 3d sire: Narcisse 21922, 4th sire: Paul 31453. Dam: Fashion 4608, 2d dam: Lena B 2629, 3d dam, Arcton 1998, 4th dam: Pride of Barth 1841. R. J. & EDWARD MICHELS.

Don't be a pleasure hunter. Do a man's part in this world and all the pleasure you need will overtake you.

Hips will be flat this spring, according to an authority on such matters, but so long as the fashion doesn't extend to tines we should worry.

If women correspondents would not add so many postscripts to their letters, it might keep the paper shorter.

The Fine Belgian Stallion,

Don Degozee

Belgian Draft Stallion will make the present season at my stable one and a half miles north of Hebron, Boone county, Kentucky, at \$10 to insure a colt to stand up and suck, money due when colt comes out or the mare is parted with or leaves the county.

Don Degozee, despite his great size and weight, is well balanced, tough, and perfectly proportioned and is a perfect type of a saddle horse with a fine finish and action, a champion in his class from a colt. His sire is Dandy Jim, the well known show horse. For official pedigree call on the undersigned. Great care will be taken to prevent accidents, but I will not be responsible for any that may occur.

HANDS, ARMS, LIMBS ASLEEP

And Was Run-Down, Weak and Nervous, Says Florida Lady. Five Bottles of Cardui Made Her Well.

Kathleen, Fla.—Mrs. Dallas Prince of this place, says: "After the birth of my last child...I got very much run-down and weakened, so much that I could hardly do anything at all...I was so awfully nervous that I could scarcely endure the least noise. My condition was getting worse all the time...I knew I must have some relief or I was in the bed and in a serious condition for I felt so badly and was so nervous and weak I could hardly live. My husband asked Dr. said, 'It's a good medicine, and good for that trouble,' so he got me 5 bottles. After about the second bottle I felt greatly improved...before taking it my limbs and hands and arms it would go to sleep. After taking it, however, this poor circulation disappeared. My strength came back to me and I was soon on the road to health. After the use of about 5 bottles, I could do all my house-work and attend to my six children besides."

You can feel safe in giving Cardui a thorough trial for your troubles. It contains no harmful or habit-forming drugs, but is composed of mild, vegetable, medicinal ingredients with no bad after-effects. Thousands of women have voluntarily written to the good Cardui has done them. It should help you, too. Try it.

Take your County Paper.

SOME CITY HINTS.

In Alameda, Cal., the board of health proposes to put placards on houses that they have found to be "dirty" or "filthy" and these are the words the placards are to bear, says Ohio State Journal. It is thought that a person whose house has been officially declared as "dirty" will do some cleaning up and make his premises respectable. In Springfield, Mass., when a contractor occupies a portion of the street and sidewalk for his work and material, he is charged 50 cents a day for the use of the public space. This is right. He has no business to discommode people without paying for it. Besides, the charge will induce him to get through with the obstruction as soon as possible. Evansville, Ind., operates a coal yard and sells coal at from 25 to 33 per cent cheaper than the prevailing prices. The city sealer bought 1,600 tons of coal and sold it at 12 cents a bushel, which is only \$3 a ton. In connection with the coal yard is a municipal market, where pork, potatoes, butter and eggs were sold at 15 cents apiece instead of 35 cents. That looks like a good place to live. At Boston, Mass., the school-children are rallied to clean up the streets by gathering paper and other inflammables, of which they are allowed to make a bonfire, which provides great fun for the youngsters. Thus a clean city and the joy of the children go together. The city manager movement is spreading rapidly all over the land. Twenty cities adopted it in 1916. There are two cities in Pennsylvania, Titusville and Grove City, that have the city manager plan without the commission appendage. In these cities the city managers have been employed by the regular councilmen. In Utah there was a contest among its 162 cities and towns to see which should capture a prize for being the best-kept city in the state. The contest awakened great interest and the result is a marked improvement in the appearance of character of all the cities of Utah. The city, the home of the citizen, is the most important place in the world to him and he should be devoted to every phase of its uplift and improvement.

Among the American industries which have received an impetus by reason of conditions growing out of the war is the manufacture of chemicals and electrical porcelain, the development of which within the past two years, it is said, has exceeded that of the preceding decade. The last meeting of the New York section of the American Electro-Chemical society was devoted to this subject. With the opening of the war, it appears, domestic chemists were forced to use American porcelain as the German supply became exhausted. There are some tests which the American manufacturer has not yet been able to meet, some problems that remain to be solved, but the consensus of opinion at the meeting was that for an extended range of uses the American product stands up as well as the German and in some instances is superior, says Milwaukee Wisconsin. The absence of certain clays which are available to the German has been one of the difficulties that has hampered progress. This may lead to increased activity in the testing of American clays.

The losses to Norway's shipping arising from the war have been greater than those experienced by any other neutral and stand second to those of only Great Britain and France. In spite of this gradual reduction in tonnage, Norwegian shipowners have placed orders for a large amount of new tonnage in home and foreign yards. The total amount is estimated at about 1,200,000 tons, a large amount of which is to be built in American yards. A considerable number of steamers are to be constructed in Canada and some in China. Newly built steamers have also been recently bought in Japan. The ships in hand or on order in Norway number 155, of 171,150 tons. The cost of all this new tonnage, however, is high.

Movie producers still contend that the stars get all the money. That isn't going to create any sympathy for them among the movie fans who worship "idols of the screen." To them such an arrangement seems right and proper.

The announcement that radium is cheaper will not go far to reconcile collectors to the high cost of living, because radium is no longer regarded as a necessity of life to the extent that it used to be.

Franklin—Reports from different sections of the county indicate that the largest corn crop has been planted in the history of the county. An average tobacco crop has been set.

1917 CHAUTAUQUA

List of Those Behind the Chautauqua to Be Held in Burlington July 16, 17, 18.

Following are the names of the guarantors for the financial success of the 1917 Chautauqua as they appear on the contract, for the Chautauqua which will be held in Burlington this year on July 16, 17, and 18th, and as it is necessary that a meeting be called to make arrangements for holding the Chautauqua, appointment of Committees, etc., all parties whose names appear below are requested to meet in Burlington, Saturday afternoon, June 9th at 2:30 o'clock p. m., at the Court House of point the necessary committees on arrangements and attend to any other business necessary for the success of the 1917 Chautauqua. You are bound for \$150 in case the sale of tickets and gate receipts do not amount to \$400. Attend this meeting and all pull together for another successful Chautauqua. The program is better and bigger than last year and the season tickets will be \$1.75 for adults and seventy-five cents for children. Be sure to attend this meeting Saturday:

A BARGAIN.

(Boston Globe.)

The plain American, who today for the first time in his life is offered Government bonds, should not make a mistake about the situation. There is no necessity for begging him to buy a Liberty bond. Uncle Sam doesn't need any beginning, the plain American is being called to do a part of his war duty by such buying, and incidentally he is making a very certain investment in the best investment in the history of the world.

Liberty bond is a first mortgage on Uncle Sam's farm, the richest land under the sun. The security behind the bond is infinite. There is no possible danger of loss of principal or interest, and that interest at 3 1/2 per cent is very liberal, when exemption from taxation is taken into account.

There is not only absolute safety, but a chance of profit. If the war is long, a holder of a Liberty bond may see his interest rate increase to 4, 4 1/2, even 5 per cent. If the war is short, the value of the bond will certainly increase. Before the war Government 3 per cent bonds sold at 100 to 102. The Liberty bond at 3 1/2 or better will surely go higher.

In the Liberty loan, if ever, duty is a privilege, patriotism is a bargain.

POOLED WOOL DELIVERED.

The Boone county wool was received last week by the purchasers, Rosenthal & Sons, of Louisville, bringing thirty-one thousand and four hundred and fifty-six and four pounds of the wool and was received as follows:

Burlington	8,900
Perkinsburg	10,000
Burlington	10,000
Holliston	10,000
Wilton	10,000

WHY MANY MEN FAIL.

They Lack Adequate Training For Their Chosen Life Work.

There are some facts of life upon which statistics are not available, but where none are needed, to carry a conviction of their truth. The statement that a great many young men have chosen the wrong business or profession for their life's work can readily be believed although there is no way of telling just how many such persons there are.

Everybody can recall innumerable instances of bright young men who have chosen an occupation for which they are not suited and by reason thereof have become mere drudges, eking out a precarious subsistence and with a life holding out an unattractive future for the rest of their lives.

Such a condition will always exist to some extent, but this is no reason why an attempt should not be made to examine the problem for the purpose not only of limiting the number of mistakes among workers, but also of securing the labor resources that the best interests of our country may be subserved, especially at this time, when it is necessary to recognize what those interests are and make preparation to take care of them. America has in the past been a land of wonderful opportunities. Our great resources in land, in extent and productiveness, the great number of important things to be done, the very youth of our country, have made it possible for many men with limited educational resources and with little constructive preparation to reach positions of high material prosperity. In fact, the excess of these opportunities has tended to be a little preparation and the intellectual organization of the mind.

"Abraham Lincoln became a great lawyer with little or no early education" has been the argument of those who have opposed higher educational standards for entrance into the professions. The opinion prevails generally around our country that an American can accomplish without preparation that to which the men of Europe give years of constructive work. Irwin G. Jennings in Scribner's,

Celebrate Birthdays.

A large crowd assembled Sunday at the home of W. H. Rodgers on lower Poplar street to jointly celebrate his birthday. The guests included that of his venerable mother, Mrs. Eliza J. Culp, who was born May 11, 1829. Mr. Rodgers was kept completely in the dark as to the plans, his good wife sparing no care to make the surprise a complete one. It was considered best to keep the news to Mrs. Culp, and in-law feared the surprise might prove too great a shock to the older woman, who has been in poor health for some time.

A little tact was used to get Mr. Rodgers away early in the day when he, in company with a friend, made a trip to his big farm in Union township. The contents of a score of "well filled baskets" made a feast that was good to look upon. Roast fowl browned to a nicely, vegetables, salads, fruits, delicious cakes of many varieties and many other good things graced the table. Two large freezers of ice cream were on tap—Ohio County News.

Metzer-Rouse.

The following account of the marriage of Miss Nell Rouse, daughter of Mr. and Mrs. Geo. E. Rouse, of Florence, was received last week after the Recorder was printed.

Miss Nellie Rouse and Mr. Albert Metzer, a noted violinist of Cincinnati, were quietly married Saturday evening at the bride's home by Rev. Royce, pastor of the Lutheran church. The bride looked lovely in a blue gown. The groom wore the conventional white tuxedo and Mr. J. G. Renaker witnessed the wedding. Miss Willia looking very sweet in plum covered silk. The prior was beautifully decorated with white flowers and ferns. No guests, only the immediate family were present. Mr. and Mrs. Metzer left for Louisville, where they expect to spend a few days with relatives of Mr. Metzer. Miss Nell has a host of friends who wish her and her husband a happy and prosperous life.

Never Rode on a Train.

There is a man living in Walcott whom it is said never rode on a train in his life. He was born and reared in this section and while he has seen thousands of trains passing here day after day he has never taken a ride on the cars. While it is a man of fine intelligence and is now in his seventies, it is not because he is afraid to travel, but simply that he has never had the occasion or inclination to try it. He is now spending a few days with relatives of Mr. Metzer. Miss Nell has a host of friends who wish her and her husband a happy and prosperous life.

BETTER BLUEGRASS SEED

Should Be Produced This Year—Do Not Strip Blue Grass While Green.

The production of blue grass seeds of superior germinating quality is an object worthy of the best efforts of our farmers and seedmen this year, being entirely in line with the wartime propaganda for increased food and feed production. But to do our best with the crop we must germinate to improve our practices, for it is generally recognized that Kentucky growers have in the past been too hasty in harvesting and seedmen this year, being entirely too careless in curing these seeds. This has given Kentucky grown blue grass seeds a bad reputation outside the State, a reputation that will stick to us as long as we do not exert ourselves and adopt practices which have been shown to be necessary in order to get the best quality of seed and cured showing a better average germination. It is our bounden duty to do it this year. The writer knows whereof he speaks when he declares that it is practicable to harvest a crop averaging 80 per cent germination. Kentucky seeds have been sold in our market this year that tested 90 per cent and above. Yet in 1915 numerous samples taken from curing racks out of doors averaged only 52 1/2 per cent. This is not high enough. We can produce as good seeds as Missouri if we will only take the pains in harvesting and curing taken by the Missouri growers. This year non-resident seedmen who were compelled to come to Kentucky for blue grass seeds because the crop was a failure in Missouri in 1916, were surprised to find home grown seeds in our market testing 90 per cent. They had been accustomed to believe that our soil and climate would not produce such seeds. Missouri seedmen are now trading on this belief, and it must be dispelled.

DELIGHTED

With Their Trip and Entertainment in "Sweet Owen."

The members of the Burlington delegation that attended the Educational Convention in Owensboro, Owen county, last week were delighted with the manner in which they were entertained, and their enjoyment in the capital of "Sweet Owen" will long be a pleasant memory to them. They had a long, tedious trip and were very tired when they reached their destination, but the cordiality with which they were received soon overcame that tired feeling, and all felt as free as if they were at home. It appeared to be the opinion of the people of Owensboro that there was nothing too good for them, and nothing was left undone that would contribute to their comfort and pleasure.

The Burlington school was represented in 33 contests and won 13 medals and came second in 15 other studies.

Burlington's record in contests in which it participated is as follows: Eighth Grade Arithmetic—Robt. Clure, second.

Physics—Walter Hall, second.

Biology—Harvey Baker, second.

Eighth Grade Agriculture—Robt. Clure, second.

Eighth Grade Civics—Robt. Clure, first.

Basket Ball—Burlington, running fifth jump—Aera.

Standing High Jump—Cleveland.

High Jump—Aera.

Pole Vault—Aera.

Boys' Mile Relay—Burlington.

Discus Throw—Cleveland, 2nd.

Shot Put—Solo—Frank Milner.

Botany—Harry Baker, second.

Physical Geography—Elizabeth Kelly.

Physiology—Denzel Carpenter, second.

H. S. Arithmetic—Horace Cleveland, second.

H. S. Agriculture—Horace Cleveland, second.

Don't Harvest Wheat too Early

Owing to high prices of flour it may be the tendency of many farmers to harvest their wheat crop too early. In some sections of the State this crop is promising, but to harvest before the berry has had time to mature would mean a big loss to the farmers. Great care should be exercised in harvesting wheat to get the largest yields and grain that will make the best grade of flour.

Wheat should be harvested when the grain is in the dough stage. At this stage the berries are not indented with the finger nails, but they are not ripe. Harvesting at this stage insures the largest yields. If harvesting is begun before the grain is in the dough stage there will be a considerable loss due to shrinkage, and in the poor quality of flour milled from such grain. If harvesting is delayed until the grain is dead ripe much grain will be lost by shattering.

The feeding value of the straw is increased if it is cut after the grain has passed thru the dough stage.

FORTY YEARS AGO TODAY

Items Taken From the Issue of The Recorder of June 7th, 1877

Gen Ord has been instructed to follow marauders across the border into Mexico.

Covington was a branch of the State penitentiary.

Western Kentucky never had a better prospect for a crop of wheat.

Monday night lightning struck a tree in Mrs. Tinsley's yard.

Sweet potato and cabbage plants are in demand.

Mrs. Eliza Gardner died on the 5th inst. at the residence of her brother, Fountain Riddell, in Burlington.

A tobacco house containing 250,000 pounds of tobacco belonging to Ellis & Stephens burnt near Walton, Monday night.

The directors of the Burlington and Bellevue pike met and re-considered contract with Burgess & Wake.

T. A. Cloud, of Missouri, is visiting friends in this county.

Esq. Jno. A. Kendall served a writ of habeas corpus on the posse of roadworkers last Friday.

R. A. Brady took two premiums on his handsome saddle gelding at Carrollton fair last week.

Growers are awaiting a good tobacco season.

Fruit crop will not amount to much this year.

Willow Vale yard at the mill is full of logs. W. H. Huey is building a very large barn—Perry Weaver and Miss Anna Stephens were married a few days since.

Waterloo—Wheat looks well but the acreage is small—Eighty-five acres were killed in this neighborhood one week—Mrs. Nan Lewis is teaching at Beech Grove, and Miss Laura Huey at Locust Grove.

Rabbit Hash—A large crowd attended the speaking here last Saturday—A. G. McConnell and Miss Carrie Culvert were married last Thursday—B. F. Mirrick has typhoid fever—Miss Mollie Stephens has gone to Louisville to spend the summer—There will be a picnic in McConnell's woods next Saturday—Farmers are complaining of the dry weather.

Butter 23 cents; coal 5 cents a bushel; best coffee 25 cents a pound; eggs 11 cents a dozen; flour \$6.00 barrel; wheat \$1.75 bushel; hay \$12.50 ton; chickens 20 dollars and fifty cents a dozen; laid 10 cents pound; wool 30 cents; good butcher cattle 10 dollars; and twenty-five cents; hogs 8; sheep 6 cents pound; milk cows 15 dollars.

Cost of Keeping a Soldier.

In the Civil War cost of keeping a soldier was \$1.00 a week. A soldier in the 18th Regt. of the 1st Div. of the Army was kept in England for the service toward the end of the war. Lord Northcliffe said that the cost of keeping a soldier in England was \$1.00 a week. It seems to France, no one will wonder that it cost \$1.00 a week to keep a soldier in England. To end a war with a great army of well-paid soldiers, it is broken down with war ships, and the cost of the war is about \$1.00 a week. It is the United States.

John S. Brown, the largest catch in the season last Saturday, was pulled from the waters of South Licking near the mouth of Shurt Creek, two men each caught 25 pounds each.

GREAT WARS

Of Old Find an Outlet for Present Struggle, Says Dr. Mills, Who Traces Russian Revolution to Napoleonic Era

New York, May 29.—Psychological influence of the great war of history on the thought and progress of the world largely was responsible for the present world conflict, in the opinion of Dr. Charles K. Mills, of Philadelphia, who spoke at the annual convention of the Medico-Psychological Association, which opened here today.

The recent Russian revolution and the military caste of Germany Dr. Mills said, can be traced directly back to the Napoleonic era. The Russian revolution probably will achieve its aims, the speaker declared, and in doing so will exert a strong psychological influence on Germany, which he described as "the victim of the created psychology and self-delusion."

England's psychology, he said, developed a self-complacency and snobishness which left it at the mercy of a more self-centered and aggressive power. "As for America," Dr. Mills added, "literature, art and science largely have been side-tracked in the quest of the almighty dollar. High thinking has taken a back seat and has been supplanted by high finance and corrupt politics."

PATRIOTIC MEETING.

There will be a patriotic rally and flag raising at Constance, June 10th, at 2 p. m. Horace Cleveland will deliver the address of welcome and the Rev. Hugh M. Leith, of Covington, and C. Clure, John L. Shuff, Harper Rucker, of Cincinnati, John Gardner, of others.

Plenty of music. Everybody come and bring your friends and help to make it a great rally.

Judge Ben Lindsay Dead.

Judge Ben S. Lindsay died at his home in this city last Sunday morning at 11 o'clock, following an illness of a few weeks. Death was due to cardiac asthma. A native of Scotland, he came to this country in 1850. He was a member of the bar and practiced law in this city. He was a prominent citizen and a member of the bar. He was a member of the bar and practiced law in this city. He was a prominent citizen and a member of the bar.

Judge Lindsay was one of the oldest citizens of Warsaw, being in his 83rd year at the time of his death. His passing removes one of our best and most highly esteemed citizens. The deceased was the son of the late John C. and Mariah Scott Lindsay, and was born in Ohio, Ky., (then a portion of Gallatin county) July 21, 1834.—Warsaw Independent.

A Game Hoosier.

Living on a big farm adjoining Dillsboro is one of the very oldest native born residents of Boone county. At 83 Thomas Walger is doing the work of his well kept farm. He was born in Hogan township, on the Bruce farm at the foot of the Hubbard hill. This season he has broken and planted eighteen acres of corn in fine condition. Without glasses he writes a very creditable hand, but his hearing is badly impaired. He and his hearty, good old citizen takes an unusual pleasure in cultivating a big crop of corn, as he says "to help Uncle Sam."—Lawrenceburg Press.

Have no Reliable Information.

The masses in this country have no reliable information as to the condition of affairs in the European nations that are engaged in war. Reports sent out by the belligerents are so conflicting as to render them worthless, but judgment is doing the work of the part of England and France to have American soldiers in France to the front, the big victories on paper and elsewhere. It looks like if Uncle Sam does not whip Germany the trick will go unturned.

Witness Failed to Appear.

Several of the citizens of the extreme northern part of the county were in Burlington last Saturday morning to attend the trial of a party charged with a violation of the local option law. The prosecuting witness failed to appear, consequently there was nothing doing.

Mrs. William Rector Dead.

Mrs. William Rector died of paralysis at her home in Petersburg last Sunday. Mrs. Rector was a daughter of the late William A. Rector and was in her 81st year. Her husband survives her.

One of W. L. Kirkpatrick's patrons of the truck and cartage business has been killed.

WALTON.

For Rent—Six room cottage, \$7 per month, D. B. Wallace, Walton, Ky.

J. D. Powers and sisters Misses Katie and Ella of Verona, spent Monday here with friends.

William Brittenheim Judge Chas Strother, and Prof. J. C. Gordon attended county court at Burlington, Monday.

Mrs. J. B. Harris and little daughter of Covington, spent part of the past week here with her parents Mr. and Mrs. W. R. Rouse.

Mr. and Mrs. F. A. Wintz, of Westwood, and Mr. and Mrs. W. B. Kohl of Sedamsville, were guests at A. P. Tompkins part of last week.

Proctor Berry sold his farm of about sixty acres on the Beaver road to E. H. Sipple of Newport, for \$3,500, possession to be given Nov. 15th.

Clifford A. Rouse, of Louisville, and Lambert Rouse, of Stone, Pike county, spent part of the week here with their parents Mr. and Mrs. W. R. Rouse.

Robt. W. Jones spent the week at Flint, Michlan, getting a couple of Buick cars he has sold, and expects to drive them thru to insure prompt delivery.

At the services at the Walton Christian church last Sunday evening Ernest Preeden united with the church and Mrs. Beach placed her letter with the church.

Matt Parker and daughter, Miss Edith, of Brooksville, Ky., were here Monday. Mr. Parker looking for a suitable farm. They are excellent people and we hope they will locate here.

Raymond M. Renaker left last Friday for Beebe, Arkansas, on a business visit to his brother Chas Renaker, who is cashier of a bank there, and expects to return the latter part of the week.

Dr. J. A. Caldwell and Mrs. Sallie Drake, of Newport, and Dr. E. A. Cram and family of Peach Grove, Pendleton county, were the guests of Mr. Cram's parents, Mr. and Mrs. W. H. Cram, Sunday.

The heavy rains of the past week washed the land badly and considerable of the corn will have to be replanted. Tobacco plants are reported very small and scarce and the acreage will be greatly curtailed.

Judge and Mrs. J. G. Tomlin spent part of the week at Lexington with relatives and friends and attending the commencement exercises of the State University from which Mrs. Tomlin's sister, Miss Jane Dickey, graduated with honor.

Mrs. Pelle W. Dickey, who, with her family, is residing in Walton during the scholastic year for the benefit of the school facilities for her children, moved back to her farm near Union last week. J. F. Hyatt and family have moved to the property vacated by Mrs. Dickey.

Matt Parker and daughter Miss Edith of Brooksville, Bracken county, and his brother-in-law, J. L. Led of Cincinnati, were visitors here a part of last week and this. Mr. Parker contemplating the purchase of a good farm.

J. F. Hyatt and family have moved to the property vacated by Mrs. Dickey.

Matt Parker and daughter Miss Edith of Brooksville, Bracken county, and his brother-in-law, J. L. Led of Cincinnati, were visitors here a part of last week and this. Mr. Parker contemplating the purchase of a good farm.

J. F. Hyatt and family have moved to the property vacated by Mrs. Dickey.

Walton Graded School pupils returned from a pleasant and very successful trip to the Northern Kentucky Tournament, which was held at Owensboro, last week. The people of Owensboro, who are noted for their hospitality, excelled themselves in their entertainment of the visitors. The Walton school won the Athletic Banner, Manual Training Banner, Chorus Banner, and tied with Owensboro for the Manual Training Banner. The winners from the Walton Graded School in the various contests are as follows:

Seventh Grade Arithmetic—Halley Aylor, first.
Roaring—Edna Gordon, second.
M and M History—Brooking Thompson, second.

Eighth Grade Grammar—Lelia Readnour, second.
H S Civics—Roy Kenney, second.
Eighth Grade History—Chas. Neumeister, second.

First Year Algebra—Virginia Evarly, second.
Physics—Kyle Nicholson, first.
First Year Grammar—Lawrence McArt, first.

Elphar—Glenna Rose Gaines, second.
Eighth Grade Agriculture—Chas. Neumeister, first.
Eighth Grade Civics—Marie West, second.

English History—Kyle Nicholson, second.
U. S. History—Roy Kenney, second.
Mental Arithmetic—Dewey Benson, first.

Trigonometry—Dewey Benson, second.
Shakespeare's Plays—Brooking Thompson, second.
E. S. Drawing—Graco Powers, second.

Seventh Grade Geography—Etna Gordon, first.
Eighth Grade Geography—Lelia Readnour, second.
Eighth Grade Writing—Mary Chambers, first.

Rapid Calculation—Dewey Benson, first.
Eighth Grade Written Spelling—Francis Smith, first.
Eighth Grade Oral Spelling—Walton, first.

State Vocal Solo—Walton, second.
Domestic Science—Corn Meal Muffins and Biscuits—Emma Jane Miller, first.
White Cake—Mary Chambers, second.

Doily—Emma Jane Miller, first.
Patches—Zoo Calendar, second.
Hems—Emma Jane Miller, first.
Display of School Work—Walton, first.

Manual Training—Bracket Shelf—Wendell Rouse, first.
Book Rack—Wendell Rouse, first.
Pedestal—Wendell Rouse, first.
Tabouret—Wendell Rouse, second.

Athletics—Boys' Basket Ball—Walton 2nd.
Girls' Basket Ball—Walton first.
Boys' Tennis—Walton, first.
Girls' Tennis—Walton, second.

Running Broad Jump—Kyle Nicholson, first.
Running High Jump—Dewey Benson, second.
100 Yard Dash—Kyle Nicholson, first.

Standing High Jump—Dewey Benson, first.
Running Broad Jump—Kyle Nicholson, first.
Hop, Step and Jump—Frank Daugherty, second.
Shot Put—Dewey Benson, first.

Discus Throw—Dewey Benson, first.
50 Yard Dash—Kyle Nicholson, first.
Girls Relay—Walton, second.
800 Yard Dash—Lawrence McCert, first.

220 Yard Dash—Dewey Benson, first.
Dewey Benson and Kyle Nicholson made the highest records ever attained by pupils of Walton school. Benson winning six firsts and three seconds; Nicholson six firsts and one second. Benson's shot put which was 41 feet five inches, broke the record for the Northern Ky. Tournament, and nearly reached the State record.

Walton school made a sensational showing in athletics, winning 11 firsts and five seconds out of 12 contests ending. The 7th and 8th Grades won five firsts and six seconds out of 12 studies entered. The people of Walton are extremely proud of the fine showing made by their school and appreciate the efforts put forth by both pupils and teachers.

Monday, Geo. and Taylor Grubbs purchased two tracts of land near Walton One tract of 37 acres from B. E. Stansifer, of Bracht, and 30 acres of Geo. B. Powers of Walton. They paid \$2,500 for the Stansifer land and \$7,700 for the Powers tract. The sale was made through the real estate firm of G. B. Powers. There are no improvements on the land.

Council of Defense Requests.

At a meeting of the Sixth District Council of Defense at Covington, last week, which voiced the wishes of Gov. Stanley and the State Council of Defense, the churches of Boone county, of all denominations, were requested to hold patriotic services Sunday, June 10th. Our country not only needs men, money and food, but, above all, needs a better and more enthusiastic knowledge among the people as to what is going on as well as more enthusiasm on the part of the people in supporting our President, army and navy.

C. G. SLEET,
J. G. TOMLIN,
EDGAR C. RILEY.

An Interesting Red Cross Meeting.

A large crowd attended a very interesting Red Cross meeting at the Methodist church last Sunday night. Mrs. B. C. Gaines and Rev. Edgar Riley each delivered an address that was replete with valuable information in regard to the aims and work of the Red Cross organization. It is proposed that the county auxiliaries work in the county may be handled as a unit and thereby become effective.

An Editor Marries.

W. J. Shonert, editor of the Fairmount Outlook, and Mrs. Grace Ridgeway, of Fairmount, were married in Covington, last Saturday afternoon. The Recorder extends congratulations.

Mrs. Edgar Berkshire entertained a large number of the Burlington Missionary Society at her home on the Burlington and Bellevue pike Wednesday. An elegant dinner was served.

Two nice, red yearling steers belonging to N. W. Carpenter died of white clover bloat last Monday. Two others that were badly bloated were saved.

The registration officers from out in the county began putting in their appearance early Wednesday morning to make report to the sheriff.

The Rabbit Hash truck passed thru Burlington Wednesday morning enroute to market with a load of R. O. Kyle's lambs.

Captain Kottmyer, of Constance, has seven grandsons who are subject to select conscription.

What's the matter at Owensboro? No tidings from that city by way of exchanges for two weeks.

Owingsville—During a wind storm west of town several barns and silos were blown down, fencing damaged and many trees uprooted.

Flemingsburg—Another destructive storm visited Flemingsburg Friday afternoon blowing down a number of barns in the Grange City vicinity.

Hartford—Ohio county has been visited by rain and wind storms in the past few days, and considerable damage was done.

Secretary Houston of the department of agriculture, has issued a warning to the farmers of the country regarding the grain seed supply for the next crops. He calls attention to certain facts which farmers should keep in mind in order to insure themselves of a supply of good seed grain for sowing next spring.

The wheat crop of 1916 in the spring wheat states of the upper Mississippi valley was badly injured, it is remembered, by rust and other diseases, says Financial America. Not only was the yield much reduced, but the quality of the grain was generally poor. Much of the grain was light in weight and was shrunken, and contained many diseased kernels. Seed is procurable from such plants, but obviously some of it may be diseased and may cause disease in plants grown from them, induce death before maturity, and may spread to other plants.

Secretary Houston recommends a careful screening and fanning of seed to remove all those grains which are not good for sowing, and urges that in no case the farmer be tempted, even by high prices, to part with his good seed wheat and thus place himself in the way of having to rely on shrunken and diseased seed for sowing purposes.

SUMMER IS HERE!

AND IT IS GOING TO BE SOME HOT

The high price of coal coupled with the inconvenience of using it in hot weather should make some other method of cooking appeal to you. Especially so when in buying one of our

COAL OIL STOVES
you are securing something which spells Economy, Safety and Comfort in full. We have them in all makes—

Blue Ribbon, Success
and New Perfection

and they all represent the highest point of efficiency in construction and durability. Surely you will own one if you see our stock, for the price is too moderate and the superiority over coal and gasoline so evident that you can not hesitate to take advantage of such a good opportunity to make the coming hot days comfortable. They BURN WITH A STEADY BLUE FLAME, have perfect cooking qualities and are absolutely safe. Practically no heat and with ordinary care will last a lifetime.

In One of These Stoves
You will secure a bargain, as has always been the case in our other large line of Groceries and Dry Goods.

Local Happenings.

John Cloud has ordered a Ford automobile.

A dry June is necessary to a good crop year.

The pestiferous cut worm is busy in every direction.

Born, June 1st, to Mr. and Mrs. Jack Eddins, a boy.

It is safe to go from home now and leave your overcoat.

A large per cent of the 1917 crop of tobacco has been set out.

Burlington people as a rule went abroad to observe Memorial day.

Warm weather and plenty of cultivation is what the corn needs now.

About fifty per cent of the intended tobacco crop has been planted.

There is a generous locust bloom which indicates good crops this year.

Supt. Riley went to Cynthiana, Harrison county, and back last Thursday.

Dr. E. W. Duncan, J. P. Duncan and Garnett Tolin witnessed the races at the Cincinnati Speedway, Decoration day.

Hubert Gaines has been annoyed with a very sore hand for several days. He knows of no cause for the trouble.

Have you noticed that the wind has blown more than usual this spring? A stiff breeze has prevailed nearly every day.

A June rise in the Ohio river use to bring down hundreds of fleets of coal, which kept the price at a reasonable figure.

About the average court day crowd was in Burlington last Monday, but the candidates who have opposition kept pretty busy.

The melon crop along the river in this county has been planted, and the growers are ready to commence a fight with the bugs.

Monday Chas Birkle bought of B. B. Hume his house and lot in Burlington, known as the J. M. Riddell property. Consideration, \$1,000.

The continued rain is very discouraging to the farmers. They see weeds growing rapidly while their corn is making very slow growth.

The Educational Tournament has been held annually for six years, and in every instance the home school has captured first place in standing.

The rise in the Ohio river the last week in May overwashed the low lands in many places which will delay planting very much along that stream.

Judge Cason was able to go out last Thursday the last time for nearly a week, having been suffering of an ulceration at the root of one of his teeth.

Master Milton Revill went to Frankfort last week to attend the Frankfort High School commencement. He was a member of the graduating class.

Sheriff W. D. Cropper is posting notices of the times and places he will meet the taxpayers of the county for the purpose of collecting their 1917 taxes.

Robert Gaines registered Tuesday morning and then called on the Recorder to advertise all his horses for sale. Guess he thinks he will have to go to the front.

The iron bridge near the mouth of Gunpowder creek has been opened to public travel very much to the gratification of those who reside in that part of the county.

Elijah Stephens, carrier on Burlington R. D. 3, has been preaching by Gunpowder Baptist church last Sunday, on which occasion a splendid dinner was served at the church at the noon hour. A very large crowd attended the services.

The local Red Cross Auxiliary meets regularly and is now in condition to begin work along the lines for the organization is designed. Many persons who are not enrolled as members, no doubt, will contribute to the efficiency of the work undertaken.

That the tobacco manufacturing industry of the United States is in good condition is evident from the official Government figures representing the collection of internal revenue from tobacco sources during the month of April, 1917. In every branch of the industry increased outputs are shown in comparison with the corresponding months last year, and the gains are of such proportions as to indicate a rather abnormal expansion of business. It is possible, experienced tobacco men say, that the large increase in production in all lines recorded at the present time may be due largely to the proposed new war taxes, which will in almost every instance double the present rates. The natural demand, however, according to reports from all sections of the country, seems to be such that unusually large outputs would be required to meet it.

Russia Needs a Man.

Writing in the New York Times, Mr. Earnest J. Hart, a man well-informed by travel and observation of Russian affairs, tells us that the Russian revolutionists missed their golden opportunity when, after deposing the Czar they failed to install the Grand Duke Nicholas, or some man like him, as a constitutional monarch.

It is known that this plan was seriously considered at Petrograd during the first days after the overthrow of the Czar. It developed that it could not be accomplished without some bloodshed, and the revolutionary committee shrank from the undertaking. If the committee had made its stand there, Mr. Hart thinks, the country would soon have been composed, the war would have gone on, and Russia would gradually have gained increasing powers of self-government.

There is much to support this theory, assuming that the Grand Duke Nicholas was the man for the place. Of this Mr. Hart feels there is little doubt. He argues that the Grand Duke Nicholas was forced out of the high command primarily because of his purpose to fight and win the war. He says that the Grand Duke is both feared and respected by the army, and is in sympathy with many of the internal reforms so urgently desired by the Russian people.

Opportunity, we are told, knocks only once, and Mr. Hart thinks that the Russian revolutionists, having failed to take advantage of the chance to get a stable government, are now in rather a hopeless position. He believes, that instead of getting better, that instead of being expected to rapidly get worse in Russia; that that country is out of the war, and that its future is dark and dubious. It is, however, too late for some strong personality, such as the Grand Duke is credited with being, to seize the reins of power from the hands of the men now struggling against each other in Petrograd. It is possible, he thinks, affairs may yet take such a turn. Certainly a very considerable proportion of the most influential people in Russia are getting tired of the revolution. We do not mean that they want to go back to the dark days preceding the overthrow of the late Czar. It is by no means necessary that such should take place. The Russian people have been very badly governed for many years. It seems certain that they want to have a share in the conduct of their government, and, if they lose everything, they have now gained in a great reaction, they will be much to be pitied. But the best friends of Russia in this country are not disposed to deny that a sudden change from absolute autocracy to unfettered self-government is most difficult. Russia might secure a constitutional ruler who would be an autocrat nor a pro-German—Louisville Evening Post.

Large Strawberry Crop. Bowling Green, Ky., May 30—Warren county, is handling the biggest strawberry crop in her history. Three thousand acres of land are producing berries this year, and up to the present time the Warren County Strawberry Association has shipped more than 300 cars of berries to Eastern and Middle Western markets. The demand for berries continues greater than the supply, and for the past few days the berries have been sold at \$2 per crate before delivery at the shipping stations. The season to date has been a perfect one. Though the weather has been cool, the rain has come just at the proper time, and berries have never been better or larger. There are some 15,000 pickers in the field, young men and women from all sections of Kentucky, Tennessee, and Indiana. Some of the pickers make \$20 a week.

Warren county has gained the reputation of growing the finest berries in the world, and as a result the association has received wires from firms in all parts of the East to ship them berries. It is estimated that between 700 and 800 cars will be shipped from here this year, and the present price holds it will mean that from \$840,000 to \$900,000 will be brought into the county.

The Federal Government has taken a hand in the shipping of berries and has a representative here. The season will last at least two more weeks, and perhaps longer.

Sour Milk Good for Chickens.

By feeding sour milk to chickens, the dangers of white diarrhea and other chick diseases can be greatly reduced. The feeding of sour milk has a beneficial influence on the growth of chicks and in lessening mortality from all causes. The milk should be fed in porcelain-lined troughs and should be kept before the chicks at all times.

Wants to Be Jailer.

The RECORDER carries the announcement this week of John C. White, for the office of Jailor of Boone county. Mr. White has an extensive acquaintance in this county, and as a case is now made up, it is doubtful if now of the interesting contents at the primary.

We are selling PARIS GREEN at 49 cents a pound yet. You had better get yours before it goes up.

BENTLER'S DRUG STORE, Erlanger, Ky.

Back to the Soup Bone.

"In an emergency it is hard to see why soup should be sold in tins at all," says the Brooklyn Eagle, commenting upon the can shortage.

There is no reason, assuredly, why soup should be sold in tins to housekeepers who are in touch with butchershops. Yet there are many households in which soup from tins is used. Soup bones cannot be sent to our soldiers in France, but the lessened use of canned goods in American homes during the war would release a great deal of tin for the front, and every can of soup that goes to the front is a tin soldier of merit, valuable in winning the fight.

The housekeeper who seeks the easiest way buys canned soup. It isn't bad soup. Often it is very good soup indeed. It contains, in addition to the soup, the meat, a good deal of soup, to the average epicure, a fair amount of what the unlearned call "nourishment," not knowing much about such matters as calories, protein and so forth. But for those who haven't forgotten, amid modern conveniences, that soup does not consist out of a tin can necessarily, there is more "nourishment" in a 10-cent soup bone than in two cans of tin soup. The soup bone is a piece of meat, or a hand-me-down soup, there is soup and, in capableness, something more besides. The soup bone, or more exactly, that which clings to the soup bone, does not lose its value and become fit only to be trodden under the foot of man, or gnawed by a pig, because soup has been extracted from it. All the bones, and some housekeepers, know that, but in many homes there is an inclination to let the packers provide soup in such form that it can be prepared with a can opener, despite the undoubted fact that soup from the soup bone has a better flavor, and as for the dog, will aren't there dog biscuits? In an emergency Louisville, for example, might do without soup in cans, and let it go to the front. The tin can is a very useful thing, as usual, or unusually well, if you manufacture your own soup, and a housewife who makes things of soup, whatever they are. When the French housekeeper has a soup bone, a loaf of bread and a bottle of red wine all things have been added unto her, and a feast is forecast; a feast after which will be left meat for the next day's dinner unless the butcher has trimmed the bone like the coal miner trims a Kamsner.—C. J.

Offensive Ended

Says Hindenburg.

Berlin, via London, June 2.—The French and British offensive on the Western front has come to a definite conclusion, according to a report from Field Marshal von Hindenburg to Emperor William. Official announcement is made that the Emperor has sent the following telegram to the Empress at Homburg Castle:

"According to a report from Field Marshal von Hindenburg, the great British and French spring offensive has come to a certain conclusion. Prepared since autumn and announced since winter, the attack of the British and French armies, supported by powerful masses of artillery, and the tactical resources of all kinds, has failed, after seven weeks of hard struggle. God's aid has granted our incomparable troops superhuman force to accomplish these excellent acts, and endure successfully the mightiest battles ever seen in the history of the war. All our heroes, by their deeds, command the respect and gratitude which every German feels. The Lord be praised. Glory for His help, and thanks for such magnificent people in arms."

Emperor William also has sent a telegram of congratulations to Emperor Charles on the Austrian resistance to the Italian attacks on the Isonzo front saying:

"In a tenacious struggle the Isonzo army defied the might and stubborn enemy and caused him to fall. I congratulate you and your brave troops on this great success. God will be with us further."

Master Commissioner's Sales.

Master Commissioner Chas Maur made the following sales last Monday:

In case of Zimmer vs. Kottmeyer house and lot in Constance to R. F. Zimmer, for \$500.

In the case of Ozden vs. Ozden, 30 acres near mouth of Gunpowder creek, to Solon Rice, for \$1,600.

Turnpike Real Estate Sold.

The real estate belonging to the Burlington and Bellevue T. P. Co., was sold as follows: House and lot near Burlington to Chas. Maurer for \$205. House and lot near Bellevue to W. B. Arnold for \$200. Gravel pit to Isaac Fick, \$200.

Painting the Cemetery Fence.

The plank fence along the pike at the Odd-Fellows' cemetery is being painted as well as the buildings in the cemetery. Col. John C. Buckner is watching the brush.

Having Good Luck.

John F. Duncan is developing a considerable poultry farm. He has had good luck with his chickens, and young chickens were hatched by the hundreds.

The Merchant's View.

(New York Times.)

Two of the uncertain factors which have kept business men guessing for some time were in review disposed of during the week just past. One of these is the amount and kind of taxation the people are to be subjected to, which are likely to affect their income and their purchasing power, and the other is the duration of the unseasonable weather. The last mentioned, taken in connection with the sudden change in the economic scene, has affected the retailer, and thru him the primary markets. Under circumstances of this kind there is reason for some irresolution and caution in future commitments, although there is none for the pessimism that is occasionally voiced and that may, if taken seriously, result in bargain counter selling and consequent sacrifice ahead of time. There will yet be plenty of call for seasonable merchandise, and, should any staple goods remain unsold, it will pay to keep them for the future, when they will command higher prices, since practically none of them can be duplicated for what they cost. When it comes to considering the effect of pending and proposed legislation, the more recent developments are of a character highly encouraging to business.

Tips From Texas.

(Dallas News.)

Sometimes a germ has so little regard for its health it will titillate onto a man who chews tobacco. What has become of the old-fashioned Democrat who could fish all day without drinking, or drink all day without fishing? As a general thing, the sweet girl graduate does not win her mother's gratitude by censuring her father's grammar.

Our observation is that the average man is gladder for having ancestors that were warriors than for having a chance to be a warrior himself.

Listen, lovely bride: The honey moon is over when your husband prefers to stay down town and get lunch rather than go home and get kissed.

Our observation is that when a woman has four or five children who look like her father, she doesn't devote much time to criticism of Greek drama.

A big fishing party, led by H. H. House, of Limburg neighborhood, had been organized to spend Tuesday at the Long Hole near the forks of Gunpowder creek last Monday night and in the morning caused an indefinite postponement of the anticipated picnic.

W. L. Kirkpatrick went to town one day last week for Lester Linder, two dogs that brought him the sum of \$119.18, clear of all expenses, as much as two pretty good horses would have sold for a few years ago.

Why Ready for? Service Clothes?

Because you see the finished suit you know how it looks on you. Because you know it fits you. Because you can select from any number of good styles to suit your preference. Because you buy them at half a good tailors price.

Why, Buy Men's and Boys' Clothes at this Store?

- Because a reliable guarantee stands behind every purchase.
- Because our price is the price that you can pay.
- Because our clothes stand for service, style and workmanship.

W. L. RIDDELL, Publisher.

Early potatoes ought to be made by this time.

Blackberry bushes are not overladen with bloom.

No base ball clubs have been organized in this county to date.

The Petersburg Baptist congregation will dedicate its new church building next Sunday.

W. L. Kirkpatrick has traded his Ford for a five passenger Maxwell, with which he is highly pleased.

Karl Rouse shipped a bunch of nice hogs to the city Saturday. He was well pleased with the price he received.

Quite a number of Burlington people attended the memorial services in Petersburg last Sunday afternoon.

The term of Fiscal Court that was to have been held last Tuesday was called off because of that being registration day.

There has been considerable improvement in the meadows this week, and many of them are now counted on for a good yield.

About twenty Boone county men who are engaged in business away from home sent in their registration cards before registration day.

The report has reached Burlington that some time this month, two of the most prominent citizens of Petersburg will be united in marriage.

A daughter, Mildred Marie, was born Monday, May 21, to Mr. and Mrs. Charles Riggs at their home on the Aurora Pike. Mrs. Riggs was formerly Miss Katie Gregory of Patriot, Rising Sun Recorder.

The Peoples Deposit Bank offers their services to those desiring to subscribe to the United States Liberty Loan Bonds. Their ad appears in another column of this issue.

N. E. Riddell announces this week as a candidate for reelection to the office of County Attorney. He is now serving his second term, and his administration at that office has been generally satisfactory.

Will Craig, who lives just above town, shipped 37 hogs from his fine farm in East Bend to the Cincinnati market Monday, receiving the nice sum of \$1,200 for the same. And the price had dropped twenty-five cents on the hundred since Saturday, too—Ohio County News.

The Liberty Loan Bonds are not being subscribed for very rapidly in many localities. Banks throughout the country have been designated as agents for the sale of the bonds, consequently, if you desire to own one or more of the bonds call on a bank and the matter will be attended to for you without cost.

Prof. Paris B. Akin is spending this week with his parents, Mr. and Mrs. Benjamin Akin down on Woolper creek. The Prof. has developed into a robust man, able to cope with any recalcitrant pupil with whom he may come in contact. It seems Trimble county people can not dispense with his services as principal of the Bedford High School.

Farmer G. W. Sardford, from out on the East Bend road, was in Burlington, Friday morning consulting the resident farmers as to the best method of ridding his corn field of the crows that were pulling up his corn as fast as it came through the ground. He was advised to catch the pestiferous birds and eat their heads off.

It was officially reported that the unusually cold and wet spring has not retarded to any great extent in Ohio crops, and one day they were only about one week behind, a delay that would be overcome by a few days warm weather. A big harvest is predicted. Corn is good, oats and potatoes good, apples medium, peaches a failure, cherries large yield probable.

The tales of rebellion in Germany should not be credited too fully was the statement of an American of German parentage who returned from Berlin.

"There are not enough able-bodied civilians and other workers out of the army to create a revolt that would not be quickly suppressed," he said.

Crows are becoming common food, and many farmers are using English sparrows. The crows sold for 40 cents each, and sparrows at eight cents each. They are not only a pest but also a source of food for the farmer.

GERMANY'S MISTAKE IN FOOD CONTROL.

(London Spectator)

We are glad to see that this Times has been employing its foreign correspondents to write its articles on the German government's mistake in food control. The numerous blunders that the German government has made in food control have been frequently pointed out in the Spectator; but it is the general public here yet realizes, in the least degree, what a colossal series of blunders has been committed by the German government.

The legend of German efficiency has been so well taught to us in the past that even now most English people seem to believe that the German government, instead of looking ahead at the food problem as a whole, have proceeded blunderingly from step to step just as if they were still feeding their lap-dogs on cream.

When the harvest of 1915 arrived the German government became alive to the fact that there was a shortage of meat, owing largely to their own foolish policy in ordering the slaughter of livestock in the spring.

They began in November, 1911, fixing maximum prices for food. Four months later they proceeded to requisition the corn supplies of the country and to establish a ticket system of bread rationing. They then suddenly turned and there was a shortage of potatoes, and also of cattle fodder.

A public clamor arose, and the German government, in obedience to this clamor, proceeded to issue an order to the slaughter of pigs and the reduction of livestock generally. They quite forgot to notice that wealthy ladies were still feeding their lap-dogs on cream.

It is significant, as the Times comments on this, that in almost every case rationing was only applied after the government had gone through the processes of fixing maximum prices in the apparent belief that they could thus settle the problem.

In almost every case this process, so beloved of our own politicians, only served to reduce the supply of the commodities of which there was already a shortage. Needless to say, these successive fidgety movements have irritated everybody concerned. The government has been furious from the outset, because so far as the government has commanded foodstuffs, instead of being bought at market prices, farmers and landowners have lost the huge profits they hoped to realize.

In addition the constant bureaucratic interference with the work on the land has undoubtedly led to a great deal of sheer waste. Numerous crops have been reported as lost in the German Press where foodstuffs have been allowed to perish, either because of government bungling or in order to avoid commandeering.

At the same time, the urban population has been persistently discontented with the supplies of food allowed to the towns by the Government. The German Socialist papers are constantly publishing these articles attacking the bureaucracy and the incompetence of the agrarians for their "profiteering."

The most recent information taken from the German press shows that many of the most urgent problems of rationing have not yet been solved in Germany.

One of the difficulties which constantly crop up is the unequal distribution between town and country. Leipzig complains that it is unfairly treated in the matter of potatoes and fat. It is equally aggrieved at its sufferings in consequence of the mismanagement of the Imperial potato office in Berlin. It appears that while Berlin is receiving three pounds of potatoes per head and three-quarter pounds of meat, Hamburg is receiving only one and three-quarter pounds of potatoes per head and one-half pound of meat.

Also, the proportion of small farms in Germany is less than in England. It is therefore, less easy to coerce the rural population for the benefit of urban consumers. The latter constantly complain through their newspapers that food is being held back by the farmers and used to feed stock instead of being sent to the towns.

Periodically the German Food Controllers, influenced by these complaints, take some drastic steps which only make matters worse. The extreme shortage of potatoes in Germany has recently led the government to issue an order to the growers to give up their potatoes with the exception of a certain proportion per acre. The result of this order will be that considerable quantities of food will be held back in the towns to be eaten with the necessary consequence that this year's crop of potatoes will suffer.

Only a few months ago the German government, in its desire to control the urban workers, took the step of ordering the urban workers to work in the rural areas.

PROFITS FROM FERTILIZERS

Efficiency and profits from using commercial fertilizers depends very largely upon the following points:

Good Drainage.—A well drained soil permits free air circulation and encourages early in the spring this promoting bacterial activity so necessary in rendering all the plant food available. Drainage removes surplus water during wet spells; puts the soil in better tilt, breaks it into minute particles thus increasing the water-holding capacity. A constant supply of water is necessary to dissolve plant food so as to furnish a supply all through the growing season.

Sweet Soil.—Practically all farm crops and desirable soil and plant bacteria do best on a sweet soil. The Ohio experiment station, as well as many individual farmers, have secured greater profits from both lime and fertilizers when used on the same land than from using each separately. For best results the lime should be applied first and well worked into the soil before the fertilizer is applied.

Organic Matter.—Weeds and other plant matter improves the tilt of all soils. It increases the water-holding capacity as one ton of organic matter will hold from eight to ten tons of water. This, like drainage, provides a steady source of water which aids in maintaining a uniform supply of available plant food for the crop during dry weather. Organic matter just when it is most needed. Organic matter furnishes a home and food for the bacteria that aids in liberating plant food. It also absorbs and holds all available and soluble plant food until used by the growing crop.

Proper Application.—Plants absorb their food through the root hairs which are on the smallest roots. As the majority of these roots are in the second to fourth inches of soil, the plant food should be placed there. Some apply fertilizer on top of the soil, but fail to work it in. This is wrong. Others plow it under where it places it in that portion of the soil where large proportion of the smaller roots are to be found. The fertilizer attachments of the various grain and seed drills offer the best means of properly applying fertilizers. When they are applied on the surface by hand or through a broadcast drill, a hoe should be used then when applied with a drill.

Kinds and Analyses.—There is no "best fertilizer." Since fertilizers supply ammonia, phosphoric acid and potash, the best analyses or kind to use is the one that supplies the proper proportions of these plant food elements for different crops and to make up for the deficiencies of the available plant food of the soil. When the crop starts slowly and is short of stalk more ammonia is needed. When the amount of grain and fruit is small, or slow in maturing or of low quality more phosphoric acid is needed. If the grain is not plump or the stalks weak more potash should be supplied in the fertilizers when available. High analyses or high-grade fertilizers are the cheapest in the end to use as the plant food can be purchased cheaper in high-grade than in low-grade goods.

Amounts.—Feeding crops is like feeding work horses or dairy cows. The well and correctly fed ones are the most profitable whether animals or crops. As a rule the first application of fertilizer should be heavier than later applications as there is usually a hunger of the soil that must be satisfied before best results can be secured by the crop. As a rule 300 to 400 pounds to the acre of a properly balanced and well-suited fertilizer is more profitable than a smaller amount, especially for the first application. J. W. Hensworth.

FACTS FOR 1917 GARDENERS

"Yield, quality and early maturity are three aims in the successful growing of vegetables. When truck crops are grown in a commercial way large yields are absolutely necessary to profit. Yet, no matter how large the yields, unless the quality is high and of the first grade, high prices on the market are not easily secured. Good seed, properly planted, and a well prepared and followed by thorough and careful cultivation of the crop assists very materially in producing largest yields of high quality, early matured vegetables," says a well-known truck gardener of Chicago.

"Yet," continues this man, "if there is not a large supply of readily available power to harness in the soil, neither large yields nor high quality goods can be produced."

Well rotted, stable manure is the old standby of all truck gardeners. This should be carefully and thoroughly worked into the seed bed during the fall, winter or early spring. While manure is considered by many to be an ideal material to use in phosphoric acid in proportion to the nitrogen and potash that it carries. This usually results in too much vine growth in proportion to the fruit. Consequently, it should be supplemented with a fertilizer analyzing high in phosphoric acid. Phosphoric acid increases the quality and improves the quality of all truck crops, especially tomatoes, sweet corn, peas, beans, pickles and cucumbers. The Chicago truck growers have found that it pays them handsomely to supplement all manure with a suitable truck or garden fertilizer. This may be applied through the fertilizer attachment of any drill used in planting and the crop, or broadcasted and worked into the soil before planting the seed. It is also advisable to occasionally work a handful of fertilizer around the plants after they come up.

PROFITABLE CORN GROWING

FIVE CORN PRINCIPLES. Good seed, well-fitted soil, proper planting, frequent and shallow cultivation, and abundant well-balanced plant food, are the five main essentials in successful corn growing. Men all over the country, who are growing seed and show corn, the boys in the corn growing contests, and farmers who are producing large and profitable yields, are practicing these five cardinal principles of successful corn growing. In 1912, Dewey Hanes, an Ohio boy, raised 130 bushels per acre, in 1915 he brought the yield up to 153 bushels, and last year, 1916, a poor corn year, he again won the first prize in Ohio with a yield of 137.5 bushels per acre, thus winning the title, "Champion Corn Grower of Ohio." He also won the title as Junior wheat champion in 1915 with a yield of 55.23 bushels per acre, on five acres. He observes all five principles in growing crops, including the liberal use of suitable fertilizers.

Getting Early Maturity. To know what fertilizers to apply to corn, it is necessary to know the duties of these three plant foods. Nitrogen, usually referred to as ammonia, is very largely concerned with the production of stalk growth and giving color to the plant. If you see a short, stunted yellowish or pale green plant, it means that the soil is deficient in ammonia. Phosphoric acid produces a larger root growth, aids in forming the ear on the stalk produced by nitrogen, hastens maturing and improves the quality. It is usually happens that corn will mature from ten days to two weeks earlier on a field well supplied with phosphoric acid than it will on a field deficient in phosphoric acid. This length of time frequently means the difference between soft and mature crops. The third plant food, potash, is largely concerned in producing a strong stalk, and the transportation of the starch or plant food digested in the leaf to the various parts of the plant. While the corn plant cannot talk, it has a way of telling us when it is hungry for certain plant foods. If we hear the rustling of leaves in wind, and observe our growing corn, we will be able to tell just what plant foods they require.

What the Corn Needs. A good corn fertilizer should have from one to three per cent ammonia, eight to twelve per cent phosphoric acid, and two to four per cent potash, unless it is used on a muck soil where from six to ten per cent potash should be used when it can be purchased. If the fertilizer is to be used on a sandy soil, it should have at least two to three per cent ammonia, eight to ten per cent phosphoric acid, and two to four per cent potash. For corn on a clay soil, especially if there has been some very rich manure applied, two per cent ammonia may be adequate along with ten to twelve per cent phosphoric acid and not over one or two per cent potash.

The best results are now being obtained from the use of from 400 to 600 pounds of fertilizer to the acre on corn. The best way to apply the fertilizer is to put on about 100 pounds to the acre with the fertilizer attachment of the corn planter when planting the corn and all amounts above this through the fertilizer attachment of the grain drill or a low-down line and fertilizer distributor before the corn is planted. If the corn planter has no fertilizer attachment, all the fertilizer may be applied before planting the corn, through the fertilizer attachment of the grain drill, or through a low-down line and fertilizer distributor, being careful to disk it well into the soil before the seed is put into the ground. With present prices for farm products, larger yields are more important than ever before. Larger yields reduce costs per bushel, and increase profits not only per bushel but also per acre.

Corn Profit. The growing of corn is a matter of dollars and cents. The grower has a right to expect a fair return on his money. This can only be secured by fulfilling every one of the five cardinal principles of successful corn growing: viz., Good seed, well fitted soil, proper planting, frequent and shallow cultivation and abundant well-balanced plant food.

250 YEARS OF PROFITABLE GRASS. In England there is a park at the famous Rothamsted experiment station, which has been used as a meadow for more than two and one-half centuries, which was used as a hayfield at the time of the Revolution, and which was in sod when America was being colonized. This park has been top dressed annually for the last sixty years. At the beginning of this period it was producing about 1½ tons of hay per acre. Where fertilizers have been used, the average acre yield for 50 years has been in one case 2.7 tons, in another 3.3 tons, and in a third case 4.1 tons, depending upon the amount of top dressing applied. This has been a really wonderful accomplishment, and should make these farmers who are content with "mating" instead of fertilizing with robbing the soil and year after year getting smaller and smaller crops, feel that possibly they are not using to the fullest the opportunities given them.

LEEK GROWS IN FAVOR

Belongs to Onion Family and Is Used for Flavoring.

Plant is Easy of Culture and Usually Grown as Second Crop, to Follow Vegetables—It is Hardy Perennial.

The leek belongs to the onion family, and is used mostly as flavoring for soups. Well-grown leeks have a very agreeable and not very strong onion flavor. The leek is of the easiest culture, and is usually grown as a second crop, to follow beets, early peas and other large vegetables. In form it is a hardy, flat-leaved, bulbous perennial. The blanched stems and bulb are used in cookery for seasoning in the same manner as the onion.

The leek has not, in the past, been much cultivated in this country except near large cities and where there is a considerable foreign population, but of

Leeks.

late years its value is becoming more generally appreciated, and now most gardens contain at least a few plants.

The seed should be sown in a seed-bed in late April or early May and the seedlings transplanted to the garden in June or July, when they should be five or six inches tall. At this time the tops should be cut back half and the plants set deep twelve to fifteen inches apart and six to nine inches asunder. The reason for setting the plants so deep is that the neck and lower part of the leaves are to be used in a blanched condition. The soil may be drawn toward the plants in cultivating to further the blanching. One ounce of seed is used to 100 feet of drill.

Being very hardy, the plants may be dug in late fall and stored in the same manner as celery, in trenches or in a cool root cellar.

As the mild flavor and excellent seasoning qualities of this vegetable are beginning to be more generally known, the demand is increasing, and it may now be found on all the vegetable stands.

SUPERIOR MIXTURE FOR HAY

Oats and Canadian Field Peas Make One of Best Crops—Use Grain Drill for Seeding.

A mixture of oats and Canadian field peas makes one of the best hay crops which can be seeded and harvested in the same season. The mixture will produce larger yields than either crop seeded alone. Peas, being a legume, make the hay richer for feeding purposes than oats alone and improve the soil. Also, the oats support the peas so that harvesting is much easier. The mixture should be sown two to three inches deep at a rate of two bushels oats and one bushel peas per acre. Use of the grain drill is the best way to seed the crop, but if a drill is not available the seed may be broadcasted and covered with a disk or harrow. Sow at oat seeding time, or as early in spring as land can be prepared. Cut the hay when the oats are in the milk-ripe or early dough stage and the pea pods well formed, but not ripe. A palatable and nutritious hay, yielding one and one-half to three tons per acre will result.

PREPARE FOR ALFALFA CROP

Four to Six Weeks Should Intervene Between Plowing and Seeding in Eastern Sections.

Where land in the East is plowed in the spring for alfalfa, at least four to six weeks should intervene between the time of plowing and seeding, during which time the land should be harrowed every 10 or 12 days to keep down the weeds and to conserve the moisture. Where the soil is inclined to be too loose or when there are any clods, the roller pulverizer is an excellent tool to use.

MOST PROFIT IN ASPARAGUS

Where Product Is Well Grown and Put Up Acceptably It Will Bring Remunerative Prices.

Asparagus is one of the most profitable truck crops grown, for although the marketing season is not very long, the product, where well grown and put up acceptably will bring remunerative prices. Profits depend upon quantities of marketable size and quality of the product, and close attention to careful grading and good appearance.

GOOD COMBINATION

A large poultry raiser in Connecticut kept his flock penned in the orchard. He picks the finest apples from those trees seen in that section. They have a different flavor than those of the same kind. They are earlier and larger than those receiving ordinary care. The only reason is that the poultry fertilize the trees and keep the insects off to a large extent.

CORN FOR FODDER AND SILO

Plant an Early Variety for Green Feed for Cows During Summer—Cultivation Kills Weeds.

For feeding green to cows during the summer plant an early variety of corn. Select firm-out, nod-ground, or ground from which a crop of crimson clover or green rye has been cut off. Plow the ground, harrow and roll before the fresh plowed ground can dry out. Mark out the long way of field and drill half bushel of corn and 400 pounds of a standard bone fertilizer to the acre. This is much the quickest and most economical way. It saves time and labor.

The corn is put in at the right depth and without waste of seed. Four hundred pounds of a good superphosphate to the acre, applied to good soil land, will bring a good crop of forage. If the land is thin, spread a coat of manure and harrow it in, then drill the corn in with the phosphate. Run the drills three feet apart. If the field is woody, plant in hills, so the crop can be cultivated both ways. As soon as the corn can be plainly seen, start the salky cultivator, using the steel chisel teeth.

Early cultivation kills weeds, and starts vigorous growth of corn. Plant the variety of corn that is best suited to your soil and climate. Home-grown seed is best and much the cheapest. The number of acres to plant will depend upon the capacity of the silo, and the number of stock to feed. One acre of good land, given thorough culture, will yield ten to twelve tons of forage.

LETTUCE RAISED IN SPRING

For Best Results Plants Should Be Started in Hotbeds—For Fall Crop Drill in Seed.

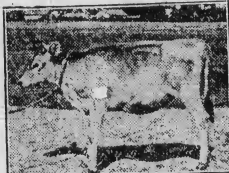

The reason for failure to get lettuce to head properly is probably too high a temperature. In outside garden work head lettuce may be grown only in the early spring and late fall. It will not head during the heated summer period.

For best results in the spring, plants should be started in greenhouses or hotbeds and after being well hardened off, set in the open at not less than 12-inch intervals as early as the ground may get into proper condition. For the fall crop the seed should be drilled in the rows where the crop is to mature, covering the seed but lightly, and thinning out the plants to the required distance after germination is complete. In this case the seed should not be sown until after the first of August.

DON'T FEED CALF TOO MUCH

Stomach of Young Animal Is Small and Excessive Amount Always Results in Disorders.

Under natural conditions the calf takes its milk frequently and in small quantities. The calf's stomach is small and an excessive amount always results in indigestion and scours. For the first two weeks five or six quarts, or about 10 or 12 pounds per day, is all the largest calf should be allowed to take. A small calf, as a Jersey, does not need over eight to ten

Healthy Young Jersey.

pounds per day on the start. This may be fed in two feeds per day, or better, in three, for two or three weeks. As the calf grows older somewhat more milk may be used, but at no time does it need over 16 or 18 pounds, or eight or nine quarts per day, but it is safe and economical to feed as high as 20 pounds to a large calf if skim milk is plentiful.

FOR DETECTING WEED SEED

Hand Lens Is Useful in Searching Out Dodder and Other Noxious Seed in Alfalfa.

The hand lens will be found very useful in detecting dodder and other weed seeds in alfalfa seed. The general quality of unadulterated seed can be estimated on the basis of color. Fresh seed is light olive green and gives a bright green surface when rubbed with the hand. Alfalfa seed which is of any shade of brown is questionable. One should not purchase seed when the bundle contains any considerable percentage that is discolored.

United States Tires

SALES & SERVICE DEPOT

Look For This Service Sign

Tire dealers displaying this sign carry a complete line of United States Tires.

—the 'Nobby', the 'Chain', the 'Royal Cord', the 'Usco', the 'Plain',

—a tire for every need of price and use.

This sign also means to you tire service

—that the dealer can supply you every sort of tire service from testing your wheel alignment and putting on your tires to a complete line of the best tire accessories in the world.

Dealers who display this sign are the best dealers in their respective communities.

Deal with them—depend on their judgment—and you will have supreme tire service.

OUR EXCHANGES.

Milton.—Mrs. George Fischer, of Rarebone, this county, has 100 hens. Since Jan. 1 she has set 200 eggs and sold enough to amount to \$107.

West Liberty.—Mrs. Will Steel of this city, was instantly killed by lightning. She was the daughter of L. I. Hovermale, a newspaper man of this place.

The highest price paid for corn delivered on the Ohio River bank was received Tuesday, when Wm. Harrington sold to the Henderson Elevator Company 6,000 bushels at \$1.12, delivered at McDonald's Landing, seven miles below the city.

Franklin.—The outlook for a "quality" wheat yield in Simpson county is exceptionally good. The continued freezes of the winter greatly reduced the possibilities for a "quantity" yield, but much of the loss in quantity, it now seems, will be made up in quality.

The State Board of Equalization increased the assessed value of real estate in Kentucky \$20,457,095. The grand total of the assessed value of real estate in Kentucky for this year, as reported to Auditor Greene, was \$901,531, 378. The final or equalized assessment by the board is \$921,988,176.

Columbia.—After a trial lasting six days in the Adair circuit court the jury in the case of the Commonwealth of Kentucky against J. H. Judd, charged with adding one dollar to the tax receipts of Sheriff W. S. Sanders for the year 1914, returned a verdict of not guilty. Judd's defense revealed that over 1000 dollars were added to the tax receipts of Adair county in the year 1914. Mr. Judd is Deputy Sheriff at the time, and he was indicted for forgery.

Paint Your Autos and Buggies.

I have a first-class painter and will do your first-class work at reasonable prices; will also furnish you Rubber Tires, Wheels and anything you want along that line. Blacksmithing and wood work done promptly. E. H. ERNST, Hebron, Ky. o June 12

General Care of CEMETRY LOTS.

For the season \$2.00, but where there is extra work required there will be an additional charge. Lots cared for in each of the cemeteries at Burlington, and I am agent for monumental work of all kinds. KIRTLY L. RICE, Burlington, Ky.

J. L. HAMILTON UNDERTAKER

Verona, - - Kentucky. All of the Up-to-Date methods and reasonable charges. Fine line of Monument Work. Telephone—Calls answered promptly, day or night.

FOR SALE.

Two fine Stock Farms of 163 acres each with fine improvements, land in best condition, two large barns on each farm, never-failing water supply for 50 head of stock, 5 miles west of Lawrenceburg, good school and church within half a mile. Can give immediate possession. Sixty five dollars per acre. Also Lawrenceburg Ferry for sale at a bargain. WARREN TEBBS, Lawrenceburg, Indiana. o June 11

Your Protection

You not only protect your savings, but you get paid for doing so when you have a time deposit at this bank.

Money that's idle means money wasted. Put your savings to work and watch the interest grow. We watch both the principal and interest for you and relieve you of all the banking worries.

ANNOUNCEMENTS.

For County Judge.

P. E. CASON is a candidate for Judge of the Boone County Court, subject to the action of the Democratic party at the primary election, Saturday, August 4th, 1917.

For County Attorney.

N. E. RIDDELL is a candidate for County Attorney of Boone County, subject to the action of the Democratic party at the primary election Saturday, August 4th, 1917.

For Sheriff.

L. A. CONNER, of Burlington precinct is a Democratic candidate for Sheriff of Boone county, subject to the action of the Democratic party at the primary election Saturday, August 4th, 1917.

B. L. CLEEK, of Union precinct, is a Democratic candidate for Sheriff of Boone county, subject to the action of the Democratic party at the primary election, August 4th, 1917. Menter Martin to be his deputy if he is elected.

For Assessor.

HARRY W. RILEY of Union precinct, is a Democratic candidate for Assessor of Boone county, subject to the action of the Democratic party at the primary election, August 4th, 1917.

J. S. CASON, of Walton precinct, is a Democratic candidate for Assessor of Boone county, subject to the action of the Democratic party at the primary election, August 4th, 1917.

BOONE F. ROGERS of Bellevue precinct, is a Democratic candidate for Assessor of Boone county subject to the action of the Democratic party at the primary election August 4th, 1917.

For Superintendent.

J. C. GORDON, of Walton precinct, is a Democratic candidate for Superintendent of Schools in Boone county, subject to the action of the Democratic party at the primary election Saturday, August 4th, 1917.

For Representative.

W. P. CROPPER, of Bullittsville precinct, is a candidate for the Democratic nomination for reelection to the office of County Representative in the next General Assembly of Kentucky, subject to the action of the Democratic party in Boone county at the primary election, Saturday, August 4, 1917.

For Jailor.

CHAS. A. FOWLER, of Burlington, is a candidate for Jailor of Boone county, subject to the action of the Democratic party at the primary election Saturday, August 4th, 1917.

JOHN C. WHITE is a candidate for Jailor of Boone County, subject to the action of the Democratic party at the primary election August 4th, 1917.

For County Clerk.

W. R. ROGERS is a candidate for reelection to the office of Clerk of the Boone County Court, subject to the action of the Democratic party at the primary election August 4th, 1917.

W. F. BRADFORD, of Florence precinct, is a candidate for clerk of the Boone County Court, subject to the action of the Democratic party at the primary election August 4th, 1917.

BOONE'S REGISTRATION.

The grand jury room at the court house was decorated with the national colors, Tuesday, registration day, while a very handsome specimen of Old Glory was suspended across the street in front of the building. Registration was begun promptly at 2 p. m., by Registrars Riley and Tolin Lester Gulley—being the first person to appear in response to Uncle Sam's call.

Lee Utz, colored, when asked if he claimed exemption, answered, "no sir; I believe in the draft."

The registration passed off very quietly in the county, and the following results by precincts were reported to Sheriff Cropper, Tuesday night:

Burlington	50
Bullittsville	57
Bellevue	32
Bellevue	32
Constance	24
Carlton	36
Florence	51
Hamilton	47
Petersburg	61
Union	52
Verona	58
Walton	85

County total 693

It is claimed ten million young men registered for service, last Tuesday. Every state came up well. Some of the Indians in Colorado rebelled and are giving the white citizens trouble.

Announcements for County Judge.

In this issue appears the announcement of P. E. Cason as a candidate for Judge of Boone county court, Judge Cason is now serving his fourth term as County Judge in which office he has made such a splendid record, the Boone County Court has taken a high rank under his administration while his ability as a lawyer is recognized by all the attorneys who practice in the quarterly court, and his legal opinion is always considered sound and based upon the law.

Fortunately, as a county, Boone has not suffered from washing rains like some of the adjoining counties. Walton and Verona precincts have been hit the hardest by heavy rains the last few weeks, crops in those two localities having been damaged considerably.

When it looks like clearing it is only preparing to rain again.

This Way Please and Reduce Your Cost of Living

I have the Puritan Oil Stove on my floor now, at a reasonable price. All kinds of Oil Stove Supplies.

A full line of Farm Fencing, Farm Gates, Garden Plows, Dixie Plows, and other Farming Implements.

All kinds of Garden and Farm Seeds. Also Tomato and Sweet Potatoe Plants.

Come in and let me sell you a pair of good Shoes. Next comes the Straw Hat and I have them for you.

White Lead and Oil and all kinds of Ready-Mixed Paints and Paint Brushes.

Tileing, Lime, Sand, Cement and Brick. Get my prices.

AUTOMOBILE SUPPLIES. A large stock of all kinds of Mill Feeds—the best that money can buy.

Try a Barrel of Liberty Bell Flour.....\$16.00

Sugar—25 pound Sack.....\$2.25

A nice line of country cured Meats and Lard.

Try Moore's gasoline in your car once and be convinced.

That's the good oil.

Highest prices paid for all kinds of country produce.

Ice for sale at all times.

Give me your order for fresh Fish and Meats for every Friday and Saturday.

Fresh Bread every day.

Nobetter Coffee.....25 cents pound

I am on the job daily with my truck, moving goods to and from the city, and I will fill your orders for goods, I do not carry in stock.

W. L. Kirkpatrick,
Burlington, Ky.

Personal Mention

R. L. Tilton, of Aurora, attended court in Burlington, last Monday.

Homer Riggs, of Erlanger, was a business caller at this office last Friday.

Joe Reed, of Walton, was here Monday, meeting many of his old time friends.

J. H. Tanner, of Florence, made the Recorder a call while in Burlington, Friday.

Judge John M. Lassing, wife and son, John, were Sunday guests of Mrs. Emma Brown.

D. W. Newman, of the Mt. Zion neighborhood, was a caller at this office last press day.

Pony Easton, wife and son were visiting relatives out on the Petersburg pike, Sunday.

Mrs. John Tanner, of Erlanger, was visiting friends in Burlington, one day last week.

Mrs. Agnes Clore is visiting her sister, Mrs. J. M. Barlow, of Pleasant Valley neighborhood.

Mrs. B. B. Allphin, of Walton, was the guest of Mrs. Mary Hume several days the past week.

B. W. Campbell and wife, of Cincinnati, were in Burlington a short time last Saturday afternoon.

Thos. Rouse, of Mt. Healthy, O., was the guest of Andy Cook and wife a few days last week.

G. G. Hughes spent several days the past week with his daughter, Mrs. Earl Walton, of Petersburg.

Mr. and Mrs. Milton Southern, of Idolwild, passed thru Burlington last Friday enroute to the city.

Bert Smith and family, of Newport, were Sunday guests of relatives down on Woodpecker creek.

Mrs. Joe Huey has as her guests Misses Marietta Love and Nannie Eristow, of Grange Hall neighborhood.

Misses, Estelle Huey and Mattie Keylich are attending Georgetown college commencement this week.

Judge Gains went to Williams town, Monday, to hold the June term of the Grant county circuit.

O. P. Phipps and Circuit Clerk Chas. Maurer and wife, were in business, Aurora, Indiana, last Saturday on business.

Galen Kelly has been experiencing trouble with his eyes since he had German measles about two weeks ago.

Hubert Ryle and family, of Rabbit Hash, passed thru Burlington Friday morning enroute to the city in their new auto.

Ed. Rice celebrated the advent of his grandson by going out that day and catching a long string of small fish on which he feasted at supper.

Prof. J. H. Muntz returned home Saturday from a visit with his parents at Cynthiana. Mrs. Muntz and little daughter remained over for a longer visit.

Perry Barlow, of Pleasant Valley neighborhood, looked in upon the Recorder force a few minutes last Friday he came over to deliver his crop of fine wheat to the purchasers.

J. J. Hume returned Tuesday several days before, he had a car accident removed from one of his eyes. The vision is very much improved, and, as a consequence, he is in fine spirits.

STATE NEWS.

Carlisle.—The Grass seed crop through this section is said to be the shortest ever known. It is thought that it will be impossible to gather any of the seed owing to the shortness of the grass, which has headed out but little above the ground.

Franklin.—It is estimated that 4,000 pounds of wool, for which the buyers are offering fifty-five cents a pound, is being held by the farmers of Simpson county. It has been the custom for the past few years to pool the wool and sell it in a lump, but this year this was not done.

Lexington.—Bankers in the 4th Federal Reserve District at a meeting here adopted a resolution urging all banks to devote a sum equal to 10 per cent of deposits therein to the purchase of liberty loan bonds. A chairman was named for each county to direct in the work of securing subscriptions to the loan.

Williamstown.—The damage to land crops in Grant county by heavy rains during the past week is estimated at \$100,000. Plowed hillsides are turned out worse than at any time in twenty years, and many fields of corn will have to be replanted. Hundreds of tobacco plant beds have been destroyed.

Cadiz.—After being in session only nine days the May term of the Trigg circuit court was finally adjourned and Judge Bush left for his home at Hopkinsville. This was one of the shortest terms of court held here for years, but practically everything was disposed of at that court. The grand jury returned only 15 indictments.

Eddyville.—The rains that have been falling for the past few days have been worth many thousands of dollars to the farmers of Lyon county, who are doing their "bit" to help whip Germany in the world-wide war by raising the largest crop of foodstuff ever raised in this county. The crop consisting principally of beans, potatoes and corn. There is very little wheat being raised in this county.

Bowling Green.—W. B. Atkinson, a local man has just perfected what he believes will be very effective to the government in the destruction of the undersea boats. Mr. Atkinson has been requested to take his invention to Washington, and left today for that city. The invention will be given a thorough trial by the War Department. Mr. Atkinson will present the invention to the government should it be accepted.

Paducah.—A complete census of farm labor in McCracken county is to be made by County Farm Agent W. J. Piggett. J. R. who will be assisted by about fifty paid business men. The county was requested to make such a census by the Farm Management Department of the U. S. object is to learn how many farmers are in need of labor and how much labor is available in this county.

Over 2,000 persons partook of the hospitality of Edward Simms, his farm and family. Mr. Simms, who is a resident of small lakes on the estate for the purpose of taking out the German can and given to the State Fish and Game Commission a quantity of small bass and other fish for the State stream. The quantity of

SHEEP RETURN GOOD PROFIT

More Profitable Than Any Other Class of Live Stock, Says Instructor at Kansas College.

"Sheep will return a greater profit for each dollar invested than any other class of live stock." In the opinion of A. M. Peterson, instructor in animal husbandry in the Kansas State Agricultural college, "For this reason farmers should give more attention to the sheep industry."

"None of the disadvantages, the most important of which are dogs, parasites and disease, should discourage the flock master," said Mr. Peterson. "Proper care and management will control and largely eliminate these troubles. The flock that has to rustle for itself is the one that is hit the hardest by pests. With a little feed and attention the sheep will be in a more health-

Splendid Farm Type.

ful condition and return enough more profit to pay for the extra feed and attention.

"Sheep produce two cash crops a year—wool in the spring and lambs in the fall. They can be grown and maintained upon a greater percentage of roughage and a smaller percentage of grain—than any other class of live stock. They will clean up the woods from the farm and convert other feeds into a marketable product."

"As a source of fresh meat, which is wholesome in character and flavor, a flock of sheep is the best. This fresh meat is the most healthful class of meat because fewer sheep are condemned than any other class of live stock."

FURNISH PROTEIN FOR SOWS

Alfalfa and Clover Hay Can Be Made Use of to Supply Necessary Constituent at Low Cost.

In wintering the breeding herd there arises the question of a cheap source of protein. Where available, alfalfa and clover hay can be made use of in furnishing this necessary constituent at a low cost. The hay may be used whole or chopped, put in racks, and fed according to the appetites of the hogs.

If the sows have nursed a large litter, it will be necessary to feed a grain ration in addition to alfalfa. The amount will vary from one and one-half to two and one-half pounds per 10 pounds live weight daily, depending upon individuality and the condition of the sows when winter feeding begins.

A sow will lose weight while nursing a litter, and she must regain this weight before her next farrowing time and carry her next litter in addition. In case sows are wintered without alfalfa hay, a grain mixture of corn ten parts and tankage one part, or corn five parts and oil meal one part, or corn eight parts, wheat middlings two parts, and tankage one part may be fed.—Pennsylvania State College.

BANISHING WORMS IN SWINE

Animals Become Infested by Taking Them Up With Food and Drink—Preventive Is Urged.

Eggs become infested with worms by taking them up with food and drink. Well-drained, clean lots reduce the opportunity for them to become infested. It is well to keep a good worm preventive before the hogs at all times. Any tested commercial remedy may be used. A successful preparation is made by mixing two parts air-slaked lime, two parts salt, two parts charcoal and one part pulverized copers.

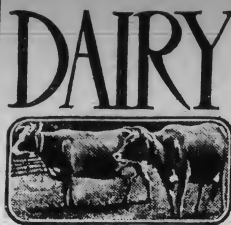

If the herd is badly infested, feed to each 100 pounds live weight of hog eight grains salutarin and six grains calomel, thoroughly mixed with a thin slop. These drugs can be obtained of most druggists. Let the hogs taste their evening feed and give them this treatment with the morning feed. Repeat it a week later if necessary.

SALT REQUIRED BY ANIMALS

Cow Needs Ounce or More Daily—Place It in Boxes in Yard Where It Is Available.

Salt is required by all animals. The cow requires an ounce or more a day and while she should be given all she needs, she should not be forced to take more than she wants.

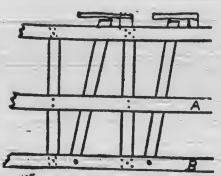

It is best, therefore, to give only a small quantity in the feed, and to place rock salt in boxes in the yard where she can lick it at will.

PREVENT COWS LYING DOWN

Iowa Man Has Practical and Inexpensive Device Attached to the Immovable Stanchion.

In the summer or spring, or at other times after rains, the yards around the barn are muddy. The cows are driven into the barn preparatory to milking. They are fastened in the stanchions. The result is that the floors become dirty and dusty. The mud comes off the feet and adheres to the platform on which the cows stand. Again, it is not infrequent for a cow to lie down on the dirty platform, and another cow to urinate on that cow's tail. It is a rare thing that two or three cows out of ten will not lie down before you are ready to milk. To prevent them from lying down for an hour or more while you are milking, is the object of the device here illustrated, writes J. N. Muncey

Keeps Cows on Feet.

of Buchanan county, Iowa, in Wallace's Farmer. It is inexpensive, unpatented, easily made, and practical. It is a labor-saver. It frequently saves the milker from a swat across the mouth with a dirty tail.

"A" is a fence-board, which may be nailed or bolted or temporarily attached to the immovable stanchion. It should be placed just high enough above "B" so that its upper edge just touches the lower edge of the cow's neck when she is standing. The same or a similar device may be used on the patented swing stanchions, I think, though I have never tried it.

If you use it in winter, be sure and put a sign of warning at the head of your bed, so that at no time will the poor cows be compelled to stand up all night long. It is an advantage to clean all the udders at once, and when they are clean and ready for milking, a man dislikes to have any one of the cows lie down and get her tail in the urine and her udder in the dirt or manure; and when she does get up she'll swat both cows next to her, and you frequently have to clean all three.

PROTECTION FOR MILK CANS

Heavy Blanket, Dipped in Water and Wrapped Around Receptacle, Keeps Out Much Dust.

The only way to have cream reach the creamery as clean as when it left the farm is to protect the can. This is best done by the use of a heavy blanket, kept for that purpose, dipped in clean water and wrapped around the can so as to completely cover all but the bottom. Dust will sift through a dry blanket quite rapidly.

The cream can, even if protected from dust, should, if possible, be kept shaded during transportation to the creamery.

If the creamery managers and butter makers would insist that patrons protect their cans the grade of cream would be greatly improved, the cans would look better and the labor of washing before returning them to the patrons would be greatly reduced.

STALE MILK CAUSES SCOURS

Pails and Utensils Used in Feeding Calves Must Be Kept Clean to Avoid Diseases.

Old or stale milk often causes indigestion or scours. A calf is better off to miss a feed than to have a feed of sour milk. Pails and utensils must be kept clean.

A good rule is to keep the calf pails as clean as the milk pails. The hand separator on the farm makes it possible to get the milk to the calf fresh, warm, and sweet.

Calves can be raised on skim milk when cream is raised by gravity, but more difficulties are experienced.

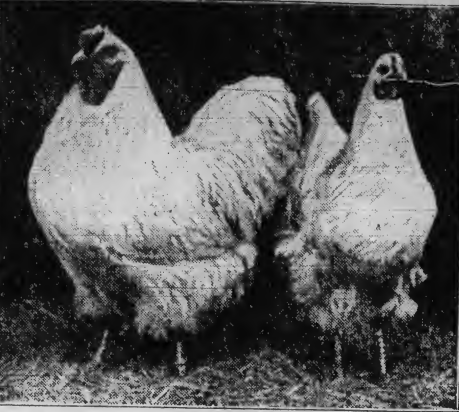

GET FAMILIAR WITH HEIFERS

Handling of Young Animals in Advance of Freshening Is Necessary in Minds of Dairymen.

The best plan is to get your heifers handled when they are familiar with your presence. They then become docile and will follow their caretaker around and to be rubbed and handled, and all the kicking, thumping, shy tendencies leave them.

The handling of the heifer in advance of the freshening period is a necessity, in the estimation of many of our best dairymen and cow owners.

EGG PRODUCTION DEPENDS MUCH ON FEED

PRIZE-WINNING WHITE WYANDOTTES.

Systematic feeding is just as necessary in the poultry yard as it is in the steer pen or hog lot. G. W. Hervey of the Missouri college of agriculture, gives the following hints which may help relieve the egg shortage:

Grain for chickens should be clean and free from mold. Moldy grain will often cause death or result in any one of the several diseases common to the digestive tract. Birds affected become weak and inactive and often manifest an intense thirst.

There is always danger of under-feeding. The birds should go on the roosts at night with crops well filled. Only a little grain need be scattered in the straw litter each morning to induce exercise during the day. The total amount of grain to be supplied daily will depend largely upon the palatability of the dry mash which is fed as an adjunct to the grain ration and also the housing facilities. If the dry mash is not relished or if none is fed at all, a greater amount of grain is required to satisfy the appetite of the birds and at the same time they cannot utilize the feed efficiently for production purposes. When insufficient protection is given, especially during the winter months, by undue exposure of houses or by allowing draughts, more grain is required to keep up the body heat.

RIGHT FEED FOR EGGS

Methods Employed at Nebraska University Farm.

Grain Thrown into Deep Litter in Morning to Keep Fowls Busy Scratching—Electric Lights Found to Be Useful.

The following methods and feeds are used at the Nebraska university farm at Lincoln in connection with the poultry department:

During the winter months the birds receive as their first feed in the morning a scratch feed, such as follows: Two pounds of cracked corn, two pounds of kafir two pounds of wheat, two pounds of oats, one pound of barley. This is thrown into a deep litter and in such amounts as will keep the birds hungry and working for food throughout the morning.

About ten o'clock a feed of sprouted oats is given. Cabbage, mangels and green alfalfa are sometimes used in addition to this green feed, in small quantities, to offer variety.

At noon a very light feed of wet mash is given. It is made from the following mixture and mixed with skim milk: Two pounds of cornmeal feed, two pounds of bran, two pounds of white middlings, two pounds of ground oats, two pounds of meat scrap, two pounds of corn gluten feed. This is fed in troughs of sufficient length so that each bird has enough room.

About four o'clock in the afternoon a liberal feeding of grain is given. Special attention is paid to giving the birds all they want for the night feed. The poultry-house is equipped with electric lights, which are turned on at five o'clock in the morning and the birds thereby have a longer day in which to work. It has been found a paying investment to have lights in the house for the early morning and night feeds.

A dry mash, composed of the same ingredients and proportions as above mentioned for wet mash, is placed before the birds for free access. Grit, oyster shell and charcoal are also available in a hopper.

KEEP POULTRY HOUSE CLEAN

If Roosts, Nests, Etc., Are Made So That They Can Be Moved Cleaning Is Made Much Easier.

Keep the house clean at all times. If all the equipment, such as roosts, nests, etc., are made so that they can be easily removed, cleaning will be made much easier. Use a good disinfectant around the roosts and nests occasionally, and whitewash the house thoroughly at least once a year.

A good house is a paying investment.

It is questionable whether chickens may be overfed. An improper balance, however, between mash and grain will often result in an excessive deposition of fat, so much in fact that the function of the reproductive organs is interfered with and the bird does not lay. It is believed that laying hens should eat half as much mash as they do grain but experience, based on year-round feeding, shows that the dry mash consumption is only about one-third of the total ration. A wet mash consisting of bran and sour milk may be fed two or three times weekly during the late summer and during the winter as an appetizer, and in this way the total amount of mash eaten may be increased.

The dry mash fed in the University of Missouri pens consists of equal parts by weight of grain, shorts, cornmeal and meat scrap. If sour milk is given the meat is not necessary. This mash admits easy mixing, is bulky and has a sufficient protein content of an animal source to make it practical for production. This mash may be fed in a self-feeding hopper to which the birds have free access. If fed in this manner they will, to a large degree, gauge their own ration, and at the same time considerably less labor is required than if the mash is thrown into troughs each morning.

HABIT OF FEATHER PULLING

Generally Develops in Winter When Fowls Are Crowded into Houses Too Small.

Feather pulling or eating may not be so bad as egg eating, but it is annoying, and is a habit with which most poultry keepers have more or less trouble. During the fall and winter, when birds are not getting sufficient exercise and are crowded into small houses, this habit is most likely to develop.

Such habits as egg and feather eating are usually the fault of the owner. When birds are not overcrowded in large flocks, and are forced to work all day for all the feed they get, it is seldom that either habit appears. As a rule, a feather-eating bird is a poor layer, and the quicker you can rid your flock of such a pest the better. One feather eater in a flock will cause no end of trouble, and in a few weeks will make all the birds show unsightly bare backs.

To stamp out the habit, get rid of the hen that is causing the trouble, supply the flock with plenty of animal matter, such as meat and green-out bone, make the birds exercise after the food they get.

As a treatment, apply an ointment of some bitter mixture—quinine or aloes mixed with lard will do the work. A solution made by boiling tobacco in water will be found satisfactory. The feather-eating bird will quit eating the feathers of these bitter doses.

GREEN FEEDING IN WINTER

Experience in North American Continent Disproves Idea That Succulent Feed Is Necessary.

A great deal of stress has been laid on succulent green feeds as an important part of an egg ration, but the experience in the North American egg-laying belt means rather to disprove that idea. No green feed is furnished except that which grows in the yards during the summer, yet the winter laying has been very satisfactory.

In a supplementary test the poorest laying pen consumed the most green feed and the highest laying pen the least. There is no doubt that green feed is good for poultry. The question is whether it is essential to heavy egg production in winter, and the experiments tend to prove that it is not. The reason hangs that consume a great deal of hunky, green feed do not lay as well as those that eat more concentrated feed is easily seen. Because of the bulk the green feed fills up and satiates, but does not contain the high percentage of nutrients that dry feeds do. In order to become high-power layers, hens must have high-power feed, so unless the hunky green feed is supplemented by highly concentrated feeds, having the food elements that green feed lacks, it will not furnish the excess of nutriment that is needed to make eggs

The writing of a multiplicity of signatures is a punishment that will be suffered no longer by your ministers of state if they consent to adopt the signing machine that has just been invented in America. The "signograph" is well conceived. Placed on a table there are sixteen or twenty penholders with an ink reservoir set in a frame upon the leaves of which is a "penholder monitor," every movement of which is repeated by the sixteen or twenty other penholders. An American with this apparatus has made 14,000 signatures in eight hours, but this record, it appears, has been beaten by one of his countrymen who signed 6,000 pieces in 38 minutes, says Le Cri de Paris. It is impossible, you may say, to read with such rapidity what one signs; but why should the ministers read what they sign?

More than 28,000 people were killed by snakes and wild animals in British India last year. The government reports show that 1,923 persons were slain by tigers and other beasts, and 26,385 perished through being bitten by reptiles, an increase over the previous year of 3,700 deaths met in this manner. No figures are available for the native states with their population of about 90,000,000. During the last five years elephants, tigers and other animals have killed 9,192 people in British India, and of these tigers have claimed a total of 3,682. In the same period 116,823 persons have died as the result of snake bites.

And now comes a warning from the public health service of the United States that cutting down the amount of milk, meat, eggs, beans and peas in the average diet of American households may increase the prevalence of pellagra, as these foods are pellagra prophylactics. It is a wise thing to use corn for the purpose of reducing the cost of living, but not to depend on corn; for pellagra is most prevalent among those who make corn their main reliance as an article of diet.

Another evidence that the judiciary is more or less human after all is found in the fact that it is not nearly so easy for a person to get colossal and wholly undeserved damages from a motorist as it used to be before all the judges had automobiles of their own.

Why not plant an acre of beans or an acre of potatoes and prepare to fare sumptuously every day?

A tiny bit of blue is shining out from the clouds. Eggs are coming down.

PELLAGRA PREVENTS.
The United States government experts declare that too much economy or lack of intelligent economy may result in a scourge of pellagra which will be as terrifying as were the epidemics of spinal meningitis and infantile paralysis. Pellagra is caused by the lack of protein in the food. Protein is furnished to the body by such foods as eggs, milk, fish, peas, nuts, apples. Most of these foods are expensive just now--but they are not as expensive as a case of pellagra will be. And the wise housekeeper will run no risk of inflicting such a calamity upon her household. A little intelligent economy in the market will enable the housewife to supply those foods to her table which are required and at no very great expense, says Houston Post. It requires as much business ability to do the marketing for a family as the ordinary purchasing agent finds use for--and the success of the Housewives' league in Houston and elsewhere is due to the early recognition of this fact by intelligent women. Particularly is this true in the family where needs of growing children must be provided for. It is likely that undernourished schoolchildren furnish the most fertile field for pellagra. Their bodies and minds naturally require more protein than those of grown persons--and they are far less likely to secure the needed quantity. The wise mother will see to it that no tuberculous germs or pellagra conditions fasten upon her offspring because of lack of sufficient foods containing protein--even though it requires far more time and thought than is ordinarily given to the food problem.

While this country may excel in a competition of trained athletes or in certain kinds of mental ingenuity or shrewdness, it is certain that the average man is far from being a picture of perfect physical development, and the lack of self-control and the extreme contempt for the law of the American have become proverbial. A casual inspection of the crowds on the streets of any one of our large cities will reveal pale, undernourished and poorly developed youths and pasty, flabby men in large numbers, and will convince the open-minded observer of the desirability for the individual of some form of regular physical training, says Medical Record. That the country, moreover, are not greatly superior to those brought up in the city has been the experience of most military men who have had occasion to handle large numbers of troops.

The quality of farm land under cultivation has very nearly kept pace with the growth of population, but it costs much more to farm now than it did 25 years and more ago, says Mariette Eagle Star. More fertilization, irrigation and higher prices for help and farm machinery all demand a higher rate of profits on productions of farms. In spite of all the improved methods of farming the average per acre yield of American farms has increased comparatively little during the past half century, yet more money, more labor and more thought are put into the cultivation of the soil than was necessary when the soil had all its virgin fertility. There seems little hope that food will ever again be as easy to raise or as cheaply purchased as it was a score of years ago.

The prohibition of high-legged boots, called for in the Shoe and Leather Record, would be a decidedly novel form of legislation. Mexico affords what is perhaps the nearest approach to such an enactment, says London Chronicle. The Mexicans have a special weakness for hats of the cart-wheel type, so that it is common to see men with clothes worn to ragged disporting themselves in hats worth \$25, or even more. In order to curb this form of extravagance the state of Yucatan recently passed a law imposing a fine of \$10 on any person found wearing a hat with a diameter of more than 30 inches.

According to the report of the department of agriculture, the farmers of America received for their 1910 crop more by 50 per cent than was ever paid before, says Houston Post. And those farmers who "lived at home" during the year were able to lay by a little something for a rainy day; while those who bought from the stores everything they used are still as "broke" as ever.

Congress may provide a fine of \$25 for neglect to vote at a federal election, which would furnish good material for meditation while waiting in line three or four hours before a balloting place.

Hubert Ryle, of East Bend, passed through Burlington, Friday, enroute to the city with a truck load of live stock.

The Confederate Reunion.

The Confederate reunion in Washington was a great event in the annals of a free people.

The "old rebels" were welcomed to the capital of a united nation by the President; they were presented with a union flag to be carried side by side with the South on flag at the head of the Confederate parade, Col. Cowan, Union veteran of the Army of the Potomac, saying as he presented the flag:

"You will proudly carry the Stars and Stripes with the Stars and Bars of heroic memories; they will be greeted with cheers and tears--cheers for the living and tears for the dead."

"We saw your Southern battle flag on a hundred battlefields; it was borne with honor through the war--it was furled in honor at the end. As long as red blood flows in your veins you will cherish its heroic and tender memories in your hearts--we honor you the more for that."

It was an occasion that inspired the highest sentiments of the soldier and the citizen, and testified to the world anew of the enduring power of the people to establish freedom and to maintain it amid the crises and counter-crises of civil and of political strife. Honor to the flags and to the men who bore them, and who will guard them and all they stand for on new fields of battle to new triumphs of peace and war--Ex.

Head Got It Over Feet.

The tournament exercises at the Court House and Athletic field were greatly enjoyed by all. The different schools gave their "yells" and everything went off tip-top. The Athletic Events were of special interest to the Owen-ton people.

The Tennis, Basket Ball, Races, Jump, etc., went off in a nice manner. Walton won the most. The remark was made at the fair ground: "The Burlington boys couldn't do anything in Athletics." Quick as a flash came the answer from one of the Owen-ton women: "You may have it over them in the 'est' but there's no it over you in the head--Owen-ton Herald."

If the growers had their ground ready and their plants were large enough to transplant they have had ample opportunity to get their crop of tobacco picked.

Information has been received at this office that when it rains the first day of June it rains every day thereafter during the month.

WALTON DEPARTMENT.

D. B. WALLACE, Manager.

Hand your news items to Mr. D. B. Wallace at the Walton Equitable Bank and Trust Co.'s building. He is also authorized to receive subscriptions and collect other accounts.

R. Wood Carpenter who has been sick is able to be about again. Bring your old auto tires to the Edwards Garage and get new ones for them.

R. M. Renaker returned home Saturday from business trip to Beebe, Arkansas.

Mrs. B. K. Sleet who has been quite ill the past couple of weeks is much improved.

Dr. B. K. Menefee of Covington, spent Monday here the guest of Mr. and Mrs. A. M. Edwards.

Legrand Gaines, of near Burlington, arrived here last Saturday on a visit to his son W. Lee Gaines.

Mrs. Chas. Strocher spent the past two weeks with her mother and friends at her old home at Owenton.

Mrs. Mollie Ford is spending a part of the week in Cincinnati, the guest of her son Claude E. Ford and family.

Mr. and Mrs. A. P. Tompkins and son John spent part of the week at Warsaw and Ghent with relatives and friends.

Prof. T. C. Frey of Vanceburg, Lewis, has been elected of the Walton Graded school.

Miss Emma Beely of St. Joseph, Mo., spent last week here the guest of her cousin W. R. Ransler and other relatives.

Misses Mary and Edna Gordon left last week for LaGrange to spend the summer with their grandmother, Mrs. M. K. Gordon.

Mr. and Mrs. John E. Williams and children spent part of the week in Bracken county, visiting his mother and other relatives.

The Ladies Aid Society, of the M. E. church had their bazaar opening last week and realized about \$100 for the benefit of the church.

John C. White, of Burlington, was here Tuesday in the interest of his race for the Democratic nomination for jailer of Boone county.

Mr. and Mrs. W. B. Ambrose and children, of Berkshire, were visitors here Tuesday morning thru to Cincinnati to spend a couple of days.

Found.—Automobile license tags, No. 24 thousand two hundred and sixty-one Ky. and No. 50660 Ind. Owners can get same at Equitable Bank.

Mrs. P. C. Youell who has been visiting her daughter Mrs. H. V. Cline at Rogers Gap, returned last week, accompanied by her daughter.

Edward Kohlbrand of Covington, and Wm. Kohlbrand of Newport, spent last week here doing some decorating work in private residences.

Mrs. Hattie Campbell and little daughter of Hazard, Perry county, arrived here last week on a visit to her mother Mrs. Belle Taylor and other relatives.

The Royal Moving Picture house is now giving three shows a week, Tuesday, Thursday and Saturday, and is being well patronized as the pictures are of a high class.

Harry D. Dean, of Moore's Hill, Indiana, spent part of last week here, guest of his brother Arthur Dean, who accompanied him home for a short visit to old friends.

Robert W. Jones, the Buck agent, delivered this week a Buick Six Roadster to J. E. Williams, of near Verona, and a Buick Four touring car to J. H. Walton, of Grant, Boone county.

Melvin Martin and wife, of Crittenden, were visitors here last week conferring with George B. Powers, the real estate agent, about the purchase of some real estate in this quarter.

Judge P. E. Cason and Geo. Porter of Burlington, were visitors here Tuesday, Judge Cason soliciting the support of the voters in his race for reelection as County Judge of Boone county.

Mrs. J. E. Williams spent part of last week at Georgetown attending the Commencement exercises at the Georgetown college where her daughter, Miss Luti, is a student, and she accompanied her home to spend the summer vacation on the farm near Verona.

Rev. and Mrs. Wayne Elyand of Louisville, have been guests of her parents Mr. and Mrs. E. P. Northeast the past two weeks. Rev. Elyand has been engaged in a protracted meeting at the Baptist church in Frankfort the past week.

Edgar Albright of Mount Vernon, Rockcastle county, was a visitor here last Friday, motorizing through from Cincinnati. Mr. Albright is the publisher of the Mount Vernon Signal, and the supt. of the electric light plant at that place.

Hon. Francis E. Curley, of Tucson, Arizona, was a visitor here last Friday to his father Judge Thos. F. Curley and his many friends, going from here to New York City where he has a business engagement relative to some mining interests in Arizona.

Hugh McLachlan of Cynthiana, was here Friday to put the farm of his father at Kennington, containing about 150 acres, for \$14,000 and will get possession this fall. Mr. McLachlan is a split-did citizen and he is gladly welcomed to Boone county. The sale was made through the real estate agency of G. B. Powers.

Robt W. Jones and John Lewis Williams returned last Saturday from Detroit, Michigan, driving through in a Buick auto that Mr. Jones received at Plint, Michigan, where the factory is located. The machine having been sold to a customer by Mr. Jones and the delivery being rather slow by rail road he decided to drive through

Miss Alma Mae Steger of Owenton, and Miss Elizabeth Hicks, of Union, are spending the week here, guests of Miss Glenna Rosa Gaines.

Joe C. Miller spent Saturday and Sunday at Ludlow visiting his uncle Charles A. Slater who has been ill and confined to his room, but is much better.

J. Merit Jack and son Osmoun of Beaver Lick, were visitors here Monday. Mr. Jack is the efficient and popular manager of the Beaver Store and is enjoying an excellent business.

Hon. H. M. Froman of Lexington, president of the Henry Clay Fire Insurance Company, was here Monday, and appointed W. Lee Gaines as the adjuster of the company in the hail insurance department.

Sunday night a fine Jersey cow was struck by an auto driven by Gus Henry Clark, near Owenton, and one of its legs broken. Dr. E. I. Glacken, the veterinary surgeon of Richmond, gave the animal prompt attention and it is believed it will recover.

The Walton Loose Leaf Tobacco Warehouse is making considerable improvements to the warehouse property, and expects to open in the coming season a business which is expected to be even greater than last year, as the warehouse was conducted in the promise of an increased business and from a more extended territory.

Geo. E. Engel, Mrs. Emma K. Gough, Miss Helen Gough, and Miss Amelia Pringer of Covington, visited friends here last Friday returning from a visit to the Blue Grass section of Kentucky, making their trip in their automobile.

Dr. E. Engel was recently elected President of the German National Bank of Covington, succeeding Hugh F. Colville, who was elected vice president of the Citizens National Bank of Louisville.

The town council at its regular meeting last Friday night decided on an ad valorem tax of 50 cents on the \$100 valuation and a one dollar poll tax, the tax rate the past several years has been forty cents, but this increase was deemed necessary to meet the current expenses. The matter of oiling the streets was deferred until a later meeting because of an increased rate of oil and a half cent per gallon on the oil, and an effort will be made to place the order at old rate for the oil.

The death of Mrs. John H. Sleet at her home at Beaver Lick, June 3th, was a matter of much sorrow to her many friends at Walton. Mrs. Sleet, whose maiden name was Mary E. Osmoun, was born in near Owenton, and lived in the neighborhood where she died, and her life of about 74 years was spent in that quarter where by her lovable nature and kind character she endeared herself to everybody. She leaves a kind and devoted husband and five children, the latter, Samuel E. and Geo. W. Sleet, of Beaver Lick; Harriet K. Sleet, of near Walton; Mrs. Lulu Dudley of Denver, Colo., and a daughter, Hattie Dudley, of the Brant neighborhood. The funeral took place Thursday afternoon from her late home, Rev. W. B. Hall of the Methodist church holding the services and speaking words of consolation to the bereaved ones.

The friendly suit between Wm. C. Menefee and Geo. W. Sleet of Crittenden, to fully decide the validity of the title to about one hundred and twenty-five acres of land recently sold Mr. Menefee to Mr. Sleet, was decided in the Court of Appeals last week in which the title was declared to be good.

Mr. Sleet bought a large tract of land near Crittenden some years ago from Mrs. Hugh Colville of Covington, who inherited the land under the will of her father, Dr. W. W. Henderson who at one time lived on the land and after his death moved to Covington. The point was raised that under the will that Mrs. Colville only had a life estate and could not sell the land, and as Mr. Menefee was paying \$11,500 for the property he wanted the assurance that the title was good and he employed Judge E. F. Menefee to make a determination by the courts. Mr. Sleet employed J. G. Tomlin and J. L. Vest to represent his interests, and they contended the title was good, and their opinion was confirmed by the Court of

Appeals, the opinion of the court being that Mrs. Colville had under the will a separate estate but she had the will a separate estate but she authority to sell and convey.

The Tobacco Crop.

Fleming county growers are practically through setting tobacco.

Nicholas county fully one-fourth of the plants were destroyed by wind and rain.

Plants in Jessamine county, doing poorly, and are being rapidly transferred to the field.

Bourbon county plants were very badly damaged by the rains, many beds being completely washed out.

Many farmers in Woodford county say their tobacco but much complaint is heard about plants being so small.

Plant beds were damaged by the rains in many sections of the State. In some places they were entirely destroyed.

Tobacco beds in Fayette were washed up in many places by the rains, but for the most part they came thru without much damage.

The rains of the early part of last week made excellent tobacco setting season in Montgomery co., and it is estimated that close to half the crop was set. The plants, while small in many instances, were hearty and seasonable weather which followed caused them to "take hold" readily and are doing nicely. Labor was and is very scarce and in many cases women and children who had never set before assisted in the work.

The outlook for a large tobacco crop in Clark county is favorable. A part of the crop has been set and plants in the beds and are making rapid growth. The soil is ready for setting, which will be done as rapidly as the plants get large enough. Most of the transplanting so far has been done by hand, and if the weather is favorable seasons most of the crop will be set in this way. If no season comes at the right time the setter will be used.

Classified Advertisements.

Wanted.—To buy good bull, Egar Berkshire, Burlington, R. D. 1.

For Sale—Five year old Jersey cow and her calf, H. R. Hearn, Richmond, Ky.

For Sale—Five sows and pigs, Russell Garrison, Union, Ky., R. D. 4, Farmers phone.

SUMMER IS HERE!

AND IT IS GOING TO BE SOME HOT

The high price of coal coupled with the inconvenience of using it in hot weather should make some other method of cooking appeal to you. Especially so when in buying one of our

COAL OIL STOVES

you are securing something which spells Economy, Safety and Comfort in full. We have them in all makes—

Blue Ribbon, Success and New Perfection

and they all represent the highest point of efficiency in construction and durability. Surely you will own one if you see our stock, for the price is too moderate and the superiority over coal and gasoline so evident that you can not hesitate to take advantage of such a good opportunity to make the coming hot days comfortable. They BURN WITH A STEADY BLUE FLAME, have perfect cooking qualities and are absolutely safe. Practically no heat and with ordinary care will last a lifetime.

In One of These Stoves

You will secure a bargain, as has always been the case in our other large line of Groceries and Dry Goods.

E. E. Kelly,

Burlington, Ky.

U. S. Liberty Loan Bonds

The Secretary of the United States Treasury at Washington has requested all banks to act as agent of the U. S. Government in placing the 3 1/2 per cent Liberty Loan War Bonds.

We desire to do our part in financing this loan and assisting those individuals who wish to subscribe for any of these bonds.

Your subscription will be received at this bank and handled by us direct with the Government without any charges whatever or any profit or commission to ourselves.

All subscriptions must be in before June 15th.

We are in possession of full details and you are welcome to take advantage of our services in subscribing for any of these bonds.

All inquiries by mail or otherwise gladly responded to.

Peoples Deposit Bank,

BURLINGTON, KY.

W. L. B. ROUSE, Pres. A. B. RENAKER, Cashier.
EDGAR C. RILEY, Vice-Pres. NELI H. MARTIN, Asst. Cashier.

PLUTARCH

Will make present season on Monday and Tuesday of each week at Waterloo, this county, and the remainder of the week at the stable of Edgar Souther, one mile west of Constance, at \$20.00 to insure a colt to stand and suck.

I will not be responsible for accidents should any occur.

T. E. RANDALL.

W. L. RIDDELL, Publisher.

Forty Years Ago Today

Items Taken From the Issue of
The Recorder of June
14th, 1877

Rev. Dr. Hall, of Covington,
preached here last Sunday.

Rev. Benj. Lampton preached at
the Methodist church last Sunday.

Crop of white clover unusually
large.

J. B. Fennell, formerly of this
county, is a candidate for County
Attorney in Scott county.

There are five men in the jail
here.

H. S. Johnson, being over fifty
years of age has been released
from paying poll tax for road
purposes.

Thos. Z. Roberts has been ap-
pointed guardian for Martha, Jas
and Rachael Merchant.

Two of the citizens of Florence
disappeared, Stubbuck, the drug-
gist, and Robinson, the shoemaker.
Stubbuck owned no bits, but
Robinson owned many.

Sherriff Geo. W. Street had mes-
sages during his honeymoon.

Florence—Bishop Toebe con-
firmed about 30 children here last
Thursday night—Father Bent will
be sent from here to Newport,
and Rev. J. A. Murney, of
Georgetown, will be sent here.

Petersburg—Murphy's gave a
big ice cream and strawberry sup-
per—Mrs. W. H. Grant died last
Sunday, after an illness of about
six days.

Bellevue—Freiburg & Workum
received 10,500 bushels of corn at
the wharf here, for which they
paid 30 cents a bushel. Crops
generally look well.

Mary E. Rector.

Mrs. Mary E. Rector was born
on Woolper creek Boone county,
Ky. May 31st, 1817, at 5:38 o'clock
p. m. being 21 years, 11 months,
5 days old.

She was a daughter of William
and Eliza Jarrell Akin. She was
married to W. D. Rector April 7th,
1870. To this union eight chil-
dren have been born, three of whom
died in infancy. Little Evelyn, late
died in infancy. Little Evelyn, late
died in infancy. Little Evelyn, late
died in infancy.

She had lived most all of her
life near Petersburg and the large
crowd of friends attending upon
her funeral was a testimony to the
high regard in which she was held.
Her life was spent in the interest
of all humanity. She was a fervent,
devoted mother to her family, and
a consecrated, devoted member of
the church.

She united with the Baptist
church under the preaching of the
late James A. Kirtley, D. D., and
was baptized in the year 1837. She
lived some 30 or 37 years ago, but
when her family had united with
the Christian church, she cast her
lot with them and became a mem-
ber of that church in the fall of
1863.

In her declining years she was
unable to attend upon public
worship, but she gave her atten-
tion to her Bible and prayer. She
trusted in Christ as her savior and
bore her suffering without com-
plaint.

A RELATIVE
The husband and children take
this means to express their thanks
to the neighbors, friends and re-
latives, who so faithfully attended
them during their last illness and
loss of a mother and wife, to un-
derstand J. H. Steir for the pleas-
ing manner in which he conducted
the funeral and to Rev. R. H. Car-
ter for his consoling words and
prayers.

Husband and Children
Kentucky's Registration.

Frankfort, June 8.—Out of a reg-
istration of 179,999 men subject to
military service in 106 counties and
four cities in Kentucky, 54,017
make no mention on their cards of
"exemptions," while 126,166 are
married, have dependents, or state
some other reason why they
should be exempted.

Out of 26,735 negroes registered
in these counties 18,687, or an
out of 20,110 state exemptions. Out
of 19,110 we listed 10,799 or about
47.31, lay some claim to be in
one of the exempted classes. In
these counties there are 911 neg-
roes and 443 enemy aliens.

Childs—Learse and Wolf, R. H.
reported only total registrations
without classifications, bringing
the total for 109 counties, four
cities and the two prisons to
175,102.

His Hat's in the Ring

Robert M. Wilson, of Constance,
has thrown his hat into
the ring as a candidate for Jailor
in this Mr. Wilson's first ap-
pearance in the political arena, and
has been a resident of several
years in this county. He
has had a residence in several
places in this county, and
should not be a large
office he will give it his un-
divided attention.

What We Owe to the Kaiser.

"We are now face to face with
the result of last year's poor har-
vest, the diversion of man power
from agriculture all over the world
the unavailing efforts of Euro-
pean women to plant available
fields fully, the isolation of Rus-
sia, the sinking of food ships."
The only hope of providing the
deficiency in the world's food
supply is the elimination of waste
and rigorous self-sacrifice. To
carry the Allies over until the
next harvest we must reduce our
wheat consumption 30 per cent.
Thus Herbert C. Hoover summa-
rizes one feature of a lamentable
situation which we owe to the
house of Hohenzollern and Haps-
burg, but chiefly, to the directing
House of Hohenzollern, and to
the Emperor of Germany whose
initiative—whether as the result
of the advice of ministers and
friends it matters not—destroyed
temporarily the peace and the
prosperity of the civilized world
in the interest of a wholly self-
ish ambition.

The entire civilized world is
short of food; every civilized man
is paying a tax in the form of
increased prices of food, and of
all other commodities, because
the Kaiser went to war with the
unspurious intention of over-
whelming France by the impact of
superior numbers and by the
agency of superior munition. In
late summer and early autumn of
1914, The War was expected to
result in a German victory. The
climax was to be a German vic-
tory and German grab.

When an American goes to a
shop to buy a pair of shoes he
pays more because the Kaiser
the Kaiser was ambitious and un-
scrupulous; because imperialism,
with the principles of medieval
imperialism with the unethical
code that is imperialism, set out
in the summer of 1914 to imitate
the exploits of Tamerlane. The
American mother who buys a box
of animal crackers for her child
pays ten cents for the package
which cost five cents formerly, be-
cause the Kaiser, in the hope of
getting a firmer seat upon the
German throne and still the in-
terrogation interrupted a pros-
perous peace, and the profitable
neighborliness of the nations of
the earth which fostered the
chances of untold products of

the soil, the factory, the loom, The
American farmer, who buys wire
with which to fence farm animals
or growing crops in his fight
against threatened famines, pays
more for the wire because the Kaiser's
invasion of the peaceful and
fruitful fields of Belgium inaugu-
rated a world-wide catastrophe
and put a war price upon almost
every commodity that is the pro-
duct of human labor. There can
be no peace upon a basis of prob-
able permanency, no peace that could
be anything more than a breath-
ing spell for imperialism, to be
followed by another murderous on-
slaught, unless and until the Kaiser
shall have been brought to his
knees; not held back merely from
the objects of his present raid upon
Christianity with the Turk as an
ally.

It is, in these circumstances,
undenied by honest men, reason-
able to infer that anyone who
asks why America is at war is in
the pay of the German Govern-
ment or lacks sufficient mental
development to see beyond the
end of his nose. But, comparat-
ively, among those who are at war
despite the adequacy of asylums
for defectives and lunatics, lack
mental development to that ex-
tent.—Courier-Journal.

NEWSPAPER WAR COMMENTS.

It's just like those stubborn Brit-
ishers to pay no attention to Von
Hindenburg's official announce-
ment that their drive has failed
and that it is all over.—Indiana-
polis News.

The refusal of some of the Ute
and Navajo Indians to appear at
the registration booths will give
the Berlin press a great deal more
excitement and comfort than the big
enrollment of American citizens of
German birth or descent in New
York, Chicago, Milwaukee and St.
Louis.—New York World.

The difference between election
day and election day was that in
this case we knew the result be-
forehand. — Philadelphia Evening
Ledger.

The advent of our commissioners
in Russia comes at a fortunate
time. They have won the race
against time since they have ar-
rived before anything has happen-
ed to make their visit futile.—
Boston Eagle.

The arrival in Russia of former
Senator Root and the remainder
of the commission from the United
States is announced in Wash-
ington, and the knowledge that
the Americans have safely nego-
tiated a dangerous journey af-
fords a sense of relief to the
United States.—Pittsburgh Sun.

Spain is showing a tendency to-
ward joining the array of nations
battling for the liberty of the
world. She has sent a note to Ber-
lin, which is a clear shot of an ul-
timate American and Spanish
soldiers may yet fight, since by
side; also Russian and Japanese
and other scores are being wiped
off the slate by the war started
by Germany.—Topeka Jour-
nal.

Another thing you have observ-
ed. The very links who speed their
automobiles fastest really have
no place in particular to go and
nothing in particular to do.—Hous-
ton Post.

We have a picture of the Kaiser
getting into bed from this coun-
try if the Liberty Loan measures
up to that army of 10,000,000.
—Pittsburgh Post.

After Edison solves the U-boat
problem he is going to try and
invent a way of using coal in the
sub-boat without a grossy false re-
sulting.—Birmingham News.

PRISON NO BAR TO SUCCESS.

Many Men Have Passed From Peni-
tentiary To Prominence
and Success.
(Leavenworth New Era.)
In the great city of Chicago
there lives a man eminent as a fi-
nancier and social economist who
up to the year 1894 was known to
the police of the world as a dan-
gerous and confirmed criminal.
While engaged in his criminal pur-
suits he went to Chicago and start-
ed a gigantic mail-order swindle
that grew so rapidly as a straight
proposition that it, perforce, led
its originator into a lawful career.
His planned mail-order swindle be-
came the ruin of one of the
world's greatest houses—capitalized
today at \$18,000,000. While his
original intentions were crooked,
the man who was once a criminal
developed so rapidly that it sur-
prised him and made a millionaire
instead of a greater crook out of
him.

The founder of one of Chicago's
greatest department stores was
once an inmate of Joliet prison.
Upon his release he became a
peddler at the corner of State and
Adams streets, the same corner
that in later years became the site
of his mammoth store.
The right-hand man of Lord
Strathmore, of Canadian Pacific
Railway fame, had spent many of
his years in English and American
prisons. According to pseudo
criminologists, he would be con-
demned forever as a habitual crim-
inal, yet he achieved great wealth
and fame, despite his damaging
record. Today he is respected by
every one.

When men have rehabilitated
themselves and become successful
after spending years in prison un-
der the old rule it seems that
men nowadays who may have been
unfortunate enough to be sent to
prison have very little to fear if
they take advantage of their ev-
ery opportunity. Every man in pri-
son is not a confirmed criminal,
and a term in this institution es-
pecially should pave the way to a
greater success in stepping stones
to greater possibilities—the be-
ginning of a better and greater
future career. What so many oth-
er men have achieved should
prove a powerful inspiration for
us also to achieve. Other men's
success should stimulate us to
greater efforts to conquer our
downfall. A firm determination
to succeed along lines of honest
endeavor.

State News.

missioner of Agriculture Mat S.
Cohen, who said seasonable weather
will bring good yields in the
cereals.

Frankfort.—A large increase in
the acreage of corn and unusual
planting of soy beans and cow
peas and buckwheat is shown in
the crop report issued by Com-

Hickman.—A slight earthquake
was felt here this morning at ten
minutes after 7 o'clock the rum-
bling sound being heard before the
vibrations began, the vibrations
lasting several seconds.

Owingsville.—The flag raising
and patriotic day exercises were
attended by a large crowd, altho
it continued to rain at frequent
intervals almost up to the hour
set for unfurling the large flag
which was placed on a ninety-foot
pole in front of the court house.

Flemingsburg.—The people of the
Mayfield neighborhood gathered
at the High School building there
Sunday afternoon for the purpose
of organizing a Red Cross chap-
ter. As Mayfield is noted for its
enthusiasm along all lines of pub-
lic interest, a large organization
is expected to result.

Lebanon.—Heavy rains which fell
in the county Saturday and Sun-
day put the ground in excellent
shape for setting out tobacco.
Though in some sections where
the ground is rolling and along
streams, some damage is reported
from washing out young corn and
other crops.

STATE NEWS.

Winchester.—There has been
fine rains in Clark county and ev-
erything is growing. The immedi-
ate need on most farms was grass,
which is now making very rapid
growth.

Payette county was visited by
some windstorms and rain on May
28 and June 1, which played with
barren trees and farms in the
country and unroofed houses in
the city.

Nicolasville.—The prospects of a
good potato yield are the best
ever known in Jessamine. Not only
is the acreage large, but the
vines are free from bugs and are
in flourishing condition.

Carlisle.—The present outlook for
the farmers in this section is
somewhat discouraging. The four
windstorms visited this county
and more than twenty tobacco
barns were blown down. Many far-
mers report that their corn
ground has been badly damaged.

Whitesburg.—While the season
during the past week has been
more favorable for the crops and
growing vegetation throughout
Eastern Kentucky, it is yet far from
favorable. Most sections of the
mountains where the storms swept
last week practically all crops suf-
fered heavily, especially garden
vegetables, etc. Fruit men lost
much in damage to trees. A con-
siderable area of corn will yet be
planted.

Having to stand the draft, has
caused many persons heretofore
considered able bodied and manly
to discover that they have asym-
metrical and infirmities upon which they
depend to keep them out of the
ranks.

POULTRY FACTS

TESTS IN POULTRY FEEDING

Results Given of Experiments Conducted by Idaho Station, With White Leghorn Pullets.

At the Idaho station three pens of 50 White Leghorn pullets each were fed the following rations for one year: Pen 1, a grain ration of wheat, oats and barley, 15, 2, 2, and all the grit they would eat; pen 2, a grain ration of wheat, peas, oats, barley, Kaffir corn, millet, sunflower seed and buckwheat, 12, 2, 3, 2, 1, 1, 5, 0, 5, 1, and mash ration of bran, shorts, cornmeal, wheat, fish-meal meal and charcoal, 2, 2, 1, 1, 2, 1 per cent, and pen 3, a

White Leghorn Is Popular.

ration the same as that given pen 2, except that corn was substituted for peas and the oats were fed in the proportion of two parts instead of three.

Pen 1 averaged 24 eggs per pullet; pen 2, 146 eggs, and pen 3, 131 eggs. The percentage of eggs under two ounces in pen 1 was 66%; in pen 2, 5.5, and in pen 3, 2.4. The cost, exclusive of labor, \$19.36, and brought in only \$19.45; pen 2 cost \$34.91, with an income of \$57.15, and pen 3 cost \$33.22, with an income of \$97.20.

RAISING DUCKS FOR MARKET

Always a Demand in Large Cities for "Green Ducks"—Produced by Special Feeding.

The number of commercial duck farms in the country is increasing somewhat, it is said, but the production of ducks on general farms is decreasing, especially in the middle West. The last census reports show that ducks were kept on only 7.9 per cent of the farms in the country. The demand for ducks' eggs is more limited than for hens' eggs, and the demand for table ducks at good prices is to a great extent, confined to the large cities and is not nearly as general as the demand for chickens. For this reason it is advisable to study the market conditions before making any large investment in ducks.

On the other hand, it is said that intensive duck farming on a large scale has been more successful than intensive chicken raising. The Pekin ducks which are kept extensively by commercial growers are less subject to disease than chickens, and artificial methods of hatching and rearing have been used very successfully with them. Of

Fine Type of Ducks.

general farms ducks can be raised with success and at a profit, though as a source of income they do not appear to be as well adapted to average farm conditions as fowls. Hitherto farmers have rarely given the necessary care to the feeding and marketing of their ducklings to secure any large share of the trade in fancy green ducks.

It is this trade which attracts the commercial duck farmer. A green duck is a duckling which is grown rapidly and marketed when from eight to twelve weeks old, weighing at that time from 4½ to 6 pounds. This rapid growth is made possible by an abundance of care and good feeding. The highest prices are paid early in the spring, but, as has already been said, the demand is chiefly from the large cities in the East and on the Pacific coast. As a matter of fact, many farmers market their ducks in the fall at a lower price per bird than green ducks bring in the spring.

USE AX ON DISEASED BIRDS

Little Satisfaction in Attempting to Doctor Whole Flock of Sick Fowls—Avoid Disorders.

There is little satisfaction in attempting to doctor a whole flock of sick fowls, in fact the flock and its about the best remedy for fowls that become seriously ill. It is far better to use the methods and precautions which will keep a flock of fowls in healthy condition than to attempt to doctor them up after they have become affected with disease.

POULTRY FACTS

PLYMOUTH ROCK IS POPULAR

Bred as First Originated Was of Barred Variety—White Is Hardy and Adapted to Farms.

The most popular of all American breeds of poultry is the Plymouth Rock. This breed as first originated was of the Barred variety, which is yet the most popular of all the colors. Early in the breeding of Barred Plymouth Rocks fanciers reported the appearance of white chicks. They were "sports" and some were bred together, producing the present variety of White Plymouth Rocks. They have attained great popularity, widely bred, both for utility and fancy, and have proven perfectly satisfactory in either capacity.

They are hardy and especially adapted to farms. The hens lay large dark brown eggs of a grade much sought in certain localities.

The chicks are vigorous, strong and active, and grow exceptionally fast on range, reaching maturity at from five and one-half to six and one-half months old. They are readily salable for the highest grade of market poultry at all ages from broiler size to full maturity, and are very popular in some sections for the production of capons.

Males weigh from 8 to 11 pounds, females 7 to 10 pounds, and are prob-

White Plymouth Rock Cock.

ably the largest of all the Plymouth Rock family. Their plumage should be pure white, legs and beak deep rich yellow, combs small, single and fine. Such a fowl not only dresses to the best advantage and commands best prices, but is also very attractive in large flocks.

GIVE SOUR MILK TO CHICKS

Found Beneficial in Cases of White Diarrhea by Professor Kaupp of North Carolina.

When white diarrhea attacks a flock of young chicks many of them die, while those that survive are more or less stunted. Feeding freely on sour milk has been found beneficial. If sour milk does not act against the disease it at least gives the chicks greater strength and vitality so they are not seriously affected if attacked.

In some tests by Professor Kaupp of North Carolina he found that chicks fed on sour milk quickly recovered when attacked and the loss was only 10 to 16 per cent. In a similar lot, handled and fed the same except for the milk, the loss was 24 per cent at the first month, while the remainder were in such a weakened condition that at the end of eight weeks 36 per cent had died.

TO GET EGGS DURING WINTER

Comfortable Houses Must Be Provided to Secure Most Profitable Returns From Hens.

Times have changed since chickens roosted out on the trees and fences. Once in a while you may see such farms where hens are permitted to follow this old way of foraging. But as a rule every hen must pay a profit or she goes to market at an early age too. Hens are measured by the number of eggs they lay instead of by the number of pounds they weigh. Expensive houses are not necessary but must be comfortable to insure proper egg laying. A house should accommodate as many hens as space calls for without crowding; about two square feet of floor space per hen is about right. This keeps up the temperature in cold nights and still gives scratching room to insure egg production.

BRIGHTEN UP POULTRY HOUSE

Coat of Whitewash Given on First Warm Day Will Make Surroundings More Cheerful.

If the poultry house is dark and gloomy, give it a coat of whitewash on the first warm day and see how much that will brighten it up and make it more cheerful for the fowls. Surroundings make considerable difference in the egg yield.

United States Tires

The Sign of Perfect Service

Look at it—remember it—for wherever you see it displayed by a tire dealer you will know

that there you can obtain tire service,

—that merely selling you a tire is not the end,

—tire service which will give you one hundred and one courtesies, little and big, which will keep down your tire costs.

Dealers displaying this sign are the best dealers;

—they carry a complete line of United States Tires,

—the 'Nobby', the 'Chain', the 'Royal Cord', the 'Usco', the 'Plain',

—a tire for every need of price and use.

—Deal with these Sales and Service Depots—depend on their judgment—and you will have supreme tire service.

United States Tires Are Good Tires

A Tire for Every Need of Price and Use—'Nobby' 'Chain' 'Royal Cord' 'Usco' 'Plain'

United States TUBES and TIRE ACCESSORIES Have All the Sterling Worth and Wear that Make United States Tires Supreme

THE AUGUSTA BATTLE.

(Falmouth Outlook.)

Mrs. J. E. Wilson, of this city, gave us an old Cincinnati Enquirer, dated October 1, 1872, which contains an account of the Augusta fight during the Civil War. The old paper was preserved by Mrs. Wilson's mother, the late Mrs. C. H. Lee, Sr., who resided at Brooksville, at the time there has been several accounts of this battle published recently in the Enquirer Chronicle, and we publish this one to bring out additional facts General Basil Duke and his army passed thru Falmouth in going to Augusta, and many of our older citizens are well acquainted with the skirmish he had at this place with a few armed guards. The account follows:

On Saturday, about 12 o'clock M. Colonel Bradford received intelligence of the approach of between four and five hundred rebels under command of Basil Duke. The Colonel immediately proposed to defend the town, his force consisting of about one hundred Home Guards and Militia, and the gunboat, Belfast, Captain Sedam commanding. About 1 o'clock the gunboat Allen Collier moored alongside the Belfast, and Col. Bradford dispatched a message to the Collier, requesting her to remain as we would certainly be attacked by two o'clock. A few minutes later the Florence Miller, carrying a gun, came along and anchored in front of our town.

Colonel Bradford then posted his men up the houses along Front street and up Mill to 2nd Street. The enemy, in the meantime, had reached the hill back of the town and were rapidly surrounding us. Hardly had our forces taken their position than the forces of the rebels, with two small pieces of artillery, appeared on the hill. The Belfast then threw a shell, and so well was it aimed that it struck within thirty feet of the enemy's gun, killing two or three of the rebels and causing them to change the position of their gun.

The enemy then opened fire, throwing shells with little or no accuracy, and the Belfast fired two more shots with good effect. Up to this time the forces of the houses were not engaged, but to the surprise and sorrow of

our people, the Belfast weighed anchor, and abandoned us to our fate. The Florence Miller, without firing a gun, did the same thing; the Allen Collier, although impounded to stay with us, steamed off before the fight and never returned. Then came a shout from the rebels and they were upon us. From every window our true and trusty boys were firing, and for one-half hour the leaden hail was doing its work of death; rebel after rebel was made to bite the dust, while our boys, thus secreted, were fighting for their homes and firesides.

But what a scene now followed. The houses in which our forces were posted were set on fire, the cannon of the enemy was planted in our streets, and disregarding the women and children, they were firing shells into the houses yet, true to their work, the little band of Union men fought on until it was madness to try to hold out longer. Colonel Bradford ordered a surrender. As soon as this was done, they commenced the pillage and plunder, every rebel fighting for himself. Stores were broken open and rifled of what was wanted by the rebels. This, however, was soon over; the rebel hurls was soon sounded, and the enemy retired from our town in good order, though in haste.

The fighting was desperate, and although our loss is small, yet gallant and brave men have gone from us forever. Our killed and wounded amount to twelve or fifteen, while that of the enemy number between seventy-five and one hundred—among them some eight or ten officers. We had no means of ascertaining the names of the rebels killed and wounded, but among the number wounded mortally, is a son of George D. Prentice, of Louisville; Captain W. Rogers, of Harrison county, was killed, and a Lieutenant Wilson. The rebels left some of their killed and wounded in our hands, all of whom have been properly cared for. They took our horses, bugles, wagons, and all means of transportation to carry off their dead and wounded.

Among the killed on the Union side were Dr. W. Taylor, M. B. Worthington, John B. Story, Geo. Byers, Oliver Stairs, John Eiphart, John Perkins and Wm. Gregg. The prisoners were all taken from the town as they were on our march. Some have been paroled and have returned home. The conduct of the gunboats seemed to us cowardly in the extreme.

Just above our town is a large saddlebar, and as soon as the rebels could move across the bottom they ran out on this bar, 100 or 150 strong, drew up in line of battle, and fired volley after volley at the Belfast and Florence Miller, and not one shot was fired in return. With one fire of grape the whole band of rebels could have been moved down; but the gallant commanders fled, aye—and when they got to Higginsport, actually hoisted their cannon ashore and moved off, up the river with their boats. Much of our town is destroyed. The loss will reach \$100,000. The principal sufferers are Thos. Myers, J. B. Ryan, W. H. Diltz, W. P. Taylor, Mrs. Hooker, S. F. Marshall, Y. Weldin, J. T. McKibben and Wm. Barr.

The Confederate forces are a battalion of Morgan's Col. Bradford, Colonel Harris and F. L. Cleveland, Esq. are still in the hands of the enemy. On yesterday Colonel Wilson and Colonel Wadsworth, commanding the forces from Mayville, and Ripley, pressed on to Brooksville in the effort to overtake the rebels, but were there only in time to fall upon their rear guard, they having retreated in great haste in the direction of Falmouth.

All of which is respectfully solicited.

JOSEPH DONIPHAN.

Several Boone county men, who were serving in the Confederacy under Gen. John H. Morgan, took part in the above described battle.

Uncontrollable Forces.

(Omaha Bee)

Newspaper readers are again shocked by stories of the tornado's destructive presence. Along the trail of the twister lives have been blotted out, men, women and children maimed and crippled, and millions of dollars' worth of property destroyed. It is a sorrowful record of a terrible manifestation of the majesty and power of nature's forces. Solar energy sets in motion elements beyond man's control and an awful demonstration of stupendous grandeur follows. Man understands the mechanism of the movement, but stands helpless before it. It is the working out of this transition from winter to summer, thru laws as immutable and certain in their operation as any known. There is a lesson for those who hope for the coming of a better thing for man. Nature clears her way thru restraints by mighty convulsions or upheavals, and so man must work out his destiny against odds by overcoming opposition. Peace only is to be obtained by a successful struggle against that which would check the forward movement to the ultimate good and whatever is worth having is worth striving for.

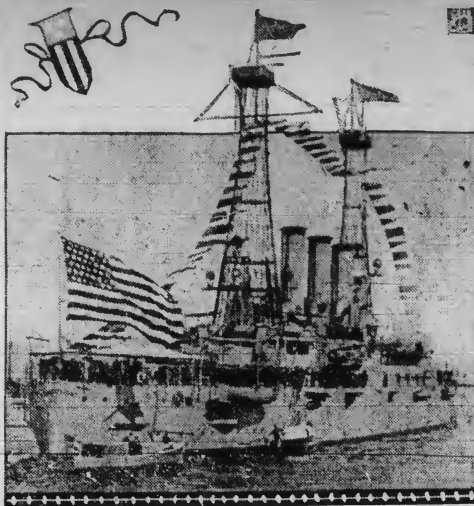

Fined Sixty Dollars and Costs

Jacob Gronauer, of Cincinnati, was tried before County Judge P. E. Cason, last Saturday, and fined \$60 and the trimming for violation of the local option law. Lewis Hodges was the prosecuting witness. Gronauer and some friends were taking an outing on Boone county soil when it was charged to commit the offense.

Will Give a Big Supper

R. E. Tanner and wife and this writer and wife spent last Sunday afternoon very pleasantly at the home of Mr. and Mrs. Jas. Asbury near Petersburg. We also visited Mr. and Mrs. Ben Houston, who has been confined to his bed with rheumatism for quite a while.

A Narrow Escape.

Two men from Covington, who had come out to enjoy a few days angling for the finny tribe, in the turbulent waters of South Licking, near Morgan, had a narrow escape from being drowned last week, after the big rain, which caused the river to rise at a rapid rate. The men were on an island in the river, and so rapid was the rise of the waters that they were unable to get to the mainland. The river continued to rise, and the fishermen took to a large sycamore tree. So swift was the current that it would have been courting death to attempt to swim to the shore, and the men were forced to remain in the tree for two days, until they were observed by some parties near Morgan. One of the men, Ewing Arnold, two young men of that place, procured a boat and went to the rescue of the men. The river continued to rise, and the fishermen took to a large sycamore tree. So swift was the current that it would have been courting death to attempt to swim to the shore, and the men were forced to remain in the tree for two days, until they were observed by some parties near Morgan. One of the men, Ewing Arnold, two young men of that place, procured a boat and went to the rescue of the men.

THE STORY OF LUTHER BURBANK

How He Has Added Untold Millions to the World's Wealth.

SOME OF HIS ACHIEVEMENTS

The story of the achievements of Luther Burbank, the Plant Wizard, reads like a fairy tale, yet his work is of a most practical and useful character, as will be seen in the interesting lecture by Dr. Edward Eccleston on the first day of our Chautauqua. The lecture will be illustrated with more than a hundred beautifully colored stereoscopic views.

Luther Burbank was the youngest of a family of thirteen children. His boyhood was spent on a New England farm and was no different from that of other boys, except perhaps that he inherited from his mother an intense love of flowers, and was always interested in all phases of plant life. He worked on the farm, in his father's brick yard, and for a time in a factory, where he perfected a contrivance that enabled him to earn as much as sixteen dollars a day doing "piece work"—pretty good for a boy!

But the dust of the factory was injuring his health and his father, dying about this time, he began raising vegetables and fruits for market. Soon he was absorbed in the work—plant development—which was later to make his name known the world over. Burbank first attracted public notice through his wonderful improvement of the potato, which up to that time had not come into such general use as a staple food.

He later moved to Santa Rosa, California, where he still continues the work that is adding billions yearly to the wealth of the world, through increased production and new plant creations.

Among the latter may be mentioned a spineless and edible cactus; a thornless blackberry that yields four times as much as the common kind; a new peach with a soft pit; a new corn for silo purposes which produces sixty-five tons to the acre; and a new variety of wheat with a seven-inch head and twenty to twenty-five rows of kernels—a variety that will yield almost four times as many bushels per acre as present varieties! Arrangements are now being made to distribute seed among the farmers of this country this year.

LUTHER BURBANK

CHAUTAUQUA BRINGS BOY SCOUT EXPERT

Chas. Daugherty An Authority On Boy Scout Movement.

HIMSELF AN "EAGLE SCOUT"

That the Chautauqua is an uplifting force, and not merely a form of entertainment is best proven by the character of the people who hold up the Chautauqua ideals. The people who appear on the Welfare Chautauqua programs are all democratic in nature and love to mingle when off the platform with the people of the community. Don't be afraid to walk right up to any one of them and make yourself acquainted.

"Chic" Daugherty, for example, is usually surrounded by a flock of boys from the minute he strikes town. Boys are drawn to Daugherty as bees hover over a barrel of honey. It seems that some magic message is sent to every boy in town the minute he arrives. And it is worth while for boys to know him. He is the embodiment of clean and upright manhood. For years he was secretary of the Boys' Department of the Y. M. C. A.

Of more general interest, however, is the fact that Mr. Daugherty is a boy scout enthusiast and an expert on all phases of boy scout work. Mr. Daugherty is himself an Eagle Scout, which is the highest rank obtainable and is a Special Field Scout Commissioner, appointed by the National

HEADQUARTERS IN NEW YORK. HE WEARS TWENTY-ONE MERIT BADGES.

The great aim of the Boy Scouts of America is to make every boy scout a better citizen. It aims to touch him physically—in the campfire and woodcraft of the outdoor life. It seeks to develop him by observation and the knowing of things far and near, so that later on when he enters business life he may be alert and keen and so be able to add to the wealth of the nation. It teaches him civility and unselfishness, duty, charity, thrift and loyalty. It teaches him the principles by which he may be healthy and clean. It teaches him patriotism in order that he may become a good citizen and do those things which every citizen ought to do to make the community and the land in which he lives the best in the world.

The boy scout movement neither promotes nor discourages military training, its chief concern being the development of character and personal efficiency of teen-age boys. Mr. Daugherty will be very glad, while here, to talk with all who are interested in boy scout work.

Lenzo's Royal Italian Band Coming for Chautauqua

TWO BIG CONCERTS SECOND DAY

of our Chautauqua, came to this country after graduating from the Conservatory of San Pietro-Maleis of Naples, Italy. For six years he has been at the head of his own band, playing in and around New York. This is his first trip with his band west of the Alleghenies. Lenzo is in point of years only a boy, but he has already established his reputation as an incomparable leader. Though not quite as eccentric as Creators, he creates considerable amusement by his imitations of the great band master. Of the band we can truthfully say that it is the "Biggest Little Band in America." Every player is an accomplished soloist. Their ensemble will do credit to a band of thirty pieces. The snap, dash, fire and feeling is all there. They play the masterpieces of

music and at the same time cater to the love of popular numbers and the season's latest hits.

It is expected that one of the most popular numbers on the program will be the "Welfare March," composed by Signor Jno. Franco and dedicated by him to the Welfare Chautauqua.

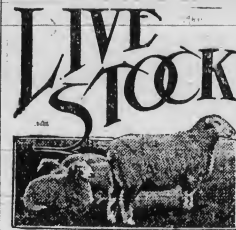

An unusual feature of the band is the string orchestra. Sig. Franco is the soloist playing upon the peculiar instrument called by the Italians the "Wizzard." This strange and marvelous instrument is played like a xylophone, but is made of strings and resembles a harp or zither. Sig. Franco is a mechanical as well as a musical genius. He constructed his instrument with his own hands.

Something New

THE WIZZARD.

Signor John Franco is a musical genius. His home in Newark, N. J., is filled with all sorts of musical instruments. The "Wizzard" (pronounced vizard) is the creation of his own hands. When President Hill of the Welfare Chautauqua visited him in his home, he was astonished at the ease with which the musician could perform on this difficult and unusual instrument; but when the strings were covered with a news paper and Sig. Franco was blindfolded at the ease with which he played the most difficult selections. President Hill's admiration and astonishment was increased. Our Chautauqua patrons will be equally pleased when they hear Sig. Franco on the second-day's program, when he will appear as a member of Lenzo's Royal Italian Band.

KILL CHICKEN-EATING HOGS

Menace to Fowls and to Pocketbook—Habit is Result of Disease or Unbalanced Ration.

Chicken-eating hogs should either be cured immediately or disposed of as they are a menace not only to the stock but to the rest of the bunch of hogs and the pocketbook as well. No real healthy, profitable hog will eat chickens and this habit is a result of disease or unbalanced ration. Corned hogs, those following fattening cattle, a suckled-down sow, born shut in a tight pen, or runty pigs usually develop into this pest. In most cases it can be cured by feeding carrion, which in itself is a dangerous practice; the better way is to feed tankage. If I were going to try to cure a chicken eater I would feed an overdose of tankage at first so as to be sure the animal got enough of the food it was craving, then reduce the amount to a more nearly-balanced ration, but rather over than under usual amount, because this animal, being in an abnormal condition may be able to assimilate a greater amount of high-protein carrying food, says a writer.

It is not every animal that will yield to treatment but the man who has chicken eaters around better begin to get nervous else something worse will strike him. It is merely a symptom that the hog is not quite in the pink of condition, therefore more liable to catch the germs of cholera and the like, or form a culture and develop a case of genuine cholera. If there is anything in this germ theory, there are most all kinds of germs swirling around everywhere and must all the time. Generally they are not numerous enough to be feared; the animal in good condition and the chicken eater should be cured immediately or disposed of.

Carlisle, June 8.—A hero commission of St. Louis, is making an investigation of the act of Bertha Wilson, a 7-year-old girl of this county, daughter of Harvey Wilson, of Stony Creek section, who while their house was burning and beginning to fall in, rushed into the house and saved her little 1-year-old sister.

HANDS, ARMS, LIMBS ASLEEP

And Was Run-Down, Weak and Nervous, Says Florida Lady. Five Bottles of Cardui Made Her Well.

Kathleen, Fla.—Mrs. Dallas Price, of this place, says: "After the birth of my last child...I got very much run-down and weakened, so much that I could hardly do anything at all. I was so awfully nervous that I could scarcely endure the least noise. My condition was getting worse all the time...I knew I must have some relief or I would soon be in the bed and in a serious condition for I felt so badly and was so nervous and weak I could hardly live. My husband asked Dr. about my taking Cardui. He said, 'It's a good medicine, and good for that trouble,' so he got me 5 bottles. After about the second bottle I felt greatly improved...before taking it my limbs and hands and arms would go to sleep. After taking it, however, this poor circulation disappeared. My strength came back to me and I was soon on the road to health. After the use of about 5 bottles, could do all my house-work and attend to my six children besides."

You can feel safe in giving Cardui a thorough trial for your troubles. It contains no harmful or habit-forming drugs, but is composed of mild, vegetable, medicinal ingredients with no bad after-effects. Thousands of women have voluntarily written, telling of the good Cardui has done them. It should help you, too. Try it. 11 16

Take your County Paper.

"Quaker Maid"

MISS LUCY RUTLEDGE, Violinist.

Lucy Penina Rutledge, the "Quaker Maid Violinist," with the "Chic" Daugherty Company, will be one of the real artists on our Chautauqua program. Born and reared among the "Friend Quakers," Miss Rutledge has the demure and quiet refinement so characteristic of her sect. But she possesses such a lively heart that everything and everybody that she conveys in some mysterious fashion to her violin and bow, both the wit and wisdom of her views of things. Her playing is more than mere music—it has a subtle and peculiar quality that is as pleasing as it is rare.

Charming Singer

MISS MABEL BROWN, Mezzo Soprano.

One of the charming singers on the Welfare Chautauqua is Miss Mabel Brown, with the Daugherty Concert Company, which will give two musical programs on the opening day. Miss Brown is a mezzo soprano, particularly adapted to dramatic roles, in which her greatest success was scored as "Zuleika," wife of "Potiphar," in the opera "Joseph." She also sings the good old melodies that we all love to hear in a very pleasing way. Those who love good music, both vocal and instrumental, should not fail to hear Miss Brown and the Daugherty Concert Company.

HELEN BARTON, Contralto and Pianolast.

Helen Barton is more than an accompanist. She is a worthy partner to Hazel Munger Kraft in their concerts. Miss Barton sings well, she plays the piano as few can, and she is also gifted in playing upon the Hawaiian instruments used in one number of their programs. She has been a member of the Kraft Company as long that the program moves without a hesitating moment. The last day of the Chautauqua would be a big day for the Kraft Company was the only attraction.

HAZEL MUNGER KRAFT, Soprano and Dramatic Reader.

Hazel Munger Kraft, who comes for the third day of our Chautauqua, bubbles over with vivacity and life. Her art is as spontaneous as it is versatile. We are told that only one other person in the Chautauqua field can do so many things and do them so well. Hazel Kraft can sing, she can recite plays and dramatic readings, she can play the flute, piano and the Hawaiian ukelele. And she is so pleasing in manner, so gracious to her audiences that they worship her not as a distant performer, but as a close friend, who likes to please and entertain.

WALTON DEPARTMENT.
D. B. WALLACE, Manager.
Hand your news items to Mr. D. B. Wallace at the Walton Equitable Bank and Trust Co.'s building. He is also authorized to receive subscriptions and collect other accounts.

A. M. Edwards spent last Thursday at Frankfort.

Mrs. M. Kate Jones of Ludlow, spent the first of the week here with relatives and friends.

Misses Corinne Tomlin and Eva Cram spent Sunday with Mr. and Mrs. Chas. H. Young near Polson.

Rev. A. Kirtley Johnson of Ghent, spent part of the week here with relatives and friends at his old home.

Miss Willa Hance is spending the week at Warsaw attending the Chautauqua, and the guest of friends.

For Sale—Nice three year old horse, by Fitzsimmons, 16 hands. A bargain. Mrs. Britt Senour, Walton, Ky.

Mr. and Mrs. J. Waite Cross of Union, spent Sunday here visiting his mother Mrs. Jas. Cross who is very ill.

Dr. and Mrs. W. E. Sleet of Minn., Woodford county, were here here Monday, motoring thru from Cincinnati.

Mr. and Mrs. Chas. Slater, of Ludlow, and Mr. and Mrs. Wm. H. Sparks of Verona, were the guests of John C. Miller and family Sunday.

Mr. and Mrs. George L. Miller who have been visiting relatives in Louisville and here Monday, motoring thru from Cincinnati.

R. B. Huey of the Burlington neighborhood, was here the first of the week in the interest of his race for County Judge of Boone county on the Democratic ticket.

Jno. L. Vest attended a special meeting of the town council at Independence Monday night at a special attorney in the matter of granting a liquor license over which there was some controversy.

Rev. W. B. Garriott, pastor of the Walton M. E. church, began a protracted meeting last week and is having excellent services and a large attendance every evening. The meeting will continue another week.

Benj. Stahl, of Gallatin county, was here last Friday, bringing a horse from the Chambers farm near Stokes Creek to ship with some others belonging to J. E. Williams, to Richmond, Madison county, for breeding purposes.

Miss Lela Willhoite of Lexington, spent part of last week here as guest of her old schoolmate, Mrs. J. G. Tomlin. Miss Willhoite is the official stenographer of the Grand Jury.

Rev. W. J. Vaughn, of Louisville, Field Worker of the Kentucky State School Association, made two excellent addresses at Walton Baptist church last Sunday morning and night, giving some encouraging reports of the work and stimulating the workers here to greater activity.

Walton Chapter Order—Eastern Star received a special invitation to attend a meeting at the home of Latonia Thursday afternoon when the degrees will be conferred and a reception will be given Mrs. Emma McCreary, Grand Worthy Matron of Kentucky.

Judge W. A. Lee, J. G. Vallandigham and George W. Davis of Owen, were here Tuesday taking part in a case pending in the Owen Circuit Court in the case of Charles Ross against the Owen County Burley Tobacco Society, for damages over pooled tobacco.

W. H. Blessing, of Verona, who is a candidate for magistrate or member of the Fiscal Court for the Verona-Walton district was here last Friday on business at the splendid business man and a clever gentleman and a number of prominent citizens of Verona presided on him presenting his name to be used for the office.

The Q. & C. Railroad has cut off the morning train to Cincinnati that formerly reached Walton at 9:16, and also the same train that came from Cincinnati reaching Walton at 4:45 in the afternoon. A change of the schedule has been made in the mails, and the Commuter brings out the evening mail.

McClure Chapter Royal Arch Masons conferred the Mark Master and Past Master degrees on Louis S. True, of Corinth, Grant county, and Samuel H. McCarty at the regular meeting last Friday night. The Chapter is having a revival as several new petitions for the degrees have been received and there will be work at the regular meetings for a couple of months.

Prof. and Mrs. C. Spencer Chambers and little daughter, of Covington, arrived here last week to spend part of the summer months with relatives and friends. Prof. Chambers having finished his duties in the Covington schools for the term just closed. He expects to take a post graduate course at a celebrated institution of learning in Pittsburg during his vacation.

The all day meeting and Flax Raising at the Hickory Grove Baptist church last Sunday was very largely attended and the exercises were very enjoyable and elevating. Many from Marion were present and were very expressive in praise of the affair. A splendid dinner was served and it was in keeping with the reputation that that part of Kenton county has always enjoyed—the very best and that of it. Rev. R. H. P. D.

Bellevue is the pastor of the church and made two excellent addresses to the intellectual society enjoyed the day and the intellectual program.

Limburg vs. Gunpowder

Limburg and Gunpowder have all teams will play on the Limburg grounds at W. C. Rouse next Saturday afternoon.

Today, Thursday, is the longest day of the year.

A DESTRUCTIVE FIRE

Three Residences Destroyed—Loss Partially Covered Insurance.

Monday morning, between 6 and 7 o'clock, the two story frame building near the Southern depot occupied by D. H. Williams and family, was discovered to be on fire and the flames made such rapid progress that it was impossible to save the building. The property of Mrs. Mary Kendall occupied by her and her daughter, Mrs. Rouse, and the property of Mrs. Susan Hart, occupied by Mrs. Katie Abdon, both cottages, were soon food for the flames and it was impossible to save them, the nearly all the contents of all of the houses were saved. The house occupied by Mr. Williams was owned by Mr. L. C. Adams of Covington, and was valued at \$3,500 and was insured for \$2,000. The Kendall property was insured for \$400 and was valued at \$800; the Hart property valued at \$1,000 was insured for \$700. There was no apparatus with which to fight the flames and the effort made to subdue the flames was all that could be expected and prevented the further spread of the fire.

Miss Corinne Moore is spending the week in Warsaw attending the Chautauqua.

Miss Glenna Rose Gaines spent the past week in Covington, guest of Miss Marie Menefee.

Found—Set automobile curtains which the owner can get by calling at the Equitable Bank's office.

Judge Chas. Strother attended the Grant circuit court last week, having some cases before that tribunal.

Master Roland Glenn, of Covington, arrived here last Friday relatives and friends.

Mrs. B. W. Stallard and little daughter, of Toledo, Ohio, arrived here last Sunday on a visit to her parents Mr. and Mrs. Thos. F. Cudley.

Harry Riley sold his house and lot in the subdivision of Walton last Saturday to Mrs. Helen D. Tomlin for \$200. Mrs. Tomlin will rent the property.

Judge J. G. Tomlin and Jno. L. Vest spent part of last week attending the Grant circuit court in which they have several important cases.

The ordinance of baptism was administered to Ernest Breeden last Sunday afternoon by Rev. P. C. Lacy at the mill pond. Mr. Breeden having recently united with the church.

Mr. and Mrs. E. F. Pinner and baby daughter left last week for Norfolk, Va., where they will make their home. Mr. Pinner has a nice position in the railroad office at that point.

Dr. W. W. Evans, who has been spending several months in California, returned to Kentucky and spent part of last week with his many admiring friends in this quarter.

Real Estate Agent Geo. B. Powell, of Lexington, is in the market for a farm of 113 acres near Richmond last Wednesday to Melvin Jones of Lewis county, the purchase price being \$8,000 cash. Possession to be given in the fall.

Bellevue.

Thos. Rice and family of Burlington were Sunday guests at J. T. Maure's.

Chas. Maure and family, of Burlington, spent last Sunday with Mr. and Mrs. J. G. Smith.

Geo. Horton and family and Fannie Sullivan, Sundayed with Lewis Reector and family.

Mrs. Nancy Adams spent last Sunday with her granddaughters, Mrs. Hubert Rouse of Burlington.

Arthur Houston was baptized Sunday and received into full fellowship at the Baptist church Sunday night.

Mrs. Belle Cason is home after a week's visit with her daughter, Mrs. Leona Marshall, of Bark-works, Indiana.

Jos. Wilson, wife and baby of Union, spent Saturday night and Sunday with Mrs. Wilson's parents Mr. and Mrs. C. S. Smith.

Mr. and Mrs. Elmore Ryle and Mr. Waller Marshall of Locust Grove neighborhood, were Sunday guests of Mrs. Eliza Riddell.

Robert Brady, Jr. and Harvey Smith, our faithful mail carriers, made their rounds in time last Saturday to attend the ball game at Burlington that afternoon.

Mr. and Mrs. C. E. McNeely entertained Mr. and Mrs. J. D. McNeely and son, Bernard, Mr. and Mrs. Moss Pope, Manly Ryle and daughter Miss Lottie and Mrs. Liz Pope last Sunday.

The T. O. F. and Rebekah lodges held their annual decoration services here last Sunday. A large crowd was present to pay their tribute of respect to the memory of the departed brothers and sisters. The lodges desire to extend their thanks and appreciation to Revs. Baker and Carter, Mrs. Rouse, and the choir, the Baptist congregation for the use of their building and all that helped in any way to make the meeting a success.

Limburg vs. Gunpowder

Limburg and Gunpowder have all teams will play on the Limburg grounds at W. C. Rouse next Saturday afternoon.

Today, Thursday, is the longest day of the year.

Wilson Praises Mother

Who "Gave" Two Sons.

Washington, June.—President Wilson today directed a letter of appreciation to Mrs. Louis Meyer, of Wheeling, W. Va., who, in a patriotic letter to the President, informed him that she had already given two sons to the army and was ready to give her third if necessary.

The President wrote: "Your feeling about your sons is the feeling which I should think every mother in whom the true spirit of motherhood and of Americanism dwells would have, and I like to believe that it is true that the country is full of mothers of the same heroic and self-sacrificing sort."

"It quickens my pulse and strengthens my belief in the splendid capacity of this country to meet every crisis of this sort to receive such a mother as you have been gracious and kind enough to send me, and I shall treasure it in my heart as a typical expression of devoted American womanhood."

Highway Men in Town

Col. Collier and a Mr. Thomas who are very much interested in the Dixie Highway are in Burlington Tuesday afternoon, in the interest of that road. It seems that Kentucky's portion of the Federal Road Fund has been approved to the National Highway project east and west thru the State, and under present arrangements it will be along time before any part of that fund can be applied to the Dixie Highway, a portion of which it is claimed it is impossible to complete without aid from the federal fund, the two mountain counties which the uncompleted portion lies now being bonded to.

It is believed that if all the counties through which the Dixie Highway passes in this state will unite in the request the matter will be opened up and enough money obtained to complete the Dixie Highway thru the two counties as mentioned above which will require at least \$75,000. All the counties through which the highway passes, except Boone and Kenton have joined in the request, and Messrs. Collier and Thomas went from Burlington to Covington to present their proposition to the Kenton county authorities. As the proposition was stated to County Judge Cason by Messrs. Collier and Thomas, their interview last Tuesday a county loses nothing by asking that the aid desired be granted—nothing, hoping it will prove anything nor does it forfeit any of its rights to federal aid on its roads in the future. They want the unanimous endorsement of the counties, hoping it will prove a lever in favor of their efforts to secure the money with which to close the only gap in the Dixie Highway. Joneson will investigate the proposition.

Graves Are Robbed.

Toledo, Ohio, June 18.—Searching for stolen property in the suburbs, the police today discovered that an old cemetery at the city limits had been robbed of a dozen bodies and caskets. The cemetery had not been used for 50 years. The excavations were fresh. The theory is that the grave robbers were in search of jewels and valuable casket trimmings. Among the graves looted was that of Jane Southard, a relative of former Congressman James H. Southard.

HUME.

Mr. and Mrs. R. Schwenke entertained Sunday in honor of their son Eugene's birthday.

Miss Mary Krause and a lady friend from the city are guests of Pete Krause and family.

Mrs. Eliza Roberts was the guest of her granddaughter, Mrs. O. O. Baker, near Ryle, Wednesday.

Mr. and Mrs. Walter Vest near Verona, entertained Arch Noel and wife, J. G. Fennell and wife and C. P. Baker and wife Sunday.

SUMMER IS HERE!

AND IT IS GOING TO BE SOME HOT

The high price of coal coupled with the inconvenience of using it in hot weather should make some other method of cooking appeal to you. Especially so when in buying one of our

COAL OIL STOVES

you are securing something which spells Economy, Safety and Comfort in full. We have them in all makes—

Blue Ribbon, Success and New Perfection

and they all represent the highest point of efficiency in construction and durability. Surely you will own one if you see our stock, for the price is too moderate and the superiority over coal and gasoline so evident that you can not hesitate to take advantage of such a good opportunity to make the coming hot days comfortable. They BURN WITH A STEADY BLUE FLAME, have perfect cooking qualities and are absolutely safe. Practically no heat and with ordinary care will last a life time.

In One of These Stoves

You will secure a bargain, as has always been the case in our other large line of Groceries and Dry Goods.

Take Your County Paper

Local Happenings.

A dry, hot June is required to make good crops.

Have you read Chas. Clore's picnic advertisement?

The Pendleton Reformer is twenty-seven years old.

There is a big crop of white top in the meadows.

So far no good ice cream weather has struck this part of the county.

The cool weather has not been good for the melon crop in the bottoms.

Last Friday, June 15th, was a first-class October day in many respects.

Bugs are said to be getting the better of the melon raisers along the river.

The method of selecting the men who will be drafted has not yet been determined.

William Utz and wife, colored, have gone to Ft. Mitchell to work for Mr. and Mrs. Geo. Hill, Jr.

C. C. Roberts came in from his farm, last Friday afternoon, to stay until winter was over.

Elder H. M. Curry will preach at Mt. Pleasant next Sunday morning, June 24th, at the usual hour.

W. P. Sullivan, who lives just south of town, says he saw plenty of frost last Saturday morning.

Jesse Edlins pond will now be a very popular resort for anglers if he allows them free access to it.

Mrs. Sidney Blankenbaker, of Mobile, Ala., is visiting her mother, Mrs. Alice Watts, of Bullittsville.

The nations Liberty Loan has been oversubscribed a billion dollars, which is an overwhelming response.

Grass usually good at this season of the year has been delayed very much by the unfavorable weather.

Charles Maurer's chickens that are entered in the egg laying contest at Lexington are holding their own in every feature.

Owen Allen, of Petersburg, was a business visitor in Burlington, Saturday. See his farm advertisement for sale in this paper.

Jailer Adams fired the furnace in the court house, last Friday, to make it comfortable for those who held forth there or had business there.

Several corrugated culverts were put in the Burlington and Bellevue pike by County Engineer Goodridge and his force of road hands last week.

Kreitcher collected quite a drove of cattle in this neighborhood last week, buying Chas. White, Elmer Goodridge and Chas. Birkle. It was a mixed drove.

The number of veal calves that are being shipped from this county every week is surprisingly large. There is no way of obtaining the accurate number.

Mr. Bethel, of the Kentucky Motor Car company, Covington, is the gentleman who purchased Charles Hughes farm the Webb farm north of Burlington.

A post card from Bert Smith directs his Recorder changed from Newport to Ft. Thomas. Probably he has moved there to get a line on part of a soldier's life.

Boone county was apportioned Liberty Loan bonds to the amount of twenty-five thousand dollars, and she bought considerably over one hundred thousand dollars worth.

On the afternoon of the 11th inst., the residence of Ross Carroll, on the road between Walton and Beaver, was destroyed by fire. How the fire originated is not known.

Jerry Carpenter, of Richwood, died last Friday. He was a native of that part of the county and a son of Eli Carpenter, one of the early settlers in Richwood neighborhood.

A very small acreage of wheat will be harvested in this county. The farmers are sowing more rye than wheat in the last few years, and a considerable acreage of that grain will be cut.

While playing with his neighbor's dog one day last week, Attorney G. W. Tolin sprained one of his ankles badly, and had to call on a couple of canes to assist him in his locomotion.

Some of the negroes who left the South a few weeks ago for the North have discovered that their proposed new home was not located in a land of milk and honey, and are wending their way back to Dixieland.

The local colored church held its annual basket meeting last Sunday. As usual it was attended by a large crowd of colored people, many of whom came from Hinton and Lexington. A bountiful and well prepared dinner was enjoyed by all at the noon hour.

Personal Mention

Thomas Rice and wife spent last Sunday with her relatives in Bellevue.

Caddie Maurer and family spent last Sunday in Bellevue with relatives.

Miss Laura Frances Riddell is visiting Miss Sallie Castleman in Erlanger.

Frank Milner, of Constance, was a visitor to Burlington one evening the past week.

B. W. Campbell and wife, of Cincinnati, spent a few hours in Burlington, last Sunday.

L. R. Miller, of Big Bone, was transacting business in the temple of justice, Tuesday.

Edward Taves, of Lakeland, came up last Saturday to spend a few days with home folks.

Mrs. Wm. Rice, of North Manchester, Indiana, was a guest at Edward Rice's the past week.

Everett Ayler and wife, of Florence, were Sunday guests of friends out on the Bellevue pike.

Miss Lizzie Stephens, of Erlanger, was the guest of Mrs. R. S. Cowen several days the past week.

Joseph Birkle, of Bullittsville, was a Sunday guest of his son, Charles and family, near Burlington.

Master Robert Lee Buckner, of Covington, was the guest of his father, John Buckner, a few days the past week.

William Carpenter wife and son and Mrs. Mary Goodridge and son, Raymond, were shopping in the city, yesterday.

R. E. Kelly and daughter, Miss Alberta, visited his brother Walter in Carrollton last Saturday night and Sunday.

J. A. Duncanson, of Bullittsville neighborhood, has been the guest of his brother Dr. E. W. Duncanson the past few days.

W. C. Johnson and family, and Jas. McCullough and Lick neighborhood, were visitors to Burlington last Sunday afternoon.

Mrs. John M. Botts and son, Carl, and Miss Ruth Snyder, of Petersburg, were Monday evening guests of Mrs. J. W. Rogers.

Mrs. Newton Sullivan, Jr., and Miss Bessie Kirkpatrick, were the guests of Miss Eva and Hazel Akin on Woolper, last Saturday and Sunday.

Robert Snyder and family, of Hopeful neighborhood, were Sunday guests of his son, William and family, who live on the Cloud Bros' farm.

Mrs. R. B. Hazy and daughter, Miss Estelle and son Master Franklin, returned last Friday evening from their outing up on the Cumberland river.

W. H. Marshall, of Locust Grove neighborhood, was in Burlington, Monday. He reported the tobacco crop about pitched in that part of the county.

Atty. O. M. Rogers, of Erlanger, and A. Rogers, of Bellevue, are in Kansas looking after the real estate interests of the heirs of Mrs. Missouri Walton.

Mr. and Mrs. Geo. Kreylich and daughter, Miss Mattie, and their colored man, Tom Poston, went to the city, Monday, to attend Barnum & Bailey's circus.

Earl Smith and Miss Pauline Kelly, and Mr. and Mrs. Dudley Blyth made an auto trip to Lexington and return last Sunday. They had only one blow-out and seven punctures.

Sheriff W. D. Cropper, Deputy Sheriff L. A. Conner, County Attorney N. V. Riddell, John Cloud and Chas. Westbay, made a business trip to Walton last Saturday afternoon.

Harold Conner is carrying his nose in a sling as it were. While at work on the road several days ago he was struck on the nose by a fragment of stone, and an ugly wound resulted therefrom.

Howard Huey and wife and his sister, Miss Estelle, Mr. and Mrs. R. B. Carver, Dr. and Mrs. M. A. Yelton and Mrs. E. E. Kelly and daughter, Miss Kathryn, attended patriotic services at Hickory Grove Baptist church, Kenton-co., last Sunday.

W. C. Johnson, of Beaver, came over on Wednesday, to bring two grandsons, Masters Chas. and Hughes Johnson, of Memphis, Tenn., to spend a few days with their grandmother, Mrs. Mary Hume. He returned last Sunday and took the boys home with him.

J. G. Renaker, of Florence, came over in his machine, last Sunday afternoon, and in company with Attorney C. Benj. Riley and Misses Mary Roberts and Nellie Martin, visited Petersburg, returning by way of Bellevue, the territory traveled being entirely new to Mr. Renaker.

Howard Rouse, of Paynes Depot, Scott county, was the guest of his uncle Albert Conner, last Sunday and Sunday night. He is a son of the late J. E. Rouse, and at the death of his father took charge of his livestock business which he is carrying on very successfully. Not long since he sold 30 buck lambs at \$32.50 a head, and has refused 75 cents a pound for his wool.

You Can Get that Cotton Mow

The members of Burlington Red Cross, who have not received but can get them from Mrs. C. W. Goodridge, who has just received a number from State Headquarters.

Milk Producers Will Meet

The Milk Producers Association will hold a meeting in Florence, Saturday, June 23rd, 1 p. m. A full attendance is desired.

W. F. Brantford, Secretary

Public Speaking

There will be public speaking at Mt. Pleasant church at 8 o'clock next Sunday morning, June 24, for the benefit of the Red Cross.

Notice to Contractors.

Office of the Fiscal Court of Boone County.

Sealed proposals addressed to the Fiscal Court of Boone County will be received up to 12 o'clock, noon, June 26th, 1917, when they will be publicly opened and read for the resurfacing and improvement of the following roads:

The work as described and shown on the plans and specifications to be seen at the County Road Engineer's office in Burlington and the office of the Commission of Public Roads at Frankfort, will be known as the resurfacing of the Richmond, Beaver and Gallatin County Road, Walton, Verona and Gallatin County Road, Union and Florence Road, Petersburg to Idlewild, Dry Creek Pike from Idlewild to Kenton county line near Constance, as shown on general drawings.

Walton, Verona and Gallatin County Road, extending from the Covington and Lexington road at Richmond to the Gallatin county line, Southfork creek, a distance of 10.83 miles.

The work proposed to be done involves approximately:

132 cubic yards crushed stone, 132,736 square yards scarifying and shaping.

2,368 cubic yards earth excavation, 3,302 cubic yards borrow.

1,711 cubic yards 1, 2, 3 concrete, 267.6 cubic yards 1, 2, 4 concrete, 28,553 pounds Rein. steel.

720 cubic yards stone masonry, 12 lineal feet 12 inch G C I pipe—county to furnish pipe.

46 lineal feet 18 inch G C I pipe—county to furnish pipe.

Walton, Verona and Gallatin County Road, extending from the corporate limits of Walton to the Gallatin county line, extending line corporate limits of Verona, a distance of 6.88 miles.

The work proposed to be done involves approximately:

6,511 cubic yards crushed stone, 73,788 square yards scarifying and shaping.

3,717 cubic yards crushed stone, 2,714 cubic yards earth excavation, 1,442 cubic yards borrow.

6,61 cubic yards 1, 2, 3 concrete, 150 cubic yards 1, 2, 4 concrete, 30 cubic yards 1, 2, 5 concrete.

1,337 pounds Rein. steel, 2,350 F. B. M. flooring, 48 cubic yards stone masonry.

12 lineal feet 12 inch G C I pipe—county to furnish pipe.

24 lineal feet 18 inch G C I pipe—county to furnish pipe.

Florence and Union Road, extending from the corporate limits of Florence to the corporate limits of Union, a distance of 5.19 miles.

The work proposed to be done involves approximately:

6,501 cubic yards crushed stone, 67,089 square yards scarifying and shaping.

6,63 cubic yards 1, 2, 3 concrete, 1,442 cubic yards 1, 2, 4 concrete, 60 cubic yards stone masonry.

1,883 pounds Rein. steel, 164 lineal feet 12 inch G C I pipe—county to furnish pipe.

4,200 F. B. M. flooring.

Petersburg to Idlewild, extending from the corporate limits of Petersburg to Idlewild, a distance of 4.55 miles.

The work proposed to be done involves approximately:

4,291 cubic yards crushed stone, 58,800 square yards scarifying and shaping.

0.7 cubic yards 1, 2, 3 concrete, 133 cubic yards 1, 2, 4 concrete, 61 cubic yards 1, 2, 5 concrete.

1,507 pounds Rein. steel, 9,936 pounds structural steel, eye-bars.

3,270 F. B. M. flooring, 222 lineal feet 12 inch G C I pipe—county to furnish pipe.

30 cubic yards stone masonry.

Dry Creek Pike, beginning at Idlewild and extending to the Kenton county line near Constance, a distance of 10.33 miles.

The work proposed to be done involves approximately:

12,922 yards crushed stone, 146,968 square yards scarifying and shaping.

350 cubic yards earth excavation, 307 cubic yards borrow.

8,49 cubic yards 1, 2, 3 concrete, 182.7 cubic yards 1, 2, 4 concrete, 300 cubic yards stone masonry.

20,248 pounds Rein. steel, 18,820 pounds structural steel, 402 lineal feet 12 inch G C I pipe—county to furnish pipe.

51 lineal feet 18 inch G C I pipe—county to furnish pipe.

A single bid to be submitted for the whole work on each road.

Bids must be for work to be done in accordance with plans and specifications approved by the Fiscal Court and the Commission of Public Roads, on file at the County Clerk's office in Burlington, Boone County.

The Fiscal Court of Boone County expressly reserves the right to reject all bids.

Before the contracts are binding on the first bidder, he must receive the approval of Commission of Public Roads.

Each bid shall be accompanied by cash or certified check, payable at sight to the order of the County Treasurer for \$500.00, which check shall be held until the execution of the contract.

Before the contract is awarded the successful bidder or bidders will be required to furnish a bond equal to the amount of the proposal, for the faithful performance of the work in accordance with aforesaid plans and specifications.

All work to be done under the direction and supervision of the County Road Engineer.

By order of the Fiscal Court of Boone County.

W. R. ROGERS, County Clerk of Boone County.

Public Sale.

As administrator with the will annexed of Mrs. Jeannette Goodridge, deceased, I will sell at her late residence, near Francisville, this county, at public auction, beginning at 1 o'clock p. m.,

Friday, June 22nd, 1917, the following property:

Lot Household and Kitchen Furniture.

Cared Meat and Lard, Lot Poultry.

Feather Bed Pillows and Bed Clothes.

Lot Farm Implements, 3 Shows Hebron Telephone Stock, 1 Show and Pigs.

And any other articles.

Terms—Sum of \$500 and under, cash on delivery \$500 a credit of six months will be given, the purchaser to give note with approved security negotiable and approved by the Boone County Deposit Bank at Burlington, Ky.

F. J. AYLER, Administrator with the will annexed.

BOONE CO. RECORDER
W. L. RIDDELL, Publisher.

June Weddings.
Married at the home of Mr. and Mrs. John Richards, Covington, Miss Edna Beall, daughter of Mr. and Mrs. James Beall, of Francesville neighborhood, and Mr. Geo. Pierce, of Cincinnati. The groom is a wealthy railroad man, and the bride has been a very popular lady school teacher in this county. Immediately after the ceremony, the happy couple left for a trip to important Eastern cities.

Frank Walton, son of Mrs. Lulah Walton, of Bellevue, and Miss Zella Mayhugh, daughter of Mr. and Mrs. J. D. Mayhugh, of Walton, were married at the Phoenix Hotel, Lexington, last Monday. Rev. William Smith, brother-in-law, of the groom officiating. The groom is an industrious and successful young farmer in Bellevue neighborhood, and the bride is one of the county's most popular lady school teachers, and they have a large circle of friends who wish them an abundance of success in their journey through life.

Red Cross Rallies to be Held
Red Cross Rallies will be held Friday night of this week at Richwood church, and Sunday night at Pleasant church, Boone county now has four auxiliaries of the Boone county Chapter. This is work we can all do. Let us put our attention in eyes, communitary in our county by July 1. If there is no organization in your community send to the county secretary at Lexington, and ask to be enrolled and later you can list in your local auxiliary. Twelve auxiliaries in the county by July 1. The Boone county is the last one to organize. Here is the roll: Burlington, Petersburg, Union and Florence. Help us put every community on this roll.

EDGAR C. RILEY.

Crop Conditions.

The weather has been unusually cool throughout the entire month of May, which has retarded the growth of all vegetation. Planting is delayed and everything is backward. Reports from over 40 counties give the weather as cool and dry with the drought broken the latter part of the month by copious rains.

A large increase in the acreage of corn is reported from all parts of the State. Replanting has been necessary in much of the early planted corn. The acreage of the entire State is placed at 111 percent and a fraction almost 112 percent of a normal crop. Condition of same 85 percent.

A poor wheat yield is expected. Made His Congressional Debut
Washington, June 18.—Arthur E. Rouse, Jr., ten months old son of the Kentucky Congressman, made his congressional debut this afternoon. Proud papa carried him to the floor of the House. Members surrounded him and Arthur E. Rouse, Jr., was duly honored. Suddenly he spied mamma in the gallery and his hands and his laughing voice were raised to greet her. The House suspended operations while Arthur E. Rouse, Jr., bustled his offering to his mother's sheltering arms. Then the debate on the food bill was resumed.—Washington Dispatch in Times-Star.

On a Camping Tour
It will be of interest to the many friends of Dr. F. L. Peddicord and wife to state that they are off on a long automobile tour. Their itinerary is from Lakeland to Indianapolis, to Chicago, to Toledo, to Detroit, to Canada. Returning they expect to come to Cincinnati, thence to their home at Lakeland. They are carrying with them a tent and the necessary camping equipment.

Red Cross Meeting at Florence
At the union services held in Florence Christian church, last Sunday night a Red Cross Auxiliary was organized with quite a list of members, which placed the number of members in the county above 200. An effort is being made to thoroughly organize the county for Red Cross work, and considerable interest is being displayed by the people generally.

Women Can Vote at Primary
Has it occurred to the ladies who are 21 years of age or over that they are entitled to vote in the primary election for the office of County Supt. of Schools?

Candidates Galore
The following candidates were in sight on the streets in Burlington at one time, Monday: J. C. White, Charles Fowler, W. R. Rogers, W. F. Bradford, F. E. Carson, Robt. B. Huey, J. C. Gordon, L. A. Connor.

The Drive Checked
The weather this week has given the farmers a chance to kill off some of the weeds that were everywhere, thus drive in their corn.

FORTY YEARS AGO TODAY

Items Taken From the Issue of The Recorder of June 21st, 1877

Too much rain for corn and wheat.
++++

Park Holton of Gallatin county, was in this county one day last week to summon 50 men to go to Gallatin county out of which to select a jury in a murder case.

OUR FRENCH ALLIES.

It is the belief of a great many American people, including not a few in positions of authority that the best way to force the U. S. to do her part in the war is to present in the darkest colors the darkest possibilities of the war. The evils of over-confidence are, indeed, great. Men who think they can win the war without doing their way to success. The present war is a serious undertaking, and this country certainly cannot afford to take any chances. We must win the war; any other outcome is simply inconceivable.

When these things are said, however, the fact remains that there can be too much pessimism; too much shaking of heads over "private information" from Europe or "news" to "fall in" as the man on Washington; too many "war-weary" as it is sometimes put. Moreover, France has come near to the maximum of her borrowing capacity, and has in the field the last of her reserves of man power.

These things are true, and yet there is a lot of fight left in France and the French. The French people are as resolute, as calm, as inspiring—we can find no other word so descriptive of their attitude—as at the beginning of the war. It is true that the French have no more men in civil life to send into the army, but the French army is not more powerful and most effective force. The French factories are pouring forth munitions of war; the French people are cultivating the soil with the same industry for which they have always been noted. The French need financial help and they are getting it; they need supplies and they are getting them. They need American soldiers at the side of their men on the fighting line and they will soon get that aid supplied.

Let us not depreciate the French in our anxiety to induce our people to work hard in the war. Not since the days that the merchants and sailors and farmers of Holland, rising as one man, giving "all that we are and all that we have" to the cause of their king, from the mighty power of Spain in the days of William the Silent has Europe seen a nobler sight than the devotion, the bravery and the splendid endurance of the French in 1914-17. And the fire is still burning. The French army is smaller than it was, but it is still large and it is still supplied.

Let us not depreciate the French in our anxiety to induce our people to work hard in the war. PLYMOUTH ROCK IS MOST POPULAR BREED

FLOCK OF PUREBRED PLYMOUTH ROCKS.

(Prepared by the United States Department of Agriculture.)

The Plymouth Rock chicken has been for years the most popular breed in the United States. The Barred Plymouth Rock was the original variety and was developed in the United States, various lines of blood being used in the making. It is probable that the Dominique, the Black Cochon, the Black Java, the Brahma, and the Pil Game were used for this purpose.

The size and type or shape of all the varieties of Plymouth Rocks are supposed to be identical. In general the breed may be described as a good-sized, rather long-bodied chicken, with fairly prominent breast and good depth of body, showing when dressed a well-rounded, compact carcass. This breed has a single comb and yellow legs, bill, and skin. The standard weight of cocks is nine and a half pounds; of hens, seven and a half pounds; cockerels, eight pounds; pullets, six pounds. They are layers of good-sized, brown-shelled eggs, and are regarded as particularly winter layers.

Popular Farm Fowl.

The Barred Plymouth Rock is by far the most popular general-purpose or farm fowl. This variety has so long been a favorite with the general public that the barred color is generally associated with quality in table fowls. The Barred Plymouth Rock plumage is a grayish white, each feather of which is crossed by dark bars which are almost black. It is desired that these bars should be as even in width, as parallel, as straight, and as well carried down to the skin as possible. Each feather should end with a narrow dark tip. The barring in the hackle and saddle is narrower than in other sections. The alternating dark and light bars give a bluish cast or shade to the general color, which should be even throughout the surface. It is common for solid black feathers or feathers which are partly black to occur in practically all strains in this variety, but this should not be taken as a sign of impure breeding. Black spots are also common occurrences on the shanks, particularly in females, but this does not indicate impurity.

There is a decided tendency for the males of this variety to come lighter in color than the females, and for this reason breeders are usually obliged to resort to two separate matings, one for the production of males of standard or exhibition color and the other for the production of females of standard or exhibition color. This system of breeding is known as double mating. In mating for males of exhibition color a male of about standard color is used with medium dark females, or those two or three shades darker than females of exhibition color, in which the barring is as distinct as possible, showing a clear-cut line between the black and white bars. This mating is known as the cockerel mating, because it produces a greater percentage of exhibition or standard-color males, while the females produced are too dark in color for exhibition, but are suitable for continuing this line of breeding. In mating for females of exhibition color, females of about standard color are used with a medium light male or one that is two or three shades lighter than males of exhibition color, but which shows distinct barring and as strong carrying in fact the White Plymouth Rock tends to run somewhat larger in size, and the type is a little more uniform and a little better than that of the Barred Plymouth Rock. In color the White Plymouth Rock should be a pure white throughout, free from black markings and from any brassiness or greenness.

The Buff Plymouth Rock is distinguished from the other Rocks by the color alone, which should be an even shade of golden buff throughout. Shuffling, or the presence of feathers having a shift of different color from the rest of the feather, and, moreover, or the presence of feathers sprinkled with lighter color as though powdered with meal, are undesirable. As deep

an undercolor of buff as it is possible to obtain is desirable. There is a great difference of opinion as to what constitutes desirable buff color, some favoring the lighter color, approaching lemon, while others favor a much darker buff, approaching red. The important point is to have the shade as even as possible over the entire surface.

New Varieties.

The Silver Pencilled Plymouth Rock is one of the new varieties. Its plumage is distinctive and very beautiful. In general, the plumage of the male consists of a silver white top color, extending over the shoulders and back, the hackle and saddle striped with black. The rest of the body plumage, including the main tail feathers and sickles, is black. The wings when folded show a bar of black extending across below the shoulder. Below this the wing shows white, due to the white on the outside of the secondaries. In the female the general trend of color is gray, with delicate, distinct, concentric pencilling of dark on each feather except the hackle, each feather of which is silvery white with a black center, showing a slight gray pencilling, and the main tail feathers, which are black, with the two top feathers showing some pencilling. The color of the plumage is practically the same as that of the Dark Brahma.

The Partridge Plymouth Rock is also one of the newer varieties of this breed. The coloring of this variety is very attractive and is practically the same as that of the Partridge Cochon and also of the Silver Pencilled Plymouth Rock, except that the white of the Silver Pencilled is replaced by red or reddish brown.

The Columbian Plymouth Rock, a variety of comparatively recent origin, is very attractive in coloring and has proved quite popular. In general the color is white, the hackle feathers being black with a narrow edging of white, and the main tail feathers black, the tail coverts being black with a distinct white lining. The wings also carry some black on the primary and secondary feathers, which is almost hidden when the wings are folded. The color of this variety is practically the same as that of the Light Brahma.

USE INCUBATORS ONLY

Real Function of Hen Usurped by Modern Machine.

Artificial Incubation Only Kind in Use by Big Commercial Plants and "Side-line" Man Really Should Employ One.

(By C. S. ANDERSON, Colorado Agricultural College, Fort Collins, Colo.)

Modern hatcheries of eggs is exclusively an incubator proposition. There are no large commercial poultry plants or specialized poultry men conducting businesses of any consequence that are not using artificial incubation. The number of side-line poultry men and farmers buying incubators is rapidly increasing. In fact, it is a question whether even the city poultry man, with a few hens in his backyard, can afford to be without one. To meet his need, there is the small electric-heated, 50-egg capacity machine successfully operated in most any room in the house, or even on the back porch. Going to the other extreme, the mammoth commercial hatchery machine of 5,000 to 10,000-egg capacity is not uncommon.

Between these two extremes is the 250 to 300-egg machine, the kind best suited to the needs of the farmer-poultry man. The initial cost of a reliable machine of this size will vary between \$5 and 10 cents per egg capacity. To operate a 300-egg incubator for three weeks will cost approximately 75 cents for gas, oil, or electricity, and ought not to require more than ten minutes a day for attention. This represents the work of 20 hens for three weeks, and at least half that many for a six weeks' brooding period. If those hens were all kept at work during this time they would lay at least 500 eggs. Valued at only 15 cents per dozen, these eggs would amount to between \$8 and \$7, and if sold for hatching could easily bring \$50.

Skim Milk for Hens.
Skim milk is better for laying hens than whole milk for the reason that it is not so fattening.

Testing the Eyes
Sometime when people get glasses that suit them they go on wearing them for years without having their sight tested to discover whether any change has taken place. This is wrong. All should have their eyes tested at intervals. Glasses for old sight should be changed every two years. Whenever you feel uneasy in your glasses don't hesitate to call and see us. If no change is necessary we will tell you.

Statement by Secretary of War.

The cavalry, engineers, coast artillery, signal corps and quartermaster corps of the Regular Army have already been brought to war strength.

45,000 additional recruits are needed at once to complete the new regiments of infantry and field artillery.

25,000 additional recruits are desired at the earliest practicable date to fill vacancies in order that the war strength of 300,000 men may be maintained.

Facilities are in readiness for placing 70,000 men under proper training.

Any delay in obtaining this number will necessarily cause the loss of invaluable field troops.

It is the earnest desire of the War Department that 70,000 single men between the ages of 18 and 40, who have not been engaged in professions, business, or trades vitally necessary to the prosecution of the war, be enlisted in the 30th of June, 1917.

NEWTON D. BAKER,
Secretary of War.

Burlington Badly Beaten

The Burlington and Petersburg game of ball on the local grounds last Saturday afternoon was a swell affair the Petersburg score getting about all the swell, the result being 14 to 4 in favor of the visitors. The real and about the only feature of the fracas, was Berkshire's circus catch of a long fly to center field. Thompson's pitching could not be solved by Burlington and he held them back without difficulty, working easy all the way. Smith was mound for Burlington, but had no support, errors being made as rapidly as opportunity offered. The diamond and out field were in a horrible condition and should be put in condition before another game is attempted there. Petersburg and Burlington will play at Petersburg next Saturday afternoon.

A Political Card

To the Voters of Boone County: Gentlemen: Because of circumstances over which I have no control it will be impossible for me to make a close canvass of this county for the nomination for Jailer. In fact when I became a candidate I did not expect there would be any opposition, but I am in the race to run it through, and will try to be in every precinct in the county between now and the primary election and will call on as many voters as I can. Anything anyone may do to advance my interest in the campaign will be fully appreciated.

C. A. FOWLER.

The Boston Transcript is very unhappy because some of the "young men from New England" at the officers' training camp at Plattsburg have not been pleased either with their meals or their sleeping accommodations, and it notes as a special cause of woe that the "waters" in the dining-room are inefficient. The best thing for these young men from New England to do is to go home and let others take the training and receive the commissions. Applicants for the army commissions who cannot stand the fare at Plattsburg without complaining would be poor material in the trenches in France.

Writing to Representative Langley, from Dodge City, Iowa, two Kentucky maidens, Miss Huey and Miss Thatcher, say they will graduate from Iowa Medical School this month and that it is their intention to establish themselves in the practice of their profession somewhere in the most mountainous section of Kentucky, far removed from railroads and at points where automobiles cannot penetrate, so that they will have to ride on horseback to make their calls. They would be inconvenient and they wish the consent of Congress to dress like men. Asked if he will introduce the bill to give them this permission, Langley said: "I am always anxious to do what I can for the ladies, but I want to consider this matter."

NOTICE—Those who signed the contract for the Chautauque are requested to meet at the court house, tomorrow, Friday evening, at 7 o'clock for the purpose of appointing the necessary committees and the transaction of any other business that may be presented regarding the Chautauque.

DAIRY FACTS

CALVES DROPPED IN AUTUMN

More Easily Raised and at Lower Cost Than Those Coming in Spring—More Time for Care.

Calves dropped in the fall are more easily raised and at the lowest cost. Spring calves do not receive much benefit from grass the first season because for some months after birth the ruminating stomach is undeveloped, not to mention the effect of the annoyances from flies and the summer heat. When given a good start milk and dry food can be given and the growth is not checked. In the fall there is more time to give to their care and feeding. Fed mostly on sweet skim milk and oatmeal porridge. In a warm, well-aired and lighted pen, which should be kept clean, dry and well bedded, they will make a vigorous healthy growth and when spring comes the fall calf is large and strong enough to be turned into the pasture.

INCREASE QUALITY

Increase in quality of dairy products can be secured in four ways:

"First—By buying only good cows.
"Second—By breeding for improvement.
"Third—By systematic milk and feed records.
"Fourth—By better care and management."

LARGE PRODUCTION OF MILK

That From Jersey Has Higher Percentage of Protein Than That From Any Other Breed in Ayrshire.

Which do you prefer, skim milk from a Holstein or from a Jersey cow? It is generally known that Holstein milk has a lower percentage of butterfat than milk from other breeds. Does the skim milk from it have a correspondingly lower percentage of its constituents, chiefly protein and sugar?

Chemical analyses made by A. E. Perkins, dairy chemist at the Ohio experiment station, show that milk

High-Producing Cow.

from Jersey cows has a higher percentage of protein and sugar than Holstein milk. Guernsey milk is quite similar to that of the Jersey, while Ayrshire milk is intermediate between that of these two breeds and the Holstein.

These analyses indicate that the percentage of protein in milk increases with the fat content, but not in proportion. Skim milk from Holstein milk having 3.3 per cent fat contained 3.5 per cent protein, while Jersey milk testing 4.7 per cent fat had 4.1 per cent protein. The variation in sugar content showed a similar tendency. Thus the fat content of milk offers a practical basis to compute the composition of skim milk derived from it.

RAISING CALF ON SKIM MILK

Young Animal Should Be Taught to Eat Grain Early—In No Case Feed It in Milk Ratio.

The calf which is to be raised on skim milk should be taught to eat grain early. When they have access to it, many of them will begin eating at two weeks of age or three at the latest.

The grain should be placed in a box where they can easily get at it. They can be encouraged at first by placing a little in their mouths after they have consumed their milk. Grain can best be fed dry after the milk is fed. In no case should it be fed in the milk, as in that case it will be gulped down without chewing, which is bad for the digestion.

PREVENT BACTERIA IN MILK

Best Way to Hinder Formation is to Cool Liquid as Soon as Possible After Being Drawn.

Perhaps the best way to hinder the formation of bacteria in milk is to cool it as quickly as possible in order to remove the "animal heat" after it has been drawn from the udder. Then heat it a little in their mouths after they have consumed their milk. Grain can best be fed dry after the milk is fed. In no case should it be fed in the milk, as in that case it will be gulped down without chewing, which is bad for the digestion.

DAIRY FACTS

WORK AGAINST CALF SCOURS

On Every Farm Measures Should Be Taken to Prevent This Disease—Many Animals Lost.

Thousands of calves are lost each year by what is known as scours, says H. H. Kildee, University of Minnesota. On every farm measures should be taken to guard against this disease, which results from a deranged digestive system.

Calves should have warm, clean, light and well-ventilated pens. Milk should be fed in regular amounts, at regular times, at a temperature of about 50 degrees Fahrenheit, from scrupulously clean pails. The foam which accumulates on the milk while it is being separated should never be fed. The time to feed the grain ration is immediately after the milk is fed, so that the calves will not suck each other's ears and thus take air into the stomach, which causes bloat and produces scours. It is well to have stanchions in one side of the pen so that the calves may be confined for a short time after being fed milk.

Each day during the winter, when the weather is favorable, the calves need to be turned out into a sheltered yard for exercise, which is necessary for their proper growth and health. It is also very important that the calves, from a very early age, be given all the pure, fresh water they care to drink each day. The pens should be disinfected frequently. Quiktime is excellent to sprinkle on the floor each time it is cleaned and a frequent spraying with some standard coal tar dip solution will prove beneficial.

THINGS TO REMEMBER

A good grain mixture for calves is: Oats, 50 parts; bran, 30 parts; cornmeal, 10 parts; oil, 10 parts.

Remember to make the calf pen:

Dry and clean; well-lighted, warm in winter; shaded in summer; free from vermin; convenient for feeding.

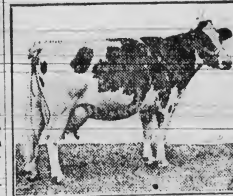

The dairy calf when bred right and raised right becomes the best cow.

OLD COWS SOMETIMES EXCEL

Animal Should Be Kept Until She Falls to Give Good Profit for the Feed Consumed.

(By J. B. HWIN)

It is my experience that a milk cow remains valuable until about twelve years of age. My cattle are purebred Holsteins, and some have produced over 10,000 pounds of milk per year after they were twelve years old. We

Holstein Cow.

seldom keep them longer than that. All farmers who have purebred cows know their ages, and I find that the farmers in this vicinity that do not have purebred cows know the ages of their animals approximately. I have kept one or two cows until they showed signs of falling as producers of milk. This was indicated by the decrease in the milk flow, but not in the shortening of the period of lactation. My way of getting them ready for the butcher is to let them go dry, and they will fatten it in good physical condition. I think a cow should be kept as long as she gives a good profit for the feed consumed.

SWELL PRODUCTION OF HERD

Only Practical Way to Make Improvement is by Raising Heifer Calves From Best Cows.

When the milk is sold for market milk, or to a cheese factory, or a creamery, the problem is how to raise calves without the feed costing more than the value of the animal raised. At the same time it is a most serious mistake under these circumstances to depend upon buying cows. The only practical way to improve the production of the herd is by raising heifer calves from the best cows.

FALL FRESHENING IN FAVOR

Heat and Flies of Summer Have Deteriorating Effect Upon Cows and Their Offspring.

The who will spend one of the long evenings thinking of a sturdy line of calves to raise, but a few months later to find the effort has been in vain. The calves born in the summer have been born in the summer, and the calves born in the fall have been born in the fall.

DAIRY FACTS

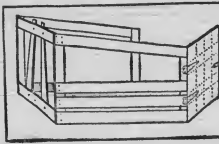

CRATES FOR SHIPPING COWS

If Animal Comes Within 1,000-Pound Limit Make Device Strong and Light as Possible.

In answer to a query as to the best way of crating a cow for shipment by express, J. Grant Morse, in Rural New Yorker, makes the following reply:

If one is thinking of shipping a cow by express the first thing necessary is to weigh the cow. The express companies have made a ruling that no express package (including live stock) will be accepted that weighs over 1,000 pounds.

But, if your cow comes within the limit, it is necessary to make your crate as light as possible and insure its holding her. Measure your cow as to length from the middle of her neck back to her tail. (Allow a little so that she can move a little). Then get the width of her through the widest part. Next get the height. Cut three pieces of 2-by-4, or other lumber, for the sills the width of the cow. Then cut the floor boards

Cow-Shipping Crate.

from inch hard pine or spruce, the length of the cow. Nail these to the three sills and then turn your floor over so that the sills will be on the inside. This will give the smooth bottom to the crate, and is very essential in moving it with the cow inside.

Next cut two 2-by-4's the height of the cow for the hind posts of the crate, and two more, six inches longer, for the fore posts. The fore posts are longer for the cross pieces of the crate, and will be nailed to. Nail the corner posts to the bottom. Now place a stanchion in front, which should be of good strong material, as this alone keeps the cow from escaping. The back end may be boarded up after the cow is in position.

If the cow is going far, send along a food supply, which may be chopped hay and grain mixed. Also send a pail to water her, and the pail can be used to feed her from also.

ROUGHAGE FOR DAIRY FEEDS

Dairymen Cannot Hope for Success Unless He Pays More Attention to Home-Grown Crops.

(Clemson College Bulletin)

The past year has demonstrated one thing to the satisfaction of every man in the state who is engaged in dairy farming and that is that he cannot hope for success unless he produces at least half of the roughage needed and most of the grain feeds. In every instance where farmers have become discouraged with the business the underlying cause has been the lack of sufficient home-grown feeds. To meet this requirement the following feed requirement for one cow has been worked out by the extension division for the information of farmers during the coming year.

One ton legume hay.
Four tons mangel or silage.
One ton sorghum.
One-half acre velvet beans and corn.
One-half acre ryegrass for winter pasture.
One acre permanent Bermuda pasture.

The above ration will furnish sufficient feed for one cow for one year, with the exception of 200 pounds of cottonseed meal or soy bean meal which should be added to the grain mixture. The one-half acre of velvet beans should furnish at least two months of winter grazing, besides 700 pounds of velvet beans in the pod and 700 pounds of corn and cob meal to be mixed with the velvet bean meal and cottonseed or soy bean meal for the grain mixture.

FLIES CARRY DISEASE GERMS

Most Practical Plan to Keep Pests Out of Barn and Milk Room—Don't Let Manure Accumulate.

Keep flies out of the barn and milk room. One fly may carry as many as 150,000 germs to the milk. They may be disease germs. Manure should not be allowed to accumulate around the barn—it is a breeding place for flies.

FEED GRAIN TO YOUNG CALF

No More Should Be Given Than Will Be Eaten Up Clean Twice a Day, About Half-Pound.

After a calf begins to eat considerable grain should not be kept less than 10. No more should be given than will be eaten up twice each day which will not be over one half pound daily for the first two months.

POTATO FACTS FOR 1917

Present unusual high prices for potatoes will tend to the planting of fields to this crop that have never grown them and perhaps where they are wholly unsuited. A suitable well-prepared seed bed, an abundance of available plantfood, strong clean seed, shallow cultivation, and spraying are the five cardinal principles necessary for a successful crop. Last year's number of potato men of Van Buren county, Michigan, grew approximately 200 bushels to the acre by paying attention to the above factors while the state average was less than one-half this.

A rich well-drained sandy loam, well supplied with humus and properly balanced plantfood, is the best potato soil. However, it is possible to grow profitable crops of potatoes on heavier soils if they are first brought to a high stage of fertility and are made friable by the use of organic matter. Since this cannot be done in the growing season, the best one possible of rotted manure supplemented by fertilizers.

Intensive methods make it possible to grow crops yielding from 250 to 400 bushels per acre and to decrease the cost of raising each bushel. Large crops of potatoes growing comes in the preparation of the land and the attention given the crop throughout the season. It costs no more to prepare ground, cultivate, and spray a 300-bushel crop than it does a 150-bushel crop. Harvesting with cost more, but the big overhead expenses are practically the same. Obviously the thing to do is to insure larger yields by supplying an abundance of available plantfood that will give the crop a good start and force it to early maturity.

Potatoes Lazy Feeders.

Potatoes are short-eaters and comparatively lazy feeders. They do not reach out far for their food. Consequently plenty of well rotted manure and commercial fertilizers should be thoroughly worked into the soil so the plants will have plenty of plantfood near at hand all through the growing period. This is the practice of the successful potato growers of Van Buren county, Michigan. Since prospects for a fairly remunerative price for potatoes is so bright, in many instances, it will pay this year to side dress the growing crop once or twice during cultivation with fertilizer, especially if the ground is not ideally rich potato land.

The potato takes up a fairly large amount of nitrogen, a moderate amount of phosphoric acid and a large supply of potash; hence, a fertilizer supplying 5 to 5 per cent ammonia, 6 to 8 per cent potash and 10 to 12 per cent phosphoric acid, under normal conditions 5 to 8 per cent potash is about right for loam soils. On sandy soils use more ammonia, on clay use more phosphoric acid and less potash, and on muck use 1 per cent of ammonia, 10 to 12 per cent phosphoric acid, and 8 to 10 per cent potash when the latter can be obtained so that when the time comes for the setting and lifting of the potatoes, there may be as large a number of potatoes as possible, and the potatoes may ripen uniformly. In applying the fertilizer, it has been found that quantities varying from 800 to 1,500 pounds per acre have given excellent results. In Maine, where about 25,000,000 bushels are produced annually the application of fertilizer on the good soil of that state varies from 1,000 to 2,400 pounds per acre.

Methods of Application.

At least one-half of the ammonia of the complete fertilizer used should be in quickly available form in order to give the young potatoes an early, vigorous start. The other half should be in more slowly available form so as to furnish a continuous supply as it is needed by the growing crop. The phosphoric acid should be readily available so that when the time comes for the setting and lifting of the potatoes, there may be as large a number of potatoes as possible, and the potatoes may ripen uniformly. In applying the fertilizer, it has been found that quantities varying from 800 to 1,500 pounds per acre have given excellent results. In Maine, where about 25,000,000 bushels are produced annually the application of fertilizer on the good soil of that state varies from 1,000 to 2,400 pounds per acre.

Apply fertilizer in the row up to the capacity of the fertilizer attachment of the planter. Any amount in excess of this should be drilled in with a wheel drill before planting, or applied with a line and fertilizer distributor and well mixed with the soil. This distributes the plantfood throughout the soil where the tiny potato roots may find it early in their growth. The tubers grow on square roots, which must enter the plant, while the feeding roots stretch off into the soil in search of available plantfood. Contrary to common belief, the general distribution of fertilizer between the rows of potatoes does not tend to spread the growing tubers, but tends to provide a better distribution of food for the growing plants.

All seed potatoes planted this year should be treated with formalin or corrosive sublimate to free them from disease. It costs but a few cents per acre to do this as well as to spray for potato bugs, beetles, blight, etc., which attacks the growing plants, if any one of the five factors necessary to the growing of potatoes are neglected the crop will not be as large nor the profits as high as they should be. Good seed well planted in a rich well fertilized soil and the crop properly cultivated and sprayed will mean big crops next summer and fall.—Henry G. Bell.

GROWING YOUNG BEANS.

"Adrian seed bed, seed free of disease planted in a soil well supplied with humus and plantfood, shallow cultivation and careful harvesting are some of the factors in a successful bean growing," says a well-known bean authority. In this section the beans should be planted by May 20.

ANNOUNCEMENTS.

For County Judge.

P. E. CASON is a candidate for Judge of the Boone County Court, subject to the action of the Democratic party at the primary election, Saturday, August 4th, 1917.

R. B. HUEY, of Burlington precinct, is a candidate for Judge of the Boone County Court, subject to the action of the Democratic party at the primary election, Saturday, August 4th, 1917.

For County Attorney.

N. E. RIDDELL is a candidate for County Attorney of Boone County, subject to the action of the Democratic party at the primary election Saturday, August 4th, 1917.

For Sheriff.

L. A. CONNER, of Burlington precinct, is a Democratic candidate for Sheriff of Boone county, subject to the action of the Democratic party at the primary election Saturday, August 4th, 1917.

B. L. CLEEK, of Union precinct, is a Democratic candidate for Sheriff of Boone county, subject to the action of the Democratic party at the primary election, August 4th, 1917. Menter Martin to be his deputy if he is elected.

For Assessor.

HARRY W. RILEY of Union precinct, is a Democratic candidate for Assessor of Boone county, subject to the action of the Democratic party at the primary election, August 4th, 1917.

J. S. CASON, of Walton precinct, is a Democratic candidate for Assessor of Boone county, subject to the action of the Democratic party at the primary election, August 4th, 1917.

BOONE F. ROGERS of Bellevue precinct, is a Democratic candidate for Assessor of Boone county, subject to the action of the Democratic party at the primary election August 4th, 1917.

For Superintendent.

J. C. GORDON, of Walton precinct, is a Democratic candidate for Superintendent of Schools in Boone county, subject to the action of the Democratic party at the primary election Saturday, August 4th, 1917.

For Representative.

W. P. HOPKINS, of Paducahville precinct, is a candidate for the Democratic nomination for reelection to the office of County Representative in the next General Assembly of Kentucky, subject to the action of the Democratic party in Boone county at the primary election, Saturday, August 4, 1917.

For Jailor.

CHAS. A. FOWLER, of Burlington, is a candidate for Jailor of Boone county, subject to the action of the Democratic party at the primary election Saturday, August 4th, 1917.

JOHN C. WHITE is a candidate for Jailor of Boone County, subject to the action of the Democratic party at the primary election August 4th, 1917.

R. M. WILSON, of Constance precinct, is a candidate for Jailor of Boone county, subject to the action of the Democratic party at the primary election Saturday, August 4th, 1917.

For County Clerk.

W. R. ROGERS is a candidate for reelection to the office of Clerk of the Boone County Court, subject to the action of the Democratic party at the primary election August 4th, 1917.

W. F. BEADFORD, of Florence precinct, is a candidate for clerk of the Boone County Court, subject to the action of the Democratic party at the primary election August 4th, 1917.

There is a young matron in town who is an ardent fancier of chickens. But this is her first experience in raising them. Now she is so enthused over the experience she is kept busy setting, alder hens and is buying all in the neighborhood with a brooding inclination. She has already a flock of chickens and the other day after one of our cool showers a few of her pets got wet. With tender care she gathered them together in her living room and built a good fire to dry them out. Not satisfied with this treatment she went so far as to get her husband's flask from the pantry and doped them up. In a short time the chickens were boozey inside and out and as vicious as rat terriers. Now the young matron wants to know how soon the chickens will begin to cut teeth. —Harrodsburg Herald.

Joe White, a colored veteran, was naming the military commands to a crowd of young colored men, a few days ago, and when he named "retreat," one of his audience asked, "what does retreat mean, Uncle Joe?" when he answered quick as a flash, "run like h-l," and he went on to say that that particular command was often obeyed before given.

Can you beat this record? County Judge W. H. Phillips, of Jessamine county, was the first Democrat elected to office after the Civil War, in 1878, and has held the office continually since that time. Thirty-nine years of service. He has announced for reelection and will have no opposition.—Somerset Journal.

Master Commissioner Chas. Maur made several sales of Bringer real estate at the Covington City Building last Monday. It being property belonging to the estate of the late John T. Craven. Two houses and lots and three vacant lots were sold, the sale amounting to \$4,741.

For Sale—Square piano. Cheap. Mrs. M. Reddick, Burlington, Ky.

GERMANY HAS NOT BEATEN US YET.

Washington, June 14. — Great gulfs of gloom, originating in Washington, are being set before the American people by the special writers who are coming to Washington, a return railroad ticket in one hand a "bited" shirt in the other. These gentlemen have set for themselves a highly laudable purpose. They have come to wake the nation up. And their idea of waking it up is to scale it to death. Their lugubrious lectures set out from the premise that already the United States is licked, to a frazzle; and should the nation refuse to take their advice and wake up instantly, it will be "vied help us," or worse than that. They have to get in some of that solemn stuff; to make it impressive.

It isn't my desire to tackle the subject from the fool optimistic angle. The situation isn't so bright and attractive as to stimulate the impulse to buy drinks for strangers or to send souvenir neckties to one's friends. But when the newspaper "commissioners" come down here and, after two days' conversation with all the pessimists whom Washington now harbors in such abundance, send out stories that bring cold shivers to the nation's spine and cause apprehensions and gloomy forebodings to becloud the nation's mind, it seems as though the time had arrived to strike a balance sheet and see where we stand.

There is—and no one in authority would undertake to deny—a large measure of truth in the stuff that's being disseminated. The United States never was prepared, either in a military or an industrial way, to put on the gloves with the greatest war nation in the world. Everybody knew that when we went into it, the United States isn't prepared well enough now to lick Germany single handed and alone and it would find that a difficult undertaking at any time. But the United States is getting ready and before the curtain shall have fallen on the greatest tragedy in history the United States bravely, nobly and effectively will have done her part. There is a middle ground between people.

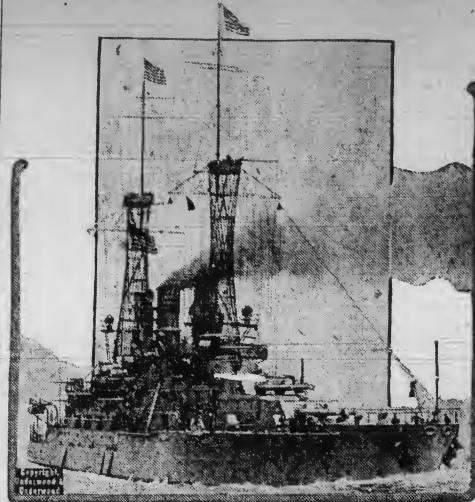

certainly the American people have shown no tendency toward the latter emotion, and members of the Cabinet and others who have traveled about during the last few weeks, are persuaded that neither does an apathetic attitude exist. An intelligent realization of the task and the terrors that lie ahead gradually is being stirred. It is not a noisy feeling, but in the language of a member of the Cabinet, that doesn't signify that it isn't there. And upon that intelligent realization the leaders of the nation are building their hopes and convictions. Perhaps it has not been fostered by constant stressing of the idea that the United States has gone into the war to fight for all humanity; but Secretary of the Interior Lane and others of deeper understanding, have made it clear, in spite of high-sounding phrases, that the U. S. is waging a war of self-defense, involving the freedom of this and coming American generations.

When the phrases shall have been eliminated and the nation shall have determined for itself the reasons for this war and the ideals for which the people are contending, there will be no longer excuse for the despondent pieces distributed by wire and by mail by the incoming knights of the typewriter, whose eyes and ears take in only the ominous and whose writings reflect an altogether bilious condition. If their work were not so hurried as to permit them to detect only the obvious, they might even now accompany their pessimism with revealing contrasts, showing improved conditions and steady progress toward national efficiency.

If the pessimists had been written two months ago, there would have been justification for their distress over the possible military collapse of France and Great Britain. But there is no justification for this distress at the present time. It is true, from a military point of view, France has been on the retrograde, and though the retrograde movement even now has been checked, Russia has disarranged many plans and were caught by surprise, and duties now devolve on nations which Russia's temporary or permanent dissolution—temporary is the best word here—has projected on them with startling suddenness. But Great Britain has not reached the maximum of her military effectiveness, nor the maximum of her effective man power by two or more millions of men, and the United States is only getting into the fight, although with much greater rapidity than has been anticipated by the nations to whose aid she has come.

Nor is the food situation, bad as it needs to be, the writers of ill-omen would have the nation believe. The strictest economy is necessary—that has been denied into the case of the public with such constancy and persistency that the thought brings no new sensations. England and France are on scant rations; there's nothing new in that. But England is not starving, nor is France, and thanks to the relief afforded by the present seasonal consumption of green stuffs, England still has a three month reserve, and France sufficient for at least ten weeks, without taking into account the current supplies. Food supplies from the U. S. are reaching both countries, and in quantities sufficient to assure that the emergency supplies will suffice until the new crops shall have been garnered. There need be no uneasiness over the prospects of immediate starvation; it is to become a real menace, that menace need strike terror to no

stout heart before the expiration of the calendar year. But what the dispenser of woe forge to take into consideration when they picture the possibilities in France and Great Britain, is the actualities in Germany, where hunger pinches far worse and where the military situation is quite as deep ly affected by the economical one. The other source of despair and subject of highly emotional fine writing is the submarine situation. It is true that no effective destructive weapon against the submarine has been devised. It is probably true that submarines are not being destroyed in large numbers. Every report of a submarine sinking should be taken with caution, for unless wreckage can be pointed to, there can be no positive proof as to whether a submarine submerged or was sent to the bottom. The naval authorities take but little stock in stories dealing with alleged destruction of undersea boats, unless they are as well authenticated as the one reported from the American armed merchantman Silvershield. But in spite of the survival of the ocean, their operations, within recent weeks, have been limited and reduced. If the submarine fails to sink American cargo ships, it makes but little difference whether the submarine is sunk or not. The thing is to get by the submarines, and American ships unquestionably have been "getting by" them. The Allies are reaching the Allies. The figures of the sub's deadly work have been gradually dwindling, altho reaching this alarming total of 100,000 tons in one recent month. Since then replacements have been going on at the rate of 200,000 tons a month, and it will not be long

before these replacements reach a monthly total of 500,000 which is about as much as is needed to replace what is being sunk at prevalent rates. It isn't difficult for the writer who comes here to "arouse the nation" to paint a startling and sensational picture in a few bold strokes. But he is compelled to do it at the expense of his judicial poise. He is obliged to exaggerate the evils and shortcomings existing and to ignore the developments and achievements which do not stand out quite as conspicuously as the dangers. In so far as they are endeavoring to stir the public to intelligent realization of the perils of this war, they are serving a patriotic purpose. But there isn't any need of scaring the people to death, nor is there occasion for it.

Don't suppose you have forgotten that big picnic that will be given at the Harris home grounds on Saturday afternoon?

Brooks' new show boat will show at Belmont Wednesday, Thursday and Friday.

STRUGGLE TO BE TRUE.

The struggle to be true. Who has not felt its hardships and paid its penalties. Its very nature presupposes obstacles to be overcome, disappointments to be borne, temptations to be resisted, sacrifices to be suffered; yet no high-minded, honest-hearted, pure-souled man will shrink from the ordeals it imposes, says Charleston News and Courier. The struggle to be true is a never-ending one. No sooner do we succeed in passing through one ordeal than another presents itself; no sooner do we gain one victory over our baser selves than our hearts become battlefields again; no sooner do we show ourselves true to our highest ideals than temptation assails us in another form. We are never allowed to rest upon our laurels in the struggle to be true, nor yet are we permitted to obliterate ourselves in our failures. In the one case the strength of our victories makes us all the more eager to live true to the highest teachings and noblest ideals of life; in the other the voice of conscience never allows us to forget the weak and cowardly manner in which we surrendered our best traditions to the call of the world. We suffer temporarily, perhaps, through the loss of material comforts and the sacrifice of certain pleasures which add to our worldly ease, but our efforts to ring true, our eager desire to attain only the best results, our forgetfulness of selfish interests are like fresh breezes sweeping through our tired, oftentimes hard-pressed souls.

Much has been done to improve the quality of milk in cities. Much has been done to improve the quality of butter. Country butter is of highly speculative value. It is sometimes good, sometimes indifferent and often bad. It is sometimes fresh, but sometimes it has been hoarded at the farm, insidiously, and has absorbed strange odors and flavors in addition to acquiring the odor and flavor of undesirable age. Creamery butter never is, and never will be, quite as good as the best country butter, says Louisville Courier Journal. But it is usually much better than the average country butter if it is fresh. Oftentimes it is not nearly so fresh as the neat carton and the boastful printed matter on the outside of it would lead the consumer to believe. When the milk question has been settled, if that time comes, how about making it a felony, or a misdemeanor, or disorderly conduct, at least, to sell a pound of stale, strong butter inclosed in a carton covered with printed matter which makes the contents as alluring as proprietary medicine?

In the celebrated Dick mimeograph case the Supreme court of the United States held that the owner of a patented device could prescribe the supplementary materials to be used in operating it. This ruling was severely criticized at the time it was handed down. Now it is reversed. Dismissing an infringement suit of the Motion Picture Patents company, the court holds that patentees of machines cannot prescribe what materials shall be used with their products. Patentees of machines, the court declares, are limited to the mechanism itself. Patentees may not restrict their use to any particular supplementary materials, and the public may use any materials necessary to their operation, says Milwaukee Wisconsin.

A contrary practice, it is observed, "would be gravely injurious to the public interest, which is more a favorite of the law than is promotion of private fortunes."

Agrial peace rumors fill the air. So terrible is becoming the strain on the belligerent nations, both at home and in the field, that the hard-pressed people may refuse to bear it as long as their rulers would like. And if any one nation reaches the limit of its endurance then will come the deluge, the greater for having gathered strength while pent up in apparent submission.

An investigation of finances in Russia showed that it cost \$20,000,000 a year to run the imperial household, \$900,000 of this going to autos and the imperial stables. No wonder, with potatoes and onions at their present prices, the country found it necessary to cut down expenses at the top.

Amateur farmers who think nothing but a clunk of ground and a supply of enthusiasm are needed to grow big crops ought to gain some practical knowledge by next fall which will be useful during the summer of 1918.

Safe and sane though the demonstration may be, the coming Fourth of July promises to be the liveliest since the original placing of that day in the red-letter column of the calendar.

FIREWORKS
Bulletin Issued by Department of State Fire Marshal Commonwealth of Kentucky.

In view of the extraordinary conditions brought about by this country being at war with a foreign nation, we issue the following ORDER, and call upon and request all officials and officers of this Commonwealth to assist in the enforcement of the same:

No person or persons, firm or corporation, shall SELL, offer for SALE, or place on display, in any part of the Commonwealth of Kentucky any blank cartridges, toy pistols, rockets, Roman candles, squibs, or whistles, spinners, sparklers, or any similar fireworks, or any explosives are used, or the type of toy or aerial balloon which requires FIRE underneath to propel same.

No fireworks or fire crackers, of any size, containing chlorate of potash and sulphur, no device for discharging or exploding such substances by concussion or friction will be allowed to be SOLD, DISPLAYED or DISCHARGED within the Commonwealth of Kentucky.

The discharging of any fire arms within the corporate limit of any city or town, or within three hundred yards of any magazine or factory where explosives are stored or manufactured, is hereby prohibited.

PENALTY. Any person, persons, firm or corporation failing or refusing to comply with these rules and regulations as herein provided, shall be guilty of a misdemeanor and subjected to the penalties as provided in Section 21 of an act of the General Assembly, approved March 15th, 1916, which is as follows:

"Any owner, occupant, or other person having control over or charge of any building, structure or other premises, and any other person required to do or perform any act herein required, or who shall fail or refuse to comply with any such provisions or any part thereof, or who shall violate or fail or refuse to comply with any lawful order made under such law, or who, directly or indirectly, knowingly induces another so to do, shall be punished by a fine of not less than ten dollars and more than five hundred dollars, or by imprisonment in the county jail for not more than 30 days, or by both such fine and imprisonment."

"In any prosecution under this subsection, it shall be deemed prima facie evidence of a violation of the law if the accused has failed or refused to comply with any order, rule, regulation or requirement of the State Fire Marshal relating to the safety of any building, structure or premises, and the burden of proof shall thereupon rest upon the accused to show that he has complied with such order, rule, regulation or requirement."

"Every violation of the provisions contained in Sections 39, 40 and 41, or any part or portion thereof, by any person or corporation, shall be deemed a distinct offense, and in the case of continuing violation thereof, each day's continuance thereof shall constitute a separate and distinct offense."

Witness my signature at Frankfort, Ky., this, the 11th day of June 1917.

T. B. PANNELL,
State Fire Marshal.

Who Raised the Price?

What the people who are buying food want to know is, "Who is doing the raising?" Turn there, you will, you are told, that some one somewhere else is doing the stunt. No one pleads guilty but certainly there is a place and a person who is making these high prices.

Let us consider one item. We will not pretend to give the exact figures because it is immaterial. The point is, why the rise? Take a line of canned goods that was put up last year, that sold last October for \$2.30 a case. That is, there was nothing added to that case of canned goods, the fruit was all bought and paid for on last year's prices, also the sugar and labor. Now tell us why the same case is now listed at wholesale at \$4.07? It looks to us very much as if it is raised here, and about it. The industry uses the word "speculator," who has been using it? The local grocer has not been consulted and we believe that we are suffering from an epidemic of pencil prices than we are from a shortage of food. It is simply a case of going out and getting the money, and the people are not to buy with other nations they have not had time to capture the criminal. - Mason Journal

A Sane Fourth.
By reference to the article entitled "No Fireworks" published in another column it will be noted that you cannot resort to fireworks on the fourth of July as in the case of your patriotism. Sit in the shade and keep cool in about all you will be permitted to do that day unless you desire to work as usual.

AMERICAN LINER PHILADELPHIA

HOW TO CAN IN THE SOUTH
Home Methods as Taught by the U. S. Agricultural Department for Southern States.

Can surplus food but use jars and cans wisely.

Don't have an empty preserving jar in your home next fall.

Reserve regular tight sealing containers for canning foods.

Concentrate products so that jars and cans will hold as much food and as little water as possible.

Put up jams, jellies and preserves in wide-necked glass jars sealed with cork or paper and paraffin. Pack fruit juices in ordinary bottles.

Don't can anything that can be kept just as well dried or in other forms. Dry peas and mature lima beans for winter use.

Produce in your garden lots of cabbage, potatoes, and root crops that can be kept for winter without canning. - U. S. Department of Agriculture.

SOME DRAFT SNAGS.
War Developing Curious Problems in West and South.

(New York Commercial.)
Padding the census has been a favorite sport west of the Mississippi River, which has often had unpleasant consequences, but never more so than now. The new army bill provides that the quota of men to be drawn from a state for the United States army must be based on the population as shown in the last Federal census and not upon the registration. In the state of Washington, for example, the census figures are about half the estimated number of men between 21 and 31 years of age registered on June 5. The Justice Department has ruled that the census figures, and not the registration returns, must form the basis for the draft. Years ago, Omaha, Minneapolis and St. Paul padded the census in efforts to create real estate booms. Rival cities in Washington and other Pacific Coast States indulged in the practice when the census was taken and Washington will have a hard time when the draft is enforced. If the census was not padded the state must be full of slackers.

In some Southern states a strong prejudice against negro soldiers exists. When these states come to supply their quota of men for the army a large number of negroes will be drafted, if the local authorities do not find a way to keep them at home. If this is done the draft on the white population will be very heavy because each state must furnish its quota according to the total population. The war is developing some curious domestic problems in the West and South.

Hunting for Beach Hargis.

Frankfort, Ky., June 26.—Members of the State Prison Board expressed the fear today that the letter of former Chairman Daniel E. O'Sullivan, charging Beach Hargis with violating his parole, will "flush the game" again. Chairman Hines said a warrant was issued March 19 for Hargis, after an investigation, accusing him of drawing a gun in a saloon at Lexington and making members of the party crawl around on the floor and perform various diverting antics. The parole agent went to Breathitt county agent Beach, but the latter eluded him. "He was reported," Frankfort, but got out of the city before the police could be notified. He then was located in Middletown, Ohio, whence the board received complaints of his conduct. He left Middletown just ahead of the agent who is on his trail now.

Hon. A. B. Rouse Honored.

Washington, June 15.—A distinctive honor was paid Representative A. B. Rouse today when he agreed to accept the appointment as first assistant Democratic whip of the House of Representatives. The appointment was proffered him by Speaker Clark, who prevailed on the Sixth District Congressman to serve as the "right-hand man" of Representative Tom Bell of Georgia, the Democratic whip. In a letter to Mr. Rouse, Speaker Clark said:

"June 15, Hon. A. B. Rouse, House of Representatives, Washington—My Dear Arthur: Representing full confidence in your capacity and knowing your activities in the House, I hereby appoint you one of the assistant whips. There is a good deal of hard work attached to the place, but I hope you will accept the place and do the work. Your friend, CHAMP CLARK."

The second assistant whip chosen was Representative Geo. White of Ohio. It was explained by Speaker Clark and the House floor leaders today that Mr. Rouse was selected as first assistant whip "because of his popularity with members of the House; because he is always in the job on Capitol Hill in Washington; because he is an all-around live-wire."

The day of the Democratic whip and his assistants is to make sure that every member of the majority is in his seat and prepared to vote on the important legislative matters of importance. As the Democratic majority in the House is exceedingly small in this Congress, the importance of Mr. Rouse's position is great. - Courier Journal.

ERNEST L. GRANT DEAD.
One of the County's Prominent Citizens and Farmers Gone To His Reward.

Ernest Longmore Grant died June 21st, 1917. He was born on his farm, where he lived all his life, the 3rd of July, 1838.

He died suddenly of heart disease which had impaired his health for the past twenty-five years.

He was one of the most influential men in Boone county, of very charitable impulses and was highly esteemed by all his neighbors and friends. He was a leader in every enterprise to improve the roads of the county, and always gave generously of his means and time in building bridges and turnpikes in his neighborhood. He was one of the most successful farmers in the county and carried on farming on an extensive scale, raising all kinds of crops and livestock, and was a citizen we could ill afford to spare.

Ernest L. Grant was the son of Dr. L. Grant and Rebecca Jane Grant, old citizens of Boone county. He married Miss Lillian A. Child of this county, who, with Rev. Edgar Riley at the residence, and two brothers, W. Ed and H. Horace Grant, of Louisville, Ky., survive him.

His last place at Petersburg cemetery, June 23d, 1917.

Although it was known by his friends that he was in a critical condition, the announcement of the death of Ernest L. Grant at his home in Bellevue precinct, Thursday morning of last week, was a shock to them. Mr. Grant was assisting to make some adjustment of a mowing machine when the summer came and he expired immediately after falling forward and saying "boys I am gone." No one knew Mr. Grant but to admire him, and the very large number of those who assembled at the home last Saturday afternoon to pay their last tribute of respect to the deceased, was a strong testimonial of the esteem in which he was held by those who had known and been associated with him all his life. A short service was conducted by Rev. Edgar Riley at the residence, following which the remains of one loved by all in life and in death, were conveyed to the Petersburg and laid to rest. The bereaved wife and daughter have the sympathy of all in their sad bereavement.

Many Strange Meats.

Jackass, mule, donkey, burro and horse meat may now be sold in Portland and most markets. The City Council has adopted an ordinance providing for the regulation of their sale.

The meat must be plainly labeled with letters at least one inch high and must be inspected by the regular Meat Inspector.

As added, the ordinance says: "Dobbin and Billy, mule and horse, being sold to the housewife, must undergo thorough inspection and must be labeled, 'horse,' 'mule' or 'jackass' as the case may be."

The first horse meat market has been opened the first shipment of wild range mustangs, rounded up by Indiana and Oregon, has been received, with more to follow if the demand is sufficient. The butcher says he is able to cut steaks in two and his quotations for horse flesh range from four cents a pound for soup cuts to 12 1/2 cents for T-bone steaks.

Portland, Ore., from New York World.

A very large crowd, many from a distance, attended the big baseball meeting at Sand Run last Sunday. One of these excellent dinners for which the good cooks in that part of the county cannot be too much praised, was served at the noon hour. The occasion was one both spiritual and physical feasting, and marks another great day in the history of the Sand Run church, which is regarded as the author of churches in this county.

J. M. Thompson, Petersburg's host, had an early Monday morning visitor at Burlington.

BE ECONOMICAL.
Save by Canning the Extra Supply of the Garden and Orchard.

Never has it been so important for all food materials to be utilized. One of the most effective ways of doing this is by canning the extra supply in the garden and orchard which is so often wasted. We can food in summer because in winter the body needs iron and other substances found in fruits and vegetables, because it contains cellulose and it is economical.

The purpose of all canning is to destroy microorganisms, as yeasts, molds and bacteria, and to prevent others from entering. Heat will kill all these if applied long enough, while some types are more easily killed than others. The reason that canned food spoils is because all the living organisms have not been killed. There are two kinds of bacteria, aerobic which requires oxygen, being easily killed and anaerobic which does not require oxygen, being found on thick vegetables as beans and corn and is hard to destroy.

In all canning complete sterilization is necessary. The best way to insure this by the Cold Pack Method. Pack the uncooked or slightly cooked food in sterilized jars and pour over it a liquid, hot on rubber and top jars in a receptacle where the food can be covered by means of boiling water or steam. The simplest canner for home use is a covered wash boiler. A false bottom is used to keep the glass jars from touching the metal. A wooden rack to fit the interior of the boiler can be made at home from narrow strips of wood or a wire bottom can be obtained at any hardware store.

Have a covered boiler in the same temperature as the jars. The water in the canner should be 3 or 4 inches deep over the top (good) or one inch over the top (best). Place partially sealed jars in boiler and boil for a definite number of minutes. Remove jars, tighten top and invert to cool in a place where there is no draft. If a leak occurs place a top on jar and sterilize again for a few minutes.

Advantages of the Cold Pack method are that the food and jars are both sterilized, natural flavor is preserved and color and shape are retained.

In preparing fruits and vegetables for canning—scalding—dipping in boiling water for a definite number of minutes. It is really a quick cooking and loosens the skin.

Blanching, means in this case to set the color. It is partly cooking, removes the bitter, sour taste and helps to keep the natural asparagus, etc. It is used in the case of beans, peas, corn, etc. It is usually required on quick vegetables and fruits. Place product in a square of cheese cloth or wire basket, dip in boiling water and keep boiling for a certain number of minutes.

Dipping is placing of scalded or blanched product in cold water and always follows scalding and blanching. It shrinks food, loosens the skin, making it separate from pulp, sets color and makes pulp firmer.

COLD WATER METHOD—Fruits which contain a large amount of acid, preventing the growth of yeasts and molds, may be canned without cooking. Gooseberries, rhubarb, sour plums.

Wash fruit, pack in sterile jars, cover with cold water and let stand for five minutes, drain, cover with fresh cold water and seal.

MAUD N. ASBURY.

Plant Pumpkins in Corn.

Pumpkins planted in corn furnish a cheap appetizing stock feed. They should be planted by the latter part of June, putting a pumpkin seed in every sixth hill, and in every missing corn hill. The pumpkins will affect, but slightly the stand of corn and a large amount of fine stock feed can be raised.

The pumpkins are relished by cattle and hogs. Fed, uncooked and with the seeds, they act as an appetizer and corrective of digestive organs. Two and one-half tons of uncooked pumpkins are equivalent to a ton of corn silage to cattle. It has been found that 273 pounds of grain and 376 pounds of pumpkins produced 100 pounds of pork, the pumpkins saving 100 to 150 pounds of grain. The low cost of growing, ease of keeping, large yields, and the tonic qualities of a succulent hog feed are scarce make pumpkins well worth while.

He Accepts.

Mr. R. O. Hughes and Others. Gentlemen:

In reply to your call through the Recorder to me to become a candidate for Judge of the Boone County Court, I will say that I highly appreciate and feel most gratefully for the honor you have thus conferred upon me. I hereby accept, and shall endeavor to discharge the duties of the office in such a way that you may never have cause to regret the step that you have taken.

I am your humble servant,
R. O. HUGHES.

Will Soon Have Light.

HEAVY LOSSES BY U-BOATS
Twenty-seven British Vessels of Over 1,600 Tons Sent to The Bottom.

London, June 21.—Twenty-seven British ships of more than 1,600 tons have been sunk, according to the weekly British summary given out today. Five British vessels under 1,600 tons also were sent to the bottom. No fishing vessels were destroyed.

Last week's report showed 22 vessels of over 1,600 tons, and 19 of under 1,600 tons and six fishing vessels sunk.

Returns week by week for last three months show that the U-boat activities run in waves. It is assumed that this week is the crest of a period of super-activity noticed the previous week.

The Consumer's Hide and Tallow

While the report speculators are employing of heavy crops in various parts of the world, the American crop may be bought, from the farmer as usual, at reasonable prices. Herbert C. Hoover makes the declaration that if millers and dealers had been content to make reasonable profits, the price of flour need not have passed \$9 this year.

The statement is credible. The millers and dealers, like the coal miners and dealers, can make an alibi, of course. Nevertheless, it is not believed that excess profits have been extorted from consumers. The government is distributing claims that have been made the occasion of get-rich-quick schemes cloaked behind a "need" for necessity for price-raising nobody doubts.

A war tax on excess profits, if every dollar of profits beyond a reasonable return capital and toil could be retained, would yield a revenue for the Government that would be staggering to the reader of the totals.

The wheat market, manipulated down at harvest time, and manipulated upward after the grain has left the farm and gone into the granaries of mills, into the strong hands of capital, has been a spectacle illustrative of a wide spread skimming of the consumer for his hide and tallow.

"You do not intend to take grain from the farmer's bin?" asked Senator Hoover during the course of Mr. Hoover's statement for the information of the Senate.

The farmer's bin is figurative. Speaking generally he has no bins. In his uses in ten acres of store wheat. He threshes it under a threatening sky and hauls it to the shelter of the nearest freight car and sells it at the market offers, less the sum which he is mercilessly "hooked" by the buyer.

And flour made from wheat sold at an average of \$1, all grades considered, reaches \$14.

As the 1917 harvest approaches wheat reaches toward a normal level. It may be selling \$1.50 in July. Flour may reach \$20 by April, 1918, unless a means to prohibit excessive profits is found and employed.

Wheat is only one of many necessities. Extortionate price-fixing means no means confined to food. - C. J.

Plant Pumpkins in Corn.

Pumpkins planted in corn furnish a cheap appetizing stock feed. They should be planted by the latter part of June, putting a pumpkin seed in every sixth hill, and in every missing corn hill. The pumpkins will affect, but slightly the stand of corn and a large amount of fine stock feed can be raised.

The pumpkins are relished by cattle and hogs. Fed, uncooked and with the seeds, they act as an appetizer and corrective of digestive organs. Two and one-half tons of uncooked pumpkins are equivalent to a ton of corn silage to cattle. It has been found that 273 pounds of grain and 376 pounds of pumpkins produced 100 pounds of pork, the pumpkins saving 100 to 150 pounds of grain. The low cost of growing, ease of keeping, large yields, and the tonic qualities of a succulent hog feed are scarce make pumpkins well worth while.

QUALITY GOODS
Erlanger, Ky.

Local Happenings.

Rising Sun has a traffic policeman.

W. W. Mills, of Covington, attended fiscal court, Tuesday.

Several Erlanger people visited the fishing camp on Gunpowder creek last Sunday.

The Justices of the Peace of the county called on the Recorder in a body, Tuesday.

A nice yearling heifer belonging to John Clout, died of white clover blight one day last week.

Gunpowder ball team defeated the Limburg team 8 to 5 last Saturday afternoon in an exciting contest.

Hon. W. J. Bryan is making a speaking tour in Covington, Williamstown is one of the points he will touch.

Florence gave its main street a generous coat of oil one day last week. The volume of dust stirred up by passing machines had become unbearable.

Wallace Strader, colored, was the only colored applicant for a teacher's certificate at last Friday and Saturday's examination. He secured a second class certificate.

John M. Finch, of Erlanger, spent part of last Thursday in Burlington. It is a pleasure to say that his health is improved considerably over what it has been for a month or so.

If the weather clerk wants to do the proper thing by the farmers he will provide a shower at once that will make the potato crop, and boom other crops rapidly, they now being cleaned of weeds and ready for a good bath.

Boone county is getting pretty well organized as to Red Cross auxiliaries, the membership now approximating five hundred. Auxiliaries were organized last week at Richmond with 47 members, and at Ft. Pleasant with 28 members. Auxiliaries will be organized at other points in the county.

Colored people from everywhere assembled in Florence, last Sunday, to attend the annual bazaar meeting held with their church at that place. They were there in all kind of conveyances except flying machines, and the dinner served was all that the occasion required. The crowd was estimated at 500.

Persons passing the country home of Cincinnati's postmaster out on the Bullittsville and Dry creek turnpikes at the proper time last Sunday morning, saw Mr. Clore enjoying the fragrance emitted by a very promising truck patch. He was minus coat and hat—his feet were concealed by the luxuriant growth of vegetation. He was evidently greatly pleased with his garden prospects.

Sheriff Cropper was one of the very large congregation at Sand Run, last Sunday, and after he returned home that afternoon—he was expatiating on the excellency of the big dinner, and an inquisitive bystander asked him about the sermon, when he answered, "If they were as good as the dinner they were certainly very fine, and I reckon they were."

John Binder, of Big Bone, was in Burlington one day last week, and showed the Recorder a bill of sale for 89 hogs he sold a day or two before, they bringing from twelve dollars and fifty cents to \$15.00 per 100 pounds. The gross amount of the sale being \$2,021.27. Mr. Binder expended \$174 for food for these hogs, all the other food they consumed having been produced by him, and they netted him \$1,779.86.

1917 CHAUTAUQUA

Committees Named and Everything Shaping Up For Three Big Days at Burlington, July 16-17-18.

A very enthusiastic meeting of the local Chautauqua Boosters was held at the court house last Friday night to arrange for the coming Chautauqua July 16, 17, 18, and the following committees appointed:

Committee on Seats—C. W. Goodridge and M. I. Baker to get material on the ground and Prof. J. H. Muntz to have seats erected.

Committee on Light—N. E. Riddell and R. H. Carter.

Gate Keeper and General Manager—J. A. Caywood.

Treasurer and Manager of Season Tickets—Wallace Rice.

Advertising Manager—A. B. Renaker.

Newton Sullivan Jr., and Walton Dempsey very kindly submitted a proposition to take charge of the refreshment privileges on the ground and donate one half the profit derived from same.

The Red Cross, which proposition was readily accepted. The season tickets are now in the hands of Wallace Rice who will be glad to take your order. If not convenient to see Mr. Rice any one of the boosters will be glad to supply you with tickets as every booster is requested to assist in the selling of the season tickets. Remember if you attend all the numbers it will cost you \$1.95 whereas as a season ticket for \$1.25 entitles you to all the numbers.

If you only attend the three nights and no afternoon at all it will cost you \$1.30. Season tickets are transferable.

Children's season tickets are 75 cents.

The program is better than last year and three big days are in store for the people of this county.

The afternoon performance begins at 2:30 p. m. and the evening performance at 7:30 p. m.

Programs and other advertising matter is now in the hands of A. B. Renaker who will be glad to supply you with same.

Shoots Victim and Flees.

Central City, June 23.—Marvin Murphy, 35 years of age, lying at the point of death as the result of a bullet wound in the abdomen inflicted by a highwayman who became enraged over the small amount of money Murphy had on his person when ordered to stand and deliver. The bullet passed through Murphy's abdomen and wounded his companion, Jesse Wilkins, in the hand.

Murphy and Wilkins were on their way home from work at the Dove mine, three miles from here, when the highwayman emerged from a wood, and ordered the two to deposit their money in their hats. Murphy had been working only a short time, and consequently was able to produce only a small sum of money.

They had not enough money, so Mr. Murphy took out a revolver, and said, "I'll just shoot you," the highwayman declared, leveling a revolver at Murphy and pulling the trigger.

Following the shooting the highwayman made his escape.

Crops Flourishing.

Columbia—Crops are flourishing in this section of the country now, these good rains in the last three days have put things on the boom. Corn is growing by leaps and bounds it seems and a good tobacco setting season has caused considerably more than an average acreage to be transplanted. Meadows are looking better at this time than at any previous period this season and gardens are thriving wonderfully, home grown vegetables are being put on the market daily. Potatoes are said to be fine, and a bountiful yield is almost assured. It is said that there are more young chickens in the country than ever known before, from 10 to 15 is a small number for every back-yard flock in town.

Personal Mention

Kirk Clore and wife, of Bellevue, were Sunday guests at Edward Rice's.

Mr. and Mrs. James E. Smith and son, Earl, were shopping in the city last Friday.

Judge Gaines began the June term of the Owen county circuit court, last Monday.

Miss Mary A. Thompson is visiting friends in Idlewood and Petersburg neighborhoods.

Warren Lassing and wife, of Richmond, spent last Friday afternoon in Burlington.

Miss Louise Walton, of Home City, is the guest of her grandmother, Mrs. Fannie Cropper.

Miss Louise Walton, of Home City, is the guest of her grandmother, Mrs. Fannie Cropper.

Julius Utzinger, of the north end of the county, was a business caller at this office, Monday.

Eugene Long and wife, of McVine, were guests of her parents, Mr. and Mrs. R. S. Crisler, Sunday.

Dr. L. H. Crisler and wife, of Covington, were Sunday guests of his sister, Mrs. Fannie Rice near town.

W. T. Riddell and wife, of Dayton, Ohio, were guests of his brother, Mr. L. Riddell and wife a few days the past week.

Mrs. C. H. Bridgewater and two interesting little children, of Akron, Ohio, are guests of her parents, Mr. and Mrs. Chas. A. Fowler.

Joseph Walton and wife and Ott Scott and wife passed thru Burlington, Friday morning, enroute to the city in Mr. Walton's machine.

Mr. and Mrs. G. L. Smith, of Hathaway neighborhood, are the guests of their daughter, Mrs. John C. White, the first of this week.

Miss Besse Hall, of Newport, was the guest of her parents, Mr. and Mrs. F. A. Hall from last Saturday evening until Monday morning.

Captain Fenton, of Ft. Thomas, has been the guest of his daughter, Mrs. Edgar Berkshire, several days. The Captain came out to assist Mr. and Mrs. Berkshire save their crop of strawberries and Al-der cream. He tells, in a most interesting manner of his sojourn in the land of Flowers last winter mingling with the millionaire heiresses.

F. A. Averbek, of Covington, was a caller at this office last Monday. Mr. Averbek is selling the Delco electric lighting system for residences, and has sold Jerome Respass and Miss Emma V. Rouse, of Florence, and Joel C. Clore, for his country home near Hebron, and in each instance the purchaser is highly pleased. Indications are Mr. Averbek will install quite a number of these plants in this county, and, by the way he will furnish electric lights for the Chautauqua grounds in Burlington July 16, 17 and 18th. Persons desiring a Delco light plant should purchase before July 1st, at which date the price will be advanced. A communication addressed to F. A. Averbek, Covington, Ky., will reach him. You will find the Delco light exactly what Mr. Averbek represents it.

Verona Road Meeting

The citizens of the Verona precinct are hereby notified to meet in Verona, Saturday, June 30th, at 2 p. m., to designate how and where they want their bond issue money spent. Everybody interested in Verona roads please be present.

J. C. BEDINGER, Magistrate.

Next Wednesday is the 4th of July and the RECORDER will be printed on Tuesday next week. Get your contributions in early.

"The Five Tires"

Lower Tire Cost Than Ever—NOW

For, in the old days, tires not only cost motorists more per tire, but were also so far inferior to the present product, that the final cost—the cost per mile—was from 50 to 100 or more per cent. higher than you pay now.

United States Tires—the 'Royal Cord', the 'Nobby', the 'Chain', the 'Usco' and the 'Plain'—

- one for every need of price and use,
- produced by the largest rubber manufacturer in the world,
- produced by the most experienced tire manufacturer in the world,
- produced by a time-tried, exclusive, patented, vulcanizing process,
- produced of only the most carefully selected materials,
- have so far eclipsed every other make of tire that

United States Tires are famous for their mileage-giving qualities—their low cost per mile.

The proof?—the consistent and persistent tremendous sales increases of United States Tires.

United States Tires Are Good Tires

A Tire for Every Need of Price and Use

L. RIDDELL, Publisher.

FORTY YEARS AGO TODAY

Items Taken From the Issue of
The Recorder of June
28th, 1877

A train ran from Louisville to Cincinnati on the Short Line Railroad, a distance of 109 miles in three hours, and made six stops.

Indians are having a hostile attitude and 1,000 stands of arms have been ordered to Oregon, five hundred to Idaho and five hundred to Washington territories.

Local Universalist church is organizing a library.

Wheat crop injured by rain and wind. Some complaint of meagre in their wheat.

Last Thursday lightning struck a beech tree near the residence of Wesley Unlerhill.

Wm. Rouse's dog showed symptoms of hydrophobia and was killed, Monday.

Prof. Stephens' school closed Tuesday. Pupils acquitted themselves in a manner very satisfactory to their parents.

The old earling machine is being torn down and converted into a barn.

Richard Utz has a colony of bees that filled their hive with honey in 12 days. P. Ridell has three colonies that have turned out over swarms this season.

Two thousand people attended St. John's day celebration in Burlington on the 23d. A procession of Masons formed at the court house and headed by the Covington cornet band, marched to W. T. Smith's woods. Shortly after 11 o'clock the exercises were opened by prayer by Rev. L. Johnson, of Walton, after which George G. Hughes introduced Grand Master, Charles Ezington, of Covington, who entertained the crowd somewhat over an hour with an eloquent address. Immediately after dinner Rev. Johnson delighted the crowd with one of his characteristic and humorous addresses. Everybody was given a good dinner.

ITALIANS ARE HUMAN FLEET.

Cliffs, Craig, and Peaks are Scaled in the Alpine Offensive.

If the Austrians should check the Italian advance today, it would still remain the most remarkable feat of arms in modern history. It is the first of sixteen days with all its original fury. The French and British have been fighting for it the higgs, for raising the Alps. The Italians have been scaling mountains. The French and British have been going forward, but the Italians have been going upward. The French and British fighting horizontally, the Italians perpendicularly.

Now they are on a plateau and can go forward but not up. It is of volcanic creation, and it consists of craters, rocks and caves; it is like the pictures of the dead moon. It is bare and blasted and waterless; never was a battlefield in such a spasm of nature. Because there is no water the Italian build an aqueduct, but by and by they go sailing. This land of caves and hiding places and desolate rocks has been fortified by the Austrians and complicated with barbed wire. The chevaux de frise until nature and art have made it seemingly impassable by man.

But to the Italians these incredible obstacles come as a relief, a modification of their task to the comparatively easy. For two years they have had to fight their way up into the air. They have had to ascend the steep faces of high mountains which ordinary men do not ascend in time of peace and these mountains have been infinitely fortified and garrisoned by a powerful enemy.

The other armies opposed to Germany have had to attack the frontiers. The Italians have had to attack peaks. Peak by peak they took them. They have taken heavy guns and supply trains up mountains which no other army could reach. Alpine climbers who roped themselves together. They have swung bridges, from one mountain peak to another. They have built trenches, fortifications, roads, tunnels retaining walls, ten thousand feet above the sea level; all this in the face of an enemy fighting desperately on the defensive.

First they had to seal up the passes in the Dolomite Alps, so that Austria could not pour armies thru there upon them. Austria interrupted them by pouring armies through; the Italians counter-attacked with such lightning rapidity that the Austrians were hurled back, and the Italians went on with their work and sealed the passes. That is all this mountain climbing. This making men do the work ascending work of flies, and doing it in the face of fire, was, for Italy, a feat of the first order. Further in that direction, was the northern direction; at least Gen. Cadorna did not waste his time considering it, and having made the north safe from attack he turned to the east. There again he climbed mountains, swung bridges across them, furnished the north with a line of an impregnable mountain he blew the top of it off. Yes, that is the way the Italians have advanced—by blowing up the Alps. Before such superhuman resources they found themselves on the Carso Plateau.

CHARACTERISTICS OF WYANDOTTE BREED

(Prepared by the United States Department of Agriculture.)

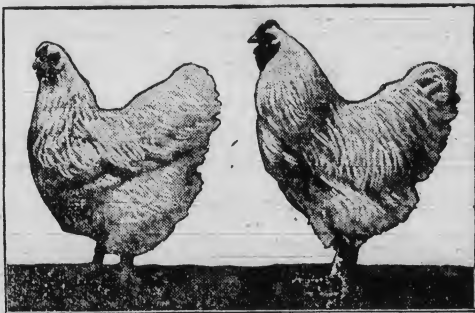

The Wyandotte chicken is a rose-comb breed and is characterized as a breed of curves. The body is comparatively round and set somewhat lower on the legs than the Plymouth Rock. It is inclined to be a looser feathered breed, and its general shape and character of feathering gives it an appearance of being somewhat short backed and short bodied. The Wyandotte is a breed which also was developed in the United States, and has become very popular. The Silver Wyandotte was the original variety, and it is generally believed that the Dark Brahma, the Silver-Spangled Hamburg, and the Buff Cochins played a part in its origin. It is somewhat smaller than the Plymouth Rock, the standard weight being, for the cock, 8½ pounds; for the hen, 6½ pounds; for the pullet, 5½ pounds. The hens are fairly prolific layers of brown eggs, and are reputed to be good winter layers, and

laced with a black edge. The main tail feathers are black. The feet are slate color with some gray mixture. The color of the female shows white feathers laced with black over the entire body except the hackle, which is black laced with white, and the main tail feathers, which are black, and some black in the wings while the feet are slate mixed with gray. The color combination and the character of markings of the Silver Wyandotte make this a very attractive variety.

In the Golden Wyandotte the general color scheme is the same as in the Silver Wyandotte, except that the white of the Silver variety is replaced with red and reddish brown. Like the Silver Wyandotte, the color and markings of the Golden are very attractive.

Most Popular Variety.

The White Wyandotte is undoubtedly the most popular variety of this breed. The color is white throughout,

WHITE WYANDOTTE COCKEREL AND PULLET.

the breed as a whole makes a fine table fowl. The young chickens do not tend to have the same leggy stage which is characteristic of the Rocks and most of the other general-purpose breeds, and the breed is therefore well suited for the production of broilers. Like the Plymouth Rock, all the varieties of this breed are yellow legged and yellow skinned, which adds to their market popularity.

In the Silver Wyandotte the male has a silver-white back and saddle, the hackle and saddle feathers being striped with black. The feathers of the body and breast are white, each

and should be free from any brassiness or creaminess or black ticking. In the Buff Wyandotte the color should be an even shade of buff throughout, being identical with that of the Buff Plymouth Rock.

In the Black Wyandotte the color is black in all sections, showing a greenish sheen, free from purple barring. The undercolor is lighter, somewhat on the slate order.

In the Partridge Wyandotte the color is the same as in the Partridge Plymouth Rock. In the Silver-Penciled and Columbian Wyandottes the color is the same as in the corresponding varieties of the Plymouth Rocks.

GREEN FEED FOR HENS

Sudan Grass Found to Be Satisfactory for Poultry.

No Other Summer Crop Can Take Its Place in Poultry Yard—Young Shoots are Tender and Easily Broken—Grows Rapidly.

(By R. N. HARVEY, Texas Agricultural College.)

Sudan grass, although a new crop is given a high place in the list of green crops suitable for poultry. It was planted primarily as a pasture crop, but rapidly assumed other uses, equal in importance to the first one. Now, no other summer crop can take its place in the poultry yards. It would, in fact, require a combination of several crops to give the satisfaction obtained from a crop of Sudan grass. As a forage crop it is excellent. The young shoots are very tender and easily broken. As in the case of other grains, the new shoots are preferred to the larger leaves. Yet the low fiber content renders the larger leaves brittle and much more available than the leaves of most other forage crops of the same age.

The rapidity with which the grass grows is surprising. Few crops are able to keep pace with it. It is almost impossible for the fowls to keep the grass short, and two or three cuttings can be made during the season. The hay makes a good litter for the laying house.

The rapid growth has another decided and quite important advantage. In keeping the fields free from weeds. After the first cultivation, there should be but few weeds found in the field. The crop grows more rapidly than most weeds, and the tops soon meet above the rows, shutting out most of the direct rays of the sun. Thus the weeds are checked, and it is not so difficult to keep them cut away. A point not to be overlooked is the shade furnished by the grass. It is not uncommon to find a whole flock in the shelter of the Sudan grass, while none can be found under the trees. A small stand left uncultivated will furnish enough shelter for the ordinary sized flock of white fowls. A foot of the grass short and the standing crop can scarcely be seen by a person 10 feet away. Few if any plants are superior to Sudan grass as shade producers.

The relative feeding value of Sudan grass for poultry has not been determined, but all indications tend to show that it is a welcome addition to the pasture crops for poultry.

Poultry for Family Use.

Do not forget the satisfaction of having eggs, fryers and roasters for the family table. Poultry raising is a very important feature of animal husbandry. The food supply will not be economical without poultry.

RAISE TURKEYS FOR PROFIT

Ranching is New Industry Born of Decreasing Number of Fowls on Farms in United States.

Turkey ranching is a new industry born of the decreasing production of turkeys on farms, according to an article in the recently published 1904 Yearbook of the United States department of agriculture.

Exclusive turkey ranching is now found practically only in the unsettled foothill regions of California and in certain sections of Arizona and other Western states. In these regions a few persons are engaged in raising a thousand or more turkeys a season. The establishments are located where the range is unlimited and the natural food of the turkey, such as grasshoppers and other insects, green vegetation, and the seeds of various weeds and grasses, is abundant. Advantage also is taken on these ranches of the turkey's roiling feathers, which are used for making hats. The turkeys are plentiful but little grain need be used for fattening in the fall.

The large flocks of turkeys are managed much like herds of sheep, being taken out to the range early in the morning and brought home to roost at night. They are herded during the day by men either on foot or on horseback, and by dogs especially trained for the work.

CAPONS ARE EASILY RAISED

Good, Roomy Yard is All That is Necessary in Way of Range—Keep Quarters Clean.

Because of their quiet dispositions, capons are easily raised under intensive conditions. A good, roomy yard is all that is necessary in the way of range. Cracked corn and beef scraps should be provided in hoppers to which the birds have free access. These hoppers should be kept full at all times, and, with the exception of a daily feed of steamed clover or alfalfa, this constitutes the extent of the feeding operation. If the quarters are kept clean the birds will thrive and make splendid gains.

CULL SCRUBS OUT OF FLOCK

Do Not Keep Unprofitable Fowls—Breed Up Continually—Feed Well and in Variety.

Cull out the scrubs and unprofitable members of the flock. Breed up continually. Feed well and in variety. Supply grain and oyster shell and remember that clean water is a necessity.

Keep the fowls comfortable and free from vermin. And then if they are not profitable, do not rest satisfied until you have hunted out the reason—for there surely is one.

DRAFTING

Will Probably Be Done in Washington—Drawing Will Be Entirely by Number

Washington, June 23. — Regulations for drafting the new national army, now awaiting President Wilson's approval, contain provision for every step in the great undertaking except the actual method of the draft itself.

No official announcement has been made and official confirmation is being withheld, but it has been stated, and generally is accepted here as true, that the Federal Government itself will do the drafting, so there will be no opportunity for local favorites, political or otherwise.

As the regulations stand now every registered man bears a number. The numbers will be forwarded to Washington and the drawing will be entirely by number.

The identity of the numbered men will be unknown to those in charge of the draft machinery, and can be established only by comparing a number with a printed list of the man's home district.

As the numbers are drawn they will be telegraphed to the home districts, where the registered men learn if they have been drafted.

Then the question of examination will come up, and this will go before the local boards. If a man is exempted the man bearing the number which was drawn next in order will take his place, and so on.

In this way all those available for service out of the 10,000,000 who registered will be made ready for the country's call, and when the first increment of 625,000 will be assembled. The others will be called as the need develops as the war goes on.

Plenty of time will be given for drafted men to arrange their personal affairs and report to the cantonments. It is hoped to have them all in training by September 1, or very soon thereafter.

DRIVE BY THE ALLIED FLEETS

Is Urged in Article Written by Winston Spencer Churchill.

London, June 24.—Winston Spencer Churchill, in an article in the Sunday Pictorial, demands an aggressive policy for the vast surplus fleets under the Entente Allies' command, especially since America's entrance into the war. "The allied navies," he declared, "have today at least two dreadnoughts for every one at disposal Germany and Austria. In addition more than four old battle ships to one for the enemy. But the superiority in weight of metal, modernity and speed is far greater even than these immense figures imply.

"Are we really to be content to see this vast mass of about 200 battle ships wait idle on the off chance of the German fleet emerging to fight into battle—perhaps an unsatisfactory peace—is declared."

"When three old battle ships were sunk in the Dardanelles it was represented as a great naval disaster, but what kind of a disaster would it be when, on the day peace is signed, hundreds of battle ships are found to have been virtually unused and pass into obsolescence to be supplanted in future wars by airplanes and submarines?"

"We must have a vast blue water fleet capable of engaging the full strength of the enemy with good prospects of success, but after that has been provided for, an immense surplus of old, but valuable, vessels remains, and it is in their adaptation for and employment in aggressive action that escapes from the present deadlock can still be found.

"It is only when we are able to devise and execute some method of aggressive naval warfare against the German that we shall find his weakness and our strength; that we shall liberate our splendid navy from the enchanted circle the submarine has drawn about it, and compel our enemies to absorb themselves so much in the process of their own defense as to leave them to leisure to encompass our ruin."

Must File Petition.
Candidates for county and district offices must bear in mind that, to get their names on the primary election ballots, it is necessary for them to file with the county clerk not later than July 1st their petition as required by law, and further that they must meet at the county clerk's office at 2 o'clock p. m. standard time, July 10th, for the purpose of drawing for position on the ballot.

John Allison, of Kenton, Germany today has not spoken. Many men in proportion South. It probably still

A Week's News

Only two months until the North Kentucky Fair.

Dirt roads have been in excellent condition the past week.

Potato bugs are eating 47 to 50 cent a pound Parisgreen.

Now get your land ready to plant a large crop of late Irish potatoes.

Samples of nice potatoes have been taken from many of the local patches.

The south end croquet club holds sessions nightly on Dolph Seeb's lawn.

A sample of orchard grass that measured five feet was brought to this office one day the past week.

The farmers made a big killing of weeds last week, and the corn began to look like making a crop.

The sound of the napping hammer indicates the resumption of putting down concrete pavements in Burlington.

You can step up to the captain's desk now and pay your 1917 taxes if you wish to get the matter off of your mind.

Some of the meadows, which, a few weeks since appeared to be ruined by weeds, will yield a fairly good crop of grass.

Several of those who will be candidates at the primary election in August have filed their petitions with the county clerk.

Burlington fishermen had their usual luck last week, but they do not appear in the least discouraged, and will try again.

Kenton county commissioners have appointed a patrolman whose duty it is to break up wrecks along the Leitchfield road.

War registration returns, virtually completed show 9,649,348 men between the ages of 21 and 30 years, inclusive have been enrolled for the country's service.

One of the local trucks hauls buttermilk from a creamery near Cincinnati, it costing the purchaser here four cents a gallon. It is fed to hogs with a very satisfactory result.

John Walton, of the Commissary neighborhood, passed through town a few days ago in his automobile which was being trailed by a two-horse wheat drill attached to its rear.

J. M. Stephens, of Grange Hall neighborhood, called in to see the Recorder while in town last Friday. Mr. Stephens is one of the good, old time men of this county.

John Peall, an old Confederate soldier died last Friday morning at his home on Lick creek when the Rabbit Hash and Hathaway road crosses that creek. He had resided there for many years.

Dr. Cornelius H. Duval, of Warsaw, announced this week as a candidate for Representative in the Legislature for the Carroll-Gallatin legislative district, subject to the action of the Democratic party.

Walter Riddell is now located at Elmer fair grounds with a nice string of horses which he will have in first class condition when the fair season opens. His firm has made two or three sales of horses at fancy prices recently.

The dust in Burlington becomes blinding in a short time after a rain. One cause of the increase of this annoyance is the greater volume of travel to and thru the town since automobiles have become such a favorite conveyance.

Master John Birkle set a bunch of steel traps one night last week to capture the destroyers of his father's truck patch and the next morning he had in captivity two ground hogs and an opossum, which he proceeded to execute a la Kaiser.

A large flag was received last Saturday by County Attorney N. E. Riddell, the same having been purchased in accordance with the recommendation of the last grand jury and an order of the Fiscal Court, to be floated from the court house cupola.

The RECORDER will be printed on Tuesday next week, and all communications intended for publication next week must reach this office not later than the 23rd inst., mail on Monday. Advertisers should get their copy in on Saturday to insure insertion.

W. B. Ambrose and family of Ryle were motoring down to Warsaw to attend the chautauqua last Sunday afternoon when their machine skidded and went over the bank alongside the road. The top of the machine was badly smashed, but fortunately the occupants escaped injury.

Fred Morris, who makes a specialty of looking after race horses that need recuperating, was in Lexington, one day the past week where five drivers were given in his charge, not one of which was able to get all four feet to the ground. In a few months Mr. Morris will have these animals in race horse condition again. He is one of the best men in the country to handle race stock.

Why the Best Gift Parents Can Give Children is Sleep.

A grave folly, which often leads babies from sleep, it should be a felony to "show the baby off" to lift it from the crib or carriage to fondle it or show it to some friend, but it is a worse misdemeanor to keep infants awake, "because it is such a hot night."

Many of the ill-thrust upon children are usually traceable to the mothers and fathers who insist on "going somewhere" or visit out doors after dark because their rooms are hot. For an infant undressed and asleep under clean, cool linens, is far better off in a hot room than awake and active on some person's hotter arms, though it be outside in the open air.

A young baby should be asleep almost all the time, except when bathed, nursing or having its toilet. As baby grows older it may sleep a little less, but even the age of three months it should never lie awake much over an hour at a time.

Even when one year old an infant should have 15 to 18 hours sleep in the twenty-four, be the day ever so hot.

Three-year old children should sleep 13 hours, and a 4 year old should have no less than 11 hours sleep. This should be maintained until eleven years of age when 10 hours is the minimum.

While the position a healthy child assumes in sleep is not of the least consequence, after the fact is formed of lying on the back on the stomach or on the side, it may help to make it sleep to place it first in the accustomed posture.

A child with less sleep per day than the amounts given here will be less able to triumph over the worldly difficulties in adult life than the one who secures them.

Pew things are more certain to disturb a child's calmness, and amiable disposition than the failure of parents to make them go to bed regularly at an early hour without exception, no matter what the neighbors' children do—Dr. Leonard Keene Hirschberg.

Kentucky 125 Years Ago.

One hundred and twenty-five years ago, Friday, June 1, the State of Kentucky was admitted into the Union, making the 15th State. It was only through the delay of Virginia in recognizing the independence that the State failed to take her place along the side of the thirteen colonies.

During her existence as a State Kentucky has played an important part in the Nation's history, not only in peace but also in war. Even prior to the Civil War, it has been engaged Kentucky has borne her share of the burden.

In the war of 1812 it was largely through the ability of the Kentucky soldiers that the important Battle of New Orleans was won, which was virtually the only victory of the war. Kentucky also gave a good account of themselves in the war with Mexico. In the Civil War the State declared her neutrality, when she considered that Kentucky was at the head of each Government.

Although Kentucky took neither side in the Civil War, the sectional conflict, nevertheless furnished her quota of men, sending more soldiers to the Union army than the State of Vermont and more to the Southern side than Georgia. It was a Kentuckian who first scaled the dizzy heights of Mount Chimborazo and planted the U. S. flag on its top. It was a Kentuckian, Cassius M. Clay, who led the abolitionists in the South; it was a Kentuckian who postponed the Civil War ten years and when the struggle at last came it was a Kentuckian who preserved the Union. Can any State claim greater men?

Wilson's Message to Russia.

The cry of some of the Russians under the stimulus of German influence, of no annexation and no indemnities is met forcibly by the President. The U. S. is seeking no land or selfish advantage, but the case of other people who are under Powers they do not wish to be under and the question of the building of the canal has been done are other matters.—Pittsburg Post.

The purpose of the President is to make clear to Russian Democrats that continuing to fight is their best chance for permanent self-government.—Boston Globe.

President Wilson presents the situation here so that no one can misunderstand it. There is to be no adjustment which is to work for an extension of the great principles which secure to humanity life, liberty and the pursuit of happiness.—Baltimore Post.

It will be welcomed in Russia by the strong and clear-headed men are bending every energy to check the forces of anarchy and disorder to which German agents are now chance at increasing themselves.—Brooklyn Eagle.

President Wilson's message to the Russian people setting forth the war aims of the U. S. is a clean, candid and powerful presentation of the essential of the international situation as it now exists.—Charleston News and Courier.

Franklin—Wheat harvesting in this county began this week, and it is now estimated that 60 per cent of a normal crop will be produced. The heads are from 7 to 12 inches long. The indications also point to a good quality of grain. Up to date there has been threshed in the county 14,000 bushels of wheat and 1,000 bushels of corn. The yield this year being from one to sixteen bushels per acre.

Highway Improvement

PAYMENT FOR GOOD BRIDGES

Deputy Minister of Highways of Ontario Advises Taxpayers to Pay for Them by Bond Issue.

No matter how good the surface of a road may be, if the bridges are weak and the culverts poor, the highway is far from satisfactory. The annual record of bridge failures under threshing machines and other heavy loads makes a long list, and the cost of repairing the annual damage to poor culverts is a large sum. In progressive communities, therefore, strong steel and concrete bridges and well built cul-

Substantial Structure.

verts are being constructed before expensive road surfacing is done, says Indiana Farmer.

This work is often paid for out of the annual tax levy for road and bridge construction, and absorbs such a large part of the funds that too little money is left for grading the surfacing. Good bridges and culverts are permanent structures, and the deputy minister of highways of Ontario, Hon.

W. A. McLean, has advised taxpayers of that province to pay for them by a bond issue where the total expenditure for the purpose is large. In such a case he suggests compiling a complete list of the bridges and culverts needed, preparing plans and estimates for their construction, and then financing the work so that its cost will be equitably distributed over a period of years rather than be concentrated on the taxpayers of a few years. Where there are few of these structures and none is expensive, the cost of good roads may be met by the annual tax levy cannot be criticized, in his opinion, for it does not interfere appreciably with satisfactory progress in grading, drainage, surfacing and maintenance.

SAVE COST OF MAINTENANCE

Highways Which Cost Most at First Are Always Cheapest to Keep in Good Condition.

(By R. W. GAY, Mississippi Experiment Station.)

With the recently awakened interest in the cause of good roads the question of financing road building is of first importance. How road building can be paid for is not the only serious question, however, but which one of several possible methods of construction will best suit the needs of the community and give the people the best roads at the least cost as possible within the limit of the available funds.

The first cost may be only a small part of the total. Roads must be maintained in good condition, and the cheapest road is the one that costs least per year to build and keep in shape for travel. In New York State it was found cheaper to expend \$25,000 a mile in the construction of brick highways than to pay from \$7,500 to \$10,000 a mile for macadam because of the difference in cost of upkeep.

To save maintenance expense the idea of present economy must not be allowed to overshadow the importance of building permanent highways. As a rule the roads which cost the most at first will be the cheapest to maintain.

LONG ROADWAY OF CONCRETE

Remarkable Example of Uses of That Material in California—Cost Almost \$395,000.

Under supervision of the California state highway commission there has just been completed the longest concrete roadway in the world, a remarkable example of the uses of that material. It is a little more than three miles long, a trestle concrete of state highway almost 385,000. The trestle is 20 feet high and was built in units with a roadway 21 feet wide. It is supported on reinforced concrete piles, each weighing from three to five tons, and the floor is made of "pre-cast" slabs. All the parts were put together so accurately that the completed structure is practically a monolith.

Convicts Work Georgia Roads. Georgia employs virtually all her able-bodied male convicts in road building. In 1909 the state abandoned the old system of leasing prisoners to private contractors, and there that time an increasing number have been employed on the roads. The work has been considered very successful.

Top Dressing for Roads. A mixture of iron filings, sand and cement is being used experimentally in France as a top dressing for highways.

GOOD ROADS

CONCRETE PAVEMENT IS BEST

Affords as Good Foothold for Horses as Any Other Hard Surface and Wears Quick Well.

The concrete pavement in use on the main driveway at the Kansas State Agricultural college has proved that this type of pavement is successful, according to L. E. Conrad, professor of civil engineering. This pavement has been in use for more than three years and shows practically no wear. The traffic over this road is heavy. It consists of all the coal and machinery delivered to the college, a large part of the material that is used in the construction of new buildings on the campus, college mail and express, and the many pleasure vehicles that are continually using this road.

Two methods were used to surface the road. On the level portion of the roadway the finish was made comparatively smooth, while on the heavy grade brush was drawn over the green cement, leaving a rough surface. It is probable that after a few years of service the roadway which has the smooth surface will present a more uniform appearance but at present there is no appreciable difference. The trestles carrying coal to the college power plant were strongly of the opinion that the road would be slippery," remarked Mr. Conrad, "but they say, after using it for three years, that it affords as good a foothold for the horses as any hard surface."

"The expansion and contraction of the concrete taken up by steel-bound joints that are placed every 35 feet, these joints being surrounded by an elastic material. Outside of a few dollars for replacing some of this material, there has been no expense whatever for the repair or upkeep of the roadway."

SPRING WORK ON GOOD ROADS

One or Two Trips Up and Down With Drag Will Put Them in Fine Condition—Details of a Drag.

(By LEO MATTHEWS.)

In the spring of the year, when the roads begin to dry and the dirt is still somewhat moist, one or two trips up and down with the road drag will put them in excellent condition. If each farmer would care for the road which passes his place, dragging it every time it needed it, we would all have occasion to rejoice.

Personally, I don't believe there is a steel drag made that will beat the use of the old King drag. Another point in its favor is that it can be made at home and costs practically nothing.

Because of constant inquiry for plans of this drag and to encourage

Outline of King Drag.

its further use I give this detailed drawing and make the following suggestions:

Use light wood. The drag will do the most efficient work if it is light enough for one man to lift.

Don't use square timber, as it will not lie sharp on the edge like a round timber. A log from 10 to 12 inches in diameter is best.

A strip of iron three-eighths of an inch thick, three or four inches wide and thirty-six inches long bolted to the right-hand side of the front timber, is very effective in cutting down unusually rough spots.

TREES ALONG ALL HIGHWAYS

Plan for Annual Appropriation Commands Recognition—Investment Would Give Satisfaction.

The plan for an annual appropriation for the planting of shade trees and shrubs along the great extent of state highways commands recognition. It is a contribution to the decoration of regions in which from year to year there is a greater passage of our people for recreation and the enjoyment of the pleasures of nature. There is no investment from whose dividends greater satisfaction can be drawn.—Boston Post.

Results From Road Drag.

The systematic use of the road drag will give better results for the money spent than any other method of maintaining an earth road, and in Illinois, provided the road has been properly built.

\$1,750,000 for Concrete Roads. A bond issue for \$1,750,000 to be used for building approximately 425 miles of concrete highways in Sacramento county, Cal., passed a few days ago, the vote being four to one.

LIVE STOCK

EWES CARE AT LAMBING TIME

Most Common Complaint Is That Animals Walk With Unsteady Gait—Cause and Treatment.

A large number of inquiries concerning the care of ewes at lambing time have been received by the University of Missouri College of Agriculture. The most common complaint is that "the ewes heavy with lamb walk with a weak unsteady gait and later get down and seem to be paralyzed in their hind legs." In most cases where these symptoms have occurred the ewes have come into lambing season in a rundown condition.

In many cases too much corn, corn stover, corn silage, timothy hay, oat straw or similar feeds have been fed. Such feeds do not contain sufficient raw material for the mother to build up muscle, bone and blood. Alfalfa hay, linseed oil and bran must be fed. Breeding ewes that are in strong, thrifty condition in the fall can be carried up to lambing season on good alfalfa, cowpea or clover hay. However, about a month before lambing it is advisable to feed about one-half pound of grain per head per day. A grain ration of six parts corn, three

Sheep at Pasture.

parts bran and one part old cake by weight has proved successful. A double handful of this ration will average about one-half pound. After lambing it will be necessary to increase the feed to one pound of grain up to the time pasture is available.

Some native ewes are troubled with "mudder disease." This disease is due to smart worms lodging in the tissues of the intestines, and a small tumor-like mass is formed around them. So far as is known the trouble caused by this worm is due to the decreased area of digestion. The only known remedy is liberal feeding.

The Missouri College of Agriculture will be glad to answer any further inquiries.

SORE SHOULDERS OF HORSES

Animal Should Be Given Frequent Breathing Spells When First Started at Hard Work.

When the soft horse is started at heavy work, the shoulders should be given a good deal of care. The horse will need frequent breathing spells and at these times lift the collar so as to give the shoulder a chance to cool and to dry. When it becomes moist from sweat, it will become much quicker than if dry. The collar should be kept smooth. If any incrustations form on it, scrape them off. Care should be used in making sure that the horse has the collar that is fitted to its shoulders. A misfit collar is apt to lead to shoulder trouble.

When starting the horse at hard work, watch its shoulders and neck too, carefully.—Extension Department, North Dakota Agricultural College.

PIG FEEDS AFTER WEANING

Separate Dears and Sows and Aim for Growth, Bone and Muscle—Do Better Without Fat.

When the pigs are weaned and doing well, separate the hogs and sows as soon as possible, for too many pigs in one lot do not do so well as when they are divided into several different lots. Then feed for growth, bone and muscle; the finishing touches can be put on the last month or so before the sale.

If a pig is grown without very much fat, he will, nine times out of ten, be a better hog on his feet, for if a pig is loaded down with fat and his hindquarters are broken down, it is "good-by" as far as good foot are concerned.

SALT LIVE STOCK REGULARLY

Some Growers Follow Plan of Salting Once Every Week—Arrangement of Box Is Best.

Any kind of live stock must have salt and have it regularly if they are to grow as fast as they should. Some stock growers follow the plan of salting their stock once every week or ten days. Sometimes we get too busy to salt at the proper time. Why arrange for a salt box and keep the salt always before them? It will pay.

FACTS ABOUT GOATS

Every wild kid shoe is made from goat skin.

All "mohair" goods in the dress line are made from goat hair.

The average Angora goat will produce about six or eight pounds of mohair.

The meat of the purebred goat is excellent and very similar to mutton.

The silk plush of every Pullman car is made of Angora goat hair.

The Angora reaches the size of an ordinary sheep, but it is slower to mature.

Goat milk gives a constitution to the child which cannot be obtained from cow's milk.

Angoras will thrive and live in any climate of our country where sheep will.

HORSE-RADISH IS GOOD CROP

Excellent Variety Discovered by Explorer of United States Department of Agriculture.

An excellent new variety of horseradish was discovered by the United States Agricultural Explorer David Fraichilds in Bohemia, a few years ago. Cuttings from this plant in April will produce fine large roots for use in the fall, and if left in the ground until spring, will grow to very large size. It is white

Horse-Radish.

and of excellent quality. Horse-radish grows on almost any kind of soil, and will stand the dry weather as well as the wet. In planting horseradish, it is the same as for strawberries, and cultivate the same as any other garden crop.

Many persons plant horseradish in some out-of-the-way spot and dig a piece of the root as often as needed, leaving the fragments of roots in the soil to grow farther use. This method results in having nothing but tough, stringy roots, very unlike the product of a properly planted and well cared for bed. The best roots are those planted in the spring at the time of setting early cabbage, and dug as late as possible in the fall. The same fall the same fall as the weather will permit. It becomes therefore, an annual crop.

INCREASE YIELD BY PRUNING

Pinch Off Center Buds, Thus Throwing Energy of Plants to Formation and Ripening of Fruit.

The yield and quality of many vegetables can be increased by pruning. Pinching off center buds, thus throwing the energy of the plants to the formation and ripening of fruit.

With muskmelons and cantaloupes I always pinch off the center bud of the main vine when it reaches a length of four or five feet, says a writer. Cucumbers are treated in a like manner. Such treatment results in increased size of the fruit and a hastening of maturity. For the same reason the ends of pole and lima bean vines are pinched off when they reach a height of six feet.

Tomato vines expected to yield an early crop are pruned severely. But three stalks are allowed to develop, all side shoots being pinched off as soon as they begin to form. The three stalks are firmly supported by a stake four feet in height.

When the vines reach the top of the stake the center buds are pinched off. This stops height growth and throws all the energy of the vine to the developing and ripening of fruit already set. By following this method I have obtained as high as 40 fine, perfect tomatoes from a single plant.

WAR GARDENS FOR EVERYONE

Supplies Are Needed for Armies Fighting for Brotherhood and Peace, Says Dean Woods.

Every family should have its own garden this year. "To do so will be to release supplies for the armies that are fighting for brotherhood and peace," says Dean A. F. Woods of the Minnesota College of Agriculture.

"To hasten the close of the war," adds Dean Woods, "we must feed the people in the armies. The farmers are doing everything possible and the people of the towns should assist by avoiding waste and extravagance. They should make gardens not only in their back yards, but in their front yards as well, and on vacant lots. They should organize garden clubs, including women and children, and grow enough to supply their needs not only through the summer, but through the winter. They can do this by intensive effort."

ANNOUNCEMENTS.

For County Judge.

P. E. CASON is a candidate for Judge of the Boone County Court, subject to the action of the Democratic party at the primary election, Saturday, August 4th, 1917.

R. B. HUEY, of Burlington precinct, is a candidate for Judge of the Boone County Court, subject to the action of the Democratic party at the primary election, Saturday, August 4th, 1917.

For County Attorney.

N. E. RIDDELL is a candidate for County Attorney of Boone County, subject to the action of the Democratic party at the primary election Saturday, August 4th, 1917.

For Sheriff.

L. A. CONNER, of Burlington precinct is a Democratic candidate for Sheriff of Boone county, subject to the action of the Democratic party at the primary election Saturday, August 4th, 1917.

B. L. CLECK, of Union precinct, is a Democratic candidate for Sheriff of Boone county, subject to the action of the Democratic party at the primary election, August 4th, 1917. Menter Martin to be his deputy if he is elected.

For Assessor.

HARRY W. RILEY of Union precinct, is a Democratic candidate for Assessor of Boone county, subject to the action of the Democratic party at the primary election, August 4th, 1917.

J. S. CASON, of Walton precinct, is a Democratic candidate for Assessor of Boone county, subject to the action of the Democratic party at the primary election, August 4th, 1917.

BOONE F. ROGERS of Bellevue precinct, is a Democratic candidate for Assessor of Boone county, subject to the action of the Democratic party at the primary election August 4th, 1917.

For Superintendent.

J. C. GORDON, of Walton precinct, is a Democratic candidate for Superintendent of Schools in Boone county, subject to the action of the Democratic party at the primary election Saturday, August 4th, 1917.

For Representative.

W. P. CROPPER, of Bullittsville precinct, is a candidate for the Democratic nomination for reelection to the office of County Representative in the next General Assembly of Kentucky, subject to the action of the Democratic party in Boone county at the primary election, Saturday, August 4, 1917.

For Jailer.

CHAS. A. FOWLER, of Burlington, is a candidate for Jailer of Boone county, subject to the action of the Democratic party at the primary election Saturday, August 4th, 1917.

JOHN C. WHITE is a candidate for Jailer of Boone County, subject to the action of the Democratic party at the primary election August 4th, 1917.

B. M. WILSON, of Constance precinct, is a candidate for Jailer of Boone county, subject to the action of the Democratic party at the primary election Saturday, August 4th, 1917.

For County Clerk.

W. R. ROGERS is a candidate for reelection to the office of Clerk of the Boone County Court, subject to the action of the Democratic party at the primary election August 4th, 1917.

W. F. BRADFORD, of Florence precinct, is a candidate for clerk of the Boone County Court, subject to the action of the Democratic party at the primary election August 4th, 1917.

For Justices of the Peace.

The Recorder is authorized to announce the following as candidates for Justices of the Peace in Boone county, subject to the action of the Democratic party at the primary election Saturday, August 4th, 1917.

District No. 1—Burlington and Bullittsville precincts—E. J. Aylor.

District No. 2—Petersburg and Bellevue precincts—Wm. Stephens.

District No. 3—Carlton and Hamilton precincts—Chas. Wilson.

District No. 4—Union and Beaver precincts—Noah C. Tanner.

District No. 5—Walton and Verona precincts—John C. Bedinger.

District No. 6—Florence and Constance precincts—R. H. Tanner.

Glen Crisler sent 14 nice fat hogs to market Tuesday morning.

W. L. Kirkpatrick has the local agency for the Maxwell automobile.

Wilford Bullock and wife, of Hebron, were Sunday guests at C. W. Goodridge's.

For Sale—Three sows and twenty pigs. Webb McGlasson, Burlington, Ky.; R. D. 3.

Wanted.—To buy a good all-purpose horse—must be perfectly good. Menter Martin, Florence, Ky.; R. D.

J. S. Cason, of Richmond, candidate for Assessor, was in Burlington last Monday. He is letting no grass grow under his brigands.

C. C. Roberts is assembling materials for remodeling his residence, which, when completed, will be about the most convenient home in the town.

Jos. R. Williams, Ben Weinberger and W. H. Blessing, of Evans, attended Fiscal Court Tuesday in regard to road matters in their precinct.

FISCAL COURT

Receives Bids for The Building of Turnpikes to The Amount of \$150,000.

The High Prices of Labor and Stone a Great Draw-Back to Turnpike Building.

Fiscal Court was in session Tuesday, and received bids for building roads to the amount of about \$150,000, none of which were accepted. The court will meet again next Tuesday when final action on the bids will be taken.

The bid for the construction of the Burlington and Locust Grove pike was \$14,000 which is far beyond the amount of money available for that road.

The bid for the reconstruction of the Bullittsville and Dry creek pike, with the conditions attached in regard to stone, put it above \$5,000 a mile as figured by the court.

The prices of labor and stone which the contractors have to go up against when bidding for road construction have just about made that work prohibitive in this county, and the indications are the Fiscal court will be a long time expending the proceeds of the \$200,000 bond issue as business is now progressing, but the court will be damned if it builds roads and it will be damned if it don't, so there you are.

FLORENCE.

Mrs. Charles Fulton has returned from a visit with friends at Falmouth.

Lydia Grant is the guest of her uncle, F. S. Thatcher, at Alexandria.

Miss Myrtle Conner, of Cincinnati, is the guest of Mr. and Mrs. John Conner.

Miss Ruby Corbin spent Sunday night with her aunt, Miss Carrie Clark, of Cincinnati.

Mrs. Elsie Riggs and daughter spent several days last week with Mrs. Ola Carpenter.

Miss Minnie Baxter spent Tuesday with her cousin, Mrs. Melvin Jones, in Covington.

Miss Hannah Olsner spent Sunday with her sister, Mrs. Mart Cahill, of Sandfortown.

Mrs. Will Goodridge entertained last Thursday Mrs. Ed. Sidner and Miss Annie Carlton.

Mrs. Joseph Baxter had for her guests Wednesday, Mrs. Mary Carpenter and son, Leonard, of Covington.

Mr. and Mrs. Arch Lucas entertained Sunday Mr. and Mrs. Joe Lucas and Mr. and Mrs. Elmer Lucas and children, of Erlanger.

Mr. and Mrs. Chas. Zanyer, of Cincinnati, and Mrs. Matt Rouse and children, of Erlanger, spent Sunday with Mr. and Mrs. Ed. Snyder.

Mrs. Lucy Tanner entertained Sunday Mr. and Mrs. Clint Blankenbaker, Howard Blankenbaker, Ezra Tanner, wife and grandchildren, Harry, Cecil, Mabel and Helen Tanner.

Charlie Beall and Miss Minnie Baxter and Carl Anderson and Pearl Long went to Independence and Walton in their new Ford, Sunday, and called on Mrs. Chas. Scott.

WALTON.

Wm. C. Readnour bought a fine three year old Fitzsimmons gelding from Mr. Britt Senour, Tuesday, for \$100.

C. R. O'Neal, wife and baby daughter, of Cincinnati, arrived here last Sunday on a visit to his father John O'Neal.

Mrs. Georgia Wilkins and little daughter Dorothy Carroll spent a few days with her aunt Mrs. G. E. Carroll on Ridge Road.

Dr. and Mrs. R. E. Ryle of Beaver Lick, neighborhood, and Walter Brown of near Berkshire, were here Tuesday on business.

Mrs. W. H. Cram expects to leave next week for Great Falls, Montana, on a visit of several weeks to her children who are located near that point.

J. S. D. Chittenden, who was born near Big Bone Springs, and is the son of Chittenden, of Joy, Livingston county, is a candidate for Sheriff of Livingston-co., on the Republican ticket, and if he is made the nominee in August, which it is believed he will be, he is assured of election as the county is Republican by about 400.

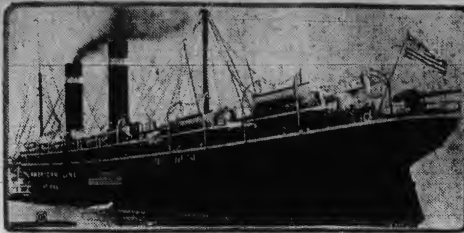

The protracted meeting at the Walton Methodist church is being well attended and the presentation of the christian doctrine being presented by the pastor Rev. W. B. Garriott is being appreciated as his sermons are filled with thoughtful suggestions. The music under the care of Prof. Blackburn of West Va. is a most pleasing feature and adds much to the excellent services.

Hugh McClanahan of Cynthia, and R. D. Renaker, of Paris, Bourbon county, spent Tuesday here looking over some real estate with a view to making an investment. Mr. McClanahan recently bought the farm of Ira Aylor at Kensing and Mr. Renaker is contemplating the purchase of a fine farm in Kenton county. They were introduced by Geo. B. Powers, the well-known real estate man.

Mrs. Leola Furlow, of Los Angeles, California, is a guest of Mrs. Edgar Riley, Miss Furlow is on her way to New York City.

A. L. Nichols says he has six weeks potatoes as large as a goose egg.

Clyde Clements, of the city, was the guest of H. H. Clure and wife last Saturday night and Sunday.
The following were guests of this scribe's last Sunday: Mrs. Wm. H. Smith and Mr. Smith, of Erlanger, spent several days last week with her sister, Mrs. A. A. Floyd.
Clyde Clements, of the city, was the guest of H. H. Clure and wife last Saturday night and Sunday.
The following were guests of this scribe's last Sunday: Mrs. Wm. H. Smith and Mr. Smith, of Erlanger, spent several days last week with her sister, Mrs. A. A. Floyd.
Clyde Clements, of the city, was the guest of H. H. Clure and wife last Saturday night and Sunday.

Be Canny—
Home preparedness—cans loaded with food.
That rubber ring you put on a preserving jar helps you to stretch your income.
The awful question "what shall I do for dinner?" is easily answered if your shelves are full of home canned products.
Can't eat 'em all in summer. Not enough in winter. Home canning is the answer.
You put a lid on waste every time you seal a preserving jar.
Canned berries are bird proof!
Frost doesn't nip canned vegetables.
Canned green peas and yellow peaches help fight the blues.
See that your garden produces dry beans, cabbage, potatoes and root crops that can be kept without canning.
The tobacco plants seem to be making a slow start after transplanting.

BIG BONE.

Larry Rich and wife are entertaining a fine girl at their home.
Be sure and go to the supper Friday night, June 10th, at L. R. Miller's.
Elizabeth Miller, wife of James Miller, was buried at Big Bone, Sunday afternoon.
Chas. Miller and mother visited at B. P. Bristow's, at Devon, Sunday afternoon. He is very sick.
Curtis Johnson, wife and grandchildren, and Mrs. Mary Noel were at Big Bone, Sunday, in his new machine.
The picnic was a success in every way. All had a good time. Sorry the visiting team did not get here as it disappointed so many. There will be a game here next Saturday, and also a picnic.

PT. PLEASANT.

R. B. Huey, candidate for County Judge, was a caller here last Thursday.
Leslie Carpenter recently purchased a truck with which to haul milk to the city.
The supper at Henry Jergens' was attended by a fair sized crowd, and \$28 was cleared.
We were visited by a good rain accompanied by a violent hail storm, Tuesday of last week.
The auto traffic on our dirt roads is almost as great as on the macadam roads this time of year.
B. H. Tanner and wife each entertained in honor of their sister-in-law, Mrs. Lena Kelley and friend of Hillsboro, Ill., Sunday.
The potato crop in this section is good, and in some patches they are large enough to eat. The corn crop looks fairly well; some fields have a bad stand. Strawberries were abundant but peaches, pears and plums are a failure and the apple crop is almost a failure.

DEVON.

Mrs. Sarah McCall, of Hillsboro, Ill., and Mrs. Lawrence Kenney Sundayed with Henry Holdsworth, Misses Leta and Julia Rice, of Latonia, spent Sunday with their parents here.
Mr. and Mrs. H. F. Utz spent last Sunday afternoon at Ben Floyd's on Gunpowder.
Mrs. Mrs. Ambrose Easton are entertaining a fine son at their home, since Saturday.
R. F. Bristow has been very sick since last Thursday.
Mrs. Hattie Campbell and daughter, Paulina, of Hazard, Ky.; Mrs. Belle Taylor, of Walton; Mr. and Mrs. Nicholas McCormick and daughter, Hazel, of Verona, Miss Katherine Taylor, of Richmond, and Mrs. Anna Kenney and son, Roy, of Beaver, spent a very delightful day Sunday with Mr. and Mrs. Jeff Hutsell.
The Chautauqua people met last Friday evening and appointed all the necessary committees, and the work of preparation for the three day season is now under way. Good weather will insure success.

FRANCESVILLE.

Miss Annie Kruse, of Dayton, is visiting her aunt, Mrs. Mike Stahl.
Miss Elvora Eggleston entertained her friend, Miss Edith Wilson, Saturday night.
Mrs. Fannie Snyder and daughter, Miss Mary, of Petersburg, visited at J. W. Utzinger's, last Wednesday.
Raymond and Carl Baker, of near Butler, visited friends in this community, Sunday and Sunday night.
Mrs. Harry Roberts and daughter, Miss Beulah, of Erlanger, spent the week-end with Mr. and Mrs. Will Reitmeyer.
Mr. and Mrs. A. J. Ogden, Mr. and Mrs. C. D. Scothorn, Mrs. C. S. Riddell and Miss Adelia Scothorn, were shopping in Cincinnati one day last week.
The Friday night meeting at Sand Run Sunday was very successful. A large crowd. Rev. J. W. Campbell preached an excellent sermon on "Heavenly Recognition." Rev. W. A. M. Wood delivered two excellent addresses and explained the "Budget System" in a clear, forceful way. The songs by Mr. and Mrs. Jump and Miss Edith Moore, of Latonia, were enjoyed by all and a good and profitable day was spent.

RICHWOOD.

Miss Agnes Snow is much better. Wm. Blacken has been ill the past week.
Clarence Tanner will soon be an auto owner.
Otis Rouse's boy that was quite sick is better.
Mrs. Susan Conner leaves for her Colorado home, Tuesday.
Mr. and Mrs. Ben Carpenter are the proud parents of a little daughter.
Mr. and Mrs. Frank Youell are entertaining a little daughter at their home.
Dr. Glacken spent several days the past week in Louisville at a Vet's meeting.
J. S. Cason spent Sunday at home after a strenuous campaign in Petersburg district.
Mr. Rusk sent several teams to Dayton, Ohio, to work on the government air ship court.
Mrs. Walter Grubbs visited her brother, Geo. Rice, of Price Hill. He is quite ill of pneumonia.
Walter Grubbs sold a five week old calf that weighed 302 pounds at 13¢ cents, it bringing \$37.71.
Theo. Carpenter and family and Mrs. Amanda Carpenter were Sunday guests of Chas. Carpenter, of Florence.

UNION.

Mrs. Emma Judge and daughter were guests of Mrs. A. P. Dickerson, Tuesday.
Miss Ruth Stephens is spending a few weeks with Mr. and Mrs. Wood Stephens.
Henry Afterkirk, one of Union's well known young men has joined the army.
Miss Olga Afterkirk was the guest of Mrs. Robt. Dickerson, last Sunday afternoon.

VERONA.

J. H. Chapman is visiting friends in Missouri.
The Lutheran brethren will hold a two weeks tent meeting in Verona, July 29th.
Chas. Lewis, of Frankfort, came home last week very much disabled by rheumatism.
Chas. Watson, son of J. H. Watson, who has been in the Navy the past two years, is here on a few days furlough.
D. O. Hudson has erected a building to be occupied as a creamery. He has installed a gasoline engine to operate his separator.
Will Rankin, grandson of J. E. Ransom, is spending a few days here on a furlough. Mr. Rankin belongs to the Navy, and will leave for France in a few days.
J. N. Powers has moved his residence a few feet and is having four rooms with a double wharf built in front, which will add much to the appearance of his home.
Rev. Charles Hind preached a splendid sermon at New Bethel church, June 17th. He will leave in a few days to visit his parents, Mr. and Mrs. James Hind, of Knox City, Missouri.
Last Saturday morning about 8 o'clock the barn of Mr. Scoggins, on the farm of Mr. Scoggins, which caused considerable excitement for a while. The people in town succeeded in keeping the flames from spreading to other buildings. A barrel of gasoline was removed from the burning building. Joe Turner's horse was in the barn and was consumed. Mr. Scoggins' auto, and the back of the building was removed and the auto taken out without damage to it.

All Announce for Reelection

In this issue will be found the announcement of each of the present Justices of Peace as a candidate for his office again. These gentlemen do not feel like lying down on a job of the importance of that they are now engaged in. They have been subjected to much of their own business, but where can a bunch of Justices be secured that it is known will do any better work for the county than those composing the fiscal court? Echo answers, "where?"

Big Fourth of July Picnic

Chas. Clure will pull off another picnic at Harvest Home Grounds on the afternoon of July 4th. He says he has secured for the afternoon the best dance music to be had in Cincinnati, and if you don't come and dance until you are satisfied, you must not blame him. He is very anxious that you come.

For Sale—I will sell at 1:30 p. m., on the premises, July 3rd, three acres fields on a window on the corner of the intersection between Florence and Limaburg. Terms made known on day of sale, Geo. E. Rouse.

For Sale—Five thoroughbred bull calves, and one O. I. C. boar hog ready for service. All the stock subject to register. W. G. Kite, Burlington R. D. 2.

Mail Orders Promptly Filled.

"FAIRHOPE."

Rev. Edgar DeWitt Jones, who is so well and favorably known throughout Boone County, is author of a most interesting and attractive volume bearing the above title. This little book, resulting from the press of McMillan & Company, is a real gem. It recites the annals of a Fairhope Meeting House in such a natural, unostentatious manner as to bring you face to face with the people and incidents that made up the life of that church during the past 30 years or more. Humor and pathos are cleverly interwoven throughout and the story possesses just enough of romance to make it abound in human interest and to hold the rapt attention of the reader from first to last.

While this book will prove of unusual interest to all who are familiar with rural church life as portrayed therein and will be in the nature of a revelation to those who know nothing of this life from actual experience, it will unquestionably excite the deep interest and elicit unstinted praise and commendation of all Boone county people. Many familiar scenes and well known characters are but thinly veiled in this splendid book which will make it of intense interest to all who know or want to know something of Northern Kentucky. I venture the prediction that this volume will be read and discussed by more of our people than any other publication except the Holy Bible.

Yours Very Sincerely,
JOEL C. CLORE.

Boone County Fraternal

Day Association.

In an endeavor to form an association for the holding of Fraternal or Order Day, an annual invitation is extended to the secret orders and churches of the county to enter.

On that day each order will render its program to make this affair a success it is necessary that all the lodges of the several orders in this county consolidate, also the churches.

Each lodge or church desiring to enter shall appoint two delegates to represent that lodge or church in a convention to be held on the time, place and expense of this day.

The cooperation of the lodges and churches each sharing equally in the expense and cost will be comparatively small.

Persons interested in this movement will urge their lodges to appoint delegates and notify the undersigned.

J. D. MOORE, Jr.,
Big Bone, Ky.

A Glorious Day.

Our all day meeting at Sand Run church, last Sunday, was a success from every standpoint. Three good sermons by J. W. Campbell, brought us a very tender message, on "Heavenly Recognition," and Bro. W. A. M. Wood, of the District Missionary, delivered two addresses on Missions and the working of the Budget, which was very interesting and helpful. A large crowd in attendance and an elaborate dinner was served on the ground. Every one seemed to enjoy the day exceedingly well. May the Lord bless the Boone county folks. They are hard to beat.

P. S.—The writer has just closed a meeting with Rev. W. A. M. Wood, at Petersburg, with twenty additions. A glorious meeting.

Red-Cross Fish Fry

Golden Grange, of Union, will give a fish fry, July 4th, for the benefit of the Red Cross Chapter recently organized in Union. Everybody cordially invited to come and help a good cause along. We hope to have some speakers for the occasion. There will be two ball games at the ball park, one in the morning and one in the afternoon.

No Trespassing

Notice is hereby given that camping, hunting—in fact all kinds of trespassing on my lands, are positively forbidden, and the law against same will be strictly and rigidly enforced.

Lloyd Weaver.

How to Can Beans.

The Farm and Fireside says: "Many of our readers are asking us how to can particular vegetables, such as beans, peas or corn. Here is the process for beans in detail: Select beans of the same age and color, and plan to can immediately after picking. String and wash well, and if you do not wish to can them whole cut them into uniform pieces, like them canned whole. Blanch by placing in boiling water from five to ten minutes, depending on the age of the beans, and then plunge them quickly into cold water. Fill the jars, packing closely. Add one teaspoonful of salt to each quart of beans, and put on the tops loosely, put the jars in the canner. This may be simply a large pot or wash boiler with a false bottom of wooden slats, or better, a wire rack, and the water in it should cover the cans about one inch. Have the water bring to a boil quickly. Count the time from the moment it starts boiling and sterilize the beans two hours. Then remove jars and tighten covers. Use the same method for peas."

Jessamine County. The cool weather has not affected the corn nor the vegetation. Corn is looking fine and although Jessamine will have a record breaking potato crop people are planting the second crop planting. What is very much better than the far more expected it to be.

CAUSES OF REJECTION.

Long List of Conditions That Make Men Unfit For Service.

There is a long list of cogitations which would make a man unavailable for service, but the five chief causes are found in flat foot, poor teeth, defective eyesight, a lack of chest development and underweight. It is obvious that in a large percentage of cases these defects are unavoidable, just as tuberculosis and kidney trouble are avoidable. They are preventable thru right living and proper training, as are only many of the less important causes of rejection, such as poor lungs, irregular spines and certain heart affections.

Take the case of flat feet, which is probably responsible for more rejections in the army than any other single case. About 18 per cent of all applications for enlistment in the marine corps in New York are rejected for flat foot, according to Captain Frank E. Evans. He places the blame largely on the feet while at work, worn by the average soldier, and on the fact that most of the recruits have been compelled to stand on their feet while at work, as workmen, conductors, policemen, subway guards, machinists, waiters and clerks are the principal sufferers, according to Captain Evans.

There appear to be comparatively few rejections in the army on the basis of heart trouble, perhaps because most of the recruits who apply are young. On the other hand, there is a considerable number of rejections of applicants for the marine corps on the score of heart affections. Prominent among these is the condition known as tachycardia abnormal rapidly, probably due chiefly to excessive cigarette smoking. During a recent period, out of 4,082 applicants for enlistment in the marine corps only 810 finally reached the medical office, 80 of these being rejected for defective vision, 84 for poor teeth, 71 for heart affections, 74 for flat feet and 70 for being under weight and of poor physique. Only 187 were accepted.

It will finally appear from these figures that our physical unfitness is a condition that is both avoidable and capable of being remedied. Our deficiencies are not fundamental, but superficial, being due to lack of activity and poor hygiene.

American men can be made strong and sound in every respect through proper training, correct habits and good living conditions, so that it will not require over 7,000 applicants for the marine service in order to secure a couple of hundred enlisted men. Out of 7,000 applicants there should be 7,000 or very nearly that number, of men fit for acceptance.—Physical and Culture Magazine.

State News.

In Grayson county the corn crop in general is good; potato crop is excellent.

Bracken county farmers cannot get help and most of them are getting a decided crop. There are few good rye crops in the county, but as a rule rye will not amount to a great deal.

Letcher County. — While cool nights have been the rule crops have been a decided improvement and are looking more prosperous. It is believed that the Irish potato crop will be the best in years, while the corn is looking fine.

Bullitt County. — Wheat will be nearly an average crop. Corn acreage will be greatly increased. Garfield county is looking good and with a little more and better labor farmers would have no cause to cry hard times in this section.

Nicholas County.—Farmers took advantage of the favorable weather to set out their tobacco crops. Timothy fields present a fair prospect. The work of stripping blue grass seed has begun. The wheat crop has come out considerably in the past few weeks.

Bourbon County. — Much corn has had to be replanted and wash-outs. Corn looks well, however, and a big crop is anticipated. What little wheat there is in better. Bourbon county is heading out in better. The wheat crop is thin on the ground. Conditions are very promising and truck farmers seem pleased with the prospects.

WAR RESULT OF SINS OF NATIONS.

Rev. John F. Herget, pastor of Little Street Baptist church, Cincinnati, in a recent sermon declared that the present world catastrophe is due to the sins of the nations of the earth, all of whom have their dark spots. He said:

"Even poor outraged Belgium, for whom our heart goes out in tender sympathy, has her own atrocious to account for. France, her goddessness, England her opium traffic in China and other national sins, Turkey her Armenian atrocities, Germany the distribution by her universities of unbelief and atheism, her military and her unappealing atrocities, the United States has her ever-growing tendency to godlessness and her dealings with the Indians in the past to answer for before God."

The picnic at the Harvest Home grounds was attended by a very large number of young people last Saturday afternoon, and they had a delightful time.

The Rabbit Hash truck passed through town Monday morning with a miscellaneous cargo bound for Cincinnati.

READER OF POPULAR PLAYS IS COMING

"Peg O' My Heart," "Within the Law," "Experience," Etc to Be Given.

HUMOROUS, TOO

Miss Nanah Rense, who is featured as one of the attractions on the second day of our Chautauqua, has been a favorite before Chautauqua and Lyceum audiences for many years. As a reader of plays and short stories she has been more than successful. Her work has a charm and sympathy that reaches the heart.

The following article clipped from The Journal, Ladysmith, Wis., is typical of the many expressions of appreciation of her work: "No one on the platform has a greater capacity of making friends than Nanah Rense. Whenever she makes a return date (and no one has more return dates than she) it seems as if her audience is a crowd of friends. People admire her instinctively, not only because she is attractive in appearance, but also because she has a splendid Christian character and is not ashamed to have people know where she stands. They admire her for her exuberant good health, her abundance of common sense and her piquant good humor. They admire her because she is not at all blasé, but is interested in people and their interests. She has appeared in Columbus, Ohio, ten times, and in the following cities from three to five times: Dexter City, Ohio; Seymour, Ind.; Steubenville, Ohio; Winchester, Ky.; Lawrenceburg, Ky.; and Orchard, Ky.; Newark, Ohio. To give a list of the towns where she has appeared two or three times would take up more space than is at our disposal. She is a Kentucky girl of delightful personality. Her work is clear, cut, artistic and free from affectation."

MISS NANAH RENSE,
Dramatic Reader.

May Go to Front as Red Cross Nurse. Miss Rense is, above all, a very loyal American and anxious to do her bit for her country during its period of stress. At the close of her season with the Welfare Chautauqua she is planning, if there is still need for her service, to join the Red Cross and go to France as a nurse.

Come and Bring Your Neighbors

Can the World "Right Itself?"

What is this old world but an airship, with a billion and a half of passengers? And just at this particular moment the most of us feel a good deal as the crew of a Zeppelin must when an anti-aircraft projectile hits a vital place in the mechanism. A shiver shakes the ship; she reels and begins to plunge. Below her opens an abyss. Can she "right herself?" Is it possible for her to recover lost equilibrium and make a landing?

At any rate, she has always done it in the past! The ability of the old vessel to get back upon an even keel is astounding. It is as if she carried a gyroscope in her entrails and could not be permanently upset. No matter how hard a blow is struck her; how much she reels and staggers; how swift and far she dives—she rights herself before a fatal crash. She did it when hordes of barbarians came out of the Orient before the Christian era and struck the Grecian culture that terrible blow; when they poured down from the north and overthrew the Roman Empire; when the Saracens rolled over Europe like a tidal wave; when the darkness of the Middle Ages all but extinguished the lamp of learning; when the Revolution in France sent a shock through the hull of the ancient vessel.

Each time she shook herself, turned her nose to the wind and got back upon an even keel. She seems not meant to perish. Her voyage is not finished. It is true that she has been hard hit. Millions of her sons have been slain. Her treasures have been destroyed. Her wealth has been consumed or put up as surety. Many

of her nations have been impoverished. Ruin actually stares her in the face. Recovery seems impossible.

But it is not. The sun still shines. The rain continues to fall. Springtime and summer, harvest and winter have not failed. The rivers run to the sea; the ores exist in the bowels of the earth; the forests stand upon its surface; the soil is fertile still; the grass is growing; the harvests are ripening; there are cattle enough to restock the depleted pasture lands; the womb of Nature teems with life; the children keep coming and the will of man is unshaken by the unconquerable will of man.

And pervading all, re-energizing all, is a universal sense of nature—the cosmic energy, the spirit of life and love and hope. The war will end. The boundaries of nations will be established. Human relationships will readjust themselves. Grain will grow and flocks will pasture over the trench and the shell holes of battlefields. Credit will be restored. Life will resume its accustomed activities. The old world ship will right itself and resume its peaceful journey. The mysterious gyroscope will keep her on an even keel. Keep steadily at work. Preserve a cheerful spirit. Cherish hope.—Cincinnati Enquirer.

McLean County. — M. T. Cain, of Owensboro, has just finished the loading of two cars of fine corn at this place. The cars contain 1,200 bushels of corn, for which the farmers received \$1.50 per bushel. Many of the farmers in the lowlands will get out only a half crop of corn, continued rains keeping the ground too wet for planting. The hay crop does not look very promising.

 large sheep and wool farm in
 which a number of Cincinnati cap-
 italists will be interested. Dr.
 Lewis is a veterinary dentist and
 is interested in live stock gen-
 erally.
Mrs. D. K. Johnson became sud-
 denly ill Sunday morning during
 the services of the Baptist
 church and lapsed into an un-
 conscious state. She was taken to
 the residence of Rev. Olin Ham-
 ilton and soon recovered so as to
 be able to return home.
R. D. Renaker of Paris, Bourbon
 county, bought through the real
 estate agency of Geo. E. Powers
 last Wednesday the Jas. Sellers
 farm in Kenton county near Wal-
 ton. The farm contains about 163
 acres, and the purchase price is
 \$11,000 cash, possession to be given
 on March 1st, next.
Thursday the following gentle-
 men spent the day at Sanders en-
 joying an outing at the Blue Lick
 Springs and a fine dinner pre-
 pared for the occasion: Rev. Olin
 Hamilton, Geo. E. Powers, W. H.
 Powers and son Clifford, A. H.
 Mason, J. M. Arnold, J. D. May-
 hugh, Judge J. G. Tomlin, John E.
 Williams, Joe C. Hulse, and B. C.
 Wallace. Some of the gentlemen
 went to Sanders for the purpose
 of arranging for the establishment
 of a loose leaf tobacco warehouse
 there instead of at Sparta, and it
 is believed Sanders will be the
 place from the home.
Maria Bolling and sterilize
 beans two hours. Then regu-
 late them and then cover. Use the
 same method for peas.
Jessamine County. The cold
 weather has not affected the crops
 near the vegetation. Corn is look-
 ing fine and although Jessamine
 will have a record breaking po-
 tato crop people are planning the
 second crop planting. Wheat is
 very much better than the far-
 more expected it to be.

The Tobacco Crop.

The warm, fair weather won-
 derfully improved tobacco in Fay-
 ette county.
 Taking Jessamine county as a
 whole, the acreage is less than
 last year as in some sections, the
 plants were injured.
 Tobacco is growing fine in Scott
 county. Early tobacco is looking
 exceedingly well.
 The large crop of tobacco in
 Fleming county needs cultivation
 as the weeds as well as the crop
 have been growing very rapidly.
 In Bourbon county plants are
 looking well. The acreage seems
 to be about as large as that cul-
 tivated last year. Prospects now
 point to a large yield.
 The acreage in eastern Kentucky
 will be much smaller than usual
 due to scarcity of plants, ravages
 of cut worms, inability to
 prepare ground and the scarcity
 of labor.
 Tobacco was planted late in
 Franklin county but is growing
 nicely.
 The acreage in the Ohio dis-
 trict will be practically the same
 as last year.
 The condition of the New En-
 gland tobacco crop is very unsat-
 isfactory. Less than one half of
 the crop was picked on time.
 A scarcity of plants delayed the
 setting of the Wisconsin crop.
 The acreage in South Carolina
 will be about the same as last
 year, and the prospects for a good
 crop are bright and the yield
 promises to be better than that
 of last year.
 Nicholas county will have about
 15 per cent of a normal crop. A
 shortage of plants curtailed the
 acreage, but an excellent stand
 has been secured and what has
 been set out presents a very fa-
 vorable prospect.

Death of Mrs. Mary Johnson.

Mrs. Mary Spence Johnson died
 at the home of her daughter,
 Mrs. J. V. Murray, on North Hol-
 den street at 2 o'clock Sunday
 afternoon after a long illness of
 stroke which she suffered three
 weeks ago. Mrs. Johnson was in
 her 90th year and had resided in
 Johnson county since 1871. She
 came to Warrenton three weeks
 ago to visit her daughter and was
 stricken while in the Murray
 home. She had been confined to
 her bed since that time.
 Mrs. Johnson was born in Ken-
 tucky and moved to Missouri with
 her parents in 1871, settling in
 Holden where she has made her
 home ever since. She was a mem-
 ber of the Baptist church, hav-
 ing united with that denomina-
 tion when a young girl. Mr. John-
 son was pastor of the Baptist church
 Mrs. Johnson was a faithful and
 conscientious member. She was
 known as "Aunt Mary" over the
 west end of the county. She is sur-
 vived by two daughters, Mrs. J. V.
 Murray, of this city; Mrs. J. T.
 Miller of Holden; two sons, J. S.
 and T. I. Johnson, of Kansas; 15
 grandchildren and 4 great grand-
 children.
 A short prayer service was held
 at the Murray home this morn-
 ing at 5 o'clock, conducted by Dr.
 J. B. Haskett, pastor of the Baptist
 church. The casket was then taken
 in a motor hearse to Holden
 followed by motor cars carry-
 ing family and friends.
 The casket was open in the Z.
 T. Miller home at Holden from 9
 until 10 o'clock today, where a
 host of friends called to have a
 last look on the form of their
 aged friend who had lived so
 many years there and whose ac-
 tivities during her life were in-
 terwoven with the life of Hol-
 den and vicinity.
 The funeral was held at the Hol-
 den Baptist church, conducted by
 the pastor, Rev. Alexander. Burial
 in Holden cemetery.
 The floral testimony of friends,
 both at Warrenton and Holden
 was most beautiful, exemplifying
 the life which they sought to
 honor.
 Mrs. Johnson was in many re-
 spects a wonderful character.
 Years seemed to have no effect
 on her active life. Despite the fact
 that she had long since passed the
 allotted three score and ten
 years, her girlish instincts and
 sympathies were pronounced as
 in one in the bloom of life. She
 never lost her keen interest in the
 affairs of the world about her
 and had a lively part in every
 movement that was for the wel-
 fare of home and country. Posses-
 sion of remarkable physical endur-
 ance, she did not neglect to use
 this blessing and improve her
 lengthened years.
 Mrs. Johnson was a member of
 the famous Lillard family of Vir-
 ginia and Kentucky, which has
 family tree dating back to Scot-
 land and Wales, and she was a
 faithful survivor of that sturdy
 stock which has had a large part
 in the making of America—Hol-
 den Missouri, paper.

Tax-Payers, Notice!

The Tax-Payers of Boone County are hereby notified that I, or my Deputy
 will be at the places and on the dates named below to collect the 1917 State,
 County and County School Taxes. Will also collect the 1917 Graded Com-
 mon School taxes in Verona, Bellevue, Union and Florence Districts on the
 same days other taxes are collected:

FAIRHOPE

Rev. Edgar Dewitt was so well and favorably known out Boone County, that he was most anxious to have the advantage of the same experience in his field and factory, in country, the British and German woman has done and taken up the tools she brought out for herself a new scheme of things, says the conductor, railroadman—is that right? This scolded the last wall of prejudice and ranged her last trench wherefrom masculinity had banished their churches, finding their way to the call of Mrs. Dewitt, to the aged and decrepit, the cracked and quivering voices of the substitute proffered such dissonance that it seemed better to go without the vestal choir at all. For the service required something of the sort, and, finally, a rector less timid than the rest, ventured to admit women into the professional. She must wear the surplice and other-wise demean herself as if she were really not a woman, but the anthems of the church were well up on the organ and at last, control of clear-voiced women, and nothing is left for her to conquer in England save a seat in parliament.

The present emergency has given women a unique opportunity to serve. There is no act that she has even now, and much more may be demanded of her in the future. The National League for Women's Service has been formed to coordinate and standardize the work of American women along lines of constructive patriotism. It is intended to develop the resources and to promote the efficiency of women in meeting their everyday responsibilities to home, state, nation and humanity. More in detail, the league is to provide organized training camps in every community prepared to co-operate with the Red Cross and other agencies in the event of calamities and in time of war. The services which may be performed are so many and varied that nearly every patriotic woman may, and should, and some use for her energy and ability.

The newly published annual reports of three of the leading mental hospitals in Scotland tend to confirm the opinion of nearly all intelligent observers, that the war has had little or no evil influence upon the mental stability of the civil populations in the belligerent countries. The medical superintendent of the Glasgow royal asylum is rather inclined to think that it has benefited many whose sanity was threatened, especially among women, who now have a much larger choice of callings than in ordinary times and are therefore better able to find suitable occupation. But though some patients whose illness began before the war recovered for a time under its compelling influence, not a few had since relapsed and showed an aggravation of their symptoms.

The Bible tells us that no man can add a cubit to his stature, but when a Missouri man was found to be one inch short of the required 5 feet 4 inches, a half-dozen Guardsmen volunteered to take the one-inch slack from his physique, and after an hour's muscading and rolling he appeared again and was accepted.

The very latest British trench slang is "swishy," meaning the very best, ultramarine, uptop, A1, the finest ever, and then some. A woman's dress is "swishy" if it is beautiful and exceedingly becoming. A dinner is "swishy" if it is unexcelled. Does it strike you that this addition to British slang is swishy?

A military expert, in a Berlin paper, says that evacuation of front lines is the only policy to pursue, as against superiority in materials no heroism can prevail. But not so long ago the experts were telling the people that the German lines were invincible.

And now they are giving Ezekiel credit for first foresight, the idea of an airship. Well, if Solomon was right about there being nothing new under the sun, the old prophet has just as much claim to the credit as anybody else.

Not only is it well to drop the word "dancer" from our vocabulary, but it would be even better to drop from our vocabulary the word "dancer" and the beans two hours. Then we have and tighten covers. Use the same method for peas.

Jessamine County. The crop weather has not affected the corn, but the vegetation, corn, and flaxing fine and although Jessamine will have a record breaking potato crop people are planning the second crop planting. Wheat is very much better than the far more expected it to be.

ISLAND CAPITAL IS PRETTY

Under French Regime Antananarivo Is Becoming One of Most Beautiful of African Cities.

Antananarivo, which is the capital of the island of Madagascar, off the coast of Africa, has a splendid situation and under the French regime bids fair to become one of the most beautiful of African cities. It is located in one of the upland plains, which are the granaries of Madagascar, at an elevation of more than 5,000 feet above sea level. The city occupies a high, narrow, rocky ridge, rising sharply about 600 feet above the pale green spread of the rice fields. Its splendid stone churches, government buildings, schools and colleges are finely set off by this situation. Excellent streets connect all parts of the town that are accessible to vehicles, and stone stairways scale the steeper hills. There is a beautiful public square, terraced and filled with trees and flowers.

Long before the French came to Madagascar Antananarivo was the principal village of the Hova chiefs. The Hovas were the strongest tribe of the native Malagasy race and they slowly conquered the greater part of Madagascar, forming it into a native kingdom, which was rapidly advancing toward a sort of civilization. Antananarivo became a city of Hova people, built of houses made of mud with a wooden palace upon its highest hill. A unique civilization might have been developed by the Hovas had not France invaded Madagascar. She conquered the natives in the war of 1892 and finally took over the entire island as a colony. It was regarded as a highland paradise and for a time it worked great hardship on the natives, but in the long run their lot has been greatly improved.

BASIS OF MODERN STATUTES

Common Law Grew Up Gradually From Old Maxims and Customs Antedating Art of Printing.

Common law is the basis upon which our modern statutes are built. Common law generally is based upon the English common law which was used by the early settlers. This English common law grew up gradually from old maxims and customs which were practiced previous to the time of printing, or, to use the quaint legal phrase, time when the printing press of manumeth not to the contrary.

Many of these customs originated in the old feudal days, and concern the relationships between lords and vassals. The more powerful a lord was the better able he was to see that those customs were enforced which best suited his purposes, and in this way the law became established. As the social order changed, the common law changed with it. With the advance in civilization these changes were preserved in written form, and the unwritten or common law, combined with the changes and additions made in it by the various acts of parliament, became the law of the land.

Kidney Diseases.

Nearly all diseases of the kidneys are due to salt. If you are suffering with "iron" your kidneys, the first thing to do is to smother all your medicine bottles, cut out salt and sugar from your meals and go on the fruit-conical diet. Stomach astringents is the best thing in the world for your kidneys and bladder. Parsley is good for victims of kidney diseases; so also is water cress in the form of salad, but not salt! Parsley will aid the eyesight by restoring the kidneys to their proper function, but overdoes of parsley damage the vision. Peas are the very best of fruit for victims of kidney disease. But no matter the nature or the name of your kidney disease, you can get over it by following the instructions.—Los Angeles Times.

Fiscal Years.

Fiscal year means the treasury year or period for which government appropriations and reports are made, and accounts are rendered. The government fiscal year in Great Britain and in Germany ends March 31; in the United States on June 30, and in France on December 30. As it always France on government finances, it might be called the financial year. The word fiscal is derived from the Latin fisco, a basket, and may relate to some remote period of primitive simplicity when a money basket served as a government treasury. Since the organization of the United States government, the term fiscal year has meant from June 30 of one year to July 1 of the next year.

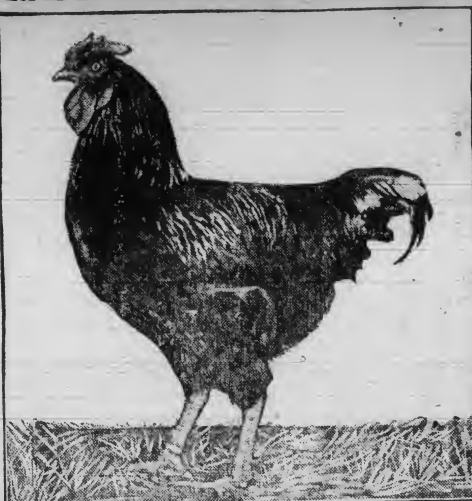

Keep Busy.

"Time was when the man who beat the drum in an orchestra was thought to have an easy job." "Yes, that was before a drummer was expected to lead the songs of birds, loud roars, fire-gongs, crying babies, the hum of a motor car, the honking of his horn, pistol shots, noises of the larynx and a hundred other noises. Nowadays he merely beats his drum during his leisure moments."

A Disappointment.

"Father," said Hortense, "Reginald going to get you tomorrow." "Right away he will!" "A day was to ask your consent to 'marry'." The girl, in a huff, I thought, through Reginald's law, but if he's not coming, I don't for Cincinnati.

CHICKENS DEVELOPED IN UNITED STATES

SINGLE-COMB RHODE ISLAND RED COCKEREL.

(Prepared by the United States Department of Agriculture.) The Java is one of the oldest breeds of chickens developed in the United States. In general this fowl tends to be long in body and broad in back. The comb is single, and the legs of the black variety are black, or black approaching yellow, while those of the mottled variety are yellow and black. The color of the legs detracts somewhat from the fowl for market purposes. The skin, however, is yellow. The legs are good layers of brown-shelled eggs, and the fowls are suitable for table purposes. This breed is not very commonly found in the present time. The standard weights are: Cock, nine and one-half pounds; hen, seven and one-half pounds; cockerel, eight pounds; pullet, six and one-half pounds.

There are two varieties of the Javas, the Black and the Mottled. The color of the Black Java is black throughout, with a greenish sheen on the surface plumage. Purple barring is undesirable. In the Mottled Java the plumage is a mottled black and white throughout, the black being more plentiful than the white. The undercolor of the Mottled Java is slaty. **Dominique Breed.** The Dominique is also one of the oldest of the American breeds. The Dominique color is associated in the minds of people throughout the country with the barnyard fowl and is frequently confused with the Barred Plymouth Rock color. The Dominique is somewhat smaller and somewhat slacker in body, with a tail somewhat longer and steeper more prominent than the other American breeds. This breed has a rose comb and yellow legs and skin. The hens lay brown-shelled, though some say smaller than the other breeds. The standard weights for this breed are: Cock, seven pounds; hen, five pounds; cockerel, six pounds; pullet, four pounds. The purebred Dominique is not extensively kept at the present time in the United States. In color of plumage the Dominique has a general bluish or slaty cast, with feathers in all sections being barred throughout with alternate, rather irregular, dark and light bars. The markings somewhat resemble those of the Barred Plymouth Rock, but are less distinct, and lack the clean-cut character of the Plymouth Rock barring. Like the Barred Plymouth Rock, each feather should end with a dark tip. The Dominique male may be, and often is, one or two shades lighter than the female. Slate undercolor occurs throughout.

Rhode Island Reds. The Rhode Island Red is one of the newest breeds which have been developed in this country. At the present time it bears an excellent reputation among the farmers and is kept very extensively throughout the farming districts. The breed originated in Rhode Island, where it was developed by the farmers engaged in poultry raising. The Malay, Buff, Cochins, Turkeys and Wyandottes are said to have been used in its development. In type the Rhode Island Red has a rather long, rectangular body and is somewhat rangier in appearance than the Plymouth Rock or the Wyandotte. The hens are prolific layers of brown-shelled eggs, and the breed makes a very suitable table fowl, having yellow legs and yellow skin. The Rhode Island Reds have enjoyed an excellent reputation for hardiness, which, in the main, they have well deserved. The standard weights for this breed are: Cock, eight and one-half pounds; hen, six and one-half pounds; cockerel, seven and one-half pounds; pullet, five pounds. There are two varieties of the Rhode Island Red which are identical in color and type, but one of which has a single comb and the other a rose comb. The single-comb Rhode Island Red is a rich, dark red, approaching a mahogany, as it is desired to have this color as even as possible over the entire surface. There is a tendency, however, for the huckle and the lower part of the body of the male to be paler in color than the back and

FOR THIRSTY GARDENS

Windmill Plays Important Part in Production of Food.

Lack of Timely Rainfall Is Often Doom of Otherwise Carefully Handled and Tended Patch—Conserve Water Pumped.

That the farm windmill should play an important part in the great food-production campaign, is the belief of H. B. Walker, drainage and irrigation engineer, Kansas State Agricultural college.

"The farm windmill should be no 'slacker' this year," said Professor Walker. "It should be ready day and night to absorb the energy of the wind to lift water for thirsty gardens. Lack of timely rainfall is often the doom of an otherwise carefully handled and tended vegetable garden."

"This year the farm garden will be an important factor in reducing the cost of living. Accordingly, every precaution should be taken to prevent a failure of the garden crops. In those areas where the natural rainfall is not dependable, some simple method of irrigation should be provided."

The farm windmill will serve faithfully and well in lifting water for irrigation if given an opportunity. Professor Walker pointed out. "This faithful source of farm power, however, will not save the garden unless the owner conserves in conserving the water pumped. The average windmill lifts water intermittently and at a slow rate. Consequently, if the water pumped is allowed to flow directly onto the warm, dry soil, a small area only can be satisfactorily covered. A small trickling flow does not spread laterally over the surface of the soil, but it penetrates deeply into the soil beyond the reach of the shallow-rooted vegetables."

If the water lifted, on the other hand, is stored in tanks, barrels, or cisterns, a volume sufficiently large can be secured in a surprisingly short time to effectively irrigate a much larger area. A barrel of water containing 3 1/2 gallons will cover a garden bed six feet wide by eight feet long, one inch deep. A quantity of water even as small as this, if properly applied, will greatly help the lettuce bed or the shallow-rooted radishes. It is advisable, therefore, to use even an ordinary barrel for storage, if nothing larger is available, in preference to direct pumping.

A reservoir sufficiently large to hold all of the water the average windmill can pump in three or four days is much more desirable.

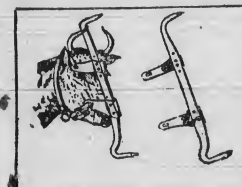

MISSOURI PLAN BEST

Carl Vrooman, assistant secretary of the United States department of agriculture, has commended the organization plan adopted by the Missouri College of Agriculture for war-crop production. Mr. Vrooman said recently, after he had visited a number of states, that the plan was the best that had come to his attention.

HEAD GUARD IS EFFICACIOUS

Prevents Calf From Sucking Mother and Keeps Cow From Going Through Wire Fence.

A guard, consisting of two hooked bars pivoted in front of the nose and attached by straps, is very handy to have around the dairy farm. It prevents a calf from sucking its mother;

Useful Guard.

Keeps the cow from going through, over or under fence; prevents her eating stacked fodder or anything of that sort. They are very easily made.

COWS SHOULD BE KEPT CLEAN

Milk Should Be Drawn Into Covered Pail Which Is Washed and Scalded After Each Milking.

To keep dirt and bacteria out of milk, the cows must be kept clean, especially in the region of the udder. The milk should be drawn into a covered pail which is thoroughly washed and scalded after each milking. Only good clean water should be used for this purpose.

KINDNESS TO DAIRY CATTLE

Farmer Who Appreciates Good Cows Will Prosper on Returns From His Animals.

The farmer who regards his dairy cattle as mere machines that thrive on abuse, will never make any money in the dairy business, while the cattle owner who appreciates good dairy cows and treats them with kindness will like to find that his cows will like to produce milk and prosper on the returns from his cows.

SUITS MADE OF RIBBONS

No Other Materials Used in Sport Costume and Pajamas, Which Are Novelty of Season.

Ribbons have taken unto themselves

finds them easily joining forces in sports suits, separate skirts, hats, hosiery and even so audacious as to attempt a pajama suit in which broadened lingerie ribbon is employed.

Made entirely of bayadere ribbon about four inches wide a new sports suit has the Russian blouse of red and white striped ribbon, with a plaited skirt made of white ribbon intersected with the striped. The hat has the upper portion made of the same variety that is fastened together. The sleeves are of the short kimono type, also with the border and adding a touch of interest is the Boshanara grille. This is square in effect, made of 50 yards of very narrow double-faced ribbon in this instance in light blue and lavender and is fastened by the sleeve which is in and out of the ribbon to show one row of blue and the other of the contrasting color alternately.

A pajama suit is made of light blue broadened lingerie ribbon about two inches wide, joined together to the slipper blouse with a deep border of the lavender ribbon of the same variety that is fastened together. The sleeves are of the short kimono type, also with the border and adding a touch of interest is the Boshanara grille. This is square in effect, made of 50 yards of very narrow double-faced ribbon in this instance in light blue and lavender and is fastened by the sleeve which is in and out of the ribbon to show one row of blue and the other of the contrasting color alternately.

PEASANT LACE IS ADOPTED

Paris Designers Go to Roumania for Heavy Colored Trimming Used Extensively in That Country.

It may be that the incoming of lace as a powerful fashion for the summer may not bring forth the best of results in economy. What a woman owns in the way of fine lace she will not cut and reshape, except under the lash of conviction that she can do nothing less than discover a fashion authority.

A few of the French designers have come to Roumania for the heavy strong colored lace used by the peasantry, and have built their fashions of it, mounting it on slips of bright-colored silk or silk. One trunk that reaches nearly to the ankles is striped a trifle below the waist, and again above it, with rolled slashes of blue silk, and there is a foundation of this silk to give color through the wide meshes of the coarsest woven lace.

Although the lace, such as point Venetian, Bruges, d'Alençon, and their sisters, are used on the hand-some gowns, there is a return to a design that is conspicuously open and appears to be a more friskier sprouting of threads finely knotted together.

FOR THE STOUT WOMAN

Stout women, especially in the summer time, frequently find difficulty in selecting a gown that will in no way emphasize their largeness. The latest styles aim at slenderness of appearance. This costume is a specially designed silhouette model with long giraffe ends, rows of buttons, and overdrapery, all of which gives a swift fashionable appearance. This looks cool and comfortable and there is small doubt that any woman of generous size may look quite as stylish and attractive if she has her gown made along the same lines.

FOR THE LUNCHBOX

Suggestions for lunchboxes that are inexpensive and pleasing.

Potato salad, with sandwiches made with hard-boiled eggs.

Grain bread and lettuce with mayonnaise and cold fish.

Cold pork, lamb or mutton chops preserved in waxed paper.

Pecan and nut sandwiches seasoned with raisins.

Cold baked beans with brown bread and lettuce.

Gingham Pattern Silk Frock.

A simple pattern in pink and white has been used for a dress of this style with a wide white collar and a wide white belt.

HOW WEALTH GIVES COURAGE

Man Who Has a Few Dollars in the Bank Is More Efficient Than One Who Is Penniless.

There is this to be said about wealth: It gives courage to the poor. Poverty makes cowards of us all. "The man who is suffering with fear," says a writer, "because he does not know where the next dollar is coming from, is in no condition to earn or to attract dollars. Fear always makes a man think he is weak, a nobody. It always pictures the worst; sees no light ahead."

We hear a great deal these days about efficiency—and about inefficiency. The fellow who has saved a few dollars, and has them in the bank or where he can put his hand upon them, is more efficient than the fellow who is penniless, declares the Dayton News. Start to find a job with never a dollar in your pocket. You'll have a hard time. You appear at a disadvantage when you approach a business man. You feel your dependence. You have a cowardly air about you—an inefficient air. You realize that you are not in a position to ask for anything that is offered. You are in no position to offer the business man in the face and tell him your qualifications. Want is at your back, causing you to cringe.

But with money in your pockets you assume a different attitude. You realize that you are, to that extent, independent. You are not the business man more nearly upon an equal footing. You are more courageous, more self-assertive, more efficient. You know that you are not compelled to accept the first job offered you. You can discuss wages, and conditions, and conditions of employment. If you are not "broke," so, if for no other reason, the young man should seek first of all to have a bank account. It has something right in the beginning. It is even more important than to save something toward the end.

MATERIALS IN BIRDS' NESTS

Greater Variety of Things in Building Homes Than Is Supposed.

Perhaps when you have said that birds' nests are made of leaves, twigs, grass, string, moss, feathers, hair or mud you think you have exhausted the list of building materials used by the feathered folk. But to examine even a nest carefully will show that your list is by no means complete.

For example, a nest of gray vireos are found to be fastened to the rough of the tree by means of strips of inner bark of spider and cocoon silk, and of milkweed stalk. The body of the nest is lined with the following: White and yellow birch bark, cedar bark, blue bottle fly, spider web, feathers, moss, bits of old, but skeletons from which all but the ribs and veins had been cut away, pine needles, old cocoons of the tussock moth, grass, cottony hairs, lichen, seeds, moss and feathers. At the bottom of the nest, was a great quantity of moss, was a piece of paper from the nest of the paper-making harp, and interwoven with all these were bits of newspaper.

Other vireo nests have yielded as many as a hundred black spider-cellar silks, a half yard of lace edging and even small snake skins.

Silenced Min. At a small social gathering recently the talk fell upon that somewhat well-known topic, mothers-in-law. One of the party, Mr. Z—, who is himself not the most amiable of men, indulged in a good deal of cheap sarcasm at the expense of the ladies in question, says London Tit-Bits.

"Nevertheless, gentlemen," he concluded, with a self-satisfying smile, "you will scarcely believe it, but the fact is I lived five years in the house with my mother-in-law and we never had a single quarrel. What do you think of that?"

"I think," said a dry old Scotsman who was present—"I think that it speaks very well for your mother-in-law, and Mr. Z— subsided, amid general laughter.

Living Music.

To move the body to the rhythm of the universe, andante, presto, fast or slow, keeping the accent steady and sure;

To use the voice in melodious speaking, with kind and gentle words, to stranger or to friend;

In all events of daily life and work, to resolve the discords, and to blend the moments into one harmonious whole;

A mind to set in firm the theme of life, announce the subject clear and true, and work it to satisfying close.

To find in music the soul's beauty—the measure of the song divine.

This is to set the days to music, and to be a symphony—Evangeline Close, in The Musician.

Accidental Discovery.

Bottled hen, rendered mellow by long keeping, was an accidental discovery. It was made by Alexander Newell, dean of St. Paul's in the reign of Queen Mary. Newell was suspicious to Bonner, and the latter had sent orders to apprehend him; but it happened on that day Newell was out fishing and in order to keep his beer cool had buried it in the back. Getting the tradition of his discovery, he felt for the bottle, and found it.

The bottle was found, and the hen was discovered to be a fine specimen of the breed. It was found to be a fine specimen of the breed. It was found to be a fine specimen of the breed.

PUBLIC ROADS

WORK OF COMMUNITY CLUBS

"Betsey Ann Association" of Brighton, Illinois, Does Much to Boost Little Village.

(By P. G. HOLDEN, Former Dean of Iowa State College.)

Community clubs play an important part in the development of civilization. They present the greatest of opportunities for the co-operation of town and country to the lasting benefit of each. They enable the residents of the town and those of the rural districts to get together and do things for the welfare of all that otherwise would not be done.

This showing of common interest in common interests brings the members of the community closer together, socially, industrially and economically.

In movements of this character every small town should feel vitally interested, for it can extend its trade territory many miles by uniting with the farmers in community welfare work. This work may take one form, or it may take another, but the life of any community organization depends upon having something to do that is worth while.

By the assistance of farmers, the town of Brighton, Illinois, a village of 600 people, has worked wonders in the way of community road building.

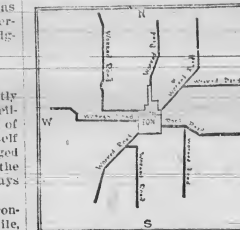

For ten years the people of Brighton have been joining hands with their rural neighbors in cooperative work; that not only has bettered the whole community, but has given the town a confidence and educational standing equal to that of many cities ten times its size.

The community organization, which has this united town and country, bears the unique title of "The Betsey Ann Association." It has given a community of 27 miles of excellent roads, a \$15,000 accredited high school, a \$5,000 community building and a neighborhood spirit which knows no township line or corporate boundary.

The Betsey Ann association is incorporated, but not for profit. It has 165 members, divided about equally between town and country, and its membership fee is only 25 cents. The executive committee consists of nine members, of which not more than five can be residents of the town.

The first improvement inaugurated by the association was the purchase of a fire bell. This bell was christened by a telephone operator, Miss Nell Flanagan. She gave it the name of Betsey Ann, which title has since passed to the association.

During the second week of August, each year, the association holds a two-day picnic in a large tent. Concerts, dramas and other forms of entertainment are given by local people from

Twenty-Seven Miles of Road Improvement Around Brighton, Illinois, Work of the Betsey Ann Community Association.

both town and country. These picnics are always attended by 2,500 or 3,000 people. All concessions are run by the association and all the profit goes into the treasury. About \$500 is realized each year. The money is spent in road improvement.

One year the association built a mile of rock road, extending eastward from the town limits. Each year a contract for draying at frequent intervals, nine different roads, for a distance of three miles from town, is awarded. Each member of the executive committee has charge of a three-mile strip. An appropriation of \$300 is annually made for this purpose.

These 27 miles of good roads are the visible results of the Betsey Ann association. They make it possible for neighbors to visit and to entertain the farm and make the interests of one the interests of the other. They have made possible the community building. They have made a really a high school, for both town and country children from which graduates are admitted to any college.

Wheels Used in Argentina.

Because some roads in Argentina have deeper dust in summer and deeper mud in winter than anywhere else in the world, the wagons used on them have wheels from six to eight feet in diameter.

Horticultural Advice

SLIGHT HOME FRUIT GARDEN

While No Less Important or Numerous They Are Overshadowed by Big Commercial Orchards.

With the growth of the commercial fruit interests of the United States the home fruit garden has been lost sight of. Only a few years ago the owners of home gardens not only led in the production of fruits, but were our authorities as to how and where to grow them. Today these gardens, while no less numerous or important, are overshadowed by the orchards where fruit is grown for commercial purposes.

While both the home garden and the orchard are essential to the good of the community, they bear very different relations to the fruit interests of the country as a whole. The home garden is always the forerunner of commercial development, and even in those localities where climate and soil conditions are adverse to conducting such industries on an extensive scale the home fruit garden of the enthusiastic amateur is certain to be found.

All the success attained today by the only 600 people, has worked wonders in the way of community road building.

For ten years the people of Brighton have been joining hands with their rural neighbors in cooperative work; that not only has bettered the whole community, but has given the town a confidence and educational standing equal to that of many cities ten times its size.

Strawberries and Currants Between Grapevines.

were the propagating grounds from which sorts of the highest quality and greatest commercial value originated. The inhabitants of this country are notably a fruit-eating and fruit-growing people. Notwithstanding this, however, fruit culture has grown to be classed among the specialties, and few persons who consume fruit are actual growers. The possibilities in fruit culture upon residential areas have been very generally overlooked, with the result that many persons who own a city lot, a suburban home, or even a farm, now look upon fruit as a luxury. This can all be changed, and much of the land which is now practically waste and entirely unproductive can be made to give them a regular place upon the family plot of land and at the same time add greatly to the attractiveness of the plot and healthfulness of the diet. The home production of fruit stimulates an interest in soil and

have for natural objects which can only be created by that familiarity with them which comes through their culture. The cultivation of fruits teaches discrimination. A grower is a much more intelligent buyer than one who has not had the advantages of tasting the better desert sorts as they come from the tree. If every purchaser was a good judge of the different kinds of fruits, the demand for fruits of high quality, to produce which is the ambition of every amateur, as well as every professional fruit grower, would become a reality. But until some means of teaching the differences in the general public will continue to buy according to the eye rather than by the palate. The encouragement of the cultivation of the fruits in the home garden will do much toward teaching buyers this discrimination.

MAKE WALNUT GRAFTING WAX

Formula Given for Making Mixture That Thoroughly Heals Wounds—Apply With Brush.

Walnut grafting-wax is made as follows:

Five pounds of resin, one pound of beeswax, one-half pound of charcoal and one-quarter pound of raw linseed oil.

Melt the resin and out the beeswax into small pieces. When the resin is melted, add the wax and the charcoal and stir thoroughly. When the charcoal has been thoroughly mixed with the resin and beeswax, take from the stove and add the linseed oil. When this mixture cools it is a hard black cake.

For use in the orchard a piece large enough for the amount of grafting to be done should be cut from the cake and carried by hand. If the weather is cold or if there is a large amount of grafting to be done the grafting wax can be kept by putting the dish in a box of sawdust or straw.

When the wax is used it should be kept in a box of sawdust or straw.

When the wax is used it should be kept in a box of sawdust or straw.

When the wax is used it should be kept in a box of sawdust or straw.

FARM ANIMALS

PROPER PLACE FOR HARNESS

Box, Two by Three by Four Feet in Height, Is Good Size—Screw Hooks Make Good Hangers.

The next time a new set of harness is bought take a box and at it with doors so that it may be closed tight. Hang the harness in this when it

Handy Harness Box.

is not in use. It is a surprise how long it will look neat and stay in good shape when cared for in this manner. A box two by three by four feet high is a good size. Screw harness hooks make good hangers. A little box may be attached to the inside of the door for holding combs, brush, etc.—Iowa Homestead.

REMEDY FOR WORMY HORSES

Mixture of Nux Vomica, Gentian Root, Arica Nut, Salt and Arsenious Acid, Is Good.

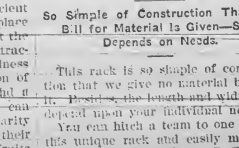

Worms in horses and colts are so common that if they do not thrive it is a good plan to give a worm remedy of some kind. A good mixture to use is: Two ounces of powdered nux vomica; four ounces of powdered gentian root; six ounces of powdered arica nut; four ounces of gentian root; and two drachms of arsenious acid. Mix them thoroughly. Give a heaping teaspoonful to every 250 pounds of live weight of horse morning and evening for about ten days. The medicine may be mixed with ground feed or sprinkled over dampened oats or corn.

Little or no bulky feed should be given the horse during the treatment. If too much feed is given the medicine is not strong enough to supply the worms and cause them to loosen their attachments to the lining of the digestive tract. Also, the bowels should be kept open so that the worms will be passed before they recover from the effects of the medicine. A well-salted bran mash will generally insure such action.

UNIQUE FEED RACK MOVABLE

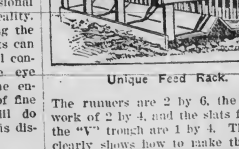

So Simple of Construction That No Bill for Material Is Given—Size Depends on Needs.

This rack is so simple of construction that we give no material bill for it. Besides, the length and width will depend upon your individual needs. You can hitch a team to one end of this unique rack and easily move it.

Unique Feed Rack.

The runners are 2 by 6, the frame-work of 2 by 4, and the slats forming the "V" trough are 1 by 4. The plan clearly shows how to make this feed rack.—Farmers Mail and Breeds.

PLAN FOR FATTENING HORSES

Boiled Barley Not Necessary, as It Can Be Done With Oats and Bran—Best to Use Hay.

It is not necessary to feed boiled barley to horses in order to make them fat. Because the fattening could be done with oats and bran, with possibly the addition of a few shovels, as recommended for the mares. In fact, the same method of feeding as was recommended for the mares would answer very well for this purpose, but it would be necessary to feed grain more liberally, and it would be better to use hay instead of straw.

REMEDY FOR CHOKED ANIMAL

White of Egg Poured Down Throat by Means of Long-Necked Bottle—Will Prove Efficacious.

For an animal that has choked on an apple, potato or turnip feed the white of an egg into a long-necked bottle, but the length of the neck as possible in the animal's throat, elevate head and gently compress the throat. It will bring up the throat and may be used to get rid of a severely choked animal in a few minutes.

For County Attorney.

N. F. RIDDELL is a candidate for County Attorney of Boone County, subject to the action of the Democratic party at the primary election Saturday, August 4th, 1917.

For Sheriff.

L. A. CONNER, of Burlington precinct, is a Democratic candidate for Sheriff of Boone county, subject to the action of the Democratic party at the primary election Saturday, August 4th, 1917.

B. L. CLECK, of Union precinct, is a Democratic candidate for Sheriff of Boone county, subject to the action of the Democratic party at the primary election, August 4th, 1917. Mentor Martin to be his deputy if he is elected.

For Assessor.

HARRY W. RILEY of Union precinct, is a Democratic candidate for Assessor of Boone county, subject to the action of the Democratic party at the primary election, August 4th, 1917.

J. S. CASON, of Walton precinct, is a Democratic candidate for Assessor of Boone county, subject to the action of the Democratic party at the primary election, August 4th, 1917.

BOONE F. ROGERS of Bellevue precinct, is a Democratic candidate for Assessor of Boone county subject to the action of the Democratic party at the primary election August 4th, 1917.

For Superintendent.

J. C. GORDON, of Walton precinct, is a Democratic candidate for Superintendent of Schools in Boone county, subject to the action of the Democratic party at the primary election Saturday, August 4th, 1917.

For Representative.

W. P. CROPPER, of Bullittsville precinct, is a candidate for the Democratic nomination for reelection to the office of County Representative in the next General Assembly of Kentucky, subject to the action of the Democratic party in Boone county at the primary election, Saturday, August 4, 1917.

For Jailer.

CHAS. A. FOWLER, of Burlington, is a candidate for Jailer of Boone county, subject to the action of the Democratic party at the primary election Saturday, August 4th, 1917.

JOHN C. WHITE is a candidate for Jailer of Boone County, subject to the action of the Democratic party at the primary election August 4th, 1917.

R. M. WILSON, of Constance precinct, is a candidate for Jailer of Boone county, subject to the action of the Democratic party at the primary election Saturday, August 4th, 1917.

For County Clerk.

W. R. ROGERS is a candidate for reelection to the office of Clerk of the Boone County Court, subject to the action of the Democratic party at the primary election August 4th, 1917.

W. F. BRADFORD, of Florence precinct, is a candidate for clerk of the Boone County Court, subject to the action of the Democratic party at the primary election August 4th, 1917.

For Justices of the Peace.

The Recorder is authorized to announce the following as candidates for Justices of the Peace in Boone County, subject to the action of the Democratic party at the primary election Saturday, August 4th, 1917.

District No. 1—Burlington and Bullittsville precincts—E. J. Aylor.

District No. 2—Petersburg and Bellevue precincts—Win. Stephens.

District No. 3—Carlton and Hamilton precincts—Chas. Wilson.

District No. 4—Union and Beaver precincts—Nash C. Tanner.

District No. 5—Walton and Verona precincts—John C. Bedinger.

District No. 6—Florence and Constance precincts—R. H. Tanner.

Wood stoves will be more in evidence next winter in these parts than in many years, if the price of coal keeps soaring. People can head off to a considerable extent the high cost of fuel by clearing out fence corners and hollows and using the heavier end growth for fuel. Two purposes will be served from an economic standpoint—there will be more grain for stock and a saving in fuel expense.

FORTY YEARS AGO TODAY

Items Taken from the Recorder of July 5th, 1877

Joe Goss, the prize fighter, was fined \$250 in the Kenton Criminal court, Monday.

A vote will be taken in August on the proposition to erect a work house for Boone county.

The Democratic Convention held Monday split and Rouse and Conner are both candidates for the Legislature.

Eastman-Rouse.

Cards are out announcing the marriage of Violetta Ironfield Rouse, of Florence, to Robert Carnes Eastman, of Madisonville, which took place at the home of the bride's parents, Mr. and Mrs. E. O. Rouse, on the Burlington pike, June 27th at 2:30 p. m. Miss Rouse, who is a girl of rare charm and loveliness, descends from two of the oldest and most prominent families of Boone county. She is a granddaughter of the late Eli and Nancy Little Rouse. On her mother's side she is of "Blue blood," her mother being born in the British Isles. She was graduated with honors from the Covington High School in the class of 1911, and is accomplished in many ways.

The groom, a young man of good standing, was born in New York, has spent the greater part of his life in and around Cincinnati, and has been connected with the Proctor & Gamble Co. for a number of years, where he met his bride.

Because of the brides opposition to much fuss and ceremony, the affair was a very quiet one indeed, her wishes being carried out in detail. Only her father and mother and grandfather, Mr. John Bentham, Sr., were present to represent her many relatives. The Rev. J. J. Rouse, of whose church she is a loyal member, officiated. The groom was attended by his widowed mother.

The bride was dignified in a church-traveling suit and hat to match, very much in keeping with her ideas of plainness and simplicity. Her gloves were of extraordinary interest, she being the fourth bride to wear them, they having been worn by her mother on her wedding day.

Mr. and Mrs. Eastman have a large relationship and hosts of friends whose well wishes follow them into the future. After a brief honeymoon they will be at home to their friends, for the present, with the bride's parents.

A big Red Cross meeting will be held at Florence Fair grounds next Saturday, at which every auxiliary in the county will be represented, each auxiliary being entitled to three delegates. There are now about 80 members of the Red Cross in this county, and a drive for a membership of 1000 by next Saturday is being made with every flattering prospect of success.

Can goods will be practically off the market by 1918 and that farmer who does not put away his winter supply of beans, potatoes and other supplies must take the consequences. The wise man with plant and prepare for the scarcity that is sure to come.

The Erlanger Fair will be held this year August 22 to 25th inclusive, and it will be bigger and better than ever.

Sunday School Picnic.

On Saturday, June 22nd, a very delightful day was spent by the people of Bullittsville and surrounding neighborhoods when they attended the picnic given by the Bullittsburg Sunday School.

After meeting at the church at ten o'clock, the time was pleasantly spent in games on the church lawn. The first event in the morning was a Peanut Hunt for the primary class.

Next was a Peanut Hunt for the Intermediate Department, in which George Hayes won the prize for having found the greatest number of peanuts.

The following a Sack Race for the boys in which Davis Gaines was the winner.

One of the most amusing events was a Sack Race for the men in which Mr. E. V. Randall came out victorious.

At noon a bountiful lunch of sandwiches, pickles and pie was served on the new tables just completed for the church by Mr. E. A. Martin.

After lunch a Peanut Race for the ladies furnished much amusement. The main event of the day was a game of baseball between the members of Mr. W. C. Cropper's B. B. team, and the Young Men's Club, taught by Mr. E. A. Martin.

The line-up of the first nine was, George B. base; Ben Snow, 2d base; H. H. Hayes, short stop; J. W. Campbell, right field; V. W. Gaines, left field; E. Y. Randall, center field; Jonas Stevens, catcher; Charles W. Riley, pitcher.

Those who played on the Young Men's team were, Will Gray, pitcher; Will Fogle, 1st base; W. Bruce Campbell, 2nd base; Milton Richey, 3d base; Albert Pettit, catcher; Penn. Dalton Dunlay, short stop; William Gray, left field; Marlon Ghines, center field; Elmer Clifford, right field; Hulman Hayes, umpire.

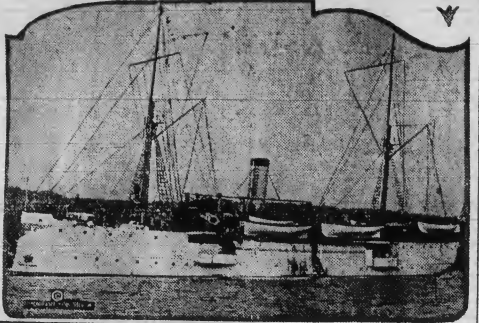

Two games were played, the score in the first game being 6 to 4 in favor of the Men's Club, and 10 to 9 in favor of the Young Men's club in the second game.

The Sunday School extends its thanks for the treat of peanuts given by Mr. Harry Stevens. Those in attendance pronounced the day quite a success.

God Will Spew Us Out If United States Fails.

Rev. T. W. Barker.

"If Uncle Sam fails to strike hard and do his best, this war will be murdering men five years from now, but it will close before 1919 if we meet the demands—if we do not 'bit' said T. W. Barker, pastor of the Methodist church, Brooksville, Ky., in a striking address, filled with patriotic ardor, which he delivered before his congregation Sunday. The sermon in part was as follows:

"The conservation of food is upon us. We can not escape it. There must be no waste until the war is over. Why does the United States have to conserve the food supply? The answer is plain. She is in war with the greatest and best prepared nation on earth and a world famine confronts us.

"We remained neutral too long. Had this nation met the demands upon her three years ago, we would not now be embarrassed as we are and the whole world would have been better off. I have written four articles on this war and I have the same opinion now I had in the beginning. We were forced into this war.

"Had we remained neutral longer the whole world would have condemned us and God would have frowned upon us. God put us in this war, and it is as clear to my mind as mathematics, that Jehovah calls on Uncle Sam to save the world, from Hohenzollern, Hohenzollern, from autocracy and to establish democracy.

"Yes, we are saving the nations of the world morally, spiritually and politically. Had we stayed out of this war, we would have been like the priest and levite who left their brother among thieves on his way to Jericho.

"Germany had been preparing a world conquest since 1870. No thinking man can read Bernhardi's book and have a doubt left concerning Germany's plan. We were forced into this war for humanity's sake as certainly as we were forced into the war with Spain in order to liberate Cuba and the Philippines. Now we are to redeem the world. Yes, Uncle Sam is responsible, and it is well that he assumes this responsibility. This war will end not only with the liberty of Serbia, Romania, Greece and all the Balkan States, but the great nations will be free. Austria-Hungary, Germany and Russia will all be free republics.

"Planting more is wise, but we must get back to God. There is no hope for Germany, she preaches a world conquest. All her universities and her great scholars were preaching and teaching infidelity. These are facts. They have been tearing the Bible to pieces for 100 years.

"There is no hope for France, the nobles of nations from Voltaire until the world war France has been poisoned with infidelity. But very little hope for England—she, too, let go of God. These nations must be and will be swept by a cyclonic scourge. It must be, and it will be.

"Never brought on this war. They brought it on themselves. Jehovah calls on these United States to redeem them. It will be said, 'the angel—Curses be these United States, curse ye bitterly the inhabitants thereof; because they came not up to the help of Jehovah.'"

"Men and women, hear me, it is back to God or a calamity. 'If Uncle Sam fails to strike hard and do his best this war will be murdering men five years from now. If Uncle Sam fails, then God will spew us out of his mouth and the whole world will go back 200 years. Let the whole nation repent in sack cloth and ashes and then come up to the help of the Lord against the mighty.'"

"It would be a burning shame if after we save all we can and give all we can, 60,000,000 of bushels of grain should be worse than wasted in a public auction some lumber roofing, windows and various other articles too numerous to mention.

"Miss Violeta Rouse, the accomplished daughter of Mr. and Mrs. E. O. Rouse and Robert Eastman of Cincinnati, were married at the home of the bride, Wednesday of last week. Rev. Royce officiating. Immediately after the ceremony they left for Louisville. They have a host of friends who wish them a happy and prosperous life.

"Mrs. Lena Stewart is very sick with malaria fever. She has been transacting business in Rising Sun, Friday. Mrs. Lewis Ryle made a business trip to Cincinnati, Saturday.

"Bernard Walton and family were Saturday and Sunday guests of their brother Elbert Wilson and wife. Mr. and Mrs. W. W. Grimley spent Saturday and Sunday with her sisters, Misses Nannie and Ella Hance.

"Rev. Lacey Christian minister of Walton, delivered quite an interesting sermon at South Fork Sunday evening. He was the subject being 'Are You Married?'

"Z. T. Miller came up from Louisville to spend a few days visiting his parents, Mr. Jeff Miller and wife, returning home Sunday evening accompanied by his son, Lloyd, who had been here visiting several weeks.

"Miss Katie Pate, a very charming young lady of near Owensboro, and Beulah Stahl, a popular young girl of this place were quietly married at her home Sunday June 22nd. They have a host of friends who wish them much happiness in life as they glide down upon the sea of matrimony.

"A Red Cross Society was organized at South Fork Sunday evening. Edgar C. Vining was a member of eleven. We are expecting in a short time to extend our membership some where between 30 and 100 working members. Miss Florence Rouse, Elbert Wilson and wife will represent this society at the meeting at Florence Fair grounds Saturday.

ERNEST GRANT.

(Aurora Bulletin.)
Many friends in Aurora and vicinity have heard with real regret of the death of Ernest Grant, a well known resident of Grant, Landing, Ky., which occurred at his home on Thursday morning, June 21, 1917. Mr. Grant had been a sufferer from heart trouble for many years and his death was not entirely unexpected to his friends.

The deceased has passed his entire life in Boone county, and in early life attended the public schools in Aurora. He was one of the most substantial men of Boone county, and his farm of four hundred acres is one of the finest in this section. Mr. Grant was a genial and lovable personality, and his circle of friendship was limited only by his acquaintance. The Grant home has ever been noted for the open-handed hospitality dispensed there. Mrs. Grant, who before her marriage was Miss Lillian Arnold, of Bellevue, Ky., being as truly a Kentuckian in that respect as her husband. Many persons who have gone to the Landing on pleasure excursions, have cause to remember the kind treatment received at the hands of Mr. Grant, who always made the visitors welcome and allowed them the free use of his premises for pleasure purposes.

The home life of Mr. and Mrs. Grant was of a particularly beautiful character, their union being characterized by great congeniality of tastes and harmony in their expression, and visitors to the home could not but be impressed with the happy quality of the domestic atmosphere.

Mr. Grant was an adherent of the Swedenborgian religious belief and a member of the church of that denomination. Mr. Grant was the prime mover in the work of securing the gravelled roads in Boone county, which has been of so much value to the people of Aurora and vicinity, and has been interested in many other movements for the general betterment of the community.

Surviving the deceased are his wife and one daughter, Miss Frances, also two brothers, Dr. Edward Grant and Dr. Horace Grant, both of Louisville, Ky.

Funeral services in his memory were conducted at the home at 2:30 o'clock on Saturday afternoon, by Rev. Edgar Riley, pastor of the Christian church, of Burlington, Ky. Interment was made at Petersburg.

In the county court Monday Mrs. Lida Peel was appointed administrator of Cynthia Kelly, deceased.

Mrs. Fannie Sullivan was recommended for a position as being the widow of the late Robert Sullivan, a Confederate soldier.

Congressman A. B. Rouse held down first, those successfully in a game of base ball last Saturday in Washington, D. C., between the Democratic and Republican members of the House, at which time was realized for the Red Cross Democrats 23, Republicans 21.

That James Mitchell is the best down first, those successfully in a game of base ball last Saturday in Washington, D. C., between the Democratic and Republican members of the House, at which time was realized for the Red Cross Democrats 23, Republicans 21.

Personal Mention

J. D. Moore and wife, of Big Bone, are on an extended visit to the fair west.

Emerson Crisler, of Cincinnati, was a Sunday guest of his sister, Mrs. Samuel Adams.

Joshua Rice, of Bellevue, was a business visitor to Burlington one day the past week.

Mrs. Sarah Carpenter and granddaughter, Miss Beatie Baldon, are visiting relatives in Aurora.

Richard Utz, who was taken seriously ill, suddenly, one day last week, is considerably better.

Miss Graham Roberts, of Walton, was the guest of Misses Sallie and Lizzie Rogers last week.

Mr. and Mrs. Elmer Kirkpatrick and children, were guests of Mrs. Brenda Garnett, of Hebron, Sunday.

Mesdames Emma V. Rouse and Robt. W. Rouse, of Florence, were guests of Mrs. Eliza Rouse, Tuesday.

Dr. Henry Adams, wife and child, of Washington, D. C., are guests of his brother, Samuel Adams, and wife.

Mrs. Sarah Gayle Furnish, of Covington, is the guest of her grandparents, Mr. and Mrs. Joe C. Revell.

Charles White was in Burlington, Monday, the first time for many months. He is improving slowly.

Mrs. W. L. Riddell has gone to Fairview, Texas, to visit her brother, James Pace, who is dangerously ill.

Mesdames N. W. Carpenter and Ceil Gains, visited Grover Snyder and wife of Madison, Indiana, last Sunday and Monday.

Mrs. Everett Walton and daughter, Mrs. C. W. Ellis, of St. Louis, Missouri, are guests of Mrs. Walton's mother, Mrs. Lucy Cloud.

Robt. Allen, Nathan Smith, Mrs. Fannie Sullivan and Mr. and Mrs. Geo. L. Smith, of Hathaway, were guests at John White's, Monday.

Miss Mary Thompson returned last Wednesday after a week's visit with Mr. and Mrs. George C. Kreylich, of Idlewild neighborhood.

G. M. Riley, of Dayton, Ohio, was in town, last Monday, and met many of his old friends in this county. He is carrying his age admirably.

Rev. J. S. Steers, of Dry Ridge, was a guest of Misses Sallie and Lizzie Rogers, last Friday. Mr. Steers is a candidate for State Senator in the Bracken, Grant, Pendleton district.

Mesdames Elmer Beull, of Dayton, Ohio, and Norris Riddell and E. J. Aylor, were guests of M. L. Riddell and wife, a few hours last Saturday evening, James Aylor bringing them over in his auto.

Miss Emma Rice, of Covington, is the guest of Mrs. Geo. L. Rouse, near town, having spent several days with Mr. and Mrs. R. S. Cowen, her uncle and aunt.

Mr. J. B. Sanders, who purchased of G. R. Kennedy, the farm on the Pike above Florence and known as the Wood Carpenter farm, was in Burlington last Monday and kind the Recorder's list of readers.

Lancaster.—Hundreds of lambs are being shipped from here to the Cincinnati market. A number of them were bought months ago at prices ranging from 1 to 11 cents per pound. Local shippers are paying 15 cents per pound for extra good lambs.

DEVON.

Mrs. Brenda Garnett entertained several last Sunday. Miss Jessie Gordon will entertain the C. E. Social Saturday night.

Samuel Aylor and Miss Thelma Aylor have improved since last writing.

Mrs. James Kelly and Mrs. Howard Kelly and son, were guests of Mrs. Iva Riddell, Saturday.

Dra. Hafer and Walton have vaccinated over three hundred cattle the past week to prevent Black Leg.

Hazel Walton, of Dayton, Ohio, arrived here Saturday evening to be the guest of his brothers about two weeks.

RABBIT HASH.

Karl Rouse and family, of Burlington, were visiting in East Bend, Sunday.

Hugh Stephens and family and Hubert Ryle and family made a trip to Walton Sunday.

Wheat harvest has begun here and while the acreage is small the yield will be good.

R. M. Wilson candidate for Jailer was here Friday shaking hands with the voters and renewing old acquaintances.

Omar Hodges and wife entertained the young folks, Saturday night, with a dance which was largely attended.

R. M. Wilson was on the market at Cincinnati, Friday, with a lot of cattle. He reported the market very bad that day.

C. G. Riddell, Chas. Wilson, Lee Stephens, Jim Wilson and Herman Ryle went to Cincinnati, last Sunday to see the ball game between the Reds and Pittsburgh, making the trip in Herman's automobile.

About half a crop of tobacco has been planted in this neighborhood. Many farmers say their plants did not get large enough to plant while there was a season and they planted their land in other crops.

The ground in the north end of the county has been thoroughly soaked twice the past week, and the potato growers there are counting on a very big yield.

Union defeated Big Bone last Saturday 8 to 7, and the Saturday before the Flying Dams defeated Union 11 to 6.

Woolper will play two games at Union July 7th.

Big Bone will play at Union July 7th.

Gunnpowder base ball team will play Limaburg at W. H. Rouse's next Saturday afternoon.

For Sale—Platform spring wagon in good shape and good survey and set double harness. Jas. Day, Burlington, Ky., R. D. 1.

FLICKERTOWN.

A nice shower fell here Sunday night.

J. E. Smith visited Gaines Bros. Sunday.

R. J. Akin and family dined with B. F. Akin and wife, Sunday.

Henry Brock and wife were Sunday guests at Cam White's.

Perry Brock and family visited Elbert Sullivan, Sunday.

Ben Hensley called at R. S. Shinkle's Saturday night.

Jas. Snyder and family were Sunday guests at Stephen Gaines.

Finn Bros. and Herbert Ruce went to Big Bone Springs Sunday.

Pigg Bros. visited their sister, Mrs. Snow, at Bullittsville, Sunday.

J. M. Thompson was here Saturday moving some of his lamb purchase.

Willis Smith and wife entertained the young folks with a party, Saturday night.

Mrs. Lewis Sullivan and granddaughters visited at Cleves, Ohio, Saturday and Sunday.

Mrs. Sarah E. White, Pearl Brady and two daughters, Sarah and Hazel, visited this scribe, Saturday and Sunday.

PETERSBURG.

Stuart Berkshire left for El Paso, Texas, last week.

Miss Alina Chambers is visiting her grandmother here.

Miss Margaret Hughes is visiting her sister Mrs. Earl Walton.

Mr. and Mrs. E. L. Helms and family spent Sunday afternoon in Hillsboro.

Miss Wood, of Louisville, has been the house guest of Mrs. O. S. Watts for several weeks past.

An account of the Petersburg celebration of the Fourth of July will appear in next week's Recorder.

A large audience enjoyed the play and different sketches presented on Bryant show boat, last Wednesday night.

Misses Alice Walton and Margaret Terrill, of Erlanger, were the guests of Mr. and Mrs. Hubert Walton one day last week.

At the present time the Red Cross Auxiliary in Petersburg has eighty-nine members. We hope to secure at least 100 by July 4th.

Our young folks have been on the beach at the Aurora ferry several times in the last two weeks and have enjoyed the bathing very much.

Misses Agnes Thompson, Aline Chambers, Henry Mathews, Norris Berkshire and Albert Stephens were guests of Miss Alice Walton at her country home near here, last Thursday evening.

Misses Thelma Lyons, Ruth Snyder and Agnes Thompson, Oliver Geisler, Henry Mathews, Aline Thompson, Karl Botta and Albert Stephens visited Split Rock Sunday afternoon. Crowds from Aurora and Lawrenceburg spent the day there.

UNION.

All are sorry to hear of the death of Aunt Nettie Clarkson.

Mr. and Mrs. Ned Rice gave the young folks a party, last Saturday night.

Miss Adella Atterkirk, one of our most independent young farm girls, was in the city shopping, Saturday.

The Ladies Mission Society of the Baptist church, Union, Ky., met on June 28th at Mrs. Joe Myers. The subject, "Christian Education," under the leadership of Mrs. J. A. Huey was profitably discussed.

Mrs. Sarah Felthaus, Secretary.

GUNPOWDER.

Bert Clore purchased a Ford machine last week.

Mrs. P. J. Allen spent last Sunday here with her parents.

Robt. Snyder and family visited her parents, J. W. Rouse and wife, last Sunday.

Robert Tanner has his new barn about completed and ready to receive his crop of hay.

H. H. Clore and wife, and Mrs. Shelly Tanner were shopping in the city, Friday of last week.

Spencer Rouse had his team on the road several days last week hauling logs to Erlanger for shipment.

Louise Tanner and family, of Grange Hall neighborhood, were guests of her parents, W. E. Utz and wife, last Sunday.

Next Saturday at 2 p. m., the Council of Hopeful church will sell a public auction some lumber roofing, windows and various other articles too numerous to mention.

Miss Violeta Rouse, the accomplished daughter of Mr. and Mrs. E. O. Rouse and Robert Eastman of Cincinnati, were married at the home of the bride, Wednesday of last week.

Immediately after the ceremony they left for Louisville. They have a host of friends who wish them a happy and prosperous life.

IDLEWILD.

Mrs. Sallie Byar of Mason county, is the guest of her brother Mr. J. S. Asbury.

Mr. and Mrs. E. Y. Randall and children spent Sunday near Union with their kinswoman Mrs. Perry Aylor.

Mrs. Ennis Barrett, of Lawrenceburg, was the guest of her grandson, Mr. R. E. Grant, Sunday.

Misses Alice Walton and Margaret Terrill, two charming Erlanger girls, were guests of relatives here, last week.

Mrs. Robert Grant entertained a number of the small folks Friday afternoon in honor of Miss Lucy Lee Grant's birthday anniversary.

Miss Nannie P. Burkett, Mrs. W. M. Rangel and Mrs. B. L. Norman, of Union, were Sunday guests of UMR, and Mrs. Ben S. Houston.

Mr. Stewart Berkshire and Miss Elizabeth Burdick were married in Rising Sun, Tuesday evening, June 26th, at the home of the bride's mother, Mrs. Leonard Gibson. Mr. and Mrs. Berkshire left at once for their home in El Paso, Texas.

CAPE FOR KIDDEE

Adopted as Summer Wrap Even for the Little Girl.

Extra Military Effect Given by Soldier-like Looking Buttons Used on Collar and Belt.

Even the kiddies are wearing capes. The little model shown in the sketch is made of navy blue gabardine, with collar, armhole edging, belt and bottom finish of gaudy red taffeta. As an extra military note a very soldierly looking brass button is used to fasten the collar and serve the belt in a similar manner.

Every little girl needs a summer wrap, and surely now that capes have been adopted as the favorite mode of

Military Cape for Small Girl.

mothers and grown-up sisters there seems to be no reason at all why the younger member of the family should not insist that she, too, have one, says a writer in the Washington Star. The cape is an ideal spring and summer wrap, as it gives all the warmth and protection ordinarily required, and can be slipped on over the flimsiest of frocks without marring the frock as a coat with sleeves would.

Many capes developed for adults show set-in vests or inside sections, with loose flowing outer parts. This arrangement, however, would not be satisfactory for the smaller models. To make a cape comfortable and just right for the little girl, at the same time giving it an unusual style touch so it isn't merely one of the stereotyped Red Riding Hood affairs, this little cape is cut off at the waistline back and front and fullness let in by means of plaits.

To make this cape for a girl of six or eight years two yards of material 36 inches wide will be required. If desired, the cape may be lined throughout with the red, and this is recommended if the trifling additional weight is not objected to.

NEW TRIMMING FOR CUSHIONS

Use of Tassels, Not Only at Corners, but All Over Pillow, is Novel Idea in Trimming.

Did it ever occur to you to trim a cushion with tassels? Yet that is what an exclusive decorator has done—not just tassels at the corners, but tassels all over the pillow. The cushion was covered with an old-fashioned changeable taffeta in old rose and tapestry blue, a material and two colors which are well combined in decorating at present. The tassels are carried out of the color scheme by being made of blue and rose silk threads. They were attached to the pillow top at a distance of about six inches apart.

One could make such a pillow very easily at home, choosing a round shape and attaching the tassels only at the edge. The tassels can be made from embroidery twist in the colors wanted by looping the thread to the proper length, binding it off at the top with a lot more of the same silk of the proper color or a dull gilt braid and cutting the loops at the bottom.

MAKE OLD PETTICOATS NEW

Detachable Flounces Also Enable One to Have an Underskirt to Match Every Dress.

Decidedly practical are the tailored petticoat flounces which will give a new lease of life to the underskirt whose upper section is in good condition but whose platings have become frayed or shabby.

The latter may be removed and the detachable petticoat flounces put on. They are made with a drawstring adjustable to the old petticoat or to the new. In width they measure about two yards and in depth about nine inches. According to one's preference the detachable flounces are to be had in chiffon, tulle or crepe.

For the knobabout petticoats there are flounces of satin or percale in a variety of colors so that by merely changing the flounce to match the tone of the dress one may have, to all intents and purposes, several petticoats by merely possessing several flounces.

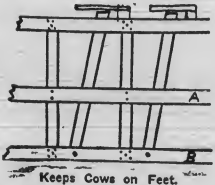

DAIRY

PREVENT COWS LYING DOWN

Iowa Man Has Practical and Inexpensive Device Attached to the Immovable Stanchion.

In the summer or spring, or at other times after rains, the yards around the barn are muddy. The cows are driven into the barn preparatory to milking. They are fastened in the stanchions. The result is that the floors become dirty and dusty. The mud comes off the feet and adheres to the platform on which the cows stand. Again, it is not infrequent for a cow to lie down on the dirty platform, and another cow to urinate on that cow's tail. It is a rare thing that two or three cows out of ten will not lie down before you are ready to milk. To prevent them from lying down for an hour or more while you are milking, is the object of the device here illustrated, writes J. N. Muncey.

of Buchanan county, Iowa, in Wallace's Farmer. It is inexpensive, unpatented, easily made, and practical. It is a labor-saver. It frequently saves the milkster from a swat across the mouth with a dirty tail.

"A" is a fence board, which may be nailed or bolted or temporarily attached to the immovable stanchion. It should be placed just high enough above "B" so that its upper edge just touches the lower edge of the cow's neck when she is standing. The same or a similar device may be used on the patented swing stanchions, I think, though I have never tried it.

If you use it in winter, be sure and put a sign of warning at the head of your bed, so that at no time will the poor cows be compelled to stand up all night long. It is an advantage to clean all the udders at once, and when they are clean and ready for milking, a man dislikes to have any one of the cows lie down and get her tail in the urine and her udder in the dirt or manure; and when she does get up she'll swat both cows next to her, and you frequently have to clean all three.

PROTECTION FOR MILK CANS

Heavy Blanket, Dipped in Water and Wrapped Around Receptacle, Keeps Out Much Dust.

The only way to have cream reach the creamery as clean as when it left the farm is to protect the can. This is best done by the use of a heavy blanket, kept for that purpose, dipped in clean water and wrapped around the can so as to completely cover all but the bottom. Dust will sift through a dry blanket quite rapidly.

The cream can, even if protected from dust, should, if possible, be kept shaded during transportation to the creamery.

If the creamery managers and butter makers would insist that patrons protect their cans the grade of cream would be greatly improved, the cans would look better and the labor of washing before returning them to the patrons would be greatly reduced.

STALE MILK CAUSES SCOURS

Pails and Utensils Used in Feeding Calves Must Be Kept Clean to Avoid Diseases.

Old or stale milk often causes indigestion or scours. A calf is better off to miss a feed than to have a feed of sour milk. Pails and utensils must be kept clean.

A good rule is to keep the calf pails as clean as the milk pails. The hand separator on the farm makes it possible to get the milk to the calf fresh, warm, and sweet.

Calves be raised on skim milk where cream is raised by gravity, but more difficulties are experienced.

GET FAMILIAR WITH HEIFERS

Handling of Young Animals in Advancement of Freshening is Necessary in Minds of Dairywomen.

The best plan is to get your heifers, handle them so they are familiar with your presence. They soon become docile and will follow their caretaker around to be rubbed and handled, and all the kicking, timid, shy tendencies leave them.

The handling of the heifer in advancement of freshening period is a necessity, in the estimation of many of our best dairywomen and cow owners.

Lived Among Indians Many Years

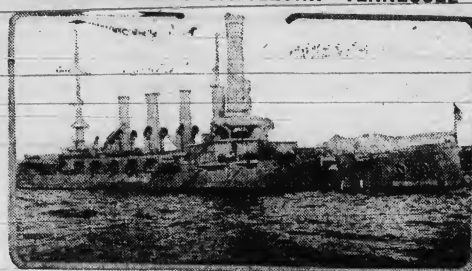

JOHN KILHAM, CALLED BY THE INDIANS "KOLA," (GIVEN ILLUSTRATION)

The Old West is passing. Within this year Buffalo Bill and Captain Jack Crawford have passed to the Happy Hunting Grounds. The Indian, the Cowboy, the Bison and the unfenced plains belong almost to by-gone times. All true Americans believe that the history and traditions of the picturesque West should be preserved. There is no one better prepared to preserve these romantic and thrilling narratives of the American Indian and the boundless West than John Kilham, Kola-Wash-ta (Good Friend), who lectures on the third day of the Wellfare Chautauqua. He is not a Wild West show, but he does in a graphic way show the Wild West. His entertainment, or lecture, consists of thrilling stories of personal experience among the Indians, varied with interesting descriptions that convey

information not found in books, and followed by a remarkable series of impersonations of famous Indian chiefs. In these impersonations, Mr. Kilham uses many articles of dress and ornament actually worn in life by these chiefs and given him by them personally. Young and old will not only be entertained and amused, but instructed as well. His costumes, relics and curios will be on exhibition after the entertainment and the audience is invited to come to the platform for close inspection and instruction. He will exhibit game bags, saddle blankets, pipe bags, scalp, war, ghost and medicine shirts, elkhorn saddles, seamless fibre bags, porcupine quill work on leather (now a lost art), and dozens of other very wonderful things, most of them presented to him by famous Indian chiefs.

Burlington Chautauqua July 16, 17, 18, 1917

UNITED STATES BATTLESHIP TENNESSEE

THE KITCHEN CABINET

About the cheapest thing in the world is happiness, but lots of rich people can't afford to buy it.

MORE ABOUT OMELETS.

The white of the eggs if beaten until dry will make a less tender omelet than one in which the eggs are beaten until light then carefully mixed with the yolks.

Adding a tablespoonful of water (cold) for each egg is also an improvement as to texture over milk. A most delicious omelet may be made using blanched almonds in the omelet pan and cooking them until brown before the omelet is turned. Serve with hot maple syrup.

Spinach Omelet.—Put half a cupful of cooked spinach in an omelet pan with a tablespoonful of butter, when thoroughly hot pour in a three-egg omelet, season and cook as usual. French juice may be substituted for water and peaches served in and around the omelet. Serve with hot peach sauce.

Orange Omelet.—Beat the yolks of three eggs with three tablespoonfuls of sugar and the grated rind of an orange with three tablespoonfuls of the juice. Add the stiffly beaten whites of the eggs and pour into a hot buttered pan. Sprinkle with powdered sugar and when well cooked on the bottom set in the oven to cook on top.

Mushroom Omelet.—Fry a few thinly sliced mushrooms in butter and spread them over a plain omelet just before folding it. Serve a few mushrooms finely chopped and cooked in butter. White sauce to accompany the omelet.

Asparagus Omelet.—Break three eggs in a bowl, add a little white pepper and salt and beat them slightly, add two tablespoonfuls of cream, thick and sweet, and pour the mixture into a frying pan containing hot butter. With a spatula rapidly stir the egg from all parts of the pan, letting the uncooked portion run down to be cooked in its turn. As soon as the mass begins to set it is ready to fold. Have a few spoonfuls of tender tips of asparagus cooked and hot, well seasoned with butter and salt. Spread this over the omelet, fold and serve at once.

Any vegetable or fruit may be served with an omelet, choosing the kind most enjoyed.

THE KITCHEN CABINET

Happiness is the only good. The place to be happy is here. The time to be happy is now. The way to be happy is to make others so—Robert Ingersoll.

WAYS OF SERVING FRUITS.

Too some ripe even sized strawberries in French dressing to marinate. Serve them on lettuce leaves with chicken or lamb.

Strawberry Gateau.—Make a round sponge cake and when cold scoop out the inside and cover with a pink icing, then fill the center with whipped cream and strawberries that have been cut up and sugared to taste. Pipe high and garnish with small ripe berries. Make a handle of angelica and serve at once.

Strawberry Syrup.—Take six pounds of strawberries, two pints of water, two ounces of tartaric acid and the sugar needed. Dissolve the acid in the water and pour over the fruit. Let stand twenty-four hours, then strain off the juice without crushing the fruit. Add or three cupfuls of sugar to every pint of juice and when boiling hot, bottle and seal. This syrup may be used for fruit drinks, pudding sauces and sherbets.

Cherry Mousse.—Cook together a pound of cherries and one-half cupful of sugar. Put two tablespoonfuls of cherry juice into a basin, add the yolks of two eggs and cook over water stirring until creamy; dissolve one and a half tablespoonfuls of powdered gelatin with a half cupful of cherry juice, add it to the yolks, with one-half cupful of whipped cream and the whites of the eggs beaten stiff and a few drops of red color. Pour into small wet molds lined round with paper; decorate with whipped cream and pistachio nuts.

Fruit Salad.—Take a cupful of strawberries, one-half cupful of ripe raspberries, half a cupful of stoned cherries, three bananas, one-half cupful of red currants, one-half cupful of white currants and two tablespoonfuls of chopped coconut. For the salad dressing, cook together a half cupful of water, six tablespoonfuls of sugar, and a cupful of fruit juice, when thick as syrup remove and chill. Pour over the fruit and sprinkle with chopped coconut just before serving.

When serving a cold drink, to make the glass more attractive roll it in hot water then fill with the cold drink.

SOLDIER'S CALLING.

One of the numerous overseas and cocksure sayings which the war has made famous is the assertion so freely made that "modern war is all a matter of machinery; individual initiative counts for little," this being amplified into an argument that service at the front made no more drafts on personal courage than the operation of a steam shovel, which it somewhat resembled, plus a certain amount of noise, says Boston Herald. The impression seemed to be that high-power, long-range guns and rifles made warfare so remote and impersonal an affair that the difference between a coward and a hero had largely disappeared.

This is the estimate that has been made by the military authorities in Washington.

The first phase of the great task of raising an army under the universal service system has been completed. More than 1,000,000 men have actually been enrolled, and, taking into consideration the number of men of registration age who are being added either in the army or navy or in the national guard, the estimates made by the census bureau upon the basis of population have been attained. All of the men subject to the law have responded to the call.

The second phase of the problem of raising a national army will begin as soon as the president has approved regulations which have been drafted by a special board under the direction of the provost marshal general. In many respects it is the more complicated and difficult portion of the task. Approximately 4,800 boards one for every 30,000 of the population of the country are to be appointed to pass upon the exemptions, to decide who shall be subject to the call of military duty and who shall not. Boards of appeal for every federal judicial district must also be designated by the president.

When this has been accomplished the preliminary draft will be made by the boards, which are to act in the capacity of courts of first instance in passing upon exemptions. The preliminary draft which is now before the president and the secretary of war. As soon as it is approved and the word is given to the machinery will be set in motion grinding out the first increment of 500,000 men for the new national army.

For fear of confusing the 9,500,000 men who will be subject to the call, General Crowder has been unusually careful not to discuss for public consumption the system that has been devised. He himself has a very clear idea, he said, of what is to be done, but before instructions are to be sent out to the boards, it is necessary to have a clear understanding as to the rules and every chance for complication is to be eliminated. The rules are not to be made as specific as human ingenuity can make them, so that there will be no possibility of charges of discrimination in the selection of the men who will take up arms with the first 500,000.

Military authorities estimate that the first draft will be for considerably more than that number. In addition to the national army, the regular army and the National Guard will probably be brought up to war strength. There also must be reserve training camps which may be drawn upon to fill vacancies in the active ranks. It is the number to be selected, therefore, that is important. It will be nearer 750,000 than five hundred thousand.

Placing the number of men registered at 10,000,000, it is estimated that 5,000,000 will be rejected for general reasons; of the remaining 5,000,000, 2,000,000 will be rejected for physical disability, according to the standards now prevailing for recruits.

There will remain, therefore, subject to duty at any time 3,000,000 men, who will be ready at any time to begin their military training. If 750,000 are to be called, a man who has registered and is physically fit and cannot claim exemption, has a little better than one chance in three to go into active service.

It is probable that a certain proportion of those who are certain to be rejected are foreign subjects, those who are generally physically unfit, and in general persons employed in the public service, mariners, workmen in arsenals, armories and at the navy yards. The regulations will designate specifically how these general exemptions are to be made.

Those who do not fall within these general exemptions must appear before the exemption board in their district and set forth their claims. The mere fact, for example, that a man is married and has children will be no bar to his selection for service. He must demonstrate that he contributes to the support of his family. The village idler whose wife takes in washing will probably have difficulty in convincing the board that he should not go into training.

The call will be made by the president for a certain number of men sufficiently large to make it certain that the necessary number for active service will be obtained after eliminations for one cause or another.

The board which is now devising the schedule by which the men may be chosen has experimented

ONE CHANCE IN THREE

Of Being Called to The Army—How National Army Will Be Raised Under Universal Service System.

Washington, July 12.—Of nearly 9,500,000 men of military age who have been registered in accordance with the selective draft law, those who are physically qualified and are not exempted will have one chance in three of being called to the colors this year.

This is the estimate that has been made by the military authorities in Washington.

The first phase of the great task of raising an army under the universal service system has been completed. More than 1,000,000 men have actually been enrolled, and, taking into consideration the number of men of registration age who are being added either in the army or navy or in the national guard, the estimates made by the census bureau upon the basis of population have been attained. All of the men subject to the law have responded to the call.

The second phase of the problem of raising a national army will begin as soon as the president has approved regulations which have been drafted by a special board under the direction of the provost marshal general. In many respects it is the more complicated and difficult portion of the task. Approximately 4,800 boards one for every 30,000 of the population of the country are to be appointed to pass upon the exemptions, to decide who shall be subject to the call of military duty and who shall not. Boards of appeal for every federal judicial district must also be designated by the president.

When this has been accomplished the preliminary draft will be made by the boards, which are to act in the capacity of courts of first instance in passing upon exemptions. The preliminary draft which is now before the president and the secretary of war. As soon as it is approved and the word is given to the machinery will be set in motion grinding out the first increment of 500,000 men for the new national army.

For fear of confusing the 9,500,000 men who will be subject to the call, General Crowder has been unusually careful not to discuss for public consumption the system that has been devised. He himself has a very clear idea, he said, of what is to be done, but before instructions are to be sent out to the boards, it is necessary to have a clear understanding as to the rules and every chance for complication is to be eliminated. The rules are not to be made as specific as human ingenuity can make them, so that there will be no possibility of charges of discrimination in the selection of the men who will take up arms with the first 500,000.

Military authorities estimate that the first draft will be for considerably more than that number. In addition to the national army, the regular army and the National Guard will probably be brought up to war strength. There also must be reserve training camps which may be drawn upon to fill vacancies in the active ranks. It is the number to be selected, therefore, that is important. It will be nearer 750,000 than five hundred thousand.

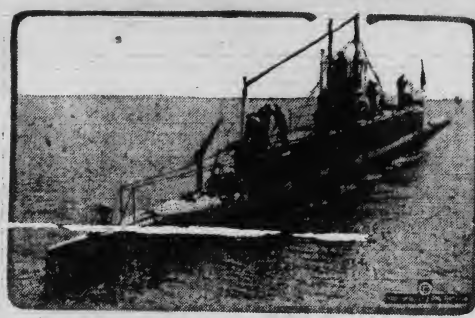

Placing the number of men registered at 10,000,000, it is estimated that 5,000,000 will be rejected for general reasons; of the remaining 5,000,000, 2,000,000 will be rejected for physical disability, according to the standards now prevailing for recruits.

There will remain, therefore, subject to duty at any time 3,000,000 men, who will be ready at any time to begin their military training. If 750,000 are to be called, a man who has registered and is physically fit and cannot claim exemption, has a little better than one chance in three to go into active service.

It is probable that a certain proportion of those who are certain to be rejected are foreign subjects, those who are generally physically unfit, and in general persons employed in the public service, mariners, workmen in arsenals, armories and at the navy yards. The regulations will designate specifically how these general exemptions are to be made.

Those who do not fall within these general exemptions must appear before the exemption board in their district and set forth their claims. The mere fact, for example, that a man is married and has children will be no bar to his selection for service. He must demonstrate that he contributes to the support of his family. The village idler whose wife takes in washing will probably have difficulty in convincing the board that he should not go into training.

UNITED STATES SUBMARINE G-1

With various devices for drawing by lot. It is probable that this phase of the draft will be made a public ceremony, which will be held at the capitols of the States or some other public place. If the registrant has run the exemption gantlet he will present himself before the authorities for physical examination. If rejected he will be dismissed, but a record of his case will be kept. If accepted, he will be sent to one of the six training camps. An effort will be made to send him to the one nearest his home, or held in readiness to enter one of the training camps which will be drawn upon to fill gaps in the ranks.

Army officials do not minimize the difficulty of the intricate task ahead of them. The President is wrestling with the problem of selecting the exemption boards, so that there will be no basis for charges of favoritism or political preference. The normal board probably will be the same as that which conducted the registration. There may be many exceptions to the general rule. An effort is being made to obtain men only of the highest character for the application boards.

General Crowder and his assistants are very careful not to disclose even the most general features of the system upon which they are working. They fear that if the word is not to be given out until every detail has been pondered carefully, and when it is given there is to be no retracing of steps.

MILK PRICE TO DOUBLE

If Prohibition Amendment Passed, Say Queen City Producers.

At a meeting of the Queen City Milk Producers' Association held in Turner Hall, Cincinnati, last Thursday night, it was announced that the price of milk would be increased from 40 to 80 cents a gallon if the prohibition amendment to the United States constitution is passed. The price of butter and cheese would be increased proportionately. The producers say that their stock at the price they pay for the following telegram was sent by the Association to President Wilson:

"The members of the Queen City Milk Producers' Association in pressing our emphatic protest against the passage of the prohibition amendment to the food control bill in the United States Senate, the passage of such an amendment would deprive us of cattle feed, now obtained from foreign sources, would consequently reduce the supply of milk; a reduced quantity of butter and cheese and an increase in the price of milk for the families of the country. With such feed eliminated the supply of fattened cattle also would be greatly reduced. I do not expect the amendment would mean the sacrifice of our investments and would impoverish many families."

Gasoline at 6c Promised.

Washington, July 12.—The gasoline problem is solved. I can increase the gasoline production of the United States from 3,000,000,000 to 9,000,000,000 gallons a year, can furnish gasoline to the government at six cents a gallon," Secretary of the Interior, Charles D. Ickes, today announced. "Cherry, scientist and inventor of Kansas City, submitted to Secretary Daniels a sample of gasoline produced by a new process he has discovered with the report of a committee of scientists that examined the process at the Cherry plant at Coffeyville, Kansas, and gave it their o. k. Cherry submitted alternate proposals to the Secretary of the Navy."

First, that the government commander crude oil, build the apparatus required by his process and permit him to go ahead, giving him a profit of one cent a gallon on all gasoline produced. Out of the profits he would guarantee gasoline to the government at six cents a gallon a year, would repay the government all the expenses incurred in the building of the plants.

Second, that the government pay him a flat rate of ten cents a gallon for gasoline and assist him in securing the materials with which to build his plants.

WAR WAITS ON AMERICA

France and England Mark Time Until Our Troops Arrive.

(Review of Reviews)

Remember that the British have now to their credit a long series of local successes. They have in the last year captured at least 75,000 German prisoners, probably nearly 100,000, with a loss of less than 10,000 prisoners themselves. They have taken between 400 and 500 guns without losing a single piece, and they have driven the Germans back at all points when they have attacked. They have established an artillery superiority frankly conceded by the Germans.

And here, for the present, it would seem the western situation must stand. It is waiting, it believes, for the arrival of sufficient American troops to give the Allies the general rule, the numerical superiority in reserves necessary to bear the great losses incident to a general, sustained offensive like the Somme. The French not less than 750,000 killed and wounded, and the Germans between 600,000 and 700,000.

To me the present pause means that the French and British High Commands have definitely laid all thought of a victory—a decision in 1917 and mean while from local attacks designed to improve their positions and drive the Germans out of high land and down to the plain, as at Arras and Ypres, to await another year—end America.

This means that the British are satisfied with the submarine menace will not win the war. It means that they are convinced despite great losses, it will not bring starvation this year or next, but that the Allies believe they can face the hazards of another year of war better than the colossal expense in lives and money which would be required this year, with Russia out and America unready.

Unless all signs fail, American troops will be in the battle line when the real great advance begins. The arrival of Gen. Pershing last month is the first sign. We have been promised by the Administration that an American division will follow soon.

But it will be a case of many divisions, not a few. For this, any useful part next summer, at least half a million men on the western line. And if the war goes into 1918, no one seems probable. We shall need more. For this, I think, the French and British will wait. France, looking to the future, to the continued existence of the nation, can make no more great sacrifices. Even the British are beginning to face the problem of men. When we come to the end of the war, all share, but until we come neither will fare to make great payments in human life for small gains.

FORTY YEARS AGO TODAY

Items Taken From The Issue of The Recorder of July 12th, 1877

The Covington Light Guards left Saturday for Carter county, the seat of war with house thieves.

The Mexican government announced its readiness to cooperate with the United States in punishing and preventing raids on the Texas border.

Passenger train will be in operation on the Southern Railroad in a few days.

Kentucky has harvested a fine crop of wheat that will be worth millions of dollars to the farmers.

The jail is being repaired, the roof to be renewed.

Fourth of July was pay day on the Burlington and Bellview pike, and the men came to town to drink and fought all day.

Some Henderson county farmers have planted 150 acres of tobacco.

Verona and Union precincts will vote on local option at the August election.

Leonard Sandford and Miss Anna Patterson were married last Saturday.

A nice shower of rain fell here last Friday night.

FISCAL COURT NEWS

Contracts Let for The Reconstruction of Several Important Roads.

Verona and Beaver People Cut The Price of Stone.

At the term of the fiscal court held on the 3rd inst., all the members and officers of the court were present. The contract for the reconstruction of the Walton, Verona and Gallatin county line road was let to C. J. Helms. The road will be water bound the entire distance. The citizens of Verona precinct agreeing to furnish the water on the road for water binding the road from Verona to the Gallatin line. The citizens of the neighborhood through which this road passes, in order to get the road agree to furnish stone on the road at 40 cents a perch. The bid of Harris Myers for the reconstruction of the Richwood, Beaver and Gallatin county line road, was accepted, and in order to get work done within the amount of money available for same, rock will be furnished on the road at 40 cents a perch.

The bid of Harris Myers for the reconstruction of the Florence and Union pike was accepted. The specifications for the reconstruction of the Petersburg, Redwood and Dry Creek pike will be reformed in order to bring the work within the limit of the amount of money available. But if the road is reconstructed from whom it will be necessary to secure the stone, will have to modify their price considerably from that at which they are holding stone, as was done by the Verona people.

OUR TROOPS AT THE FRONT

A great deal of discussion is going on in this country in regard to the disposition of the American troops when the time comes that they shall take their place on the front. The discussion is in regard to the identity of the person or persons from whom they will take orders.

A good deal depends, no doubt, upon the section of the line our soldiers are assigned to. It is understood from Washington that the soldiers under Gen. Pershing will be a "separate unit." This means, of course, that General Pershing will be in command of all the American soldiers. He will be given a part of the line to hold, or to attack, from and he will dispose of the various American brigades and regiments within that section. Moreover, he will have entire charge of the disciplining of the American troops, reductions and promotions as he sees fit.

It is, however, plain that General Pershing and the Americans will not conduct the war on their own. Under the agreement between Great Britain and France, General Petain, of the French army, and thirteen French divisions are at the front. General Petain, now ever, works in harmony with Gen. Haig, of the British army, or otherwise, under Gen. Haig, would be removed by the War Council of the allies, which meets once a week in Paris. General Haig is supreme in the British lines, and it is not probable that he receives many "orders" from Petain. The two communicate with each other daily, and agree as to a program.

For the time at least it is reasonably certain that Gen. Pershing will exercise much less authority in the field or in command of the French and British commanders. In the first place, our troops have not yet got to the front. In the second place, they will for many months be inferior in numbers to those of the other nations. But there is very little danger of a clash. The American troops will be a part of the line held by either the British or the French, which we are now. After that they will be given the same opportunity of service and distinction that was accorded the Canadians, and that is all we want.—Louisville Post.

Jay Walking.

"Jay walking," of which no less a person than Mr. William H. Taft was accused in Cincinnati recently, is that form of pedestrianism which carries a person, pre-occupied with an untimely thought or an unhoped-for hospital call, across the street at any other place than the regular crossing. In the official language of the United States, a "jay" is a country bumpkin or a greenhorn, and by deriding persons who disregard the rules of safety by crossing a street at the corners as "jays," the West gives a new and descriptive title to a large class of citizens who are impatiently courted in publicity in the morgue and hospital records.

A Pleasant Day.

A large number of young people and several old ones assembled at Hartwood Luns on the afternoon of the fourth inst., where they enjoyed themselves dancing and listening to the music of the band of night approached. It was a delightful afternoon for the people of the town and the young people were very happy when the time came for the dance.

A Week's News

Sold Pair of Fine Mules.
William Carpenter sold a pair of mules, 4 and 6 years old, to a Bourbon county buyer a few days ago, for \$400. They were handsome animals.

Collecting Taxes Again.
Sheriff Cropper opened his 1917 tax collecting campaign at Big Bone on the 5th inst. The collections were limited and the opening was not a roaring success.

Cemetery Fence Being Put Up.
The iron fence which is to be put up at the old cemetery north of town arrived Monday morning, and everything being in readiness for putting it up it will soon be in position.

Will Soon Have Electric Lights.
The poles for the electric light system in Florence have been erected and the wires will soon be strung, and when the lights are turned on "Stringtown On The Pike" will be very much on the map.

Flag Raising.
The Boone County High School Alumni will have a flag raising on the school campus next Saturday afternoon. An iron flag pole 85 feet long will be raised from the top of which Old Glory will float. An appropriate and interesting program has been prepared for the occasion.

Barn Destroyed by Lightning.
A large hay barn about two miles southeast of Burlington, and the property of James M. Barlow, of Pleasant Valley neighborhood, was struck by lightning about 11 o'clock last Friday night, and together with about 15 tons of hay, a lot of tobacco sticks and a few farm implements, was burnt.

Fine Crop of Onions.

Chester Hood, who lives at the William Pope place out on the East Bend road, has a very fine crop of onions for which he expects to realize a good fat sum. He planted ten bushels of sets last spring, which makes by odds the largest crop of that vegetable ever cultivated in that neighborhood.

Grant-Allen Marriage.

Dr. J. M. Grant and Miss Lou Allen, both of Petersburg, were married at the home of a friend of the bride in Ft. Thomas at 3 p.m., Wednesday, Tuesday. After the ceremony the bride and groom left on a bridal trip to Chicago. The doctor and his bride have the best wishes of a host of admiring friends.

Bank Make a Good Showing.

The eleven bank reports issued by The Recorder this week show that these institutions have an aggregate deposit of one million and thirteen hundred and eighty-eight and ninety-five cents, which indicates that this, God's garden spot, is well supplied with the root of all evil.

Only Two Have Opposition.

There are contests for Justice of the peace in only two districts in this county. In the Union-Beaver district, Noah Tanner, incumbent, is opposed by N. W. Burkett, of Union, in the Walton-Verona district, John C. Bedinger, incumbent, is opposed by W. H. Blessing, of Verona precinct.

Very Quiet Fourth.

The fourth of July was a quiet day in Burlington. No fireworks of any kind were indulged in and every departure from the usual order of the day was a picnic held by the local lodge, the Order of Knights of Pythias, the members of the order, headed by a brass band of a dozen pieces, paraded the streets previous to the beginning of the program in James E. Smith's woods. The attendance at the picnic was not as large as was anticipated. Everything passed off quietly.

He Wanted Cabbage Plants.

A well known citizen of Burlington, who has the reputation of being somewhat of a humorist, was short on cabbage plants and chanced to be traveling along a road not far from town, when he noticed a small stand of rape, when he called to the proprietor, "If I had a few more cabbage plants I'd give any body all they want, and I'd get them for nothing." The proprietor, who was a little surprised when told the plants were not cabbage.

He Killed the Robber.

L. S. Beemon, of the Limaburg neighborhood, set a guinea hen on 14 eggs, and in a few days the eggs had three had disappeared. He visited the nest again, in a few days, and the other three eggs had disappeared. He began to investigate and not far from the nest he discovered a hole about five feet in the ground. He contacted the hole and discovered the remains of a guinea hen. Mr. Beemon said that he had killed the robber.

One Year

Edwards' Garage

A. M. EDWARDS, Proprietor.

On Dixie Highway, Walton, Ky.

Open Day and Night with a Competent and Experienced Man in Charge.

Everything modern and up-to-date. Full equipment of everything for the automobile public. Fire proof building. Charges Reasonable.

Renching Garage and Residence.

YOUR PATRONAGE RESPECTFULLY SOLICITED.

WALTON DEPARTMENT.

D. B. WALLACE, Manager.

Hand your news items to Mr. D. B. Wallace at the Walton Equitable Bank and Trust Co.'s building. He is also authorized to receive subscriptions and collect other accounts.

Dr. B. K. Menefee of Covington, was the guest of his many friends here Sunday.

Sheriff Cropper, of Burlington, was here Monday shaking hands with his many friends.

Kirkley Norman of Latonia, was the guest of his nephew A. C. Norman and wife, near here Monday.

Bruce Wallace spent part of last week and this in Grant county, near Folsom, guest of Mr. and Mrs. C. H. Young.

J. C. Miller, the affable and efficient cashier of the Equitable Bank and Trust Co., spent Tuesday in Cincinnati.

Charley Fowler, of Burlington, candidate for Jailer of Boone county was here in the interest of his candidacy recently.

D. B. Wallace returned Monday after a pleasant visit with Mr. and Mrs. C. H. Young on his farm near Folsom, Grant county.

Raymond Watson, of Covington, was the guest of his grandparents Mr. and Mrs. James Watson, near here, part of last week and this.

Monday Rev. W. B. Garrett moved his household effects to the new Methodist parsonage, which is receiving the finishing touches.

A tent meeting will be held on the John Bagby farm now owned by Samuel Spradling, in Kenton county, near the Lexington Pike, July 15th.

Mrs. B. K. Sleet, of near here, who is in a Cincinnati hospital, is getting along very nicely and there are hopes of her early return home to her family.

A. M. Edwards has had the electric sign hung across the street at his garage to attract the motorists at nightfall. It is quite an attractive advertisement.

Charley Watson, son of Mr. and Mrs. James Watson, of near here, who is in the regular army, is now stationed at Fort Sam Houston, Texas, at Fort Sam Houston.

Mrs. Arthur Dean, of near Verona, spent part of last week and this at the bedside of her sister Mrs. B. K. Sleet, who is a patient in a Cincinnati hospital.

Mr. and Mrs. W. T. Loomis, of Independence, are spending the week here taking care of the home of Mr. and Mrs. Jno. L. Vest while the latter are enjoying a visit through Canada Northwest.

Those who have recently enlisted in the service of their country from this section are: Hill Johnson, Charles Campbell, Daniel W. Bedinger, Elmer Roberts, Thos. Northcutt.

The Gleaners Class of the Walton Christian church Sunday school were nicely entertained by the Misses Stella and Fannie Seymour at their country home last Saturday afternoon.

At the services of the Christian church Sunday school members came into the church; two by confession and four from other churches. This makes ten additions to the church in the past few weeks.

Mr. and Mrs. L. E. Carroll and daughters Misses Marie and Lulu, Mr. Herbert Ragan, Mr. and Mrs. Dan Hoffman, Mr. and Mrs. F. Callen, Mr. S. O. Statton and family, of near Independence, enjoyed a very pleasant motoring trip through Ohio and Indiana, Sunday.

Mrs. Will Webster and two children, of Rushville, Ind., were here last week and part of this the guests of her sister Mrs. James Watson and husband, near here. They left the middle of the week for Dry Ridge for several days visit to relatives and friends before returning home.

A pension has been granted Mrs. Elvora Edwards, widow of the late S. L. Edwards, of twelve dollars per month, dating from January 24th, 1917, and allowed accrued pension that was due Mr. Edwards at the time of his death. The prompt allowance of the pension was secured thru the efficient work of our popular Congressman A. B. Rouse.

The corner stone of the Walton Christian church will be laid Saturday, July 14th, at 3 p. m. An appropriate program will be rendered. The Masonic fraternity will participate in the exercises. Dr. A. W. Fortune, of Lexington, will deliver the address. All the ministers and congregations of Boone and adjoining counties, the different denominations of Walton county and surrounding country and the church in general are cordially invited to be present for the patients and services and to inspire by money and greater efforts.

Hoa R. B. Brown, of Warsaw, Judge J. G. Tomlin and D. B. Wallace were visitors to Dry Ridge, July 10th.

Mrs. E. K. Sleet, who is undergoing treatment in the hospital in Cincinnati for an internal trouble is improving rapidly.

Jos. C. Hughes, of the Richmond neighborhood, enjoyed a pleasant visit to his brother George Hughes and family at Hume, Ill., last week.

Real Estate Agent Geo. B. Powers sold to Rev. D. E. Bedinger the house and lot in Walton, belonging to Mrs. Anna Hind, of Chicago, for \$1,800, possession given at once.

Dr. and Mrs. Guilford A. Mottier, of Indianapolis, Ind., spent part of last week here, guests of his sister, Mrs. D. B. Wallace. Mrs. Mottier is the private secretary of Mayor Bell of Indianapolis.

Robert W. Jones and J. Clifton Marshall, of Louisville, real estate men in Michigan, going to the Buick Motor Car Co., at Flint, Michigan, for two cars Mr. Jones had sold widely to Mr. Mayhugh drove through.

Dr. A. E. Chambers, of Texarkana, Arkansas, was here the first of last week visiting his brother, C. E. Chambers, of near here. Dr. Chambers enroute to Buffalo, New York, to attend the Supreme Grand Lodge of Elks, being a delegate or Representative from the lodge at Texarkana.

Joseph C. Hughes sold to Wm. Gilpin the farm of 77 acres he bought from J. C. Elyand, situated near Walton, the consideration being \$3,000, possession to be given at once. Mr. Gilpin is now living on the W. F. Moore farm in Kenton county.

Dr. J. G. Slater, of Ludlow, sold the home of R. B. Rouse, real estate agent, the two-story frame dwelling now occupied by Robert W. Jones, to Dr. G. C. Rankins, consideration \$5,000. Dr. Rankins will move to the property as soon as Dr. Jones can move into his new home.

The Walton Welfare Association met at the residence of the Secretary Miss Alpha Hance recently and elected officers for the various departments as follows: Red Cross Association, Chairman—Mrs. J. L. Vest; Vice Chairman—Mrs. F. Holloway; Secretary—Miss Louise Green; Treasurer—Geo. B. Powers; Recreation and Entertainment Department—Dr. G. Holloway; Chairman of Sanitation and Beautification Department—Judge Chas. Strother, Chairman; Parents' Teachers' Association—Mrs. Julia Adams-Rouse, Chairman; Children's Welfare League—Mrs. Geo. P. Nicholson, Chairman. The meeting was very enjoyable and was made particularly so by the genial host and hostess, Mrs. M. E. Hance, and their very lovely daughter, Miss Alpha, who devotes considerable of her time to matters of public utility. It produces excellent results, nevertheless at any task that will help the community.

Sunday was a day of enjoyment at the home of Mr. J. W. Stephenson, the occasion being the celebration of the birthday of his daughter, Miss Pearl, which occurred on the 14th inst. It was a surprise to her until several had been invited to the birthday party. Miss Pearl's friendly disposition and popularity as a school teacher has won for her many friends, 60 of whom were present on this occasion, viz: Mr. and Mrs. J. C. Robinson, Mr. and Mrs. S. H. Ambrose, Mr. and Mrs. J. T. Stephenson, Mr. S. Benson, Mr. and Mrs. J. Conrad, Mr. and Mrs. Albert Metzger, Mr. and Mrs. David Houston, Mr. and Mrs. Walter Wolfe and son, Mrs. L. E. Macrander and son, Chas. Lewis, Mr. and Mrs. James Watson and grandson, Raymond, Mr. and Mrs. John B. O'Neal and grandson, Lyle, Rev. and Mrs. O. H. Statton, Miss Annie Violet, Mr. and Mrs. Jas. Houston and sons, David and Howard, Mr. and Mrs. Vol. Delwick and son, Miss Etha Macrander, and Mrs. Chas. Moore and son Robert, Mr. and Mrs. A. B. Myers, Miss Graham Roberts, Misses Elizabeth and Sallie Rogers, W. Rogers, Mrs. and Mrs. Ed. Conrad, Miss Bessie and Viola Moore, Helen and Marjorie Stephenson, Messrs. Lenton Woolley, Hilbert Grimsley, Geo. B. Stephenson, Louis and Eli. Robinson, Stanley Conrad, Ralph and Walter Myers. Miss Pearl was the recipient of many useful presents. The afternoon was spent in games

VERONA.

Crops and gardens are suffering for rain.

Fried chicken and new beans are on the bill of fare here.

Dr. Stewart, of Frankfort will locate here for the practice of medicine.

New Bethel has called Rev. Eadie for full time for the coming three months.

Clem Adams, who had been staying with D. K. Whitson, returned to an Orphans' Home in Louisville, last week.

Mr. and Mrs. O. K. Whitson entertained the following guests last Saturday: Mesdames Pattie Carlisle, Nannie Callahan, Misses Pattie Callahan, Senora Fry, Mesdames Frank and Matthew Cleek.

The inter-county was bound road from Warsaw, Gallatin county, to Walton, this county, is assured, and the people of Verona predict deserve credit for having secured it, and are entitled to congratulations. It will prove to be a very important highway.

BELLEVUE.

Mrs. Sophia Clore is sick.

Capt. Ed Maurer spent Saturday with homefolks.

Garrett Dolph has about recovered from his recent illness.

Mr. and Mrs. R. A. Brady spent Sunday at H. D. Brady's.

T. Z. Roberts, of Middle creek, spent Sunday here with his sister, Mrs. Belle Casan.

Mrs. G. W. Sandford, of Burlington, spent Monday with her mother, Mrs. Belle Casan.

Mrs. Thos. Rice and children, of Burlington, spent Monday with her sister, Mrs. J. J. Maurer.

Mrs. E. J. Ryle and children, of Latonia, are guests of her parents, Mr. and Mrs. T. W. Cook.

Mrs. E. M. Benton, of Pennsylvania, is visiting her sister, Mrs. J. H. Walton, near Rabbit Hash.

J. W. Ryle and wife, Chas. Smith and wife, and Mrs. George N. Smith were Sunday guests at C. N. Smith's.

Ralph Casan and family, Carl Casan and sister, Miss Anna, spent last Sunday with Mr. and Mrs. Richard Marshall, at Harbors, Indiana.

Mr. and Mrs. Rogers have been organized here with Mrs. A. Rogers, president; Mrs. J. H. Walton, vice-president; Miss Flora Arnold, secretary; C. E. McNeely, treasurer.

RABBIT HASH.

Crops are needing rain badly.

Those who are fortunate enough to have wheat are enticed it.

Mrs. H. Stephens, who has been quite ill, is improving.

Mrs. Ernest Ryle and children, of Latonia, are visiting relatives here.

Mrs. E. M. Bouton, of Pittsburgh, Pa., is visiting her sister, Mrs. J. H. Walton.

The Ladies' Missionary Society spent a pleasant day, last Thursday, with Mr. and Mrs. C. E. McNeely.

Solon Ryle and wife and Mrs. J. H. Walton and two sons, went to Cincinnati, last Friday, shopping.

Mrs. L. D. Dorn, of Chattanooga, Tenn., is here to spend the summer with her sister, Mrs. Z. T. Kelly.

Quite a crowd attended the meeting of the church here, last Sunday. Bro. Wood and Mr. Goldborough, of Georgetown, were the speakers.

The church, M. J. of East Bend Baptist church, will give an ice cream supper at the K. of P. hall Saturday night, July 14th. Rev. Edgar Riley will be present and speak on the work of the Red Cross Society. Everyone should hear him, and we Rabbit Hash people should do our part in providing comforts for our boys who may have to go to front. Rabbit Hash is one of the precincts in the county that has not organized a Red Cross Society.

BIG BONE.

Everybody host Fraternal Day. An auxiliary of the American Red Cross Society was organized here last Thursday with 22 members. J. D. Moore, Jr., Chinn, Ernest Hughes, Vireo-Chinn, Elva of Chinn, Rep. to S. C. L. L. Ryle and J. D. Moore, Jr. Same will appear for installation July 12th.

The Junior of this place will give an ice-cream supper July 21st. All are invited to attend.

of tennis and croquet, while the lovers of music enjoyed the selections by Mr. Albert Metzger violinist and Mrs. Metzger, pianist. The singing by some was also enjoyed.

Saturday, August 4th, Meadow, of the First Ohio National Guard, in company with a sergeant and four privates, came out here in an ambulance for the purpose of securing enlistments of eligible young men. They went to Warsaw in the afternoon and returned here in the evening. After the short speech to the audience urging the necessity of all men of military age to enlist now as the need is so needed. He stated if they did not those who had registered would have to later on and it was much better to volunteer than be drafted.

Local Happenings.

Plenty of weeds in the meadows
Trimble county is harvesting a fine crop of wheat.

W. L. Kirkpatrick has sold the street in front of his store.

It began raining on a good old summer time fashion last week.

The farmers' drive on the weeds this month has been very destructive.

The cost of cement pavement has increased over what it was a year ago.

The Petersburg growers expect to have a fine crop of melons this season.

Better buy a season ticket for the Chautauqua which begins next Monday.

Chicken thieves have begun to display considerable activity in some quarters.

Two of the Erlanger boys who joined the army are now somewhere in France.

John W. Dye and Alma Emma Gatzke, of Hebron, obtained marriage license, Tuesday.

Not much doing in base ball in this county this year. None of the larger towns have teams.

Don't you know it will be a very short time until the Erlanger and Boone fairs will be here.

The fourth of July Red Cross meeting held in Petersburg was a big success in every way.

Rye harvest began last week. It is a larger crop in last year than in latter years than that of wheat.

The Welfare Chautauqua will begin in Burlington on Monday of next week for a three days season.

Reports that reach the Cincinnati market indicate that this will be the banner potato producing year.

Dennis Conway, of the Erlanger neighborhood, was in this neighborhood one day last week buying hay.

William Utz has sold that portion of the Burlington and Florence pike immediately in front of his residence.

The political drive that has been on in this county for several weeks has a little over three weeks in which to be completed.

There appears to be a large crop of young rabbits. They are calculated to relieve the most problem to some extent this winter.

Geo. Blyth was afraid to price his home to a would-be buyer a few days ago. The man appeared to be willing to pay a long price for it.

Tobacco has made slow growth so far this season, but tobacco is like a mule; you can never tell what it is going to do until it is done.

The plans for conducting the draft will be made public in a few days. It is a big job and its execution wants to be done in a way that is absolutely fair to all.

John Barnes was a caller at the Recorder office last Saturday. Mr. Barnes bought a farm near Burlington not long since, and has a very promising crop growing thereon.

The concrete section of the Covington and Lexington pike is now open to travel to the old State road that turned to the left at the top of the Willow Run hill and is known as the Amsterdam pike.

James Stephens was the guest of his son, Elijah, called on Burlington R. D. 3, the first of this week. Mr. Stephens has three sons who are subject to draft. He was an early Monday caller at this office.

The streets of Burlington are producing an abundant crop of dust this summer, which is very annoying to many of the housekeepers. If there was a market for the dust the town would have a splendid income from that source.

The Gunpowder base ball team defeated the Linaburg team last Saturday on the grounds of the former 8 to 9. Gunpowder pulled a sensational batting rally in the eighth inning, scoring five runs, which tied the score, and in the ninth one more was added which won the game.

Edgar W. Northcutt, a prominent young physician of Covington, has gone to Rochester, Minnesota, to take a private course in surgery under the Mayo Bros., who have an international reputation as surgeons. Mr. Northcutt is a Boone county boy and the people here should be proud of him.

T. J. Cody, of Kenton county, is a candidate for reelection as county commissioner. Mr. Cody has made a good official and it Boone county people had a voice in the Kenton county election they would all be for Mr. Cody in order that he might be continued in office to complete the good road work in which he has been the leading spirit in Kenton county.

3 Per Cent

Interest does not sound very big, but a certificate of deposit in this bank bearing this rate is a splendid investment, in view of the fact it is not taxable.

We pay the taxes on all money deposited with us, whether subject to check or interest.

PEOPLES DEPOSIT BANK,

James Will Ryle and wife, of Reech-Grove neighborhood, spent several days the past week, including the fourth, in Georgetown with Rev. George Smith and wife.

Dr. O. O. Dixon, of Richmond, was a caller at this office Monday. The doctor is kept busy ministering to those who are ill and know of his efficiency as a nurse.

Mr. James Hughes, of Oxford, O., spent the afternoon of the 4th with his cousin, Mrs. Eliza Rouse. Mr. Hughes is proprietor of the leading hotel of that place and also Mayor of the city.

Hoa A. A. Allphin and son Shet and wife, of Gallatin county; Mrs. J. G. Pinner, of Illinois, and W. G. Johnson and two grandsons, Chas. and Hughes Johnson, visited Mrs. Mary Hume last Sunday.

Geo. Blyth had as his guests, last Sunday, the Rev. and Mrs. W. L. and Private Ralph Robinson, all of Cincinnati. When children these young men used to spend the summers with Mr. and Mrs. Blyth, of Texas. In visiting friends in the

Hathaway neighborhood, Miss Edna taught school in this county before going to Texas several years ago, where she has followed teaching.

Edwin Duncan, who had been in Washington, D. C., several weeks preparing to take the examination necessary to entering Annapolis Military Academy, arrived at home last Friday. He had no information as to the result of the examination.

John Furlong, of Pt. Pleasant neighborhood, came over last Friday to spend a few days with his sister, Mrs. V. T. T. T.

Miss Mary Campbell, of Lexington, who first visited to Burlington since he was stricken last fall. His friends here are glad to see him looking so fine and able to get about so well.

MARY SPENCER JOHNSON

Mrs. Mary Spencer Johnson died Sunday afternoon at the home of her daughter, Mrs. Murray, in Warrensburg. She had suffered a paralytic stroke a few weeks before.

The funeral was held Tuesday morning at the Baptist church, the services being in charge of the pastor, Rev. Ferd L. Alexander, assisted by Rev. Edw. James and Rev. Hampton, of Warrensburg.

The pall bearers were grandsons, R. M. Johnson, Lillard Johnson, R. L. Miller, Frank Johnson, Frank G. Lobban and George Hill.

Mary Spencer Lillard, daughter of John P. and America Jack Lillard, was born in Kentucky March 31st, 1828. She was married to R. B. Johnson and to this union nine children were born, the surviving ones being T. I. Johnson of Kansas City, J. S. Johnson, of Oswa-

omie, Kansas, Mrs. Z. T. Miller of Holden and Mrs. J. V. Murray of Warrensburg; there are nineteen grand children and four great grand children. Mr. Johnson died in 1879. The family came to Johnson county in 1872, settling on a farm near Holden, which was five years later they came to Holden, which was the home to the last Mrs. Johnson had a revolutionary ancestor, Joseph Spencer from Virginia, a lieutenant colonel of militia. At the age of nineteen Mrs. Johnson joined the Baptist church and led a faithful christian life, in deed as well as in word, to the end.

Her husband is credited with being the founder of the Holden Baptist church; through all its early discouragements, he was the one who bore its many burdens, aided at all times by his faithful wife. No activity of this church was ever neglected by her. The last Sunday before her stroke she was in her accustomed place in the Sunday school. As to her chroniclers to state, not even her own kindred knew the extent of her benevolence. Her name is a blessed memory in many homes of the lowly. Her first two children were burned to death, and this tragedy had a marvelous chastening influence on her life. It made her resolve that she would never tell her own troubles, but having passed through this refining fire, she patiently listened to the woes of others, and from her deep fund of spiritual experience came the best of counsel and encouragement. She was a woman of firm convictions. She consulted her Bible, decided on her course of action and never swayed. A long and useful life, one devoted to the practical religion of the mother, of Galilee, has come to an end—Holden Progress, June 28, 1917.

WALTON.

Clifford A. Rouse, who has been visiting his parents, Mr. and Mrs. W. R. Rouse, has gone to Stone, Pike county, where he has a position with a large coal mining company.

Miss Hazel Fawcett, of Ellettsville, Indiana, spent the past two weeks here, the guest of Miss Lovina Edwards, with whom she attended the State University.

Judge and Mrs. J. G. Tomlin and children spent Thursday with her mother, Mrs. Belle Dickey, near Union.

Claud E. Harris, of Covington, and S. M. Billiter, of Williamstown, who have the contract for rebuilding the Lexington pike in this county, are pushing the work near Florence, and expect to have contract completed within a short period.

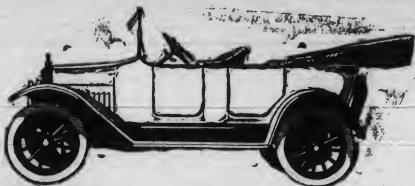

John L. Jones, of Lexington, returned last week from Kirksville, Mo., where he had been for several days.

Rev. B. V. M. of Lexington, Mo., who now occupies by Dr. Perkins, who will move to the property he bought of Dr. J. G. Sisker.

Mrs. C. Spencer Chambers has gone to Washington, D. C., to join her husband, who has a position in the War Department.

THE MAXWELL,

America's Greatest Low Priced CAR.

34 Horse Power.

Price, \$665 f. o. b. Detroit.

I want to tell the Boone county citizens why I have taken the agency for the Maxwell Car.

In the first place I traded the car I have been driving for some time for a Maxwell Car, not because I figured that I would handle this car, but because I wanted a nice, up-to-date car with all the modern equipment and at the same time have a car that would not cost me any more to operate than the one I had, after driving this car for several weeks I found the Maxwell Car comprises everything that any one can desire in an automobile, it is an exceptionally easy riding car, with all the equipment that comes on any car, it is finished very nicely with graceful lines, and I find the expense of operation actually less than the car I formerly owned.

After summing it all up I came to the conclusion at this is just the kind of car that the average man is looking for and I know if any prospective buyer will consider what he is getting in a Maxwell Car and the price he cannot help but choose this car, this is why I have taken the agency for the Maxwell Car for Boone County, arrangements has been made with Baker and Eddins Garage at Burlington to carry a full line of Maxwell parts and render service on all cars I sell free of charge for one year after purchase, so you will know when you buy a Maxwell your expenses are ended for one year.

If you are thinking of purchasing any kind of a car don't fail to let me demonstrate a Maxwell to you, you will be sorry if you don't.

W. L. Kirkpatrick,
Burlington, Kentucky.

"The Five Tires"

Today—tires cost less than ever

Your tires actually cost you less per mile today than they did a few years ago.

—provided you buy the right kind of tires.

In the first place, don't buy a nondescript tire that some dealer has a selfish price motive in selling to you.

Buy a tire with a name behind it—a tire, the quality of which must be so good that the reputation of a great Company is protected.

United States Tires, with the name of the largest rubber manufacturer in the world behind them, are safe tires to buy.

United States Tires are constructed under an exclusive time-tried vulcanizing process that is patented.

They are honestly built with the best materials that the markets of the world afford.

United States Tires
Are Good Tires

RBS Have All the Sizing North and West
But Make United States Tires Supreme

A Complete Stock of United States Tires carried by Eddins & Baker, Burlington, Ky.

A Rebel Veteran Reenlists

John Crider, of Long Branch, was in Burlington, Tuesday, and reenlisted in the Recorder's army for another term.

James Kirkpatrick and force put down a string of sidewalk for J. A. Adams and the Consolidated Telephone Company, and is putting down a long walk for Blaine Eddins this week.

Take Your County Paper, \$1.50

Only \$1.50 the Year

If Not Try It One year

SATURDAY MAY BE DAY

For Drawing of Names—First Draft To Take 670,000.
Washington, D. C., July 9.—Unofficially it was indicated today that 687,000 is the number of men to be selected for the first national war army from the millions registered June 5.
Probably twice that number of names will be drawn, as the number of exemptions to be allowed is estimated at 50 per cent.
Next Saturday is understood to be the date for the drawing, although no announcement has been made by the Provost Marshal General's office.

His Fliver Flickered

Last Thursday afternoon as Courtney Walton and R. C. Gaines, of Erlanger, were returning home from a fried chicken eating, a jolt with friends in Kildewild neighborhood, Mr. Walton's Henry went out of commission at G. T. Gaines' on the Petersburg Pike, and they sent in several distress calls by telephone before anyone they had visions of a hike to Erlanger which was not at all comforting as the distance is about nine miles.

Black Leg Among Cattle.

Dr. Thomas Hafer was in Burlington, Saturday, and reports black leg bad among cattle in Florence, Erlanger, Pleasant and Hebron neighborhoods, where over 600 have been vaccinated. Several cattle have died of the disease, all the carcasses of which have been burned. Cattle owners are very anxious about their stock in the neighborhoods above.

Has More Racers

Fred Morris, at the close of the Latonia races, last week, added another race horse to the list he had under his care. He has some very valuable animals in his charge which he is looking after very closely.

Has Had Good Rains

The northern part of this county was visited by a fine rain last Friday night. That part of the county has been particularly favored so far with good rains, which crops of all kinds have responded.

Messrs. Eliph Tanner and Wm. Goodridge, of Hebron neighborhood, were transacting business in Burlington, Saturday. Mr. Tanner was a great fox hunter until a few years ago, when age eliminated him from the chase, but when he hears a pack of hounds even now his ears prick up.

Some very enterprising individual in the east issued a series of bogus figures which were given out to the public as those representing numbers of the registration cards of the persons who had been drafted, thereby creating considerable talk.

Young chicks must be protected from sun stroke, so provide shade out of old door cloth or anything available. Put your male birds all in one pen and sell all you do not wish to keep for breeders next season.

H. Clay Castleman, 27, son of Dr. T. B. Castleman, of Florence, enlisted on the 4th inst., in the Ohio National Guards. He passed the necessary examination, and is liable to be called any day.

Mr. Renaker, a Bourbon county mule buyer, received several nice mules here last Saturday. Messrs. Pope, Kite Sullivan and Stephens, delivered the young animals.

Robert Rouse, agent for the Farmers' Mutual Fire Insurance Company of Boone County, dropped in Monday and swapped lies with the typists for a few minutes.

Geo. E. Rouse and F. A. Utz, Florence, suburban residents, are having their residences brightened up by a liberal use of paint.

Don't forget the Chautauque, which starts in Burlington on July 16, 17 and 18th. You will miss a rare treat if you fail to attend.

Persons bringing sows to my house for breeding must not leave them over night.
THOMAS RICE.

Jailor Adams was out early last Monday morning with a crew of men cleaning the weeds off the court house and jail yard.

In this issue county road bonds to the amount of one hundred thousand dollars are advertised for sale.

"Works of any kind were indulged in here on the Fourth, something very unusual in Burlington.

Don't put too many chicks on the same plot of ground. If gapes develop move flock to fresh ground.

Some are delaying the purchase of their winter coats, not believing the price will go down.

The assessors who list the property for taxation in 1918 will tackle a complicated piece of work.

A dust is getting bad and it is considerably worse in a lot of places. It does not rain, and it is being served up by merely blowing up some of the best.

Kentucky Crop News.

The following compiled by the Cincinnati Enquirer and published Monday, shows the condition of the tobacco crop in Kentucky:
Addie—Very good transplanting season. Early stand is good and outlook for fine crop seems very bright.

Allen—Weather cool and dry. Plants grow slowly, but were transplanted under favorable conditions.

Ballard—There was an unusually fine season for setting out tobacco, but there was a scarcity of plants.

Barton—Plants late. Season good. Bath—Conditions never better at a planting. Lots of rain and a good season all the time. Acreage slightly reduced.

Boone—Splendid season for tobacco, and some early plants look good. Bulk of plant beds were late. Slightly increased acreage this year.

Bourbon—Planting unusually late. Many beds need reseeded. Heavy rains held back the work in the fields. Acreage about same as last year.

Boyle—Good season for tobacco. Bracken—Plants are scarce and planting is late.

Ecklenridge—Cold season retarded growth of plants. Conditions good after first of June.

Caldwell—No trouble with plant beds and entire season has been very favorable. Crop set out early.

Galloway—Conditions are fine, and average yield is looked for. Campbell—Tobacco season not very good. Labor scarce.

Carlisle—Transplanting was a little slow, but the crop seems to have started off well.

Casper—Tobacco looks fine and there will be an increase here.

Clark—Season was excellent. Plants a trifle late. Cold weather delayed early setting, but crop looks good now.

Clay—Tobacco season good. Transplanting delayed a little by cold weather.

Christian—Conditions at transplanting were fine. Plants were a little scarce, but there will be plenty to set out the contemplated acreage.

Crittenden—Good season. Considerable trouble with the cut worms.

Cumberland—Season extra good. Prospects better than last year at this time.

Davies—Some complaint regarding planting season. Prospects how ever, are fair.

Edmonson—Condition of tobacco fairly good. Plant shortage complained of, but crop will be almost an average crop.

Fleming—Plants scarce. Yield will be close to that of last year.

Fulton—Planting season was not favorable. Too much rain.

Franklin—Tobacco season has been reasonably good. Plants were small and somewhat late.

Gallatin—Conditions very good. Garrard—Plants backward, but plentiful. Weather seasonable. Prospects good, but crop will be smaller than last year.

Now It's Playing Cards.

Entering the military service of his country in the time of war is required and extended to soldiers, render all ease and comfort and, when the necessity arises, to sacrifice even life itself. This is not enough for the host of hysterical reformers who are plaguing the country. They are demanding that he shall give up even the relaxation of the camp and adopt a life as arduous as that of the monks of La Trappe. Moralists and crank leaders are loudly protesting against the kindly disposed for placing in the comfort of the soldier the routine of the lives of our soldiers, it will be most difficult to sustain relative happiness among those who have gone forth to die for mankind!—Enquirer.

May it not be suggested that if these strange people are permitted to have their way in prescribing the routine of the lives of our soldiers, it will be most difficult to sustain relative happiness among those who have gone forth to die for mankind!—Enquirer.

The Fourth at Petersburg.

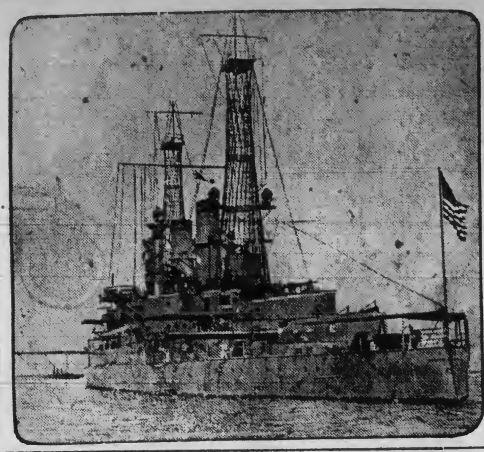

J. C. Boland, of Petersburg, was among the Recorder's callers last Monday. Mr. Boland says the 4th of July exercises surpassed anything along that line in the history of Petersburg. Music, oratory and field exercises afforded entertainment for an immense crowd of patriotic citizens who contributed liberally to the Red Cross fund, the money being thrown into the collection by ladies in the procession by several young ladies. The day's program was carried out to the minutest detail and the event is one of which the citizens of Petersburg are justly proud.

Big Sale of Hogs

W. A. Gaines sold 30 hogs, last Friday, that averaged 275 pounds, bringing him \$1,200.35. The highest price brought by any of the hogs was fifteen dollars and fifty-five cents per one hundred pounds.

The sun soon began to have its drying up effect on the mud.

UNITED STATES BATTLESHIP SOUTH CAROLINA

Public Sale.

As administrator of the estate of Cynthia Kelly, deceased, I will sell at public sale at her late residence in Bellevue, Ky., on

Saturday, July 28th, 1917

the following property:
4 shares of stock in Citizens Deposit Bank of Grant, Ky.
1 share Telephone stock.

All the household goods belonging to the estate of the deceased. The house and lot occupied by the deceased at the time of her death, and known as the Lizzie Lee property.

Terms of Sale—All sums of \$10.00 and under, cash; on sums over that amount a credit of nine months will be given, the purchaser to give note with approved security, except the bank stock which will be sold for cash.

No property to be removed until the terms of the sale are complied with.

Z. T. KELLY, Administrator of Cynthia Kelly, deceased.

Public Sale.

I will offer for sale at public auction at my residence near Waterloo, Ky., on

Saturday, July 14th, 1917.

The following property:
3 bay draft mares 1, 3 and 5 yrs. old.
1 yr. bay saddle and harness mare.
Fresh Jersey cow and calf; 2 Jersey cows will be fresh in two weeks.

Terms—12 months time will be given without interest, purchaser to give note with good security, negotiable at the Burlington bank.
Sale to begin at 2 p. m.

Mrs. C. T. NORTHGATE.

GEO. B. POWERS
Real Estate Agent,
Fire and Life Insurance

WALTON, KY.

Notice to Contractors.

Office of the Fiscal Court of Boone County.

Sealed proposals addressed to the Fiscal Court of Boone County will be received up to 12 o'clock, noon, July 24th, 1917, when they will be publicly opened and read for the resurfacing and improvement of the following road:

Beginning at the corporate limits of Petersburg, on the Ohio river, and extending in an easterly direction through the town of Hebron and Constance to the Kenton county line on the Ohio river, opposite Cincinnati, a distance of 14.94 miles.

The following quantities are approximate only, and the road is figured to be resurfaced in three different ways, subject to the decision of the Fiscal Court of Boone County:

1st—15,125 cubic yards gravel.
173,778 square yards scarifying and shaping.

2nd—350 cubic yards earth excavation.
367 cubic yards borrow for fills.
9.2 cubic yards 1, 2, 3 concrete, hand-rail.

3rd—196 cubic yards 1, 2, 4 concrete.
56 cubic yards 1, 2, 5 concrete.
490 cubic yards stonemasonry.
21,756 pounds reinforcing steel.
26,756 pounds standard "T" beams.
3,270 F. M. B. flooring.

64 lineal feet 12 inch G. C. I. pipe, county to furnish pipe.
64 lineal feet 18 inch G. C. I. pipe, county to furnish pipe.

SECOND—6,230 cubic yards gravel.
6,670 cubic yards crushed stone.
All other quantities same as above.

THIRD—11,440 cubic yards crushed stone.
All other quantities same as above.

A single bid to be submitted for the whole work on each road.

Bids must be for work to be done in accordance with plans and specifications approved by the Fiscal Court and the Commissioner of Public Roads, on file at the County Clerk's office in Burlington, Boone County.

The Fiscal Court of Boone County expressly reserves the right to reject all bids.

Before the contracts are binding on the first parties they must receive the approval of Commissioner of Public Roads.

Each bid shall be accompanied by cash or certified check payable at sight to the order of the County Treasurer for \$500.00, which check shall be held until the execution of the contract.

The contract is awarded the successful bidder or bidders will be required to furnish a bond equal to the amount of the proposal, for the faithful performance of the work in accordance with the aforesaid plans and specifications.

All work to be done under the direction and supervision of the Commissioner of Public Roads.

By order of the Fiscal Court of Boone County.

W. R. ROGERS,
Clerk of the Boone County Court.

NOTICE.

Bids for the construction of the new First Presbyterian Church, located on Big Bone church, will be received on July 24th, 1917. Estimates, quantities and specifications may be seen at the office of the County Road Engineer in Burlington, Boone County.

W. R. ROGERS, Clerk
Boone County Court.

For County Attorney—N. E. Ridgell.
For Superintendent of Schools—
J. C. Gordon.
For Representative—W. P. Cropper.
W. R. ROGERS, County Clerk
By LIZZIE ROGERS, D. C.

FLORENCE.

Mrs. Flora Smith, of Union, was calling on friends here Friday.

Miss Alberta Stephens is spending a couple of weeks in Covington.

Miss Nellie Crigler has returned after a visit with relatives in Chicago.

Mrs. Hazel Keller, of Madisonville, Ohio, is the guest of Miss Irene Cahill.

Mrs. Mike Cahill has returned after a visit with Mrs. Lou Kroger, of Hamilton.

Mrs. Charlie Scott and daughter, of Walton, spent Monday with Miss Bridget Carey.

Mr. and Mrs. John Nead of Erlanger, Ky., spent Sunday with his parents, Mr. and Mrs. Tom Nead.

Miss Carrie Clark, of the city, spent Sunday and Monday with her parents Mr. and Mrs. John Clark.

Mr. and Mrs. Cecil Finch, of Madison, Ind., were guests of Mr. and Mrs. Will Goodridge, Saturday and Sunday.

Mrs. Annie Cleek and Mrs. Rufus Tanner of Erlanger, were the guests of Mrs. J. R. Whitson on day last week.

Charlie Scott and Miss Minnie Baxter spent Sunday afternoon with Mr. and Mrs. Chas. Carpenter, of Price pike.

Russell Bradford and bride, of Cincinnati, spent Saturday and Sunday with his parents Mr. and Mrs. William Bradford.

Emmett Baxter and son James Edward, of Reading, Ohio, spent Wednesday with his parents, Mr. and Mrs. Joe Baxter.

Walter Whitson, of Walton, and Janie Cook of Erlanger, were the week-end guests of their grand mother, Mrs. J. R. Whitson.

The Ladies of Hopeful Lutheran church will give ice cream social at the old Catholic church, Florence, Saturday, July 28th, for the benefit of the new church now under construction. All are invited.

The Ladies School Club will give a dance Saturday evening, July 14th, at the old Catholic church.

McGlashons string band will furnish good music and the ladies will serve light refreshments. Everyone will be made welcome.

Mrs. Battle Long and Mr. Geo. Scott entertained Sunday Mr. and Mrs. William Scott and daughters Tillie and Marie, Mr. and Mrs. Mike Koxley and family and Guy Aylor, Mr. and Mrs. Al Scott and family, Mr. and Mrs. Ed. Stenebeck and Mr. Elmer Glazier, of Newbold and Mr. and Mrs. Arnold Bauers and family.

The Crescendo School Club met Thursday afternoon at the school house and reelected new officers for the coming year. Mrs. George Scott was made president; Mrs. Ed. Orborn, vice president; Mrs. Albert Metzger Treasurer and Mrs. Nellie Carpenter, secretary. The ladies have been quite successful in their school work the past year and hope to still continue so.

Candidates Present.

Candidates J. S. Cason, for assessor; W. F. Bradford for county clerk; and John C. White for jailer, were the only candidates present at the drawing for position on the primary election ballots. Circuit clerk Maurer did the drawing of the names of each candidate which was written on a slip of paper, which was rolled up and placed in a jury tube, the tubes placed in a hat, and shaken up, and the names were given position on the ballot in the order they were drawn from the hat.

Dynamiters After the Fish

Last Tuesday a party of strangers, supposed to be from Cincinnati or Cleveland, equipped with dynamite, appeared at what is known as the Taylor hole, on Gunpowder creek, where they destroyed a large lot of fish by setting off the explosives in the water. It is a pity that they were not pulled and made pay a good penalty for the violation of the game and fish laws.

County News Items

Interesting Facts Gathered During the Week by Our Regular Correspondents.

FRANCESVILLE.

The farmers in this community who have wheat are busy harvesting it. William Goodridge was the Sunday guest of Manlius Goodridge and wife. Miss Rhoda Eggleston entertained her friend, Miss Beatrice Muntz Sunday. Mr. and Mrs. Collins entertained several relatives Saturday night and Sunday. Master John Kilgore is visiting his grandparents, Mr. and Mrs. Harry Kilgore. John Kruse, of Detroit, Michigan, spent several days last week with relatives here. Mr. and Mrs. Will Lane, of Riverside, were guests of Miss Maggie Whitaker, Sunday. Mr. and Mrs. Clint Riddell entertained Miss Adelia Seothorn and Frank Estes, Sunday. Miss Sadie Morehead, of Taylorport, was the guest of Mrs. Manlius Goodridge the Fourth. Mr. and Mrs. Chas. Muntz had as guests, Sunday, Misses Florence and Alice Eggleston and Andy Muntz. Mr. and Mrs. C. D. Seothorn and daughter, Miss Adelia, motored to Idlewild and called on L. C. Seothorn and wife, Sunday afternoon. Mrs. Nellie Markland and son, Graham, entertained Mr. and Mrs. C. S. Riddell and Misses Amanda Koons and Sadie Riemann last Wednesday evening.

DEVON.

James W. Bristow has a nice lot of pigs for sale. Mrs. Sarah Rector, who is very ill, does not improve. B. F. Bristow, who has been very sick, improves slowly. Seymour Riley, wife and niece spent Sunday with Thomas Neau at Florence. Mr. and Mrs. Jeff Hutsell Sunday with Mrs. Anna Kenney and son, Roy, of Beaver neighborhood. Mrs. Ben Norman was the guest of her daughter, Mrs. Romine, at Latonia, from Saturday evening until Monday morning. Little Miss Theresa George, of Brooklyn, N. Y., spent last week with her grandparents, Mr. and Mrs. Ben Norman, of this place. J. B. Coombs and wife, of Ft. Mitchell; J. E. Bristow and family, of Walton and N. S. Bristow and wife, of Union were recent guests at B. F. Bristow's.

GUNPOWDER.

Mrs. Lloyd Tanner is ill. The sale at Hopeful last Saturday was attended by a good sized crowd and everything sold for fairly good prices. Hay harvest is on. While some of the meadows are very good others are hardly worth cutting on account of the weeds. Some worthless cures made a raid on J. H. Tanner's sheep a few nights ago, killing one lamb and slightly wounded another. The ladies of Hopeful Lutheran church will give an ice cream social at the old Catholic church in Florence, July 28th. For the benefit of the new church now under construction. All are invited. Work is progressing very nicely on the new Hopeful church building and the corner stone service will be held next Sunday at 2 p. m. Rev. Dr. Kapp, of Cincinnati, will be present and assist pastor Royer in the service. The Death Angel has visited our community again, taking from our midst little Martha Louise, only daughter of Mr. Clyde Clements, at the age of one year, 4 months and 17 days. Since the death of her mother April 10th, she was most tenderly cared for by Mr. and Mrs. H. H. Cloro. She was a very bright and beautiful little girl and will be greatly missed in their home. The remains were taken to the private burying ground on the farm of Marion Grubbs, near Richwood, last Sunday, and after a brief service conducted by Rev. Hill, they were laid to rest by those of her mother in the presence of a large concourse of sorrowing relatives and friends. Mr. and Mrs. Cloro extend their heartfelt and sincere thanks to the friends who so kindly assisted them during the illness and death of their little one. They also thank Rev. Hill for his comforting words and the choir for the beautiful selections rendered.

UNION.

Union was both games of ball played here on the 4th with the Woolper team. The morning game was won by Allen over McCarty fifteen to five; the evening game was won by Pope over Snelling 3 to 4. The Saturday following Union won by Pope in the best of three with Ryan in the box, 8 to 7.

BOONE COUNTY DEPOSIT BANK, Burlington, Ky.

FLICKERTOWN.

A nice rain fell here last Friday night. Mrs. Laura Seebree called on Mrs. J. W. White, Sunday. E. J. Rue and wife were Sunday guests at M. C. Stephens'. Mrs. Rosa Shinkle visited her son Bolivar, the first of last week. James Snyder and family visited Holt White and family, Sunday. Theo. Oberding and wife spent the Fourth with J. W. White and family. Polyvar Shinkle and wife visited their relatives in Petersburg, last Sunday. C. L. Voshell and family, of Spartanburg, visited at J. W. White's, the Fourth. C. J. Hensley and wife visited Mrs. Chas. Cloro over on the East Bend road, Sunday night. Wood Sullivan and family and Elbert Sullivan and wife dined at L. P. Sullivan's, Sunday. Ralph Grant and family visited his sister, Mrs. Sim Terrell, of Wilson Creek, Ind., Sunday. Grant Williamson and wife entertained the young folks with a party, Saturday night. Wm. Utz and two gentlemen friends of Norwood, called on Jasper Utz Sunday afternoon. J. W. White and daughter, Alice, visited Mrs. Sarah White and family on Gunpowder, Sunday. Theo. Oberding and wife, of Hyde Park, Ohio, will go into camp on Woolper creek this week. The Ladies Aid Society met with Mrs. Willis Smith Friday and finished up their work for the year. Their annual meeting will be August 10th, when they will elect officers for the next year. They will have several new quilts to offer for sale soon. All those indebted to the old Woolper Telephone Company are requested to come forward and set their bill at once as the money is badly needed. J. W. White.

HEBRON.

Miss Alice Conner, who has been sick has improved again. Hubert Conner sold a nice Holstein calf to Harry Dinn last week. Miss Lorena Hafer is at home from Berea College for about two months. Communion services next Sunday morning at 10:30; Sunday school in afternoon at 2:30. Miss Alline Stephens, of Bullittsville, was a guest of Misses Mary and Alice Conner Saturday night and Sunday. Nicholas county farmers report prospects for good crops at present are very flattering notwithstanding the fact that some of the crops are much later than usual. The reports on the corn crops show that it is backward for this season of the year. The hay crop is much better than was anticipated. The wheat acreage in Nicholas county is the smallest in a number of years. Corn and wheat are looking well and have improved 50 per cent under the beneficial influence of sunshine and rain. The potato crop is the largest and best known in many years.

Fleming county wheat looks good to those farmers who have any kind of stand of straw this year. Cutting will begin next week. The opening price of the new wheat is not settled but promises to be good.

RICHWOOD.

Miss Alice Conner, who has been sick has improved again. Hubert Conner sold a nice Holstein calf to Harry Dinn last week. Miss Lorena Hafer is at home from Berea College for about two months. Communion services next Sunday morning at 10:30; Sunday school in afternoon at 2:30. Miss Alline Stephens, of Bullittsville, was a guest of Misses Mary and Alice Conner Saturday night and Sunday. Nicholas county farmers report prospects for good crops at present are very flattering notwithstanding the fact that some of the crops are much later than usual. The reports on the corn crops show that it is backward for this season of the year. The hay crop is much better than was anticipated. The wheat acreage in Nicholas county is the smallest in a number of years. Corn and wheat are looking well and have improved 50 per cent under the beneficial influence of sunshine and rain. The potato crop is the largest and best known in many years. Fleming county wheat looks good to those farmers who have any kind of stand of straw this year. Cutting will begin next week. The opening price of the new wheat is not settled but promises to be good.

RABBIT HASH.

Lee Stephens is spending several days in Cincinnati this week. There was an all day meeting at East Bend Methodist church, last Sunday. Mrs. Annabel Bouton, of Pittsburg, is the guest of her sister, Mrs. J. H. Walton. Robt. Rouse, insurance agent for Boone County Insurance Co., was here last Friday. Mrs. Hester Ryle and daughter, Miss Josephine, of Aurora, Ind., attended the meeting at East Bend, Sunday. Mrs. Sallie Stephens and Miss Mary Wilson were visiting Wallace Stephens and wife at Lawrenceburg, last week. John and Herman Ryle traded their old freight truck for a new Maxwell truck of a larger size than the one they had. Robert Hodges and family were visiting Mrs. Hodges' brother, Ora Ogden, in the north end of the county Saturday and Sunday. Mrs. Frances Moler and son visited Mr. and Mrs. T. H. Miller in Gallatin county, Saturday. They visited Cincinnati coming back by the train and attending the meeting in East Bend Sunday, returning home that evening making the trip in Mr. Miller's auto.

FLAG RAISING AND RALLY

At The High School Campus Next Saturday.

There will be a flag raising and Red Cross Rally at the school house grounds, Burlington on next Saturday afternoon July 14th. The program will begin at four o'clock. The committee on entertainment has secured the following speakers for the occasion: Hon. Joel C. Cloro, Hon. John L. Shuff, Attorney Haper Rucker, all three of Cincinnati and formerly residents of Kentucky. Horace Cleveland will also deliver an address, which in itself will be worth going long ways to hear. The ladies of the Red Cross will serve ice cream and cake. Don't fail to attend this good program. Hear some splendid speaking, good music and give your assistance to the great Red Cross movement.

GERMANY'S FOOD PROBLEM

An exceedingly interesting letter from the New York World from Stockholm proves that the food situation is still an acute problem in Germany, and explains, moreover, some of the military questions relating to the food question. As a matter of actual measurement food is harder to find in Germany at this moment than at any time since the beginning of the war. The harvest will not begin to come in until August. The government is doing out food to the people and thousands of people are starving. The bright part of the situation lies in the fact that the period of harvesting is approaching, and Germany is now certain that the harvest can be gathered in safely. Twice during the war, in 1915 and again in 1916, the central powers were brought to the verge of ruin by the advance of the Russian armies to within a few miles of the great wheat growing territory of Austria on both occasions the wheat was well advanced and no opportunity to raise another crop would have been afforded. On both occasions the Russian commanders assembled a vast force of cavalry behind the lines, ready to devastate the wheat fields the moment the infantry cleared the way. But the infantry did not clear the way, and in 1915 and again in 1916 the wheat fields were harvested without the excursion of a single enemy's horseman.

This year, the Austrian wheat fields are safer than in either 1915 or 1916. In fact, they are in no danger at all. There is a possibility that the Russian army will resume the offensive before the present summer is over, but no one expects that army to penetrate deep enough into Austria before fall to do any substantial harm to the crops. On the other side of Europe the German crops are safe. The territory now being fought for in Belgium and France is a mining and manufacturing district. That land is valuable; it may be held, or it may be lost, but every German citizen now knows that the 1917 harvest will be gathered in safely. It will be sufficient to relieve distress for some months; whether it will prove large enough for another winter is another question. In the meantime the German people suffer in silence and wait for August.—Louisville Post.

Pendleton County.

(Falmouth Outlook.)

Practically all the tobacco in Pendleton county has been transplanted, since the heavy rains of last week. The acreage is shorter this year than for several seasons past, but the every indication points to superior quality of the weed, and it is likely that the farmers will receive a good price for the crop this year. The Stanford Interior Journal says: "W. H. Higgins established a new record when he sold a dozen chickens at 68 2-cents per pound. They went to B. J. Sparks, of Lexington, who seems to have not in the least felt the effects of the war or to care a whit for the high cost of living."

Falmouth has not fully lemonstrated yet what she can do. We have always claimed that we had the best people in the world, and we only need the opportunity to prove it. Some of our women may go on the battlefield yet, if things get too warm over in France we'll bet our old shoes against the hole-in-a-leughnat that some of our women will go on the battlefield to see for the wounded.

The speech of William Jennings Bryan at the Chautauqua last Tuesday afternoon was "bum" in the extreme. Bryan failed to size up his audience, and his demagogic utterance fell flat. Pendleton county is composed of keen, clear-sighted, thoughtful and fair people. It is a time when we are Americans, not Republicans. The only man to-day who is in earnest is one whose axe is being ground, or he wants it ground. The Peersless One evidently thought that he was appealing to an ignorant and passionate mob of partisans. As it turned out, the people listened to him because they had to, and left the tent with their own opinion of Mr. Bryan.

Mr. Bryan is speaking on the Chautauqua circuit thru this section of the State, and Falmouth people were very fortunate in having him open the Chautauqua here. The Commoner seemed at his best, and touched the leading topics of the day in his great address. He laid especial stress upon the State-Wide Prohibition amendment in Ky. Mr. Bryan not only talked to Democrats and Prohibitionists, but his audience was made up of people from all parties and all beliefs, eager to hear the message of this great orator, and if not able to hear his message, at least to be able to see the man who three times had been the Democratic standard bearer for President and a former Secretary of State. Some claim that his speech was partisan, and ill-suited to the occasion.

Garroll County.

(Carrollton News.)

Walter Kelly has purchased the grocery of D. A. Ginn and has taken possession. Farmers finished setting their tobacco crop last week. The acreage is considerably reduced, and the late setting will require an unusually late fall to insure maturity.

Mary in Chilton, the nine-year old son of Chester Chilton, of near Turner's Station, was thrown beneath a disc harrow last Saturday when a team of horses he was driving ran off. The boy was terribly cut about the face and body, but last reports give some hope of recovery.

Last Week of Our Big July

Woolper Sale

You can practice economy in the truest form by attending this sale as bargains in every department mean savings that will not be equaled for many years. We advise all those persons who are in need of any article in Yard Goods—Ready-to-Wear or House Furnishings to anticipate any needs of the near future for inducements will never be as great as those offered during this sale.

Sale Ends

STATE NEWS.

this section. It is believed the yield will surpass that of any crop in the past ten years or more and the quality is excellent.

The sweetest story ever told Geo. Carter, near Louisville, says he is going to produce 800 gallons of fine sorghum this year—Mayfield Times.

Josamine county wheat is in good condition. Farmers are busy with their work and crops of all kinds are promising. Hogs are plentiful in the county.

Carlisle, July 5.—Harvest has begun in Nicholas county, and the wheat crop is being put in the shock. Reports indicate that there will be a banner crop in Lancaster, July 5.—The first sale of 1917 wheat at this place was consummated when the late W. Walker, one of the county's largest farmers, sold his crop to a local mill at \$2 per bushel.

Fleming county wheat looks good to those farmers who have any kind of stand of straw this year. Cutting will begin next week. The opening price of the new wheat is not settled but promises to be good.

Guthrie, July 5.—About all the wheat of this section is now ready for the thrasher. The shocks are very scarce in the fields, but the grain is extra large and good. The best forecast on the yield is not over one-half of the normal, for the sale of which the growers will not consider less than \$2 per bushel.

Harrison county wheat harvest began last week. The wheat is much better than was thought earlier in the spring. The first crop of alfalfa and white clover was splendid and a second growth is about to be cut. The oat crop looks fine and will soon be ready to harvest. Meadows are in fine condition. Corn is looking splendidly. All gardens are doing fine.

Scott County.—Meadows are growing out and it appears there will be a fair hay crop. Wheat and rye are maturing better than was expected. All well worked gardens are looking fine and promising a big yield. Live stock of every kind is doing well. Farmers are now jubilant over the prospects. There will be an abundance of apples and some peaches in this county.

Owen County.

(Owenton Herald.)
The black oil on the streets is very unbecoming to the white shoes. Many of the young ladies have just purchased white shoes to wear to the Chautauqua.

Owing to the severe cold weather the past winter and the heavy rains this spring the bees were unable to work and thus the honey crop in Owen county is unusually small. Honey this year has been very scarce on the market and will cost more than was ever known before.

While the potato crop in Owen county is exceedingly large, the farmers claim the supply may not reach the demand of the consumers, but if the growers have any to sell they expect to receive the same amount as they paid for the seed. The self-government and more commonly known as political economy. In other words, waste not means want not.

Mrs. John Baldon Dead.

The friends and relatives here of Mrs. John Baldon are sorry to hear of her death which occurred on the 4th inst., at her home in Carbondale, Colorado. She is survived by her husband and two sons, Craig and Kenneth Baldon. Baldon died of tuberculosis, which disease caused the family to move from Burlington to Colorado many years ago hoping to restore her health, and for a while she was very much better, but the disease had a hold on her that climate nor medical science could not overcome. The bereaved husband and children have the sympathy of all here at their old home.

Store Planters Away.

As soon as the farmer has finished using the planters this year they should be cleaned, and put away carefully, so that they will be in good condition for the next year. Often by carelessly allowing planters to lay around uncared for, one has to buy a new set the following season, at least hunt for lost parts. Every plate and other part of the planter should be stored carefully away, and the planter ready for use another year. Prices of machinery are advancing as well as prices of food stuffs and there is no reason why the farmer should not take annual good care of all implements on the farm.

Good Rain Went Around North
A good rain accompanied by considerable thunder and lightning passed north of here early last Monday night, and at one time looked like this part of the county would get a needed rain. A cool wave arrived some time during Monday night and Tuesday morning the mercury was down to 58.

Strayed—A yellow Jersey heifer has no marks—has been missing from my pasture since the 4th inst. Any information as to the whereabouts will be appreciated by Mrs. W. L. Wills, Burlington, Ky.

Chiropractic—Chiropractic hand made of the Will sell for \$25. Good tests are Call on Geo. W. Baker, by mail only.

LARGE LOSS DUE TO BEES SWARMING.

Curb Swarming and Secure the Greatest Possible Yields of Honey.

The old-time beekeeper boasted of the number of swarms which issue from his hives, but the modern beekeeper knows that swarming is one of his worst obstacles to producing a large crop. The modern beekeeper knows from experience that after he has given all his energy to getting every colony as strong as possible at the beginning of the honey-flow, he must not permit the bees to spoil it all by dividing their forces.

Of course, it is impossible to do anything toward controlling swarming when the bees are in a box or "gum," and this is the chief reason why bees in a movable frame hive are more profitable. It is also unfortunately true that in spite of the beekeeper's most strenuous efforts, colonies will sometimes swarm in that event the beekeeper makes the most of a bad situation by keeping the forces together in another way.

The specialists of the United States Department of Agriculture advise that if swarming occurs when honey is coming in the hive should be at once removed to a new place and a new hive placed in the old location. The swarm is now hived in this new hive, and because it is in the old location, all returning field bees from the colony join and the population is kept up. Later on there are various ways of reducing the population of colonies, but by this means the issuing of swarms is prevented.

The beekeeper who desires to get the greatest possible crop does not permit even one swarm to issue if he can help it. When swarming time arrives, he examines every colony once a week. If he finds colonies with eggs or small larvae in them, he cuts every one out and thus makes it necessary for the bees to build other cells if they will persist in their efforts to swarm. If, however, he finds larger cells with old larvae, he knows that the impulse to swarm has developed too far, so he must satisfy the impulse in some way. He may make an artificial swarm at his own convenience and not at that of the bees—or if he is a producer of comb honey, he may cut out all the queen-cells and cage the queen for ten days until they get over their "swarming" fever.

The skill of the beekeeper can usually be measured by the results of his work in curbing swarming. The poetry which others see in issuing swarms is entirely lost on a good beekeeper. The methods of swarm control are given in Farmers' Bulletin 503, "Comb Honey," which is entirely free of charge from the United States Department of Agriculture.

Hard Blow to Germany.

Washington, July 9.—America's embargo, plus German economic troubles, promises to hang two million tons on Germany's neck.

The embargo, curtailing supplies of neutral goods, test they be exported to Germany, will be effective July 15th.

Thereafter no vital foodstuffs, munitions, fertilizers or metals can be sent abroad without license from the Department of Commerce.

Certain congressmen strongly favor having the president so screw down these limitations that neutrals will have to align themselves with the United States.

Meantime according to press reports, Germany is confronted with troubles from within—a demand for parliamentary reform and a general political situation where new peace terms are forthcoming.

The pressure from without and the internal situation are so great as to give the Teutonic authorities some difficult months ahead.

Neutrals will suffer none unless they divert their tied-up ship cargoes to the United States and permit an allied patrol of the Scandinavian and Dutch coasts to bag submarines, now using territorial waters as a safe outlet to the sea.

In issuing regulations on the embargo, President Wilson pointed out that the United States wants to heed neutral needs, but he also showed the prime need of feeding the United States and its allies and of shutting off any re-exports to Germany thru neutral nations.

Norway, Sweden, Denmark, Holland and Switzerland will be hard hit.

The nature of the proclamation has strengthened belief the government will shut off all exports for 60 days until an invoice of this character is submitted.

Declaring Holland a starving, Chavalier Van Rappard, spokesman in Washington, bespoke today the grave apprehension of neutral governments.

Other neutrals affected by President Wilson's proclamation, indicating off food fuels and other necessities asserted their existence is threatened.

"Our people are on rations," Van Rappard said. "We will suffer most of war's evils although not a belated."

"We are forced to depend on Germany for food and on America for grain. Holland is at your mercy."

It is realized if the war endures long new forces may appear on one side or the other of the great world struggle—forced there by the pressure of threatened starvation. But military men insist no chances must be taken.

CHAUTAUQUA BRINGS BOY SCOUT EXPERT

Chas. Daugherty An Authority On Boy Scout Movement.

HIMSELF AN "EAGLE SCOUT"

That the Chautauqua is an upbuilding force, and not merely a form of entertainment is best proven by the character of the people who hold up the Chautauqua ideals. The people who appear on the Welfare Chautauqua programs are all democratic in nature and love to mingle when on the platform with the people of the community. Don't be afraid to walk right up to any one of them and make yourself acquainted.

"Chic" Daugherty, for example, is usually surrounded by a flock of boys from the minute he strikes town. Boys are drawn to Daugherty as bees hover over a barrel of honey. It seems that some magic message is sent to every boy in town the minute he arrives. And it is worth while for boys to know him. He is the embodiment of clean and upright manhood. For years he was secretary of the Boys' Department of the Y. M. C. A.

Of general interest, however, is the fact that Mr. Daugherty is a boy scout enthusiast and an expert on all phases of boy scout work. Mr. Daugherty is himself an Eagle Scout, which is the highest rank obtainable and is a Special Field Scout Commissioner, appointed by the National

Burlington Chautauqua Begins Next Monday, July 16.

We are not always glad when we smile.
For the heart in a tempest of pain
May live in the guise of a laugh in the eyes.
As the rainbow may live in the rain.
—J. W. Riley.

SOME GOOD EATINGS.

When eggs are reasonable in price, if they ever attain this glaze.
Glazed Eggs.—Heat until very hot a number of individual shirring dishes, greased with butter and spread with buttered crumbs to line them. Break into each a fresh egg, being careful not to break the yolk. Cover each egg with a mixture of crumbs and butter, seasoning highly with salt and paprika. Cook in a hot oven until the eggs are set. Place in a pan of hot water they cook better. Garnish with sprigs of parsley.

Glazed Tongue.—Wash the tongue and soak it overnight. In the morning place it in a kettle with cold water to cover. Bring to the simmering point and cook until the meat is tender enough to pierce with a fork. When set it away to cool in the water in which it was cooked. When cold remove the skin and any rough places; place the tongue in a deep mold, the tip fastened to the other end. Heat a pint and a half of the liquor in which it was cooked, add a cupful of tomatoes, a bay leaf, a slice of onion, pepper and salt to taste, 12 cloves, and a pinch of allspice; simmer these ingredients for 20 minutes and strain. In one ounce of gelatin that has been previously soaked, when dissolved pour over the tongue, just covering it. Place when cold on ice to harden. When unmolded garnish with olives and parsley.

Virginia Creamed Beets.—Boil the beets until tender in salted water, when tender rub off the skins, slice and arrange them in a deep dish. Make a sauce, using two tablespoonfuls of butter, and when bubbling hot add two tablespoonfuls of flour, a little salt and red pepper, a spoonful of sugar and a cupful of hot cream. Heat all well and when smooth pour over the prepared beets. Serve hot.

Whipped cream, shredded almonds, powdered sugar to taste with a few drops of rose water for flavoring is especially appropriate for a sponge cake or an angel food.

HEADQUARTERS IN NEW YORK.

He wears twenty-one merit badges. The great aim of the Boy Scouts of America is to make every boy scout a better citizen. It aims to touch him—physically—in the campfire and woodcraft of the outdoor life. It seeks to develop him by observation and the knowing of things far and near, so that later on when he enters business life he may be alert and keen and so be able to add to the wealth of the nation. It teaches him chivalry and unselfishness, duty, charity, thrift and loyalty. It teaches him temperance and gives him the principles by which he may be healthy and clean. It teaches him patriotism in order that he may become a good citizen and do those things which every citizen ought to do to make the community and the land in which he lives the best in the world.

The boy scout movement neither promotes nor discourages military training, its chief concern being the development of character and personal efficiency of teen-age boys. Mr. Daugherty will be very glad, while here, to talk with all who are interested in boy scout work.

WAYS WITH SAUSAGE.

One of the earliest methods of preparing meat was in the form of sausages, as the tough meat, used was finely chopped, not knowing the more modern method of hanging the meat to soften the fibers. Bologna sausage has its name from the Roman city of that name. This sausage is usually boiled before it goes onto the market so that it may then be served without further cooking.

Sausage Omelet.—Drop a bologna into water and cook for five minutes, then cool and skin; cut in dice. Take three eggs, a tablespoonful of butter, one-half teaspoonful of finely minced onion and a fourth of a sausage. Put the butter into a smooth frying pan, add the onion and cook gently in the butter without browning. Have the eggs well beaten and season with salt and pepper; add the diced sausage. Pour the eggs into the hot frying pan and with a fork keep stirring until the mixture is lightly set. Shake the pan to keep it from cooking on. Tilt the pan and roll out the omelet on a hot platter. Serve garnished with parsley.

Sausage Eggs.—Mix two tablespoonfuls of bread crumbs with half a pound of sausage meat, adding sufficient seasoning to taste. Cook three eggs in the shell until hard, then divide into quarters. Put a layer of the sausage meat round each piece of egg and smooth it well with a knife dipped into boiling water. Place the pieces to harden on a plate. Dip into beaten egg and finely crushed vermicelli and fry until a golden brown. Serve with fried parsley-sprigs.

Oyster Sausage.—Take two dozen oysters, rinse them well to remove pieces of shell, mix with bread crumbs and suet, finely chopped and well blended, using two tablespoonfuls of bread crumbs to one of suet, add salt, pepper, grated nutmeg and a half pound of sausage meat, with the yolks of two eggs. Let this stand until firm. Mold in the hands into cakes and fry in deep fat until brown.

Another good luncheon dish using toast, is prepared by using a hot well-seasoned tomato poured over buttered toast, serving hot with tea.

over a year now. I am so happy and

SUGAR.

It has been said that the prosperity of a country and the standard of living of its people are measured by the consumption of sugar. Fifty years ago comparatively little sugar was used in this part of the country. Molasses was in common use in the rural districts and on the farms for sweetening purposes, sugar being reserved for special occasions and for "company." Old book accounts of less than a century ago rarely show an entry of sugar, says Providence Journal. Our Yankee skippers sailed out of Narragansett bay and New London harbor with their shiploads of shoe pegs, hams and other New England products, and returned with hogheads of molasses, but no sugar. It was in the days before the invention of the centrifugal, and sugar was manufactured in the cane-growing countries in a primitive manner requiring weeks and even months in the boiled cane juice from the treacle which we call molasses. In the mountains of Virginia, the Carolinas and Georgia very little sugar is in daily use even now, and none at all in the cabins of the very poor. The farmers in that section of the country produce a home-made sirup from a variety of miller cane. The cane sugar cane or sorghum, and it is a very good article, too.

A Boston paper publishes the picture and a description of what is known as the Kimpit Blowhole of New Zealand. This is an opening in the earth through which steam shoots forth continuously under 180 pounds pressure. This steam pipe now serves only for exhibition purposes. Its industrial utilization has not been seriously considered. Indeed, only a small part of the possibilities in energy making on the planet has been tapped by mankind, says Toledo Blade. Not much more than one per cent of the water-power of America is now utilized. The tides and waves have not been harnessed. There is limitless power in the winds, very little of which has been made to work for humanity. There is power in sunshine, in thermal springs, in volcanoes, in reactions in chemical factories, in fermentation—in scores of things which have not yet caught the attention of inventors. The world is becoming ever more and more like a great industrial plant. As this progresses we may see energy now wasted made the servant of men.

Upward of 100 Alaskans are directly interested in fur farming. There are silver fox yards in 35 localities, while on an equal number of islands blue foxes are farmed. The silver fox farms are not yet producing fur, but pets sent to market during the last season from the older blue fox farms brought good results. Experiments are being carried on at Washington, Linden, Md., and Chesterfield, N. Y., to determine the best methods of feeding, confining and otherwise handling fur-bearing animals, especially foxes, minks and martens; to determine the species most suitable for domestication; to produce improved strains by selective breeding; to investigate the effects of temperature on fur growth, and to test methods of dressing peltries and of curing for dressed furs.

There are some sharpshooters left in the United States—the kind that helped General Jackson to win the battle of New Orleans—if reliance is to be placed on a letter to a friend in Washington from a North Carolina mountaineer who says, "Tell them authorities there 5,000 of us drilling here. There ain't one of us missed in squirrel for ten years." However, it is not to be overlooked that the day of the sharpshooter is past, and that this is an era of the machine gun.

The proclamation of the president, warning that any insulter or insultor of the flag will be subject to summary arrest, emphasizes the fact that in these times, summary arrest will be necessary to keep such person or persons intact.

Production of foodstuffs in greater quantity is highly important, but the government must also see to it that a few men do not monopolize the sale and distribution to their own excessive profit.

A Los Angeles theosophist having invented a machine to photograph thoughts, his next move may be to locate them, and this may not be so easy in some places.

Remember, too, that if one or two needless days a week should be required, a nice selection from an adjacent back-yard garden will do much to fill the void.

Keeping in mind the dates of the Blandings and Horvace fairs, are you not?

A BIG SUCCESS

Was the Patriotic Meeting Held Last Saturday Afternoon.

The Crowd Listened to Splendid Music and Entertaining Speeches.

Old Glory Appeared to Be Imbued With an Understanding of the Occasion.

Several hundred people attended the Patriotic meeting held by the Burlington Red Cross Auxiliary last Saturday afternoon. The second Kentucky regimental band under the command of Major Denhart, was present and discoursed splendid music for the occasion.

Rev. Edgar C. Riley was chairman of the meeting which was opened with a beautiful invocation by Rev. David Blyth.

Horace Cleveland, a member of the 1917 graduating class of the Boone County High School, was the first speaker introduced, and soon convinced the large audience that he is very much at home on the rostrum. His speech was in perfect accord with the occasion and was delivered with an ease and grace that only a natural orator can command.

Postmaster Joel C. Clore, of Cincinnati, was to follow Mr. Cleveland, but his physical condition was such that he had to decline, and introduced Hon. Frank R. Probasco, of Cincinnati, who made a rattling good speech, causing the audience to realize more than ever the immense undertaking in which this country is engaged for freedom of mankind the world over. Mr. Probasco pictured the Kaiser as a hideous monster in human shape, while he proclaimed Woodrow Wilson, one of the greatest men this country ever produced, and endorsed fully his war policies. Mr. Probasco hand with the German slayers and all others who in any way are trying to obstruct this country's action in the course it is pursuing in the world war.

Harper Rucker was the next speaker and entertained his hearers with a clear and succinct statement of what brought about the European war, and how Germany had for years been preparing for the great struggle, by combining with other powers, and increasing his military strength at home.

The speech was a strong indictment of the Kaiser for his inhuman effort to acquire control of the world. Major Denhart was the last speaker of the afternoon. Major Denhart served on the Mexican front for several months and expects to be sent to the front at the beginning of the new year, and is engaged in a recruiting campaign to complete the Kentucky brigade before the fall. He has been making an appeal to the young men to enlist and not wait to be conscripted and denied any choice as to where they may serve. The major is a man of fine address and his speech was listened to with intense interest, but failed of immediate result. At the conclusion of Major Denhart's speech several young ladies, members of the local Red Cross Auxiliary, carried the flag through the crowd and on to this was thrown money to the amount of \$121.01 for the use of the local Auxiliary. Then came the most affecting scene of the afternoon, the playing of the Star Spangled Banner. Having reached the position the flag was unfurled perfectly by a breeze, and in this position it floated proudly while all eyes were turned upon it and Mr. Probasco read a beautiful address to the Stars and Stripes. The exercises at the stand being completed unanimously attention was turned to the after-dinner social which was held in the hall of the hotel. The Auxiliary's funds.

Everything passed off in the most satisfactory manner, and the Auxiliary is proud of the success achieved in every respect.

Several hundred people attended the Patriotic meeting held by the Burlington Red Cross Auxiliary last Saturday afternoon.

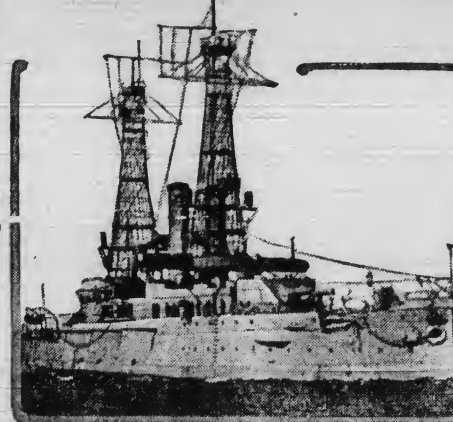

The second Kentucky regimental band under the command of Major Denhart, was present and discoursed splendid music for the occasion.

Rev. Edgar C. Riley was chairman of the meeting which was opened with a beautiful invocation by Rev. David Blyth.

UNITED STATES BATTLESHIP WISCONSIN

FORTY YEARS AGO TODAY

Items Taken From the Issue of The Recorder of July 19th, 1877

Bridges are being erected on the Burlington and Bellevue pike.

The grain of the wheat is of a very superior quality.

Blackberries are on the market.

Lockhart, legislator, gave an exhibition in Burlington last Tuesday night.

Died, at two o'clock Tuesday morning, Oscar Crisler. Funeral was preached by Rev. Jas. A. Kirtley.

Two negroes and one white prisoner escaped from jail last Thursday night. They rushed out by the jailer when he went to pass a bucket of water into them.

The school commissioner has received Boone's quote of Collins' History of Kentucky.

Rev. Vardeman preached to a large congregation at Locust Grove school house last Sunday. Jasper Sullivan was elected trustee in school district 4. D. M. Snyder is building a dwelling house in Bellevue.

PLATTSBURG.

John Bachelor opened what was understood to be an Indian grave and found two skulls and many other bones. A beautiful blue stone about eight inches in length was also found in the grave.

OUR FLAG

Some Beautiful Things About Old Glory In Far Away France.

It is a beautiful thing to know that the first armed contingent that carried the American flag to the front on the allied lines was drawn from the men of the Red Cross Ambulance and that first official division of the American army to land in England for service in the great war was a hospital unit. It is beautiful to think too, that the same papers that told of General Pershing's visit to the tomb of Napoleon, the master-soldier, had also the story of a splendid fund that is being raised to furnish and send to France a complete base hospital in memory of General Pershing's wife.

It is good to feel that our flag of the stars is standing for tenderness and pity more than for the pride of war, and that the blood with which it must soon be stained and the scars and rents which it must so soon receive, belong to a world war, not for glory's sake, but for the healing of the nations.

For we have come at last to know that it is sacrifice alone that buys for us the high things of the spirit, that blood is the price of soul-sovereignty and the personal removal of heart. We accept again "God's" noble mystery. It is God's decree.

Our starred flag, with its new wounds, its new stains of blood, is the beacon of our faith, the emblem of our trust in the coming of that war-bought peace to which our sword is pledged—Southern Vindicator Magazine.

Attacked by a Mad Dog

One of the Horton boys who lives down on Gunpowder creek, had an experience last Friday. He does not want to repeat again, a dog belonging to a man developed hydrophobia and attacked him. He fought the dog off by kicking him till he fell in a fit when he went to the house of his father, returned and killed it. The dog had been missing from home several days and had just returned.

WORK FOR ASSESSORS

The New Property Schedule Will Make Them Earn Their Money.

While the law placing the intellectual and educational qualifications of the office of Assessor failed of passage, when the County Assessor's office over the eighth page "general property schedule," prepared for his use by the State Tax Commission, with its black-face admonition that "the assessor, under penalty of prosecution, must see that each question is answered," etc., he will realize that the commission called for some qualifications of the highest order in making the assessment this year. The schedule is chock full of interesting reading matter that pertains to information concerning everything about the premises, even down to the shirt on a man's back. The schedule has paralleled culms in the nature of the "deadly parallel" between the owner's and the assessor's valuation.

Consider farm lands. The commission wants to know the number of acres, those in cultivation in timber, waste, underlain with minerals, likewise the kinds of minerals, the nearest point to an improved road, the nearest point to a railroad, the nearest market town and all about dwelling and out-houses. Then the bushels of each kind of product from corn to peaches in the hands of the producer; how much of each thing produced and not in his hands; the number of good old country hams, dried fruits and eggs and such things he has stored up.

As to the town lots the commission would be informed of the size, the street it's on, the number of lots in the group, the value as improved and unimproved and the character of improvements and environments.

About livestock, the inquiries include height, soundness, service charges, the number of progeny and whether the cows are fresh or dry. Not even hog incubators and fruit-pellers are overlooked in the category of agricultural implements. The schedule goes right down the line with poultry, it includes everything from pre-amplifiers to hearses in the vehicle line; it inquires the caravans of the kitchen, dining room, laundry and even the closets of the home, and insists upon knowing how many talking machine records are kept on hand for the entertainment of Sunday callers.

It demands a poll of bees as well as humans, and what might be left out of specific schedules, it covers in "miscellaneous" and that broad item takes in as variable a quantity as the "tons of ice."

Of course, there are separate schedules for stores and manufacturing concerns, as deep in detail as those concerning the domestic establishments, and the whole concludes with "enterprises," in which the commission respectfully inquires whether a plant happens to be an "executor, committee, assignee, commissioner, receiver or trustee;" whether he has in his possession property, belonging to any other person or corporation; whether his infant daughter or son has any taxable property or whether his wife has any; and finally, "your family;" and tactfully suggests that if you have prior to the first of September of the present year disposed of any of your property or invested in property or money for the purpose of escaping taxation, ample space is afforded for a neat blank line made and provided for that purpose in which to "give the facts." All this must be solemnly sworn to and witnessed by the nearest resident.

The taxpayer is guilty of false swearing if his statements are untrue and the Assessor is liable to prosecution if he receives any bribe to which the taxpayer has not been sworn.

A FATAL ACCIDENT

Arthur Kelly Leaps or Is Thrown From An Automobile and Is Badly Mangled.

Injuries Survived About Twenty-Five Hours.

A Model Young Man's Life the Toll of Reckless Speeders—A Warning to Others.

Arthur Kelly, son of E. T. Kelly, who lives about three miles out on the East Bend road was fatally hurt last Saturday night about 12 o'clock on the Burlington and Florence pike between the residences of G. A. Snyder and the Hopeful church road. Two automobiles were coming from Erlanger, one of them driven by Melvin Gains, son of V. W. Gains, of Idlewild, neighbor hood. On the seat with young Gains was Edwin Duncan, while Jerry Fowler and Arthur Kelly occupied the rear seat. The other machine was driven by Joe Walton, son of Mrs. Eliza Walton, who lives out on the Bellevue pike, and riding with him were his brother, Thomas, Harold Conner and Virgil Gains. These machines were proceeding at a high rate of speed, and at the Hiram Long tobacco barn Gains' machine passed Walton's, and left the road at the curve just before reaching the Snyder residence and took a considerable distance very close to a wire fence before it took the road again. Whether Arthur Kelly was thrown out of the machine or whether he jumped out is not known, but his body was hurled against the fence with tremendous force breaking a large locust post of near the top of the ground and causing the wires to make deep furrows in the wood. The machine was stopped, when Walton's passed it, and the Walton machine was stopped in a hundred yards or so and the occupants returned to see what was the matter. The injured man, terribly mangled about the head and face, was put in one of the machines and brought to Dr. Yelton's residence in Burlington. Recognizing the seriousness of the injuries Dr. Langsdale, of Cincinnati, was summoned and was at the injured man's bedside in the shortest possible time. The purpose of the examination was unable to give an opinion as to the result of the injuries. The young man lingered until two o'clock of the night when he passed away at the residence of Dr. Yelton, never having regained consciousness. Undertaker C. Scott Chambers, of Walton, prepared for the funeral, which was taken to the home of his parents.

Arthur Kelly was the model young man of this neighborhood, and his tragic death casts a gloom over the entire community, which extends to his friends, his brother and sisters the heartfelt sympathy of friends.

A funeral service was conducted at the home of the parents of the deceased by Rev. Edgar C. Riley at 10 a. m. Tuesday, after which the remains were conveyed to the local Odd-fellows hall where the Knights of Pythias performed their burial ceremony and consigned the remains to their last earthly resting place.

The pall-bearers, members of the local K. of P. Lodge, which order the deceased belonged, were E. E. Kelly, Courtney Kelly, Rex Berkshire, Elmer Goodridge, Hubert White, G. W. Sandford.

Wheat Promises To Be Good Crop.

Increased Acreage in Scott Co. All Food Crops are Bumpers.

(Georgetown News.) Wheat threshing in Scott county began in earnest Monday with prospects for a large yield. The acreage of the great staple in the county was increased this year, and although several weeks ago it seemed that it would be a failure, the good weather has made the yield probably about the average. Except in a few fields the leads are well filled, although in some places the stand is thin.

Corn with a larger acreage in Scott county than ever before, promises to make a good yield, although the wet weather has retarded it somewhat. Corn bumper crop is a possibility with favorable weather the remainder of the season.

On account of the Government's appeal that more food crops be raised and also on account of the high prices of all food products, many farmers are being raised in the county than at any time in its history. Although the truck gardens were late, prospects for a large production are very bright. Corn, beans and potatoes have been planted in every vacant fence corner, and it is reported that the total acreage will amount to a fifty per cent increase over any previous season.

Many potatoes have been planted, and where the seed was of good quality the yield will be large. The plantings of the tubers for a second crop have been made, and will be during the next few days. A heavy frost caused the loss of a considerable portion of the early crop.

Most of the tobacco in Scott and neighboring counties is exceptionally good, in spite of the fact that it was set out later than usual, caused both by the lack of warm weather and the shortage of plants. A small portion of the crop was replanted and its success depends upon the weather conditions. The price is expected to be even higher than last year, due to the fact that unless it keeps up with food crops in value, little of the weed will be planted next year and the factories will be left in the lurch.

Harvesting of barley has been going on for some time, and reports are that it is the largest crop ever made in Scott county. The average yield per acre is better than usual also. Rye, never a large crop, in this neighborhood, is better than usual.

TOBACCO OUTLOOK

For Growers Never Better—Lexington Man Says Prices Will Be "Hard to Catch"

New history is being made in tobacco, estimated by the United States Agricultural Department at Washington, to be 435,000,000 lbs., has all been bought up and passed into the hands of the manufacturers, thus making new history for the trade.

The 1917 crop, reported through the press reports coming from the counties, all report no increase in acreage, but on the contrary, many counties state the acreage to be from 1,000 to as high as 2,000 acres less than last year. This means that every pound of tobacco wanted, and it means more, it means that the price that will prevail next year will be "hard to catch."

It therefore behooves the farmers to take all possible care and produce all the quality and pounds they can.

E. T. ROBARDS.

While the foregoing may all be true with reference to prices and quantity of the crop, the outlook for the growing crop is not very brilliant here nor in other parts of the Burley district, if reports brought to this office from different sections are to be trusted. In this county it is doubtful if more than 2,500 acres have been planted, which is not more than two-thirds of the average and not much more than half as much as was set last year.

All of the tobacco which was set from the first half of June is growing off nicely, but the late setting, much of which was not transplanted until the last days of June and the first days of July, is in the clouds and it will require the most favorable weather to bring it out. What is true of this county seems to also be true of most of the counties in the Burley district, and growers who contract their crops to speculators at any figure at the present time will make a mistake as there is no telling how high the price may go—Grant County News.

News From Indiana.

(Lawrence Press.)

Harvest conditions in Indiana could hardly be better, and quality of wheat promises all that could be desired.

Although the river was a trifle crooked, it was quite a number of bathers of both sexes enjoyed themselves at Kaup's landing last Sunday afternoon. As soon as the water gets warmer larger numbers may be expected to frequent this bathing beach and other near town.

Mr. and Mrs. J. A. Will of Rising Sun, publishers of the Ohio County News, were interested at the water party held at Kaup's landing on the Fourth. An eagle mounted on the front bumper of their car attracted much attention. Its wings were spread, and from its tail there floated streamers.

The eagle was by Morris Rice in Boone County, a water party was held on the Fourth and one of the prizes was a trip to the lake. The prize was won by Mr. Rice and his family.

Four men were arrested for the theft of a horse and a cow from the farm of Mr. Rice. The men were taken to the jail and are being held for trial.

Edwards Garage

A. M. EDWARDS, Proprietor.

WALTON DEPARTMENT.

D. B. WALLACE, Manager.

Hand your news items to Mr. D. B. Wallace at the Walton Equitable Bank and Trust Co.'s building. He is also authorized to receive subscriptions and collect other accounts.

Eliza V. Ross of Gallatin county, spent Monday here.

Elijah Roberts of Crittenden, spent Monday here on business.

Mrs. B. K. Menefee, of Covington, spent Saturday and Sunday here.

Mrs. D. B. Wallace has been quite ill this week, confined to her room most of the time.

Miss Frances Curtis of Owenzont spent the week here the guest of Miss Grace Powers.

Judge J. G. Tomlin spent part of the week at Warsaw attending the Gallatin circuit court.

J. W. Youell, son of P. C. Youell, is enjoying his vacation with friends in New York City.

Lost—Coat, uniform. Return to J. T. Hurl, railroad agent at Richmond, or at his home in Walton.

Miss Kathryn Hicks, of Union, spent the week here the guest of her cousin Miss Jennie Lee Gams.

Mrs. A. C. Norman has been on the sick list at her country home near Walton, but is now somewhat better.

Mrs. Henry C. Diers spent the past week at Paris, Bourbon county, guest of her daughter, Mrs. Chas. T. Best.

Dr. and Mrs. C. T. Coleman, of Frankfort, spent part of the past week here the guests of Judge and Mrs. Thos. P. Curley.

Mr. and Mrs. H. W. Mayfield and two children, of Ludlow, spent part of the week here the guests of Mr. and Mrs. A. M. Edwards.

Dr. J. F. Daugherty and Dr. A. N. Jones attended the meeting of the Pendleton county Medical Society at Falmouth, last Wednesday.

Mr. and Mrs. Jno. L. Vest returned from a two weeks' trip thru Northwestern Canada, enjoying the beautiful scenery and the journey very much.

Rev. and Mrs. E. C. Lacy and children left the first of the week to spend the vacation of several weeks at their former home in Tennessee.

R. W. Jones, the local Buick agent sold and delivered last week two new cars, one to John Taylor of near Richmond, and one to G. W. Smith of Union.

Mrs. Carolyn Slater, Mrs. Harry B. Slater, Mrs. Leona Stephens and Miss Allie Stephens, of Erlanger, were the guests of Mr. and Mrs. M. E. Hanes this week.

The Gleaner Class of the Walton Christian church will give an ice cream supper on the church lawn Monday evening, July 23, to which all are most cordially invited.

Mrs. Martin Hudson has been quite ill this week with appendicitis and her physician, Dr. G. C. Rankins thinks she may have to be taken to the hospital for an operation.

Mrs. J. W. Houston spent the week at Latonia attending the bed side of her sister Mrs. Eugene DeMolsey who has been ill and undergoing treatment in the hospital at Covington.

John Carroll Hamilton of Warsaw, spent Monday here the guest of his daughter Mrs. A. B. Tompkins being enroute home from a visit to his daughter Mrs. Nelma at Roanoke, Virginia.

Rev. W. B. Garriott and family have moved into the new Methodist parsonage and Mr. and Mrs. E. B. Hancock of Covington, have moved to the Johnson property vacated by Rev. Garriott.

Mr. and Mrs. Edward Schmiedker of Cincinnati, were guests of Mr. and Mrs. A. B. Tompkins the past week. Mr. Schmiedker is the credit man of the Graf-Morschbach Harness Company for which Mr. Tompkins is the traveling salesman.

Thos. Percival and sister Miss Tote, Miss Jane Vollandingham, L. C. Percival and Miss Polly Moore of Covington, motored through to Frankfort Saturday and spent Sunday with Mr. and Mrs. Edwin Johnson who make their home at the Capital City.

Members of Walton M. E. church enjoyed their annual picnic in the beautiful grove of Mr. and Mrs. L. Hopkins in Kenton county last Saturday and a delightful day was spent together and a great feast was spread for the enjoyment of all who attended.

Mr. and Mrs. E. E. Wright and two sons Forest and Edwin, of Christiansburg, were here Monday visiting the Real Estate Agent Geo. F. Tamm with a view to buying property in this vicinity and pay

was laid with the impressive and ancient ceremonies of the craft, Prof. J. C. Gordon officiating as the proxy of the Grand Master of Kentucky, and the other positions being filled by other members of Walton Lodge, Dr. Fortune stated that he had attended the laying of a number of corner stones and that the ceremonies last Saturday were the most beautiful and impressive he had ever witnessed. It was a very pleasant affair in every way and the people of Walton are justly proud of the excellent manner in which it was conducted.

State News.

Crittenden county corn looks fine. Wheat small, all cut, and crop short.

Fayette county wheat yielded from fifteen to twenty bushels to the acre.

Limbs bean crop is a failure in Marion county. The potato crop is splendid.

Georgetown—John Wesley Barkley, candidate for Scott county Commissioner, died suddenly.

Dry weather cut the Boyle county crops. Potatoes are not what they should be. Wheat is being threshed and yielding about 15 bushels per acre, and is selling on the market at \$2. Early corn looks good but the late planting looks bad.

New Castle—A deplorable accident occurred five miles west of here when Ira Doyle, a farmer, ran down his 4-year old son with a mowing machine, cutting off one of the lad's legs. The child nearly died to death before a physician could be called.

Ashland—Susie Cartnell, aged seven years, is believed to be dying at a local hospital from a fractured skull due to her having been hit on the head by a stone thrown by her father, Wm. Cartnell, who threw it at William each time he quarreled with whom she had some trouble.

Elkton—Tom McGhee and son, Taylor McGhee, who have been in jail eight months on a charge of murdering Dick Wells in the north end of this county, will be released as soon as they can furnish bail in the sum of \$15,000 each. Their trial was continued until December.

The Bourbon county wheat harvest was the principal item of interest last week in sections of the county where there was a crop to be harvested. The average was somewhat increased over last year and the crop was much better than it looked a few weeks ago. The weeds were full and here and there the result was a little above the average for several years past. This may encourage farmers to sow a larger acreage in the fall.

The Chautauqua.

Weather conditions this week have been very unfavorable to the Chautauqua, and the attendance Monday and Tuesday was not as large as otherwise it would have been. The programs both afternoon and evening have been given in full and delighted all.

Thenceforth, Monday, by Charles Daugherty Company and Dr. E. A. Daugherty's lectures, "The Menace of the Yellow Peril" and Luther Burbank the Plant Wizard, made an excellent program. The lectures being full of information, given in excellent style.

The concert Tuesday by Lenzo's Italian Band, were charming while the dramatic readings of "Nanette" were grand. In fact the entire program was given tumultuously and the audience was sorry when it was completed.

The RECORDER went to press too early to contain anything about Wednesday's program, but with favorable weather a very large attendance was anticipated for both afternoon and evening.

UNION July 6th a. m. and Oct. 10th.	BELLEVUE July 12th p. m. and Oct. 5th.
FLORENCE July 6th p. m. and Oct. 19th.	PETERSBURG July 13 and Oct. 11th.
VERONA July 9th a. m. and Oct. 15th.	HEBRON October 23d.
WALTON July 9th p. m. and Oct. 18th.	RICHWOOD October 24th.
CONSTANCE July 10th a. m. and Oct. 22.	

RATES—State 55c; County 70c; School 20c on the \$100. Poll-Tax \$1.50. School \$1. Dog tax \$1. Graded School Rates—Verona 50c; Bellevue 50c; Union 20c and Florence 25c on the \$100. Graded School Poll-Tax—Verona \$1; Union \$1, and Florence 50c.

All unpaid taxes become delinquent after Nov. 30. Six per cent. penalty due County and State added Dec. 1st on all delinquent taxes; Six per cent. commission in addition to penalty is allowed Sheriff for collecting delinquent taxes. Cost of levy, 60c; advertising \$1.

Please make inquiries for amount of your taxes before Nov. 15th. We can not receive every one's taxes on the last few days of November.

W. D. CROPPER, Sheriff Boone County.

BOONE COUNTY, KY., ROAD BONDS FOR SALE.

Bids will be received at the office of the County Judge in the Court House, Burlington, Ky., until noon August 10th, 1917, for the purchase of Boone County Road Bonds Nos. 51 to 250 inclusive. These bonds are in denominations of \$500.00 each, 4 per cent. interest, payable annually and July, with coupons attached. No bid will be accepted for less than par and accrued interest which amounts to \$502 for each bond on day of sale. These bonds are due serially as follows:

Nos. 51 to 80 due July 1922	\$15,000
" 81 to 100 due "	12,500
" 101 to 120 due "	10,000
" 121 to 140 due "	10,000
" 141 to 160 due "	10,000
" 161 to 180 due "	10,000
" 181 to 200 due "	10,000
" 201 to 220 due "	10,000
" 221 to 240 due "	10,000
" 241 to 250 due "	10,000

This is a part of a \$200,000 bond issue voted by Boone county, Kentucky, and is the only indebtedness of the county that has a total assessed value of \$7,300,000.

These Bonds are non-taxable in Kentucky.

E. P. CASON, County Judge.
N. E. RIDDELL, County Attorney.

Notice to Road Contractors.

Office of the Fiscal Court of Boone County.

Sealed proposals addressed to the Fiscal Court of Boone County will be received up to 12 o'clock, noon, July 24th, 1917, for the improvement of the road known as the "Willis Pike."

Beginning at the end of the Union and Big Bone road and extending in a southerly direction to Big Bone Springs, a distance of 3.84 miles. The work proposed to be done involves approximately:

2,840 cubic yards stone, crushed or napped.

80 lineal feet 12 inch metal pipe.

20 lineal feet 18 inch metal pipe.

10 lineal feet 24 inch metal pipe.

20 cu. yds. stone masonry.

57 cu. yds. Class "A" Concrete.

74 lbs. Rein. Steel.

4500 sq. yds. scarifying and shaping.

A single bid to be submitted for the whole work.

The Fiscal Court of Boone County expressly reserves the right to reject any and all bids.

Each bid shall be accompanied by cash or certified check payable at sight to the order of the County Treasurer for \$250.00, which check shall be held until the execution of the contract.

All work to be done under the direction and supervision of the County Road Engineer.

By order of the Fiscal Court of Boone County.

W. R. ROGERS, Clerk of the Boone County Court.

WILSON GIVES WARNING

Just Prices, Not Unusual Profits, Will Be Fixed, Says President.

No Man Can Win Honor Who Thinks of Himself Is Warning.

Washington, July 11.—President Wilson appealed tonight to the country's business interests to put aside every selfish consideration and to give their aid to the nation as freely as those who go out to offer their lives on the battlefield. He said:

"My Fellow Countrymen: The Government is about to attempt to determine the prices at which it will ask you henceforth to furnish various supplies which are necessary for the prosecution of the war and various materials which will be needed in the industries by which the war must be sustained. We shall, of course, try to determine them justly to the best advantage of the nation as a whole; but justice is easier to speak of than to arrive at and here are many considerations which, I hope, we shall keep steadily in mind while this particular problem of justice is being worked out. I, therefore, take the liberty of stating very candidly my own view of the situation and of the principles which should guide both the Government and the mine owners and manufacturers of the country in this difficult matter.

"A just price must, of course, be paid for everything the Government buys. By a just price I mean a price which will sustain the industries concerned on a high state of efficiency, provide a living for those who conduct them, enable them to pay good wages and make possible the expansions of their enterprises which will, from time to time, become an essay as the stupendous undertaking of this great war develop. We could not wisely or reasonably do less than pay such prices. They are necessary for the most effective means in their power to defeat the armies engaged against Germany. When they realize this we may take it for granted, count upon them to reconsider the whole matter. It is high time their extra hazards are covered by war-risk insurance.

"I know, and you know, what response to this great challenge of duty and of opportunity the nation will expect of you, and I know what response you will make. Those who do not respond, who do not respond in the spirit of those who have gone to give their lives for us on bloody fields, may safely be left to be dealt with by opinion and the law, for the law must, of course, command these matters. I am dealing with the matter thus publicly and frankly, not because I have any doubt or fear as to the result, but only in order that in all our thinking and in all our doings, each of us may move in a perfectly clear air of mutual understanding.

"And there is something more that we must add to our thinking. The public is now as much a part of the Government as are the army and navy themselves; the whole people, in all their activities, are now mobilized and in service for the accomplishment of the nation's task in this war; it is in such circumstances that it is justly to distinguish between industrial purchases, made by the Government and industrial purchases made by the managers of individual industries; and it is just as much our duty to sustain the industries of the country, all the industries that contribute to its life, as it is to sustain our forces in the field and on the sea.

"We must make the prices to the public the same as the prices to the Government. Prices must be the same everywhere now; they mean the efficiency, or the inefficiency of the nation whether it is government that pays them or not. They mean victory or defeat. They mean that America will win her place once for all among the foremost free nations of the world, or that she will sink to defeat and become a second-rate power, alike in thought and in action. This is a day of reckoning and every man among us must personally face that reckoning along with her.

"In this case needs no arguing. I assume that I am only expressing your own thoughts—what must be in the mind of every true man when he faces the tragedy and the solemn glory of the present war for the emancipation of mankind. I summon you to a great duty, a great privilege, a shining dignity and distinction. I shall expect every man who is not a slacker to be at my side through this great enterprise. In it no man can win honor who thinks of himself."

"Do they mean that you must be paid, must be bribed, to make your contribution, a contribution that costs you neither a drop of blood nor a tear, when the whole world is in travail and men everywhere depend upon and call upon you to bring them out of bondage and make the world a fit place to live in again amidst peace and justice? Do they mean that you will exact a price, drive enduring the agony of this war on the battlefield, in the trenches, amidst the lurking dangers of the sea, or with the bereaved women and pitiful children, before you will come forward to do your duty and give some part of your life, in easy, peaceful fashion, for things we have fought for? Do they mean that we have fought for these things, our lives, our sacred honor to vindicate and defend liberty

and justice and fair dealing and the peace of nations? "Of course you will not. It is inconceivable. Your patriotism is of the same self-denying stuff as the patriotism of the men dead or maimed on the fields of France, or else it is no patriotism at all. Let us never speak, then, of profits and of patriotism in the same sentence, but face facts and meet them. Let us do sound business, but not in the midst of a midst. Many a grievous burden of taxation will be laid on this nation, in this generation and in the next, to pay for this war; let us see to it that for every dollar that is taken from the people's pocket, it shall be possible to obtain a dollar's worth of these sound stuffs they need.

"Let me turn for a moment to the ship owners of the U. S. and the other oceanic and inland, whose example they have followed, and ask them if they realize what obstacles, what almost insuperable obstacles, they have been putting in the way of the successful prosecution of this war by ocean freight rates they have been

"They are doing everything that high freight charges can do to make the war a failure, to make it impossible. I do not say that they realize this or intend it. The thing has happened naturally enough, because the commercial processes which we are content to operate in ordinary times, have without sufficient thought been continued into a period where they have no proper place. I am not questioning motives. I am merely stating a fact and stating it in order that attention may be fixed upon it.

"The fact is that these 'who have fixed war freight have taken the maintenance and development of industry, and the maintenance and development of industry are necessary for the great task we have in hand.

"But I trust that we shall not surround the matter with a mist of sentiment. Facts are our masters now. We ought not to put the acceptance of such prices on the ground of patriotism. Patriotism has nothing to do with a matter of business, with the acceptance of such prices. It is proper to discuss profits as a matter of business, and never in the present circumstances to be mentioned together. It is proper to discuss profits as a matter of business, and never in the present circumstances to be mentioned together. It is proper to discuss profits as a matter of business, and never in the present circumstances to be mentioned together.

"Patriotism leaves profits out of the question. In these days of our supreme trial, when we are sending hundreds of thousands of our young men across the seas to serve a great cause, no true man stays behind to work for their sustenance. I am not saying that they are but people who are not going to make out of this labor. No true patriot will permit himself to be a scold of their heroism in money or seek to grow rich by the shedding of their blood. He will give as freely and with as unflinching self-sacrifice as they. When they are giving their lives, will he not give at least his money?

"I have insisted that more than a just price, more than a price that will sustain our industries, must be paid; that it is necessary to pay very liberal and unusual profits in order to stimulate production; that nothing but pecuniary rewards will do—rewards paid in money, not in the mere liberality of the Government. I have granted that those who argue this do not stop to think what that means.

A Prayer.

(Kansas State Health Bulletin) Teach me that 60 minutes makes an hour, 16 ounces on pound, and 48 cent in \$1.

Help me to live so that I can lie down at night with a clear conscience, without a gun under my pillow and unhaunted by the faces of those to whom I have brought pain.

Grant, I beseech Thee, that I may earn my meal ticket on the square, and in doing proof that I may not stick the gaff where it does not belong.

Deafen me to the jingle of taint money and the rustle of unwholesome skirts.

Blind me to the faults of the other fellow, but reveal to me my own.

Guide me so that each night when I look across the dinner table at my wife, who has been a blessing to me, I shall have nothing to conceal.

Keep me young enough to laugh with my children and to lose myself in their play.

And then when comes the smell of flowers, and the tread of soft steps, and the crushing of the sear's wheels in the gravel, our in front of my place, make the ceremony short and epitaph.

"Here lies a man"

Will need Them On Our Roads Next Winter.

Casting out an eye for future means of transportation to our county, the New-Herald has hit upon the scheme of using Submarines, especially on the Owenton and Sparta road.

When winter comes with its rains and melting snows, the soft and ideal base for submarine operations. We would suggest submarine in their stead, but the government will have its hands full furnishing fuel for the submarines. By the way, I think the submarine business will not be so popular in Germany and we suggest that the United States Court negotiate for two or three second-hand submarines, place them on this road, New-Herald

Annual July Clearance Sale

NOW GOING ON

We are not going to quote prices in this advertisement, but advise you not to miss this Money Saving Event, as at this sale, prices will be reduced to the Lowest of the Season.

Women, of Newport, Covington and vicinity who have been waiting for this sale know the character of The Luhn & Stevie Co., Merchandise. They know that moderate prices are the invariable rules in our stores, and this July Sale was planned with these two features uppermost in mind. Therefore we say you will find unmatched values in every instance, you will find Merchandise made up to the standard, not down to prices.

The summer is yet before you and the harvest is here for you to avail yourself of the opportunity to reap your share of the Bargains in the following departments.

SILKS
PRINTED VOILES
SUMMER WHITE GOODS
HOSIERY
UNDERWEAR
Bleached and Unbleached Muslin
PILLOW SLIPS
TOWELING
LACES, EMBROIDERIES
MUSLIN UNDERWEAR
CURTAIN DRAPERIES
Mercerized Table Damask
NOTIONS

Planning this sale was difficult this year, but in spite of all difficulties, and many of them seemed unsurmountable, we have succeeded in an astonishing way in bringing together merchandise of unusual merit at low, yes exceedingly low prices.

Despite the fact that it was hardest to provide Muslin Underwear that is dainty, refined and still low priced, we are sure you will agree that we have succeeded in a marvelous way. Many tables and all counters are laden with merchandise in tempting variety—a wonderful selection at prices impossible for any one to duplicate.

NEUTRAL NATIONS

Must Become Self-Supporting as We Will Need Our Own Rations.

(Chicago Tribune)

Nothing can be more vital to our welfare than the efficient control and distribution of exports. The President's proclamation establishes the machinery of control beginning July 15, no food, fuel or munitions can be shipped abroad except by the consent of the President or the Secretary of Commerce acting for him. This involves the exercise of enormous power. At no other time in our American supplies been so great a factor in a European struggle, and the control of these supplies may be equivalent to the control of the destinies of nations.

The problems that will arise are numerous and perplexing; they must be solved with reference to our own needs and military aims. Our primary duty is to maintain our armies in the field and provide for the people of the United States. Our allies are helping our battle and we cannot do otherwise than to furnish them with our surplus production as we can spare.

But we owe no such duty to the neutral European countries. If we had any obligation to feed them, it is certainly canceled by the increasing evidence of the aid they are giving Germany. In Scandinavian circles it is vigorously denied that our foodstuffs have been allowed to reach Germany. That may be technically true, but if our food enables the Scandinavians to produce munitions and supplies for the Central Powers then we surely have a right to shut off that food.

Our Government is said to have learned that Sweden shipped 9,000,000 tons of iron ore to Germany during the last two years. We may assume that a good share of the food that supported the iron mining industry came from this country. If we shut off that food the miners will have to become farmers. Agriculture may not be as profitable as mining, but we are engaged in a great military undertaking and we cannot afford to allow the question of Sweden's profits to stand in the way of our military aims.

We have used Sweden as an example, but the same thing has been going on in the other neutral nations—Norway, Denmark, Switzerland and Holland. We believe these countries can make themselves largely self-supporting. We do not believe they are entitled to special consideration as long as they continue to trade with Germany. Our production of food and munitions is hardly adequate to supply ourselves and our allies. Under these circumstances we cannot afford to pass our rations around to the neutral countries except in return for definite military benefits.

Dave McGinnis, who resides on the Lexington road, whose is above reproach for truth and veracity, is above reproach for truth and veracity. A Messenger reporter that following the storm of wind and rain that part of the Lexington road was covered with small frogs. When they came from he could not tell, he only knew they were there by the millions. —Davies Messenger.

The KITCHEN CABINET

To be honest, to be fearless, to be just, joyful, kind. To go to the light and to struggle, face again to the light and to struggle without waiting a moment in regret.—K. W. Trine.

GOOD THINGS FOR THE TABLE.

The following dish is a good one for a hot dish, as a large number may be served at slight cost.

Hot Chicken Sandwich.—Cook very tender chicken until plenty of water, which will be used in making the gravy. Cool and remove the meat from the bones and cut it into bits with the scissors. Put the skin and giblets, omitting the liver, through the meat chopper and mix the chicken with enough stock to make the mixture moist; season well with salt and pepper. Thicken the remaining stock with one and a half tablespoons of flour mixed with cold water, using this amount for every cupful of stock. Let it bubble and season well.

When serving, allow two slices of bread cut thin; place one slice on a hot plate, spread a spoonful of the chicken mixture over it and cover with a second slice, then dip a ladle of gravy over it. Serve with a generous portion of well-cooked rice or mashed potatoes. One chicken cooked and served in this manner will serve 15 people.

Bolled Russian Dressing.—Take two-thirds of a cupful of any kind of bolled salad dressing, four tablespoonfuls of strained chili sauce, two tablespoonfuls of diced pimientos, a half tablespoonful of chives cut in half-inch lengths, and a tablespoonful of tarragon vinegar. Mix all the ingredients and chill well; then serve on lettuce.

Egg Dish.—Melt a tablespoonful of butter in a baking dish; cover with crumbs and pour over a half a can of mock turtle soup diluted with a third of a cupful of hot water. Break five eggs very carefully over the top. Sprinkle with half a teaspoonful of salt, an eighth of a teaspoonful of pepper and a third of a teaspoonful of curry powder well mixed. Dot with bits of butter and bake from 12 to 15 minutes.

Green Pea Omelet.—A few left-over green peas may be stirred into an omelet just before putting to cook and served with a circle of them around the platter.

A Week's News

Tobacco is growing nicely.

The rains have refreshed the pastures.

The candidates will soon enter the home stretch.

There have been no hot nights so far this summer.

Swat the fly, but don't expend time and labor on a nail head.

It will be only a few days now until the conscription will be done.

Have Edson Riddell insure your tobacco against destruction by hail.

Clarence Mitchell bought an auto last Friday at Baker & Eldins—a Ford.

Rev. Edgar Riley's is the next stretch of sidewalk to be constructed.

then from the top of a suitable pole raised in the corner of the court house yard.

W. T. Ryle, of Commissary, received a five passenger Chevrolet, last Sunday.

The sale of automobiles is being pushed in nearly every neighborhood in this county.

Next county court day the successful candidates will be receiving congratulations.

Several fine showers of rain have fallen in this part of the county the past week.

William Utz, over on the Florence pike, bought a Maxwell touring car of W. L. Kirkpatrick, last week.

A sewing machine agent struck the town one day last week, the first that had been in town for a long time.

The crops in this neighborhood were in splendid condition to receive the rain that fell last Friday evening.

Judge Gaines began a term of circuit court at Warsaw, Monday. He expects to be kept there only a few days.

Lewis Clegg, of Union precinct, dropped in to see the Recorder as he passed through town enroute to Petersburg, Friday.

The construction of sidewalks on South Jefferson street is about completed. The work on the west side of the street is all done.

The Boone County High School has very flattering prospects for a considerable increase in the number of pupils the coming year.

The Covington and Lexington pike from Erlanger to the Boone and Kenton line is under repairs—being scarified, crowned and oiled.

During the Chautauque last year Burlington was mourning the death of a popular young person and the same is the case again this year.

The parties who have the contract for rebuilding the Lexington pike in this county are having trouble securing cars to haul their stone from the quarry.

Fred Bentler, of Erlanger, brought the Chautauque tent and other equipment over in his truck last Sunday afternoon. It was shipped from Sadeville, Scott county to Erlanger.

Two brothers, natives of Boone county are candidates for Democratic nominations for county offices in Kenton county. S. W. Adams, for county attorney, and Jas. L. Adams, for assessor.

Several Burlington people were present at the laying of the corner stone of the new church last Sunday afternoon. It rained enough to interrupt the services but not enough to wet anyone.

All day Sunday groups of three or four people could be seen on the streets of Burlington, discussing the accident to Arthur Kelly. Tidings from his bedside were sought every minute.

Coleman Lassing, son of the late Dr. H. C. Lassing has joined the hospital corps and expects to be sent to France by the first of next September. He reported at Ft. Thomas last Sunday.

J. T. Stephenson, of Limaburg neighborhood, is cultivating in corn a field on which he has raised a crop of corn each year for the last seven, and he says the corn on it this year is as fine as he ever saw at this time in the season.

The wheat and rye crop are in the shock. The average of wheat in this county was small and in most instances the straw was thin on the ground, but the heads are large and well filled with nice, plump grains. The rye crop is not large but of good quality.

A very late rain fell here last Friday evening between seven and eight o'clock, which was fine for corn, tobacco, pastures and gardens. Had there been an extended late drop of early potatoes, the result would have been the result.

AN OLD DOCUMENT

To the Voters of the Sixth Congressional District of Kentucky.

Headquarters Detachment Fifty-Fifth Ky. Vol. Inf.,
Warsaw, Ky., July 31, 1865
General Orders,
No. 5

The following instructions from Major Genl. John M. Palmer, commanding District of Kentucky, are published for the information of all concerned:—

Headquarters Department of Kentucky,
Louisville, Ky., July 26, 1865
General Order,
No. 51

The near approach of an important election, to be held in all of the counties of the State and Military Department of Kentucky, renders it proper, in the judgment of the General Commanding, to require all officers commanding troops, to give to the officers of the State, charged by law with the duty of conducting elections, and to the legal voters of the State, the most complete protection.

Martial law prevails in the Department of Kentucky, and certain classes of persons are especially under military surveillance and control. Those are:

1st. All rebel soldiers, whether paroled or not, and without regard to the fact that they have or have not taken any of the oaths prescribed by law, or executive or military orders, or have registered under orders from the Headquarters of the Department of Kentucky.

2nd. All guerrillas and others, who, without belonging to regular rebel military organizations, have taken up arms against the Government, who have in any way operated against the Government or people of Kentucky, or any other State or Territory.

3d. All persons who by act or word, directly or indirectly, gave aid, comfort or encouragement to persons in rebellion. This includes all persons who have voluntarily acted as scouts or spies for rebel guerrilla forces, who have voluntarily furnished any rebel force with information, food, clothing, horses, arms, or money, or have harbored, concealed, or otherwise aided or encouraged them.

4th. All deserters from the military or naval service of the United States, who did not return to service or report themselves to some Provost Marshal within the sixty days limited in the Proclamation of the President of the United States, dated the 11th day of May, 1863, and who have deserted from the military or naval service of the United States after the 3rd of March, 1865, and all persons who have departed the jurisdiction of the District in which they were enrolled; or went beyond the limits of the United States to avoid any draft.

All persons who were or have been, directly or indirectly, engaged in the civil service of the so-called Confederate Government, or of the so-called Provisional Government of Kentucky; or who have in any way voluntarily submitted to either of said pretended Governments—all agents of or contractors with or for either of said pretended Governments—all such persons are disqualified from voting by the laws of the State of Kentucky, and the Act of Congress of March 3d, 1865.

All persons of the classes aforesaid are required to abstain from all interference with elections, and if they shall in any manner interfere therein, by voting, or attempting to vote, or persuading any other person to vote, or by appearing at the polls, be at once arrested and held for military trial.

Aid will be given to the civil authorities to enforce the law and to preserve the peace. Any person who shall counsel, advise or encourage, any judge of any election, or any other person, to disregard or disobey the law, as declared in the Proclamation of the Governor of the State, will be at once arrested.

The peace of the country can be secured only by obedience to the laws. By Command of Major General JOHN M. PALMER.
E. B. HARLAN, Capt. and A. A. G. Official.

B. W. SULLIVAN, Lt. and Act'g A. A. G.

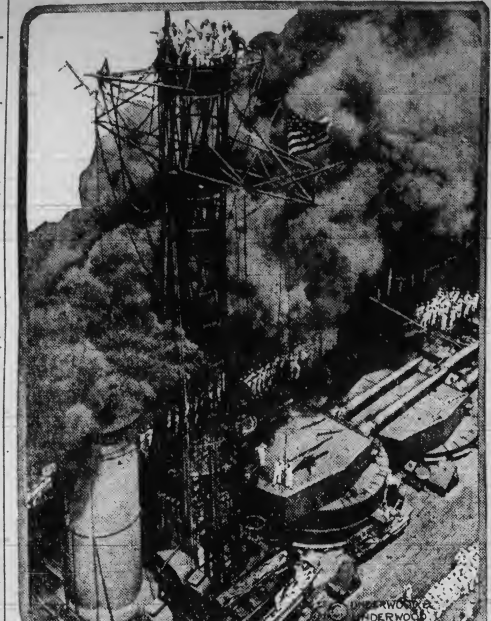

In accordance thereto, a sufficient guard will be placed at each voting precinct in the counties of Boone, Grant, Gallatin, Owen, Carter and Trible, for the purpose of enforcing the observance of the above order, and to assist the civil authorities in preserving a quiet and peaceful election.

It is hoped that all persons coming under the head of the foregoing Order will remain absent from the immediate vicinity of the polls during the election, of the election, so that it may not become necessary for any military interference, and thereby avoid the inconvenience arising from an armed and armed by a Military Commission.

By Order of
Major Fifty-Fifth Ky. V. I. Com'd.
Official:
GEO. M. HARPER, Est. Lt.,
Co. G., and Act. Adjt.

The creation of which the above is a copy was found by N. E. Riddle a few days ago when looking over the old papers of his grandfather, E. H. Hawes. The older people of the county who were citizens in 1865, will remember the indignation on the part of these persons resulting from the above order and its like, and the officers elected in

UNITED STATES BATTLESHIP WYOMING

For Representative—W. P. Cropper.

A. A. Murat, for Coroner.
W. R. Rogers, for Surveyor.
By LIZZIE ROGERS, County Clerk

Why Coffee Remains Dear.

Sharp reminder that the law of supply and demand does not govern the price of coffee is found in the recent proposal of the British Government again to permit the entrance of that foodstuff into England under certain harsh conditions. Last February, to maintain the level of the money exchange, it was decreed that many certificates might not be reported, thus ensuring a favorable balance of trade. It may be said that Brazil furnishes the world with its coffee, and it is to this that the British Government addressed her. The coffee should be carried only in the confiscated German ships now in Brazilian harbors, and that they should also bring with them foodstuffs. To these stipulations Brazil has demurred, especially to the one relating to the exclusive use of seized German ships. Brazil, it may be said in passing, is displeased with the recent embargo set at Washington placing the control of exports within the hands of the President.

All this leads up to the fact that despite the cutting off of the teutonic people, great coffee drinkers, and the residents of the United Kingdom from their supply of the fragrant bean of Arabia, the cost to Americans remains the same as before the war. Indeed, it is even higher. One would naturally infer that the reduction of the volume of the demand would affect the prices, but it has not done so.

This is due to the valorization plan of the Brazilian Government, which assists the planter to keep the market steady. Before the war coffee was cheap in Germany, than it was in the United States, although it came from the same source and there was a revenue tariff of seven cents a pound collected at Hamburg and Bremen, as against nothing at our ports. To assist in the financing of the war, the astute Brazilian came to the country to borrow the money, thus creating the spectacle of the acute Yankee saddling upon himself the expense of a scheme to rob his fellow residents of this great, glorious and gullible country.

It would not do for the Council of National Defense, which is investigating the coal and food production to look also into this affair of the coffee. If our South American neighbor will chug along in the voice of reason, she should be gently informed that valorization cannot be confined by territorial lines, and that an embargo is a useful weapon under some conditions.—Enquirer.

The Indiana Supreme Court has decided that the act passed by the 1917 Legislature, calling a constitutional convention for January, 1918, is unconstitutional and null. The Legislature has no power to call such a convention without first having been directed so to do by the people. The decision holds that the Legislature has no inherent power, and that its powers are circumscribed by the provisions of the present State and Federal constitutions.

John W. Hogan, of the Mt. Zion neighborhood was in Monday to advertise a sale of personal property for Wednesday afternoon, August 1st. He sold his farm to a Mr. Jones, of Lewis county, who was with him that day.

Through the efforts of Congressmen A. B. Boone, the parties who have the contract for reconstructing the Lexington pike in this county will be able to secure the money which to ship in their material.

The funeral procession of Arthur Kelly, last Tuesday composed of his friends and relatives was the largest that ever entered the Old-Follows cemetery at Burlington.

Pic-Nic!

WILL BE GIVEN AT
Harvest Home Grounds,
Saturday Afternoon,
July 28.

Everybody is Invited to Attend and Have One Good Time.

A World Day. Canning No. 3.

Is the time coming when it may be said that the sun never sets on Old Glory on Old Glory's day, the Fourth of July? Such is indicated by the manner in which our Fourth was celebrated Wednesday, in other lands wherever a new understanding of its significance has been born of our entry into the world war for freedom.

The Fourth of July, the anniversary of our declaration of independence of Great Britain—an independence which thus declared by the pen we proceeded to win by the sword—this year was celebrated by Great Britain and her colonies, throughout whose earth-girdling dominions the flag which symbolizes the independence we won from King George, floated by order of his successor, another George, side by side with the Union Jack.

And in France there was much enthusiasm for the Stars and Stripes Wednesday as there was anywhere in America. It cannot be said that if there had been no Fourth of July in America there would have been no Fourteenth of July in France, but it can be said that because there was a Fourth of July in America there was a Fourteenth of July in France. And in this time of war which is to decide, not whether Americans or Frenchmen, but whether mankind are to be free, no people better understand the significance of our Independence day than the people of France.

And thus it is that in this war America and England, foes in the former's struggle for freedom and France, who sided the one in that struggle, are marching now together in the world's struggle for freedom and unity—ever Russia, groping to the light—in honoring the day which marks the birth of the first great free republic.

Is it, indeed, fantastic to foretell that the time, not far in the future, when because of the birth of this first great free republic, because of the motive which has impelled it to enter this war because of the widening of freedom's horizon which this war is to bring the natal day of our republic shall come ultimately to be glorified as the natal day of democracy, and our Fourth of July be united upon as the Fourth of July, not of one people, but of an emancipated world?—C-J.

Self Explaining

Cincinnati, Ohio, July 13 1917.
Mr. W. L. Ridell,
Burlington, Ky.

Dear Sir:
My attention has been called to the attached article printed in the Recorder of July 12th, in which it is alleged, that strangers from Cincinnati or Covington, on Tuesday, exploded dynamite in that part of Gumpord creek, known as "Taylor Hole," thereby destroying a large quantity of fish.

Inasmuch, as a party of Erlanger people, including myself, spent Monday night and all day Tuesday, in that vicinity, and were at "Taylor Hole," a large part of the time, and to the best of our knowledge there were no other strangers there, the article mentioned, tends to reflect, that we were concerned in this alleged unlawful act. For your information, and that of the public, we wish it understood, that there was no explosive of any kind, whatever, used by our party, and that, for any other time, nor was there any other unlawful means used to capture or kill the fish in the waters mentioned.

Very Respectfully,
H. W. SHEARER.

Kentucky's Quota.

Frankfort, July 14.—Notification of Kentucky's quota under the selective conscription law was received today by Governor Stanley. Kentucky will be called on to supply 1,200 men for the draft army. It will then be three days to figure out the percentage of men for each county and city. When the work is concluded the quota for each county will be announced.

D. S. Rice, Perry Presser and P. H. Brown put a fine lot of potatoes on the Cincinnati market the past week.

The Baptist congregation have added to the looks of the interior of their church by having the walls papered in white.

The Tobacco Crop.

Tobacco in Scott county is growing well.

Latest reports from Virginia say that an average crop has been set out there, which is looking well.

The crop in Montgomery county, Tenn., continues to look well, and now promises an average crop.

In Bracken county there was not as much transplanting done as at first planned. The crop is looking well.

Notwithstanding the fact that tobacco on some sections of Bourbon county was planted late, it is growing nicely and the plants look very promising.

The 1917 crop in McCracken county promises well. The acreage is fully as large as last year's larger. Growers are experiencing trouble over the scarcity of labor.

In Fayette county, the crop looks exceedingly well, and farmers are looking for this crop to make new records this winter and are most anxious to have it turn out well.

The 1917 crop as far as acres are concerned is far short of last year's crop in Ohio, but it is really larger than can be handled as thoroughly as they would like to do because of the scarcity of labor.

In Jessamine county the crop will be late, farmers having just finished planting last week. The showers last week gave them a fine season and practically all was in the fields by the end of last week.

Tobacco all over the eastern section of Kentucky is doing much better than is usual at this time of the year. In the western section the crop has been well cared for and is in fine shape and growing nicely.

Pennsylvania's crop has had an excellent start with plenty of moisture sunny days and warm nights. While cut worms have made their appearance they are no worse than usual and there has been little occasion for worrying.

Tobacco in Montgomery county is growing fine and many fields show stalks with fifteen leaves on them. Never in the history of the county has a crop had a better start than this year's. The plants all lived, the weather has been ideal and growers had but little trouble with worms or insects. Fertilizers are all clean and in fine condition.

The growing crop in Christiana county is coming along splendidly in nearly every part. The plants have grown under favorable conditions and already are attaining a "spread." If the weather continues seasonable the crop this year promises to be one of the best grown in a long time, though the acreage in the section is estimated to be about 20 per cent short.

The crop in Connecticut is all in the fields and while thousands of it have been set out at a late date, they are in the ground from ten days to two weeks earlier than seemed probable a few weeks ago. The crop is a whole lot in much better condition than the crop of 1916 was on corresponding date. In ideal proportions has the heat and humidity been supplied by nature, it is well within the bounds of possibility that the 1917 crop of New England will be long remembered for both quality and quantity.

R. S. W. Ryle, of Landon, was in Rabbit Hash Sunday, renewing old acquaintances.

Mrs. Walter Fritz, of Milford, Ohio, is visiting her mother, Mrs. Lou Vaness.

Little Aylor and daughter, Ethel, of Lawrenceburg, were week-end guests at J. J. Stephens'.

Allie Riggs, wife and son of Indianapolis, are visiting his parents, Mr. and Mrs. S. N. Riggs.

The K. of P. Lodge elected Geo. H. Walton and J. Colin Kelly as representatives to the Grand Lodge.

Mr. and Mrs. Theodore Keener and little daughter, of Cincinnati, are guests of Mr. and Mrs. Ben C. Stephens.

The ladies of the East Bend M. E. church will give an ice cream supper at K. of P. Hall next Saturday night. Everybody invited.

A severe wind, rain and hail storm passed over here Friday night, doing considerable damage to the crops and gardens.

The ice cream supper given by the ladies of the Baptist church at K. of P. Hall last Saturday night was attended by a large crowd and was a success in every way.

Rev. Edgar Riley spoke on the Resurrection and an Auxiliary was organized with about thirty members.

Miss Ashbrook, of the Federal Department of Agriculture, will give a demonstration of canning and drying of vegetables at the High School building in Burlington Tuesday afternoon at 3 p. m. All women are urged to be present.

The Federal authorities call attention to conserving all food stuffs and in this way plan to help the American people.

People of Petersburg precinct are astonished at a recent performance of one of their citizens. He visited a neighbor's house and saw that the neighbor was a miser.

He visited the neighbor's house and saw that the neighbor was a miser. He visited the neighbor's house and saw that the neighbor was

SOME HONORS ARE INVISIBLE

Although Intangible and Really Non-existent They Are Eagerly Sought in Many Cases.

There is always something intangible about real honors. That is why the Victoria Cross was made of gun metal and not of gold. It was to mark the fact that the main thing was what it stood for and not what it was itself.

In the same way the most coveted title is the Order of Merit, which only confers the right to put the letters O. M. at the end of one's name. But those letters mean such a lot. They mean that you are one of a little band of the most distinguished people in the world, and that you possess an honor which money cannot buy, says an English writer.

But there are some honors which have absolutely nothing to show for themselves, which are absolutely invisible, intangible, nonexistent, and yet are eagerly striven for.

One of these is the blue ribbon of the turf. There is no such blue ribbon, and if there was nobody knows why it should be that particular color. However, for over a hundred years racing men have talked about winning the blue ribbon of the turf, by which they mean that particular race for three-year-old colts which we call the derby.

Another invisible honor and decoration is the "triple crown." It really belongs to the rugby football field, so sadly depleted on the battlefield in that deadly scrum with the Germans. In normal times England, Scotland, Ireland and Wales play international matches with each other, and, as happens occasionally, one of them "licks" the other three; that one is said to win the triple crown. There is no crown, but the honor is greatly prized all the same.

MIND AND BODY-SLOUCHING

Stand Erect, Face God, Breathe Deep and Talk Sense, is Admonition of Writer.

The hygienic department of the Chicago Herald has this paragraph:

"Keep erect if you want to keep on the road to good health! 'Slouch' or 'slump' and you are apt to find yourself headed for the sick bed. For rounded shoulders and relaxed abdominal walls are often associated with serious nervous maladies."

Not only the physical well-being, but the moral well-being is deeply interested in this suggestion, says the Columbus (O.) State Journal. When a person gives way to body-slouching the mind goes with it and slouches, too. Those nervous maladies referred to are the same as mind maladies, which easily merge into moral maladies. The only thing to do is to stand erect, face God, breathe deep and talk sense. One cannot do these things if he slouches and lets his muscles sag and his organs slump.

Domestic Economy.

Two poorly clad women were proceeding homeward after the exhilarating gaieties of the mothers' meeting, and naturally they discussed domestic economy, says London Tit-Bits. "Due ye ken," said Mrs. Brown. "I'm due ten-and-nine for gas this quarter, and I dinna ken how I'll get it paid." "Why not be like me," said Mrs. Green, "and use the penny-in-the-slot meter?" "But they say it's the dearest in the end. Ye get less gas for your penny, ye ken, than I get for mine." "Aye, but ye see, it's just this way wi' me—I never put in one nail that a penny at a time, and ye see, a lot o' folk comes ter my house at night, and whenever the gas begins to go down I jus let on I hanna got a copper! An' there is aye somebody ready to stump over the penny. Oh, yes, it's far cheaper in the end."

Where "Trousers" is Singular.

In the Castilian language trousers come singly, not in pairs. The story told by Harry A. Franck of his friend Hays, and his struggles with this Spanish idiom, is in the Century, in Mr. Franck's article, "Quito the City of the Equator." Pausing in the entrance of one of the little sewing dens known as tailor shops, Hays asked, "Can you make me a pair of trousers by Saturday night?" "Un par, señor," cried the tailor. "Ah, no; it is impossible so soon. I can make you a trouser by then, though not two of them. Then while you are wearing the one I can perhaps make the other. If the señor is in such haste." "Oh, all right," said Hays, suddenly recalling that trousers are that—is singular in Spanish. "Go ahead, I'll try to get along with one over Sunday."

At the College Exercises.

"Who is that quiet-looking fellow over there nobody seems to be noticing?" "I forget his name; he's won several scholarships, I believe." "And who is the one they seem to be going crazy about?" "That's Jabbs; why, everybody knows him—he's the football champion."

Sad News.

"The expectant heir to his uncle's millions, anxiously asked the doctor when his uncle was taken ill, if there was no hope." "What did the doctor say?" "He told him there was no hope whatever. The chances were his uncle would get well enough to marry his housekeeper."

TO WASH SUMMER FROCKS

Handful of Salt in Rinsing Water Nearly Always Acts as Preservative for Any Color.

When washing colored summer frocks at home, remember these hints: A handful of salt in the rinsing water nearly always acts as a preservative for any shade or color.

Brown Holland frocks always present a better appearance if washed in bran water, without any soap being used. Boil a pound of bran in two quarts of water, strain this into two quarts of clean warm water, and wash the dress in as many lots of water as necessary.

Rinse through cold water and, when half-dry, iron on the wrong side with a hot iron.

Silk summer blouses want washing quickly and carefully, one at a time. Do not wring the blouses, but squeeze through two bowls of soapuds, then rinse through clean warm water. Pale colored silks improve by being given a second rinsing through blue water. Roll in a towel and iron before quite dry with a fairly hot iron. Keeping a piece of muslin between the silk and the iron is a good tip this latter. So many home laundresses ruin silk blouses, making them yellow, by washing them in very hot water.

POCKETS IN NEW BLOOMERS

Garment Designed to Be Worn With Short Skirt of Khaki and the Norfolk Jacket.

It is now possible to buy bloomers which have pockets. In this will be seen the influence of the new sort of feminine garb which is being brought forward in anticipation of woman's entrance into industrial fields which heretofore have not been opened to her.

The pocketed bloomer will be worn with the new short skirt of khaki, whose proper complement is the Norfolk jacket. Moreover, the summer girl who at present does not feel the necessity of identifying herself with any of the national organizations to aid the war department will be glad to avail herself of this convenient accessory for camp wear or for the hiking expedition in the country. These bloomers are to be had all the way from those of white satin to the same humble variety of cotton or satins. The average woman will be attracted toward the models in dimity or nainsook, some of which are in color and which are designed to wear with the lingerie dress of matching hue.

SUIT WEIGHS TEN OUNCES

In summer, comfort's the thing. It is not any too easy to obtain it either. Many frocks have been designed to insure comfort, but few have lived up to their purpose. This charming suit of pussy-willow weighs only ten ounces, and is made in navy blue with white silk stitchings that are very attractive. The suit is adaptable for sport wear and is very durable. The hat is of unusual shape with a very broad brim.

ADJUST HAIR NET LIGHTLY

It Should Not Be Pulled Tightly Over Cuffure at the Beginning as Might Be Supposed.

In adjusting a hair net it is not pulled tightly over the hair, as one might suppose. The best hairdressers always throw it lightly over the hair. While one end is held in one hand, the other is pinned down at one side of the front and a few invisible hairpins thrust into it without any attempt to make it fit smoothly at first. Then the other end is fastened to the other side of the front. This leaves the hair net standing out from the hair in places. Then these little full places are gradually taken up, always being careful not to pull the cuffure down too tightly. The little bunches of net are pinned under the surface of the hair, where they will not be noticeable. A last touch is to take a hairpin and pull the cuffure out into its original form wherever it has become flattened. As the hairdresser says, "Don't be stingy with hairpins."

Knitting Kink. Some of the "knitting girls" are making attractive sweaters out of two colors of wool. They merely use the double strand, one of each color, and treat it as they would the single strand of wool in any other sweater. The effect at a distance is novel and artistic when the right colors are combined. The darker wool is usually used for the trimming bands, neck, collar and cuffs. Rice-colored sweaters made in this way of college colors are popular with the younger girls.

THE MAXWELL

If you are thinking of buying a Family Automobile be sure to see the Maxwell Car, look it over and see how neat it is made and how nice it runs before buying.

Rice, deceased are hereby notified to present their claims against said estate, properly proven, before me at my office in Lexington, Ky., on or before July 28th, 1917. I will sit daily until July 28th to receive and register such claims and proof. CHAS. MAURER, Master Commissioner.

A FAMILY MEDICINE

In Her Mother's Home, Says This Georgia Lady, Regarding Black-Draught, Relief From Head-ache, Malaria, Chills, Etc.

Ringgold, Ga.—Mrs. Chas. Gaston, of this place, writes: "I am a user of Theodore's Black-Draught; in fact, it was one of our family medicines. Also in my mother's home, when I was a child. When any of us children complained of headache, usually caused by constipation, she gave us a dose of Black-Draught, which would rectify the trouble. Often in the Spring, we would have malaria and chills, or troubles of this kind, we would take Black-Draught pretty regular until the liver acted well, and we would soon be up and around again. We would not be without it, for it certainly has saved us lots of doctor bills. Just a dose of Black-Draught when not so well saves a lot of days in bed."

Theodore's Black-Draught has been in use for many years in the treatment of stomach, liver and bowel troubles, and the popularity which it now enjoys is proof of its merit. If your liver is not doing its duty, you will suffer from such disagreeable symptoms as headache, biliousness, constipation, indigestion, etc., and unless something is done, serious trouble may result.

Theodore's Black-Draught has been found a valuable remedy for these troubles. It is purely vegetable, and acts in a prompt and natural way, regulating the liver to its proper functions and cleansing the bowels of impurities. Try it. Insist on Theodore's the original and genuine. B. F.

No Trespassing. Notice is hereby given that camping, hunting—in fact all kinds of trespassing on my lands, are positively forbidden, and the law against same will be strictly and rigidly enforced. Lloyd Weaver, Take Your County Paper.

WHAT HIS FACE DISCLOSED

Inkeeper Decided Famous Traveler Would Let No One Stop Him From Having What He Wanted.

In his new book of personal recollections, "In Good Company," Consul Kernahan tells a characteristic anecdote about Edward Whymper, the famous traveler and mountaineer. The two men had gone for a Sunday morning ramble, and after walking some four miles they came to a wayside inn.

Said Whymper: "I had some very salt blonkers for breakfast. Do you mind if I call in here and slake my thirst?"

It was within the prohibited hours, but Whymper, nevertheless, knocked sharply and loudly in his usual masterful way, and when the door was opened by a frowny-looking man in shirt-sleeves, said dryly, in more senses than one:

"I am thirsty and want a drink, please."

"Are you a bona fide traveler?" inquired the man.

This rather tickled Whymper, who, glancing down at his dusty attire, inquired of the landlord if he didn't look like one.

"I don't know," replied the man, looking at Whymper very hard in the face, "but I'll tell you what you do look like if you wish. You look to me like a man who, having made up his mind to have a drink, would have it whether he was a bona fide traveler or not, and, what's more, wouldn't let no one stop him from having it."

HAD HIS OWN EXPLANATION

Man Viewing Millais' "Trust Me" Gave Novel Interpretation of Picture to Companion.

A lady and gentleman were standing before a picture by Millais, called "Trust Me," in which an elderly squires confronts his daughter, who holds a letter behind her back.

The picture admits of more explanations than one, for Mr. Millais has that London face which puzzle us as the expression of real faces do, says London Tit-Bits.

But the one this gentleman was overheard giving his companion is as new, we will be bound to say, to the painter as to our readers. "You see," he said, "she has got a letter in her hand which she is keeping back from me, the man in the picture. Well, he is the postman, and has just given her the letter; I suppose it from abroad. She hasn't the money to pay the postage, so she says, 'Trust me.'"

The explanation was given with perfect gravity, and in apparent good faith. It was greeted with a look of the same spirit, and the lady seemed proud of her companion's intelligence in so rapidly reading the riddle.

Destroying Old Letters.

There is only one good way to clean your desk of old letters. That is simply to take out each drawer in its turn and turn it upside down over a wastebasket, without regard to whether there is anything valuable in the contents. There isn't anything valuable there, or you wouldn't have cast it among the old letters in the first place. Furthermore, if you begin re-reading letters, you know it, and you'll wind up with almost as much waste as an accumulation as you started with.

And you know before you start that the letters you'd like to keep are the ones you dare not keep, especially if you're married. So throw them all away at once. It will set an admirable example to your wife, who has an attic full of the same grade of junk.—Kansas City Star.

On Closing the Eyes.

Going to and from your place of employment in street cars or in autos close your eyes. There is nothing to see worth seeing. The streets through which you pass are lined with commonplace shops. The boulevards are lined with horrid billboards that advertise tobacco and liquors. The women and girls on the car are not worth flirting with. The men are all closely shaven. They look more like women than the women look like themselves. Close your eyes. Shut out the beastly spectacle of modern civilization. Gladstone used to always close his eyes when there was no need to use them. He closed his eyes at every opportunity. Do you then likewise. Gladstone got along without glasses until a ripe old age.—Los Angeles Times.

Some Neglected Foods.

Among the foodstuffs that American housekeepers have scarcely utilized are turnip tops, radish tops, mustard greens, sorrel and chick peas, among the vegetables, and the cheese product that can be extracted from whey. The greens mentioned may all be cooked like spinach or they may be made into delicious cream soups, as they have been for centuries by European housewives. Enough sorrel grows in the average vacant lot in every city to make many purses of cream soup. Chick peas are as nutritious as beans, and when served in a broth are just as tasty. They also can be made into a puree. Radish tops and mustard leaves make a cheap and appetizing salad.

DRAWING FOR DRAFT

Completed and 687,000 Young Men Will be Called to Serve Their Country.

Washington, July 26.—The great lottery for military service of each of the 10,000,000 men of the United States registered for the war began at 9:49 o'clock this morning. By some time tonight every man will know whether he is among the first 1,370,000 to be called before local exemption boards.

From the 1,370,000 the boards are to select 687,000 for America's first draft army of 500,000 to fill up vacancies in the National Guard and the regular army.

In a committee room of the Senate office building, with representatives of the press present, members of the Senate and House Military Committees began the drawing of 10,000 slips bearing the numbers corresponding with the number of each registrant in the largest district in the country.

Secretary Baker was the first man to draw a capsule—enclosed slip from a great glass bowl. Informed he drew No. 158. In every district in which as many as 25 men had been numbered, two hundred and fifty-eight heads, the lot of those to be called.

Chairman Chamberlain, of the Senate Military Committee, drew the second number. The Senator, blindfolded and plainly nervous, was unable to locate the wide-mouthed glass bowl filled with capsules and groped futilely for a few seconds, an attendant guided his hand to the bowl. He drew a capsule and then silently stepped aside.

"The second number is 2,522," shouted the announcer. The handkerchief was then placed over the eyes of the chairman, and he withdrew the third number, 9,613.

Senator Warren and Representative Kahn, ranking minority members of the Senate and House Military Committees, drew the next two numbers, 4,532 and 10,218. Major General H. D. Smith, chief of staff of the army, drew the 6th number. Just then a round of hand-clapping, the first applause heard since the beginning of the ceremony, burst out.

"The sixth number is 458," the announcer shouted in stentorian tones. Provost Marshal General Crowder drew the next number, 3,405, and Adjutant General McCall, the eighth man to draw, took No. 10,015.

The drafting was then turned over to the appointed clerks. They selected districts with the bowl numbers as fast as the announcer and the tally clerks could keep pace.

They drew the numbers from a high wide-mouthed bowl, set on an oak table in front of the tally clerk's desk. The bowl was large enough to hold three times the number of gelaque capsules which were placed in it. The bits of paper blackened on the back so that from the outside none could see the drawing procedure. Numbers thereon, were curled into the capsules.

As the numbers were announced, they were written on a large blackboard at the rear of the tally clerk's table.

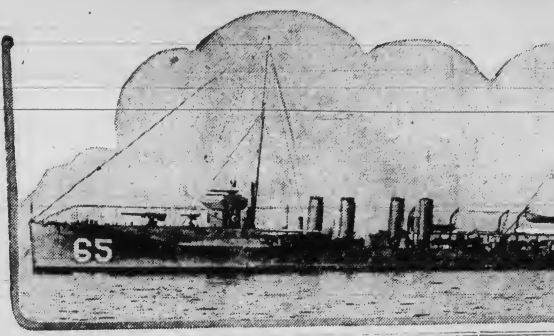

In only a small number of the largest districts will the numbers above a few thousand affect registrants. Of the four thousand five hundred and fifty-seven registration districts, thirty-five have more than a large number of registrants, the smallest has only about 185, and the average is around 3,000. A number of districts have been withdrawn before enough to affect the smallest district came out. It was 128, placed in the fourth district, and fifty-seven men numbered 124 on their local lists as 157th in order of liability.

The room in which the drawing took place, high-ceilinged and light, and about twenty-five by fifty feet, was crowded with army officers, members of the House and Senate committees and newspaper men, the latter seated about a long table running more than half the length of the room.

"We have had this morning," announced Secretary Baker in opening the proceedings, "to conduct the lot or draft by the national army and navy, and the national guard up to war strength, as to be selected. This is an occasion of very great dignity and solemnity. It represents the first application of a principle believed by many of us to be thoroughly democratic, equal and fair in selecting soldiers to defend the national honor."

"I take this occasion to say that every step has been most honestly studied with a view not only to preserve the equality of the national army, but also to preserve all those appearances of fairness which are necessary to satisfy the country that this great selection has been made in accord with every principle of justice. "There are assembled here this morning, in addition to officers of the army, the most distinguished men of the most part the mechanical part of the work, the chief of staff, the Adjutant General and other men high in the military establishment, and the draw-

UNITED STATES TORPEDO BOAT DAVIS

ing is to be held under the observation of the Senate and House Military Committees, so that both the executive and legislative branches of the government are here to see that fairness is given to every person."

FORTY YEARS AGO TODAY

Items Taken From the Issue of The Recorder of July 26th, 1877

Hon. John G. Carlisle and Judge James O'Hara were in Burlington, Sunday.

Len Sandford got two of his fingers badly mangled by getting them fastened in a rope on a hay fork.

Wheat in Robertson county will make 25 to 30 bushels an acre, Of the 960 convicts in the penitentiary not one is sick.

The Skim-Milk Question.

There seems to be considerable difference of opinion as to the best method of feeding skim-milk to pigs, and the following questions are frequently asked: Is it better to feed skim-milk direct from the separator, or to let it stand alone or should it be fed with grain and other feed as a slop; what is a good proportion of skim-milk to corn, and what is skim-milk worth for feeding to hogs, etc.

I would say that for young growing pigs it is much better to feed the skim-milk direct from the separator, rather than let it stand alone. Especially is this true in hot weather as the skim-milk will sour. Skim-milk when fed alone or should it be fed with grain and other feed as a slop; what is a good proportion of skim-milk to corn, and what is skim-milk worth for feeding to hogs, etc.

Never feed skim-milk alone. The best proportions, we have seen, are three parts of skim-milk to one part of grain such as corn, barley, etc. Feed the grain or other feed mixed with the milk, and you will find it is a much more satisfactory than feeding the grain separate. Skim-milk when fed in this way is worth per 100 pounds approximately one-half the value of corn, so that with corn selling at \$1.50 per bushel, skim-milk is worth 75 cents per 100 pounds. One pint of skim-milk weighs approximately one pound.

S. J. LOWRY.

Help the Illiterate Soldiers

Eleven prominent business men in the State are heading a movement to raise \$30,000 to provide a learner's outfit for each of the 30,000 young men in the State who are going to the army. The outfit will not read or write. A learner's outfit costs \$1.00. Thirty thousand people in the State will be asked to give \$1.00 each on or before August 4th. Let our District be the first to come up with its part. \$3,000. We cannot all go to war, but we can all help the soldier who goes to fight for us. Get in touch with your County Captain and your Precinct Lieutenant and help him all you can.

Putting Headquarters in Order

Having secured the front room of the Boone County Farmers' Mutual Fire Insurance Co. for local headquarters, the Red Cross ladies would last week last week and gave the room a thorough cleaning and put it in order for their occupancy. Last Thursday several ladies, members of the Auxiliary, visited the local headquarters to receive instructions in regard to work they intend to do. The gallant gentleman, N. W. Burkett, brought the ladies over in his automobile.

There'll be no Republican Officers

The Republicans failed to present to the county election board a list from which to select officers of the coming primary election. That party has no candidates to be voted for in this county at that election, hence the failure.

Commercial and Industrial Efficiency in America.

The President is under no delusions concerning the relation of patriotism to industry. He knows that no bank will accept patriotism as collateral for a promise to pay some time in the future. He realizes that the efficiency of our industrial and commercial organizations is just as necessary to victory as the efficiency of our army and navy.

As there are different standards of efficiency in the military service, so there are different standards of efficiency in the industrial service. The great combination of commerce and capital that have been controlling the markets for the past two years are not born of efficiency and do not promote efficiency.

The test of efficiency of any industrial or commercial organization, in transportation or in agriculture, is that there should be, in all normal times, an ever-increasing production at an ever-declining cost. As labor and capital, as ingenuity and organization, become efficient, the waste, the friction, the loss of modern commerce will be reduced.

War temporarily alters commercial conditions, and time must be given to men of business to readjust their organizations to meet war's demands.

"It is perfectly proper," says the President, "to discuss profits as a matter of business with a view of maintaining the integrity of capital and the efficiency of labor in these tragic moments, but it would be absurd to discuss them as a motive for helping to serve or save our country."

With this sentence the President punctures many of the pretensions of the organized labor unions, and the organized farmers, who claim to be patriotic and whose patriotic purposes to help the government.

The test of the industrial life of America, the best service our citizens can render the government is the best service they can render themselves and their families.

The farmers are giving an admirable illustration of their capacity to deal with the war. They are not injecting into this service any pretense of patriotic fervor. They are glad to feed the hungry in the great cities. They are glad to feed the army and navy. They are glad to feed our allies, but they must do it only as their personal necessities require. They have planted, they have cultivated, they have produced great food crops; moved by patriotic purposes, but by no means to support their families, to improve their surroundings, to reduce the cost in every step of crop production.

They have received their instructions direct from the markets. They have done what they always do; but they have done it better, with more sagacity, with a greater realization of the value of their work.

The forestallers of the market, the speculators and the organized interests have taken advantage of these conditions to wring extraordinary profits alike from the citizens at home and the soldiers at the front.

They should read with fear and trembling the declaration from the President that men who do not respond to the challenge of the nation in this great struggle may safely be left to be dealt with by opinion and the law, for the law must scatter these conspiracies. The law must clear the channels of commerce from all artificial obstructions. The law must strike cunning and its shackles, to use Mr. Roosevelt's phrase. The law must restore to the producer the control of his property and the right to deliver to the consumer the reward of his labor. The law must protect the consumer from the depredations of combinations. It would protect him from the depredations of the law.

The law must scatter these conspiracies. The law must clear the channels of commerce from all artificial obstructions. The law must strike cunning and its shackles, to use Mr. Roosevelt's phrase. The law must restore to the producer the control of his property and the right to deliver to the consumer the reward of his labor. The law must protect the consumer from the depredations of combinations. It would protect him from the depredations of the law.

Public opinion is not "a thing without profit" but it is a thing of great value. It is a thing that can be used to the common good. It is a thing that can be used to the common good. It is a thing that can be used to the common good. It is a thing that can be used to the common good.

SILOS 'SAVE GRAIN

Can Corn Crop for Cattle—No Tin Needed—Silage Supplies Succulence in Dairy Ration

Less grain can be fed by many dairymen without reducing milk production, provided they will feed more silage and legume hay. Less grain will be available for feeding to cattle, for much more than usual is needed now for human food, and the emergency demands that every effort be made for its conservation. Milk production must be maintained—hence, every effort should be made to substitute other feeds for grain in the dairy ration. To do this the silo will help.

Fruits and green vegetables are canned so as to supply succulent and palatable foods to the family during the winter. Succulence is just as essential to the cow as to a human being. The abundant milk flow obtained from June pasture, to a large extent, is due to the succulence of the grass. Silage provides succulent feed during the winter when pasture is not available. With silage in the ration dairy cattle can be kept in the condition of health common to animals on pasture. The digestive system of a cow is well suited for the utilization of large quantities of green grasses and other coarse succulent material. Silage is palatable and no other feed will combine so well with dry hay and a little grain to produce maximum economical results.

"Silaging" is an excellent way of preserving the mature corn crop or of saving one which for many reasons must be harvested before the total food material in the corn plant is in the stalks and leaves. When the farmer harvests only the ears he loses nearly one-half of the crop; on the other hand, when the crop is put into the silo and the silage is made, the entire crop may be lost unless the farmer has a silo ready in which to preserve it.

No feed crops can be so successfully harvested under widely varying conditions as those that are silaged. In case of drought or frost it is necessary to rush the filling of the silo; rain or dew on the forage does not injure the silage.

The silo at all times, and particularly now, offers to the farmer one of the best means of reducing his feed bills. The present great national emergency places these questions before every farmer who keeps cattle. Have you a silo? If you have not, your herd is not most economically fed. Why not build a silo and fill it before frost comes? If you have one, is it big enough to supply all the silage your cattle can eat before the next crop is harvested? If not, build another. You can buy one ready to erect, or you can build it yourself. Homemade silos of concrete or wood can be erected with little trouble.

Call on the extension department of your State agricultural college for advice or write to the Dairy Division, United States Department of Agriculture, for bills of material, with full specifications for silos of different capacities.

Cemetery Iron Fence in Position

The iron fence which B. W. Campbell, of Cincinnati, gave the cemetery north of town has been erected and adds much to the appearance of that little city of the dead. Those who have relatives and friends interred there will surely appreciate the generosity of Mr. Campbell, as he has removed, to a considerable extent, a matter that was more or less annoying, the keeping of the cemetery property enclosed.

Will Carry the Mail for \$1,388.

Hear that Mr. Conrad's bid for carrying the mail from Covington to Burlington thirteen trips a week, is \$1,388 a year. It is said to be compared with the present volume of mail handled by Mr. Conrad, there will be a considerable increase, and the probability is the carrying of a Post-touring car will not meet the requirements. He may have to provide a truck for the service.

If each of the candidate's claims are made good, there will be a loss for several offices while for one there will be three.

Judge Gaines returned Thursday from Warsaw, Ind., where he had a short time of the gallatin circuit court. He was away from home just long enough to miss the Chautauqua.

Reduces the Attendance at The Chautauqua, Leaving a Deficit of About \$20.

Forty Citizens Sign Contract for Next Year's Chautauqua, August 1, 2, 3 the Dates.

The weather Monday, Tuesday and Wednesday of last week was not propitious for a Chautauqua, and prevented, what probably otherwise, would have been a successful audience. Not until Wednesday afternoon did the inopportune showers cease their annoyance, and a sparse attendance had witnessed the good entertainment up to that evening, when the collections of season tickets and admissions at the door showed that between 600 and 800 people were present to enjoy the concluding program.

The program taken as a whole gave very good satisfaction, and the people who are in the employment of the company conducted themselves in the most creditable manner.

The sale of season tickets and collections at the door did not meet the guarantee by about \$20, leaving a deficit of that amount which the guarantors will have to make good. This did not cast any damper on those who have been instrumental in securing the Chautauqua, and as soon as the dates for next season were agreed upon it took a short time in which to complete a contract for a 1918 Chautauqua at Burlington, Thursday, Friday and Saturday, August 1, 2 and 3. About forty citizens of Burlington and vicinity signed the contract, while 175 season tickets were signed for, and a balance remains on a Chautauqua circuit for at least another year.

STATE'S SCHOOL CENSUS

Shows Enlistment of 637,207 Kentucky's Public Schools.

Frankfort, July 18.—Out of a total scholastic census of 741,386, including the ages of six and twenty years, there was an enrollment in the public schools of Kentucky this last year of 537,207 and an average daily attendance of 356,147. The census includes 31,231 pupils over eighteen years of age, and besides those enrolled in the public schools, 34,301 are attending private schools.

A total of 12,969 teachers were employed, 10,508 in the rural schools and 2,461 in city schools. Among the teachers 3,648 have attended the State University or normal schools, 480 have a high school education, only 4 held State diplomas, 84 hold State certificates from normal schools, 7,433 first-class county certificates, and 5,019 second-class county certificates. The average annual salaries of teachers in the city schools is \$891.31, and in the rural schools \$512.79.

There are 3,006 school houses, 187 in the cities and 2,819 in the country. Of these 7,290 are one-room buildings. The value of school buildings and grounds is \$1,111,159, rural school property being worth \$7,587,389 and city school property \$6,623,770. Furniture and apparatus for city schools are valued at \$49,671 and of rural schools \$275,574, aggregating \$1,410,165.

Veal Calves.

There is unold quantities of grasses, growing wheat and fodders that go to waste every year because cattle are not fed thereon. This wasted food could be used in a good profit if converted into beef. A large percentage of veal calves come to the market for slaughter from the dairies. The average veal calf weighs 100 to 125 pounds and is a few weeks old; rather than to keep it two years and get \$100. He concludes that the price of the calf is his mother's milk, and is profitable than the two year old beef. If the butchers were not allowed to kill these calves, the dairy man would sell them at a reasonable price to the farmers, who would feed them until they weighed ten or twelve hundred pounds, increasing the supply of beef materially.

Has not a man right to do as he pleases with his own property? He has no right to burn his house or barn, nor destroy any sets of the community. Every man knows that the slaughter of veal calves is wrong, when food conservation is of paramount importance, and there is a law, by the masses for the prohibition of this waste.

If our National Government would stop this channel of waste, resources, if only as a war measure it would add to the food supply of the nation, as no other item of economy can. Let those who want it stopped no complain, as did Judas when he regretted the loss of \$45 worth of Spikenard said, "Why this waste?" But let them speak once we can not take some concerted action. We are standing at attention for someone to tell us of a more wasteful item than the slaughter of veal calves.

W. H. EMBRY.
Judge Gaines returned Thursday from Warsaw, Ind., where he had a short time of the gallatin circuit court. He was away from home just long enough to miss the Chautauqua.

Edwards' Garage

A. M. EDWARDS, Proprietor.

Dr. Jas. P. Riffe, of Covington, candidate for the Democratic nom ination for Sheriff of Kenton co., was a visitor here Wednesday, and believes he has a fine chance to secure the nomination.

A. F. Cooper of Greenfield, In dianapolis, spent part of last week here with friends and coming to erect a monument over the re maine of his mother who was buried in the Baptist cemetery several months ago.

D. V. Holder who is employed in the Q. and C. Railroad offices at Cincinnati, is spending the summer months here with his mother Mrs. Wm. B. Norman, making daily trips to his business in the city.

Mr. and Mrs. A. Ralph Edwards entertained a host of the little friends of their son Ralph Gaines Edwards in honor of his third birthday July 17th, and a big time was enjoyed by the lit tle folks.

McClure Chapter Royal Arch Ma sons will have work in the Most Excellent Master's degree, Friday night, July 27th, when the Chapter will be given the annual inspec tion. All of the Companions are urged to be present.

Mr. and Mrs. Albert Johnson and their children J. R. Alphin and Mrs. Johnson, left last Friday for Hume, Illinois, on a visit to relatives and friends making the trip in their Ford.

Miss Martha Rouse, who has been spending part of the summer va ca tion here with her parents, Mr. and Mrs. W. R. Rouse, left Tues day for Chicago, to accept a po sition with a large wholesale mil linery establishment.

Miss Brookling Tompkins, who has been visiting friends at Baras town, Nelson county, returned this week. Her brother, John who is visiting his uncle Lee Hamilton near Walton, was contracted to spend the summer and help in the farm work.

B. C. Black, of Beaver Lick neigh borhood, who has been at Arrsmith Illinois, employed on the rail road, was a visitor here last week, having returned home to spend several weeks on account of an in jury received to his ear while in his railroad work.

Mr. and Mrs. L. L. Hood, Arch Aera and Geo. Thole of the Bur lington neighborhood, were here Saturday when Mr. Aera bought the saw mill and engine of David E. Riley, at Erlanger, and will move to a tract of land near Bur lington to saw a good sized tract of timber.

Harry W. Riley, of Union neigh borhood, candidate for the Demo cratic nomination for County As sessor, was here a part of the week seeing the voters and he has a great many friends who believe his prospect for winning the nom ination is excellent.

Mr. and Mrs. Jno. L. Vest and Mrs. Julia Adams-Rouse attended a meeting of the Eastern Star Chapter at Erlanger, last Friday night when a special program was rendered in honor of the Grand Worthy Matron Emma Menefee of Covington, who was present to in spect the Chapter.

Mrs. B. J. Linneman of Covington, is spending part of the summer months here with Mr. and Mrs. W. R. Rouse, who spent part of the week at Lexington. Her husband, B. J. Linneman is the cashier of the Citizens National Bank of Covington, and spent Sunday here with his wife.

Hon. H. M. Froman of Ghent, President of the Henry Clay In surance Co. of Lexington, accom panied by Claude Snyder, Jr., son of the company, called on the in surer Wednesday here in the in terest of the company and ap pointed Prof. J. C. Gordon as agent to look up the hail insurance writing in this quarter.

Mrs. W. W. Smith, am Charles, daughter Mrs. Ray Ratterman and little son George and Miss Ma liddle, motorized through from Louisville last Saturday and spent part of the week here with Jno. C. Miller and family, going then to Big Bone Springs to visit rela tives and friends.

Stephen L. Blakely and brother L. J. Slakely, were visitors here Monday, returning from a motor trip to Lexington, in which they had a lot of tire trouble, three blow-outs and a few other minor accidents. Stephen Blake ly is the efficient Commonwealth Attorney of Kenton county, and is giving fine public satisfaction.

Mr. and Mrs. Frank Riley and little son of Vevay, Ind., and Mr. and Mrs. Stephen H. Dibble of Quercus Grove, Ind., were visitors here Monday returning from a mo toring trip thru the Blue Grass section, where they enjoyed very much. Mr. Riley is the assistant cashier of the Peoples Deposit Bank and his wife was a Miss Scott and was born and reared near Bur lington.

Wm. C. Readnor and D. B. Wal lace spent last Thursday at Fal mouth where they attended the session of Hauser Chapter Royal Arch Masons for the purpose of inspection by Mr. Wallace who is the inspector of the Chapters in the sixth district. The mar xed a delightful evening was spent with the companions of Hauser Chapter.

William T. S. Blackburn of Dry Ridge, and E. R. Blackburn of Lex ington, were here Wednesday on business pertaining to the in spection of banks of which they are respective members. Both are suc cessful business men and of the public spirited type that helps the community in which they are at tached, as they are always trying

to encourage business enterpris es and maintain movements.

Miss Edna McElroy, of Waco, Texas, who has been here on a visit to her uncle Thomas McElroy and family, the past couple of weeks left for her home Tuesday.

Miss McElroy is delighted with her adopted home in Texas and has a nice position as teacher in a col lege there.

Hon. J. M. Elliston and son-in-law Elsa V. Ross of Elliston Sta tion, were visitors here the first of the week. Mr. Elliston repre sents Grant county in the leg islation and is a candidate for re-election and having no opposi tion will be declared the Demo cratic nominee.

Miss Ruth Atchener, of Sonora, Hardin county, is here on a visit to her sister Mrs. G. F. Holloway expecting to remain several weeks.

Miss Tichenor has attended the dental college in Louisville the past two years and is very ably assisting Dr. Holloway in his of fice work.

Mr. and Mrs. W. F. Moore, Mr. and Mrs. J. F. Houston, Mr. and Mrs. Sidney Ambrose attended the 6th birthday anniversary of their relative Mrs. Susie Utz in Gun powder neighborhood last Tues day. There was a very large gat hering of relatives and friends and a fine dinner was served in honor of the occasion.

Robert Shinkler who has been ill for several months has fully recov ered and will be able to resume his position at Birmingham, Ala., in a short time. When he came here from Birmingham, a physi cian stated that he had tubercu losis and ordered him to not do any physical exercise but to rest in the most of the time and sleep in a tent in the open, under this treatment he fully recovered his health and gained 33 pounds in the past three months.

P. E. Merriam, of Massachusetts who is the District Agricultural Agent with headquarters at Louis ville and Wayland Rhoades, Agri cultural Agent of Kenton county, were here last Friday looking over the work of some of the pro gressive farmers of this locality.

Through the encouragement of the agricultural department and its representatives there has been a marked improvement in the science of farming in this locality and the prospect is good for fur ther advancement.

Rev. and Mrs. Wm. B. Campbell and little daughter, of Mayville, spent the past week here, guests of Mrs. Alice Booth. Rev. Camp bell was formerly pastor of Wal ton Methodist church and is a young man of great earnestness.

Lead in spirit and strong in com mon sense, Rev. Campbell is a dormant reason and quicken the higher and finer aspirations that are asleep within us, as all wit nesses who were at the opportu nity of hearing him last Wednesday evening.

Mrs. Campbell is an interest ing person and a cultured.

The town council meeting Tuesday night agreed to increase the rate for lighting the street lamps to \$60 per month from \$50.

Private lights on ten to cent per kilowatt. There are 30 street lights and the electric light plant has been able to break even in expense in the old rate.

E. L. Kelley, the owner of the light plant, has been giving excellent service, and the increased rate is hardly sufficient to enable him to make a profit. He hopes by in crease patronage to be able to keep up good service and realize a profit from his investment.

Married—Lindsey E. Webster of Grant county and Miss Beulah Plunkett of Gallatin county, were united in marriage at the residence of officiating minister Rev. R. P. DeMolay last Sunday morning in the presence of a few friends.

Mr. and Mrs. Earl Beach of Walton attended them. The happy young couple will make their home on the farm near Elliston Station.

Mrs. W. B. Garriott and children and Miss Ava Lou Hudson have turned here from a visit to Mrs. Sallie Byar at Mineral, Manassas, who accompanied them home to assist Mrs. Garriott arrange the new parsonage.

Mrs. Marjorie Hudson, who has been very ill is much improved.

For Sale—Holstein heifer with first calf, Blissh Hudson, Walton, Ky.

The splendid rains of the past week has brought out the tobacco crop in a wonderful manner and greatly advanced the corn crop both of which were subject to very late planting. The tobacco crop is not over sixty percent of the acreage of last year, but with good seasons it is believed the number of pounds will be equal to that of last year, and some will be very late and un less there is a very late fall large percentage will be caught by the frost. The indications now point to a very good market and it is expected that prices will be as high if not higher than the unprecedented price of last year.

The Walton Loose Leaf Warehouse has made some addi tions and improvements, to be able to handle all of the tobacco raised in the territorial limits, and with the great satisfaction given last year expects to handle more tobacco this season than last, and has made arrangements to handle between three and four million pounds. This market was said to be the best in the State and a better average was secured for the quality of tobacco mar keted.

Jno. L. Vest spent part of the week at Mayville attending a special session of the U. S. Court.

Garnett Tolin (son) Riley and Ernest Arnold went to Cincinnati Monday, to be examined by a physi cian to the officers reserve corps.

Tolin and Riley failed to pass, Tolin being three pounds too light, and they have a defect ive vision. Arnold passed.

Leslie Stephenson,

HEBRON, KY.

Prof. J. A. Cawood is visiting relatives in Mason county.

One week from next Saturday the candidates will learn their fate.

Mrs. F. M. Howlett, of Big Bone, was transacting business in Burlington, Tuesday.

Joe Weaver and Ed. Clegg, of Union precinct, shed a few smiles in the Recorder den, Tuesday.

Miss Irmadelle Mitchell, of Erlanger, has been the week's guest of Miss Gwendolyn Goodridge.

Mrs. Sarah Carpenter spent part of last week with Mrs. Mary Goodridge out at her country home.

Eugene Long and wife, of McVine, were guests of her home, Mr. and Mrs. R. S. Crisler, last Monday.

Miss Louise Blyth returned to her home Sunday after a visit of several days with her aunt, Mrs. Eliza Rouse.

C. C. Roberts has begun digging a cellar, one of the remodeling jobs at his residence on North Jefferson street.

Miss Mary Miller, who had been visiting Misses Melvin and Georgia White returned to her home at Big Bone, Sunday.

G. G. Hughes is carrying the mail on Burlington R. D. 1 while his just 3rd, in the church grove. All taking his annual vacation.

Messrs. Holman Wingate, of Petersburg, Anthony Hasner and Miss Mathews, of Lawrenceburg, were guests at Mrs. Eliza Rouse's, Sunday.

Threshing wheat began in Petersburg bottoms Monday. The acreage there is small but the yield is large, the berry being of very fine quality.

The thermometer on the side of the door at the Boone County Deposit Bank registered 90 at 2:30 p. m. Tuesday, after a thunder shower had skirted the town.

Saturday August 4th, at 8 o'clock p. m., at old Catholic church, Florence, will be given a pupils piano recital by Mrs. Nellie E. Metzger with violin assistant. Admission 15 cents.

Geo. Hewitt requests the Recorder to announce that he has purchased a new, up-to-date, separator, and will begin threshing about the middle of next week. He solicits your work.

Circuit Clerk Maurer delivered to Sheriff Cropper, Tuesday, a list of grand and petit jurors to be summoned for the August term of circuit court which will begin Monday, August 13th.

Kirby and Wilber Conner of Cincinnati, visited their mother in Waterloo neighborhood the latter part of last week. While in the country Wilber Conner bought several cows and calves for L. J. Budd & Co.

The Common School Commencement exercises of the schools in this county will be held in Burlington, the first Tuesday in August. The Teachers' Institute will be held in Burlington the first week in September.

Leland Snyder, of the Plattaburg neighborhood, was a caller at this office Tuesday. Mr. Snyder's number was one of those that came in in the war lottery last Friday. He will probably be exempted as a farmer.

Atty. R. B. Brown, of Warsaw, attended Tuesday's session of a Fiscal Court. Mr. Brown appeared before the court and advocated the building of a bridge across South Fork creek where an inter-county road crosses that stream.

E. L. Baker, one of the Recorder's long time supporters at Berkshire, looked in at the office force for the first time Tuesday. Mr. Baker does not come north very often, and all hands were glad to make his acquaintance.

Alonso Shearer, Fred Bentler and several other Erlanger parties, passed through Burlington, Tuesday afternoon, enroute to their camp on Gunpowder creek to enjoy an outing of several days. They expect to be joined by other Erlanger people today.

Mrs. H. W. Shearer and sister, Miss Bess Hall, of Newport, were guests of their parents, Mr. and Mrs. A. A. Hall last Monday and Monday night. Miss Bess had just returned from a delightful visit of several days to Detroit, Michigan, and the surrounding country.

Arch Acra has bought a saw mill which he will locate on Middle creek, at one time one of the finest timbered districts in this county. Immense poplars and huge walnuts used to abound down there, where millions of feet of excellent lumber timber have been destroyed.

We take this means of feebly expressing our heartfelt gratitude for the kindnesses and sympathy shown us because of the tragic death of our son, Arthur, especially to Dr. J. E. Yelton and wife for their kindness and hospitality and the friends for the floral offerings; also, Rev. R. H. Tiley, the K. of P. Lodge and the undertaker, Mr. Chambers. May God bless them all.

B. T. Kelly and Family.

Complete Proof Essential in Claim for Exemption.

Washington, July 22.—The draft is not in the hands of the states. By midnight tomorrow, when the list of the master lists shall have been mailed to the local boards of operation of the law will practically have passed out of the hands of the Federal Government. It will retain merely supervision of exemptions.

The big question now is: Which state will furnish its quota first? "The race is to the swiftest," General Crowder said. "The state and by the force ready will, of course, receive much honor."

Congratulations from all sides on his handling of the greatest problem America has ever faced in a military way, General Crowder received at his desk throughout the Sunday holiday, directing the work of preparing master lists for mailing.

Practically all the sheets of 1,000 numbers each have now been verified and tallied. Six have already been checked up in the proof and run off by the thousand by the Government Printing Office. It is expected that the last sheet will be ready by morning and that the mailing of them will begin in the afternoon.

In all 6,927 master sheets have to be mailed out, 11 to each of the four thousand five hundred and fifty-seven boards. Ten of the sheets contain 100 numbers each, and the eleventh 500 numbers, making the total of 10,500 numbers drawn.

Complete instructions to cover every contingency that might arise have been sent to the local boards. The rules for handling cards improperly or illegibly numbered, and the last night, were the final word.

The boards will now be left with their own work.

The Government has nothing to do with exemptions. They are officially provided that soldiers will be made out of civilians by civilian boards, men of their own kind. Other civilian boards will serve as courts of appeal. There are 156 of these appellate boards. The majority of them were named yesterday. The remainder will be made public tomorrow. Gen. Crowder said this afternoon.

Indications here tonight were that fewer exemptions will be asked than were expected.

The margin estimated by the Government is only a little more than 2,200,000 men out of the 10,000,000 drafted and that is too narrow to permit of wide apron exemptions. The estimate is that 40 per cent of the drafted force will be ineligible physically to serve.

Claims of exemptions for dependents will be closely investigated. Affidavits not only by the man making the claim, but by a third party named will be necessary, but a third affidavit from a disinterested person acquainted with the circumstances of the man will be required.

Claims for exemption for industrial reasons also will require complete proof. The employer must prove that his business is vital to the war needs of the nation, and that the employee making the claim is a vital factor in the industry before the man will be exempted. The man himself, if making the claim, must bring similar affidavits.

Those selected for service under the draft will be permitted to enlist in the regular army of national guard at any time prior to their call for examination before exemption boards, probably 10 days hence. Provost Marshal General Crowder announced tonight. They will not be allowed, however, to join the Marine Corps. The first men drafted probably will be detailed to the regular army in order to bring that branch up to its full war strength of 300,000. If the 35,000 enlistments needed are not obtained before examinations begin, The rest will be put into the national guard.

Women in Trousers.

No, there is no satire in the heading. It is the cold logic truth which we must face—and that probably very soon.

In Europe the women are doing the work which was the prerogative of the men. It is a necessity which they do not shirk, and which they do not regard as a disgrace. It is a serious obstacle to the proper performance of these duties hence the skirt has been discarded and replaced by the masculine trousers. It is quite within the bounds of possibility, even probability, that our army will be increased to five or ten million men, and in such event millions of women must go in to shops, the factories and fields—wherever a man has been taken away and there is no other to take his place.

Some people of both sexes will welcome the adoption of any garment that will aid them in their duties and make life irksome for those who shirk.

A few senseless prudes will of course be horrified, but the prudes have not made the world, and there has been little benefit to it, and they will not end it.

Women in trousers are inevitable. It must come, and the sooner we are reconciled to the thought the easier it will be for those upon whom necessity forces the innovation.

Pike Being Resurfaced.

The work of reconstructing the Lexington pike began last week at the new reconstruction line of Florence and a considerable distance has been run up and covered with new metal. Mr. Billier is using a new 15-ton roller, which he will break in on the work, it being one that was built to be sent to Panama, but was not needed on the work there.

NOTICE.

The farmers and other people interested in the production of food products, especially those engaged in the dairy business, in the north end of the county, are requested to meet at Hebron, at 2 o'clock, Tuesday, July 31, 1917, when they will be addressed by Mr. Harry Hartke, Mr. Wayland Rhodes, and several successful farmers from Keokuk county.

Another meeting of the same kind, for the same purposes, with some of the same and additional speakers, is hereby called at Union, at 7:30 o'clock, Tuesday evening, July 31, 1917, for the benefit of the same class of people.

Another meeting for the benefit of the same class of people and same purposes, to be a county meeting, is hereby called at Union, at 7:30 o'clock, Tuesday evening, July 31, 1917, for the benefit of the same class of people.

C. C. SLEET.
E. C. RILEY.
J. G. TOMLIN.
Boone County Council of Defense.

FISCAL COURT NEWS.

The fiscal court was in session Tuesday, Judge Cason presiding and all the justices of the peace, and officers of the court present.

James A. Huey was allowed \$50 for making change in Proctor road. R. L. Huey was awarded the contract for picking fifty-five hundredths of a mile of the road leading from toward Big Bone church toward Union. Contract calls for \$1,300.

The bid of Harris & Myers of fifty-two thousand four hundred and fifteen dollars and 50 cents for reconstructing the pike from Petersburg to Dry creek was rejected, and Louen's bid of \$18,212.20 was continued.

Chas. Goodridge, R. L. Huey and Chas. Youell were appointed commissioners to meet with the Gallatin county commissioners in regard to locating a bridge across Fork creek on inter-county road.

E. L. Baker was authorized to pick a short piece of road in his neighborhood, same being a connecting link between two other pikes.

C. W. Goodridge Wm. Stephens and Chas. Youell were appointed a committee to see about getting material to use in reconstructing the Bullittsville pike.

CONSTANCE.

Jake Hetzel got one of hands badly mangled while at work at Fleischman's Sawmill.

John Popham in jumping from his corn crib caught his foot in the floor and fell skinning both shins badly. The country doctor has been called and he is in a serious condition.

Had a Nice Time at the River.

Mr. and Mrs. Clint Riley and son, Edward, Mr. and Mrs. Geo. Hughes, Mr. and Mrs. Rabe Riley and family, Mr. and Mrs. Chas. Riley and family, Mr. and Mrs. Richard Baker and family, Mr. and Mrs. Clay Hughes and family, Mr. Albert Hughes and son, Mr. Geo. Hughes and son, John, Mrs. Mollie Hughes, and Miss Anna May Jones, of the city, spent Sunday at the Ohio river, where they enjoyed a fish fry in a grove and had nice time generally.

Philip Tallafiero, of Erlanger, was among the callers at this office, Tuesday. Mr. Tallafiero is a member of an Undertakers' Association that has for its object the looking after, caring for and bringing back to this country the bodies of American soldiers who may lose their lives at the front in France.

Twelve hundred Kentucky physicians have volunteered their services in assisting in the examination of men who have been drafted for the national army with a view to eliminating all those who have tuberculosis tendencies.

The official list of the numbers as drawn in the draft at Washington is looked for upon the arrival of every mail now.

The candidates are having trouble presenting their claims since the draft, as some people want to discuss that and that alone.

The next term of the fiscal court will be held on Tuesday following the first Monday in August.

Of course you will attend the picnic next Saturday afternoon at the Harvest Home Grounds.

Many farmers are having trouble securing help in their hay harvest.

There are now over 1,000 members of the Red Cross in this county.

Rain has become plentiful in this part of the county.

A Week's News

Indications are there will be a large peach crop this year.

Mrs. Jane Riggs, of Covington, was a guest at G. G. Hughes' last week.

Heavy rains in some parts of the county last week washed the land considerably.

In these latter days the young man who cannot roll a cigarette is not up to date.

Poultry raisers hereabout have lost a great many young chickens the last few weeks.

The real estate firm of Riley & Riley sold the Haves and Hogan properties last week.

The luscious blackberries will be on the market in a few days. The crop is not large this year.

Cleveland Snyder and wife, of Cincinnati, were Sunday guests of his mother, Mrs. Alice Snyder.

Kirby Smith, of Boone county is spending the summer with Harry Blyth and family, Lawrenceburg Press.

Mrs. Laura Sehee, of Plattsburg, was the guest of her brother, S. W. Tolin, several days last week.

Becker have your tobacco insured against damage by hail. Call Edmond Riddell, Burlington and get rates.

Attorney Ben Riley looked for his draft number two or three days before it appeared in the published list. It was 436.

Ed. Haves came up from Lakeland last Saturday to put the finishing touches on his sale of real estate to Chas. Hughes.

There are many fields of very fine corn in this county, while occasionally there is a crop that is not growing as it should.

Many chickens have died in this county the past month of various diseases. However, no indignities, as some call the trouble, has killed many.

Each of the candidates filed his statement of expenses up to the time of filing as required by law. Some of them filed at almost the last hour.

Last Saturday the Lawrenceburg fair advertising man covered this section of Boone county putting up posters and distributing premium lists.

Alonso Aera was in Burlington, Friday, collecting from the subscribers to the church Building Fund. He was making good progress.

Mrs. Richard Stephens and son, Benjamin, of Rabbit Hash, neighbor, took in the Chautauque a couple of afternoons and evenings last week.

The electric light wires have been strung to the town of Florence, and the work of wiring residences will be in progress for the next few weeks.

The primary election is just eight days in the future and the industrious candidate will be on the move all that time and then move some on the ninth day.

The name of Arthur Kelly who was fatally hurt by falling out of, or being thrown out of, an automobile Saturday night the 14th inst., was among those called in the draft.

Mrs. B. F. Rogers, of Bellevue precinct, arrived home last Friday evening from Kansas, where she had been visiting her daughter, Mrs. Weeden Williamson, since the first of last February.

Irvin Hood and wife, who were returning from an auto trip up the country last Saturday were in the cloud burst at Richmond and vicinity. They had never before seen a rain fall equal to it.

The names of Leland and Herbert Snyder, brothers, living in Petersburg neighborhood, both appear among the first 69 drafted men to be called in this county, as do the names of Ralph and Stanley Cason.

The State school per capita for the ensuing school year will be five dollars, against five dollars and fifteen cents last year. There are 18,837 children of school age in the State. The seven months school term will be continued.

The registration for the purpose of the draft shows that there are 13 illiterate whites in this county between the ages of 21 and 30 years. They are located in the precincts as follows: Petersburg, Walton, Union and Landersburg, one each; Verona 2; Florence 2. There are four colored illiterates, one in each precinct, Walton, Petersburg and Union precincts.

Out in Los Angeles they are considering a proposition to defeat the high cost of living to a certain extent by conserving the grain and vegetable crop through the process of insecting the country. This is how the originator of the idea has figured it out: Cut out meat and milk; eat cats, birds, insects and vegetables; eat the cat and thus save the grain and vegetables that are eaten by the birds that are eaten by the cats. It's as simple as A, B, C.

STATE NEWS.

Many of the food crops we are depending on have yet to mature. Their harvest is still far ahead, and the result is still subject to unforeseen contingencies. Even if the most buoyant hopes for an abundant harvest are realized there is still need for food conservation. —Philadelphia Press.

The fear of poor crops, bred by the cold, wet May, disappeared under the hot June suns, and the July report of a billion bushels increase over the yield of last year is hardly a surprise, although it is very welcome in view of the success which the friends of Germany are having in staying off the passage of a food control law. —Brooklyn Eagle.

This is the American farmer's response to the appeal of President Wilson and others to cultivate more acres and cultivate them more intensively for the sake of democracy and world freedom. This is America's contribution to the cause for which America's allies have sacrificed millions of lives and billions upon billions of treasure. —Cleveland Plaindealer.

There will thus probably be food and to spare in this country. It is carefully conserved. There will be food and to spare if people don't cling to the idea that they must have one particular sort of food in as great a quantity as they have been accustomed to. —Chicago Herald.

A smashing blow to German hopes is the Government crop report issued yesterday. Cautious persons will reserve the celebration until the harvests are completed, but there is no reason why everybody should not be uncommonly cheerful over the prospect and put forth additional effort to realize all that is forecast. —Pittsburgh Gazette-Times.

Mother Earth has entered the coalition of the nations pledged to make this world safe for democracy, and is giving evidence of doing her "bit" in these U. S. So kind is she that it seems as if all the husbandmen had to do to make her "laugh with the harvest" was to "tickle her with a hoe." —Buffalo Commercial.

Mr. Bruce Starkey found a potato in his garden Sunday. Since potatoes have been grown so extensively from the tuber the seed have become quite a curiosity. It is said that a certain grower has offered a large price for a small quantity of the seed. Mr. John Gough has also found them in his patch occasionally. —Owensboro News-Herald.

The Bourbon county members of John H. Morgan's 1st regiment which rendered valuable service to the Southern Confederacy in the reorganization of Morgan's men, which will probably be held at Olympian Springs, some time in August, have been notified by the Southern States Veterans' Association that the reunion of the 1st regiment and for the last few years reunions have been held annually at one by one the old veterans have answered the roll call for the last time and now there are only a few left here who will be among those present at the reunion this year. With the passing of a few more years, the reunion will be at an end, but the names of the famous veterans will go down in history to be honored by posterity thru ages. —Paris Kentuckian Citizen.

TWENTY-FOUR COWS SOLD.
The sale of milk cows at the fair grounds in this city last Saturday, by J. Murphy, of Paris, was quite successful. Twenty-four cows were sold at prices ranging from \$45 to \$50, or a total of \$1,200. The highest-priced cow was one bought by Jas. W. Coleman, of the need was many fine milkers, and will prove valuable additions to the dairy herds in this county. —Falmouth Outlook.

GOBBLER REPLACES HEN ON NEST.
Roscoe Gritton, who moved from Mercer county who has a county some months ago has a hen on a remarkable turkey gobbler. When not long ago one of the gobbler immediately took possession of the eggs and patiently sat on them until he hatched twenty. He is now taking care of the flock with all the solicitude of a hen.

FINE TOBACCO.
John, in Ernest Fields, of near Concord, have five acres of fine tobacco, and they will top about one and one-half acres this year. This is probably the best crop of tobacco in the county. These young men are hustling young farmers and deserve the top price this winter for their product. —Falmouth Outlook.

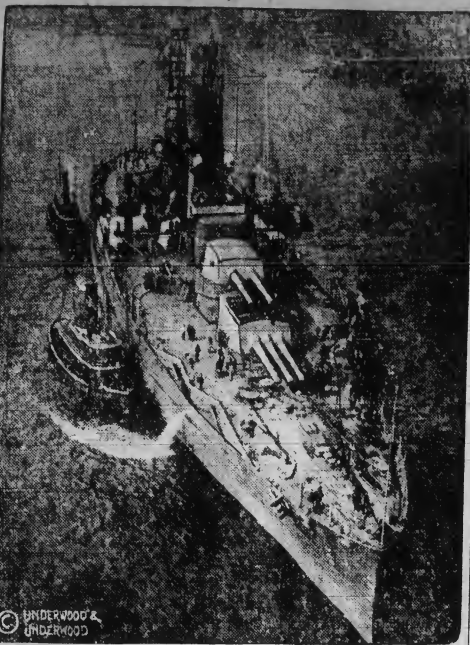

A FINE GROP BUT CUT WORMS ARE ANNOYING.
Ransom Ryle, of Locust Grove neighborhood, was a business visitor to Burlington last Thursday. He reports that he has a crop of very fine growing tobacco, some of which will top in a few days. He said cut worms have been very annoying, actually cutting leaves until they fall from the stalk.

LAWRENCEBURG FAIR WILL BE HELD AUGUST 8, 9, 10, 11.
The Lawrenceburg fair will be held this year August 8, 9, 10, 11. The advertisement in another column, regarding the Lawrenceburg fair will come shortly after the Lawrenceburg fair.

Notice is hereby given that my lands are located against trespassing of any and all kinds, and hunters and trappers are forbidden to go thereon.

THE KITCHEN CABINET

My business is not to re-make myself, but to make the absolute best of what God made.—Robert Browning.

MORE GOOD THINGS FOR THE TABLE.

With the coming of warm weather salads and other dainty dishes will be welcome to the housewife who likes a variety in her menu.

Lima Bean Salad.—Cook a cupful of fresh or dried lima beans until tender and the liquid is evaporated. Let them cool, grate half of a mild onion, add a tablespoonful of finely chopped capers, two ta-

blespoonsful each of finely chopped green pepper and olives, half a teaspoonful of salt, half a teaspoonful of paprika, one-third of a cupful of olive oil, and a fourth of a cupful of vinegar; pour this over the chilled beans, mix thoroughly and turn upon a chilled serving dish. Garnish with slices of pickled beet and sprigs of parsley.

Credole Rice.—Remove the stems and seeds from two red peppers and chop fine; peel a large mild onion and chop it fine; chop fine one-fourth of a pound of lean ham, cooked or not, as convenient. Melt three tablespoonsful of butter in a saucepan, add pepper, onion, ham, and stir without discarding the vegetables until the moisture is absorbed. Add one cupful of blanched rice and stir and cook about five minutes, then add three cupfuls of broth, or a teaspoonful of beef extract dissolved in three cupfuls of boiling water and let cook covered about half an hour; add three or four tomatoes, cut in small pieces and a teaspoonful of salt; cover and let cook until the grains of the rice are tender. Lightly stir in with two forks—three tablespoonsful of butter in bits; let stand five minutes, covered. Serve as a hearty dish for supper or luncheon.

Scotch Gingerbread.—Sift together two cupfuls of flour, half a cupful of granulated sugar, half a teaspoonful of soda, one teaspoonful of baking powder, three-fourths of a teaspoonful of cinnamon, half a teaspoonful of mace or nutmeg, and a fourth of a teaspoonful of salt; add half a cupful of seeded raisins; half a cupful of sliced ginger and a fourth of a cupful of blanched almonds chopped fine. Heat a cupful each of molasses and shortening to the boiling point and stir into the dry ingredients. Add lastly two well-beaten eggs. Bake in a sheet one-half hour.

Nellie Maxwell

NOTICE.

Bids for the construction of the Union and Big Bone road, towards Big Bone church, will be received on July 21st, 1917. Exact maps, quantities and specifications may be seen at the office of the County Road Engineer in Burlington, Boone county.

Testing the Eyes
Sometimes when people get glasses that suit them they go on wearing them for years without having their sight tested to discover whether any change has taken place. This is wrong. All should have their eyes tested at intervals. Glasses for old sight should be changed every two years. Whenever you feel uneasy in your glasses don't hesitate to call and see us. If no change is necessary we will tell you.

Canning No. IV.

TESTING JARS AND RUBBERS.
Screw top on jar without rubber and if the finger nail can be run between the jar and top it is usually imperfect, and should be discarded, for it may cause much loss. Rubbers should never be used more than once as heat destroys their elasticity. Always test jars after cooking in the hot water bath. To test leak, if any occur, put on a new top or rubber and replace in canner for about fifteen minutes.

STERILIZATION

The jars and tops to be used should be washed in hot water, using soap; then rinsed, place jars in a kettle, covered. If possible, cover with cold water, bring to boiling point and let boil for 15 to 30 minutes. If not to be used at once, invert in a towel or paper. The rubber should be dipped in boiling water for one minute before using. It should always be put on the jar after cooking in the hot water bath as a good rubber can stand several hours heating.

It has always been hard to keep canned corn, but the government gives the following method: Corn—Corn ferments very quickly, due to the large amount of sugar it contains, hence but very little time should elapse between the time it is pulled and the time it is placed in the canner. The corn is ready to put up when the milk is thick and will not flow from the kernel. As soon as possible after the corn is picked, husk and remove the silk, trim and cut out all worm-eaten or blemished spots. Blanch ten to fifteen minutes in boiling water, plunge into cold water, then remove from cob. This may be done in two ways: First by cutting off the tips of the kernels with a knife or by using a coarse grater, then pressing out the good corn with knife. Second by scoring each row of kernels with a sharp knife and pressing out corn from kernels. Fill cans, picking lightly to one-fourth inch of top, adding to each quart one level teaspoon of salt. If there is not enough milk in corn to fill can, add boiling water, adjust rubber and top on glass jar and partially seal. Sterilize for four hours in hot water bath, or sixty minutes in pressure cooker. Remove, tighten covers and invert to cool. Interment sterilization is preferred by many for one hour on each of three successive days.

When canning vegetables which take up water during sterilization as beans, peas and even corn, it is good to refill the ears when the cooking is one-half complete. Only water which has boiled for several minutes should be used.

MAUD N. ASBURY.

Resolutions of Respect.

Whereas it has pleased God in His wisdom to call to her heavenly home our sister, Mrs. John H. Sleet,
Resolved, That the Woman's Christian Temperance Union of Richmond, has lost a valued and highly esteemed member.

Resolved, That our Union deprecates the loss of our enthusiasm and ever increasing love and loyalty to the cause and that we strive to find some one to take her place.

Resolved, That we convey to her bereaved husband, daughters and sons our sincere sympathy.

Resolved, That a copy of these resolutions be placed in the minutes of our Union and that a copy be sent to the Boone County RECORDER and to her family.

Committee—Mrs. Hattie Griffith, Mrs. L. R. Miller, Mrs. R. O. Hughes.

Whereas it has pleased our Heavenly Father to remove to her heavenly home our sister, Mrs. John H. Sleet,
Resolved, That the Woman's Missionary Society of Hughes Chapel has lost a faithful and devoted member.

Resolved, That we as members of the Society emulate her example of earnestness and enthusiasm and faithfulness, and endeavor to find some one to fill her place.

Resolved, That we sympathize deeply with her bereaved husband, daughters and sons.

Resolved, That we spread a copy of these resolutions on the minutes of the Society and send a copy to the Boone County RECORDER and to her family.

Committee—Mrs. R. O. Hughes, Mrs. James Pottinger, Miss Pearl Marsh.

AN HONOR

APPRECIATED HIGHLY.

Hon. W. P. Cropper was in Burlington a few hours, last Friday, to file his expense account as a candidate for the Democratic nomination for the Legislature, that being the last day upon which the account could be filed. Mr. Cropper enjoys the distinction of being the only representative, in the mind of man, who succeeded in his office, an honor which is appreciated very highly by him.

Bought a House and Lot

C. C. Hughes has bought of E. Hawes his house and lot on North Jefferson street, and a lot near but not adjoining. The property is owned by the late Arthur Blyth at the time of his death. The consideration is said to be \$1,000. Mr. Hughes will remodel the building considerably.

Hay and Weeds in the Stack

Some very woody hay has been cut in this county, but it has not been baled for some time. The hay cut at the time of the purchase of considerable food will be avoided next winter.

Country Being Flooded With Clothes Made in Red, White and Blue.

MILITARY CAPE IS FIXTURE

Garment, Which Is Becoming Serious Rival to Topcoat Appears in Many Designs—General Silhouette Is Slim.

New York.—When France went to war she abolished the introduction of colors into her apparel. When England went to war she did not change a lot or a lot of her life in any manner. Mr. Wells, with his extraordinary facility for telling the truth in the guise of fiction has shown us in "Mr. Britling Sees It Through" a picture of England and her greatest war.

When America went to war she introduced the red, white and blue into woman's apparel to such an alarming

In this French flannel tennis frock the skirt and blouse are plaited and trimmed with wide, white silk braid. On the immense pockets there are large pearl buttons. The flannel is amber colored.

manner that one critic truly said that if this exploitation of the flag continued, Americans would soon prefer to see the enemy's flag to their own.

The Colors Too Freely Used.

Everywhere we wore the colors. They not only floated from the windows, covered the facades of houses, swung from every public building and hotel, ornamented railroad stations and draped themselves around monuments, but they were carried by every motorcar, by the ox wagons of the South, by the bicycles of boys, by the bucksters on their little carts and even by the bookbinders' boxes on the corner stands.

When France went seriously, sadly, terribly in earnest to meet the enemy in the shape of the "gray fog" that rolled through Brussels, she did not exhibit one-fiftieth as many flags as one city in America during the first week that war was declared; for in addition to all the methods by which the flag itself was exploited, several million people wore the colors in their buttonholes, wrapped about their hats and pinned to their shoulders.

Billions of buttons showing the flag were sold in two weeks, and then the dressmakers and designers of all sorts of woman's apparel saw to it that the colors would be introduced into their field of work.

By this time one begins to feel that the critic was right. The flag has become so commonly used that there should be a law to prohibit its being flaunted in this way. If we do not succeed in stemming the tide of clothes made in the red, white and blue, we shall all become an animated flag moving across the continent, made up of a few million human beings appearing as parts of the whole.

The day that General Joffre arrived in New York it was the delight of the women to wear the red, white and blue in every way, and some of the smart set launched fashions that may become part of the season's styles.

There were flag blue frocks of silk with brilliant red belts or sashes and a white star embroidered on each shoulder, and there were caps taken from those of the French Guard of 1870, with the wide strap under the chin and the red, white and blue cockade floating in front.

There were red, white and blue sunshades, to match handbags and shoes. There were army capes of every kind in dark blue lined with red and showing white stars on the collar. There were military suits of blue serge with lapels and cuffs of red and white striped silk, and there were visored caps of red satin and patent leather trimmed with a dark blue band.

As General Joffre rode from the city hall to upper Fifth avenue, he must have wondered at the overwhelming display of his own colors, perhaps not realizing that America was exploiting herself as well as France.

It is no longer a question as to whether the three colors will be introduced into fashion through the entrance of America into the war; it is a question as to how they shall be suppressed.

The colors of our flag are exceptionally lovely, and bits of red or blue introduced into the costume freshen and enliven it; but a studied and continuous array of the three colors joined together in some type of costume should become a dead fashion because of its monotony, if for nothing else.

The Wearing of the Capes.

The widespread demand for army capes cut in any fashion that different sections of the army wear, is accepted by the makers of women's clothes as a dominant fashion. It has given the tailors a good chance to break loose into a mass of work which is ready for instant sale.

Coats and skirts have not been demanded as much as usual this spring, and even elaborate afternoon frocks have been partly replaced by sports suits; therefore, the coming of these military capes into the fashions of the hour has proved a boon to those who deal in cloth.

There are far too many designs in these capes to attempt to describe them, but the general silhouette must be slim, there must be an opening of some kind on each side for the arm, the collar must be a pretensions and elaborate affair and the cape must fall well below the knees.

As a garment it has become a serious rival to the top coat. This is natural. Several years of the top coat as a constant garment and its increase in fashion during the last two years have put one or more into the possession of most women, until they feel they have enough top coats to last them until the fashion is dead.

For several varieties of capes that are worn, the choice of materials is usually limited to thin, dark blue serge, white broadcloth, black and white checked wool, and sometimes deep red broadcloth.

In all the capes there is no tendency to hide the openings at the sides which were an armhole. There is a wide band of soutache braid, sometimes the application of another color with embroidery, of pieces of the material cut into points, scallops or battlements.

One of the dark blue capes which is lined with army red has 12-inch openings of the arms which are edged with small blue bone buttons and buttonholes, so that any part of the opening can be fastened whenever desired.

When one tries of bright colors, the mind constantly turns to black-and-white checks. There are seasons when this design is a trifle smarter than other seasons, and it is always in fashion and usually in strong demand. This season it has taken a high place in the affection of the public. Coat

In this simple hat the straw is partly covered with emerald green georgette crepe, and the upright stalks of roses are cut from biscuit-colored kid. suits, one-piece frocks, capes and other wraps are made of it. It is sometimes trimmed with marine blue or any shade of dark red, but an application of solid black is the best way to treat it.

These capes are about the only kind of top garment that is not belted; they swing free and full from the shoulders, but there is a fashion law against their being too full and the dressmakers have invented several ways of making the cut irregular and full of character.

ACTIVITIES OF WOMEN

Women have been voting in the United States for the past 40 years. Female schoolteachers in Boston have won the first step in the fight to give them equal salaries with the men. Miss Antoinette Taylor of St. Louis has just come into possession of a table that was once the property of John Hancock.

Under the provisions of the bill passed by the New York senate, women printers will be permitted to work at night.

The New York legislature has passed a bill establishing a six-day, 54-hour week for women employed in manufacturing.

Two sisters—Jeanne and Blanche Lamb—have the distinction of being the only woman home leaders in Ventura county, Cal., who are making good. Last year they cleared over \$1,000 from their land, and expect to double the amount this year.

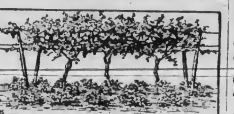

INTEREST IN FRUIT GARDENS

Pleasure Increased by Growing Fruits Not Adapted to Climatic Region in Which Located.

The interest of a fruit garden may be greatly enhanced by growing there in plants not adapted naturally to the climatic region in which the garden is located, as, for instance, the growing of figs as far north as the latitude of Philadelphia. The summers of the region are sufficiently long and warm to induce a strong growth in the fig, but as the fruits normally require a long period in which to mature, the plant becomes useless as a fruit producer unless sufficient protection is afforded to carry over winter the immature fruits set the previous fall.

This can be successfully accomplished in several ways. The most handy sort should be selected, in addition to which the fruiting shoots may be wrapped in matting, covered with straw, and the fruits thus increase in size and weight. If it seems desirable, temporary sheds may be built over the plants, and those thatched with straw or fodder sufficiently to protect them from frost.

Then, again, semihardy sorts may be tipped over by cutting the roots on one side, bending the branches close to the soil, pinning them down, and then covering the whole plant with matting and earth or a straw thatch and canvas. At the extreme northern limit of fig culture it has been found that the covering of earth is preferable to any other method, while at the South, where only slight protection is necessary, bending down and covering with pine boughs or thatching with cornstalks has proved most successful.

Strawberries Under Grapevines.

By the use of one or the other of these methods of protecting plants the peach has been grown and successfully fruited in the southern central part of South Dakota, along the Missouri river.

Besides these protective devices, sheltered places, where growth is retarded in spring, may be taken advantage of in order to hold back such early blooming plants as apricots, Japanese plums, etc. Apricots planted and trained on the north wall of a building are frequently sufficiently retarded at blooming time to insure a crop, while if planted in the open and trained in a "standard" the fruit crop will be killed by late spring frosts.

For commercial purposes the use of most of these protective measures is precluded on account of expense. The commercial grower cannot indulge in such expensive devices unless he has the assurance of obtaining a fancy price for his product. In a home fruit garden, however, it is different. The expense of protecting a half dozen plants is trifling, and many amateur plants will incur it for the sake of the novelty of securing fruits naturally adapted to other climatic regions.

TO GUARD AGAINST RABBITS

Too Much Expense in Many Tree Protection Methods—Wire or Poison Keeps Animals Away.

Cornstalks, grasses, tar paper, and other materials are used in trapping fruit trees for protection against rabbits, points out F. S. Merrill, assistant professor of horticulture in the Kansas State Agricultural college. Every spring, however, it is necessary to remove these wrappings, and this requires a great deal of labor and in the long run is expensive.

"Successful results have been reported from the use of poisoned alfalfa spread near the runways," said Professor Merrill. "Caustic paints also have been used successfully at times in reducing the feeding of the rabbits."

"The best method to protect fruit trees from rabbits is to band each tree when planting with a cylinder of galvanized screen wire. This method has furnished protection except when the ground has been covered with snow, which allows the rabbit to work above the screen. To prevent injuries to the trees, cotton often is stuffed in at the top between the wire and the tree."

"The
Five
Tires"

Today—tires cost less than ever

Your tires actually cost you less per mile today than they did a few years ago.

—provided you buy the right kind of tires.

In the first place, don't buy a nondescript tire that some dealer has a selfish price motive in selling to you.

Buy a tire with a name behind it—a tire, the quality of which must be so good that the reputation of a great Company is protected.

United States Tires, with the name of the largest rubber manufacturer in the world behind them, are safe tires to buy.

United States Tires are constructed under an exclusive timed-treading process that is patented.

They are honestly built with the best materials that the markets of the world afford.

Interesting Facts Gathered During the Week by Our Regular Correspondents.

FRANCESVILLE.

L. Ogden and family visited relatives in Bellevue, Sunday.

Mrs. Wyl Kruse and children visited Mrs. West Tugate last Thursday.

Miss Emma Goodridge spent last Sunday with Mrs. Manlius Goodridge.

Miss Elvora Eggleston entertained her friend, Miss Alma Muntz, Sunday.

Chris Whitaker, Jr., and Frank Esics were Sunday guests at Chas. Muntz's.

Miss Bessie Hunt was the guest of Miss Anna Henry, of Buellville, Sunday.

Rev. C. T. Claunch was a guest at Hubert Cropper's, near Buellville, Sunday.

Mr. and Mrs. Mike Stahl entertained several of their Cincinnati friends last week.

Miss Sadie Kenna is the guest of her parents, Mr. and Mrs. Elliot Riemann, near Rising Sun.

Mr. and Mrs. Dorsey Anderson and Charlie Beall, Jr., were Sunday guests at J. W. Utzinger's.

Mrs. Marietta Gaines has returned after a visit with her brother, Dr. Dick Crisler and wife in North Bend.

Manlius Goodridge and sister, Miss Mary Frances, spent Sunday in Cincinnati, guests at Snyder Watts'.

Miss Mary Thompson, of Burlington, who is visiting at Mrs. Sand Watts' attended church at Sunday.

Dr. O. C. Henry, who came down from Minerva, last week to look after his farm interest, shipped a lot of fine lambs to Cincinnati, Friday.

Clint Riddell and wife had as guests Sunday, L. C. Seothorn and children, of Idlewild; Lewis Riddell, wife and daughter, Hilda May, and C. D. Seothorn wife, and daughter, Miss Adella.

PETERSBURG.

We are having plenty of rain and warm weather.

Alfred Chambers, of Texarkana, is the guest of his mother.

C. Scott Chambers and family were here Sunday afternoon.

E. L. Helms and family were in Ft. Mitchell Sunday afternoon.

Miss Mary Nelson, of Gratz, is the house guest of Miss Ruth Snyder.

Rev. and Mrs. R. H. Carter spent several days last week in Burlington.

July 18th was the 25th wedding anniversary of Mr. and Mrs. B. H. Lerkshire.

Mr. and Mrs. Elmer McWethy and children are guests at J. M. Thompson's.

Rev. and Mrs. R. H. Carter are spending several weeks with relatives in Central Kentucky.

Charles McWethy and family, of Greencastle, Ind., were guests of Mrs. J. I. McWethy, last week.

Mrs. Tom Willis and daughter, Rev. E. D. Jones and Mr. Hamilton were guests at W. T. Stott's, last Thursday.

Several of our citizens attended the funeral of Mrs. Smith McWethy, at Lawrenceburg, Saturday afternoon.

Dr. and Mrs. J. M. Grant arrived Thursday evening after a week's visit with Mr. and Mrs. Geo. Dunlap, in Chicago.

Miss Agnes Thompson and Bulb Snyder spent a very pleasant ten days recently in Gratz, the guests of Miss Mary Nelson.

Robert Grant, Robert Berkshire, Luther Surface, Leland Snyder, Cal Klapp and Holman Wingate are the young men drafted in the Petersburg precinct.

Misses Mary Nelson, Agnes Thompson, Melma Lyons and Ruth Snyder, Messrs. Allen Thompson, Albert Stephens, Henry Mathews, Karl Bots and Cleveland Stephens attended the Burlington Chautauqua Wednesday evening.

GUNPOWDER.

Work on the new Hopewell church building is progressing nicely.

Bro. Clore and wife spent last Sunday at P. P. Neal's, near Grange Hall.

E. A. House and wife entertained several of their friends at dinner, last Sunday.

Robt. McElasson and family, of Hebron neighborhood, attended church at Florence, last Sunday.

Rev. Royer will preach at the Presbyterian church at Florence, next Sunday evening at 7:30. Everybody is invited.

J. O. Griffith's new six cylinder Buick pulls the hills in the Big Bone Springs neighborhood.

Bro. W. H. W. is the relation to smoothly and rides so easy that it would not bruise a peach.

B. B. Hume, of Covington, and Jess Delahanty spent Saturday at the home of Mr. Hume, demonstrating one of his new machines. Not known whether Mr. Hume made a sale of his machine or not.

Notified to Appear

Garnett Tolm received notice last Saturday afternoon to appear at the office in Cincinnati at 2 p. m. following Tuesday for final examination for admission to the officers' training corps, for which he made his application several weeks ago.

CENTREVIEW.

The Y. W. A. of Big Bone Baptist church will give a fish fry Friday morning and evening, August 3d, in the church grove. All are cordially invited to come. In the afternoon Rev. Ous Hamilton of Walton church, will deliver an address on "Woman's Relation to the Church," and Rev. A. L. Maddox, "The Church's Relation to Woman." Be sure and come and spend a pleasant day with your friends.

RABBIT HASH.

Born, July 22, to Mr. and Mrs. Clifford Ryle, a boy.

Joe Rogers, candidate for assessor, was here Saturday.

Mrs. D. K. Walton, of Rising Sun, is visiting Mrs. E. L. Stephens in East Bend.

Harry Anderson, wife and daughter, of Rising Sun, spent Sunday at Colin Kelly's.

In spite of bad weather the festival at K. of P. Hall, Saturday night, was attended by a large crowd and was a success.

Joe Alphin and a Mr. Johnson, with their families, crossed the river here Thursday morning in their machine, enroute to Illinois.

Mr. and Mrs. T. B. Miller, of Galatin county, came up Saturday in their auto to bring Mrs. Frances Moler and son, who have been visiting them for a couple of weeks.

The R. C. Cross Society elected the following officers Saturday night: President—Mrs. Clarence Ryle, Vice President—Mrs. R. C. Stephens, Secretary—Miss Stella Ryle, Treasurer—R. C. McNeely.

BELLEVIEW.

Miss Iva Mae Burcham was quite sick last week.

Mr. and Mrs. Flick's family are enjoying a new Humobile.

Rev. C. E. Baker and family are spending this week with relatives in Claryville, Ky.

Mrs. Nannie G. Maurer entertained at dinner Sunday, friends from Burlington and Erlanger.

Pepper Smith and wife and Miss Julia Smith and Robert Brady, Jr., Sundayed at Henry Clore's.

Mrs. Harriet Walton, of Rabbit Hash, and Mrs. Fannie Platt, of California, are guests of Mrs. H. D. Brady.

Chas. Dolph and family spent several days at Millford, O., recently visiting Mrs. Dolph's sister, Mrs. W. A. Fritz.

Warren Flick and sons, Sheldon and Vernon, and Stanley Cason, of Mill Rice and Joe Brady, spent Monday in the city.

Mrs. John Rogers, Mrs. Bernard Rogers, Mrs. A. Rogers and son, Edward, spent last Saturday in Covington in the interest of the Red Cross.

J. G. Smith and family, Mrs. Belle Cason and family and Mr. and Mrs. Stanley Stephens spent last Sunday at Ralph Cason's on Middle creek.

Mr. and Mrs. E. E. Parsons, Mr. and Mrs. Hood and Mrs. Addie Pope, of Middle creek, spent last Sunday at Richard Marshall's, at Barkwoods, Indiana.

Farmers Attention!

"Since the inauguration of the 'Good Roads' movement in Kentucky and the construction of many miles of the best roads found in America, this State has been quite a haven for tourists, coming from almost every state in the Union, and since many of our farmers have failed to recognize and grasp the benefits derived through the medium of publicity—

and entrance to their farms—I am calling upon the land owners in every county in this Commonwealth to please have a board or sign on their farms, giving the name of the owner of each farm, also the name of the farm, if same bears such, and post in a conspicuous place on the farm. This will require but little effort and expense upon the part of each farmer, and the benefits derived through simple and inexpensive methods of publicity can not be over estimated.

MAT S. COHRN,
Commissioner of Agriculture.

A CARD.

To the Democratic voters of Boone County:

Gentlemen:—When I announced my candidacy for the office of Auditor of the Boone county, it was my intention to have every voter in the county, and was engaged in an active canvass until a few days ago when my horse got crippled, and as I was unable to secure another it will be impossible for me to make my canvass as I intended.

I wish here to contradict the report that I have withdrawn, and say I will continue the fight to the last ditch, for or lose, and urge upon my friends in simple and earnest terms to go to the polls and cast their votes for me, and thereby make sure of my nomination.

Thank you, my friends, for the cordial support they are giving me, and feeling sure they will carry me to success at the primary election August 1st, I am,

Yours respectfully,
H. M. WILSON,
Candidate for Auditor.

Lieutenant Arch McElasson has been detached from the Navy Recruiting Station, Cincinnati, and ordered to Norfolk, Va., in connection with the fitting out of the S. S. Hinton, and to assume command when commissioned.

PT. PLEASANT.

H. L. Tanner had recently, a hay fork and tract put in his barn, Claude Rouse doing the work.

Lightning killed three cows for Chas. Carpenter during one of the storms last week. The animals were insured.

Chas. Carpenter and wife, Miss Leona Hood and John Carpenter enjoyed an all day outing at Coney Island, last Saturday.

During the storm last Wednesday lightning struck Albert Price's barn, tearing off some shingles and burning a hole through the hay.

An ice cream supper was given at Pt. Pleasant church last Saturday night at which 24 were realized, and will be used for the benefit of the church.

Miss Fern Darby, daughter of Mr. and Mrs. Allen Darby, of Bayler, Ark., Ohio, came over to attend the Chautauqua, remaining the week-end with Charles Carpenter and wife.

HEBRON.

Preaching next Sunday morning at 10:30.

Andy Cook and family, of near Burlington, were guests at Frank Ayler's, Sunday.

Elmer Goodridge and wife are parents of a daughter since last Wednesday—Vera Alberta.

Mrs. S. Schiars and daughter, of Norwood, Ohio, are spending several weeks with relatives here.

Mrs. Jessie Hosman entertained her Sunday school class of young ladies last Saturday night with a social.

The Quick reunion will be held at the home of Jas. Barlow on the 19th of August. All relatives and friends are invited to come and bring a basket.

Hal Highhouse and wife, of Ludlow, Ed. Osborn and wife, of Florence, Harvey Baker, Jacob W. Lodge, wife and daughter spent Sunday at Ed. Baker's.

WATERLOO.

Mrs. J. W. Ryle and Mrs. Geo. Smith and son spent Saturday at Grange Hall.

E. A. House and wife entertained several of their friends at dinner, last Sunday.

Robt. McElasson and family, of Hebron neighborhood, attended church at Florence, last Sunday.

Rev. Royer will preach at the Presbyterian church at Florence, next Sunday evening at 7:30. Everybody is invited.

USE PLAIN SHAPES

Paris Milliners Put Ban on Trimming This Season.

Flower-Pot Models, With Narrow Brims and Very High Crowns, are Very Fashionable Just Now.

The quaint hat for a young girl, which is shown in the accompanying sketch, was created by the famous Caroline Reboux. It is exceedingly simple, but at the same time amazingly chic, writes Idalia de Villiers, a Paris correspondent. The hat itself is made of lacquered Japanese straw, and the broad ribbons are in a delicate shade of silver gray.

These ribbons are tied in a full bow right at the top of the high crown, passed through the brim at either side and then passed under the chin. In all black, with a bright colored lining in

Quaint Hat for Young Girl.

the narrow brim, this model would be charming, or in dark blue straw with japonic-pink ribbons and a lining of cream glove kid.

These flower-pot shapes are very fashionable just now. They always have narrow brims, very high crowns and hardly any trimming. Indeed, the leading note of the 1917 millinery season is simplicity.

Very beautiful and expensive straws are selected for the hat shapes, but trimmings are lightly used.

Georgette is making a specialty of Boy Scout hats for morning wear, in fine chip and also in Japanese straw. Lengths of picot ribbon are twisted round the crown of these wide-brimmed hats, the ends hanging loosely over one shoulder.

SUPPER SET FOR LITTLE ONES

Same General Decorative Scheme Can Be Carried Out in Tray Cloth, Bib and Napkins.

When your particular little boy sings for his supper set that he is set down to something as attractive as this little supper set, which will amuse him if he eats alone or at least keep him quiet if he shares his evening meal with the family.

It consists of a traycloth of crash all finished with fancy buttonholing in black and embellished with a procession of animals from the cross-stitch book. The bib, which Tommy Tucker will put on to protect his clean suit will follow the same general decorative scheme. Then there are two little napkins each with one of the cross-stitch, cross-stitched—animals in one corner. These are used to form an extra protection under the little one's plate, especially if the cloth is used to cover his portion of a polished table. Surely a kiddie would not grow obstinate at a supper served under such attractive conditions.

HOW TO TRANSFER DESIGNS

"Window Pane" Method the Easiest and Most Successful When the Material Used Is Thin.

Here are suggestions for transferring the embroidery design to any material.

Perhaps the easiest way is the "window pane" method. This is successful when the material is thin, like linen batiste, etc. Pin the sheet of paper and the material together and hold them up against the glass of a window. With a sharp pencil draw on the material the design, which can be easily seen through the goods. If one-half of the design only is given, unpin the paper and turn the other side to the fabric.

If you have carbon paper, you should place the sheet between the fabric and the newspaper. The latter is on top. With a sharp pencil go over the outlines of the design. The impression will be left in fine lines and will last until worked.

Coloring Process.

If you have ribbons or waists of delicate shade which have become faded and solid you can restore them to their natural color or change to a darker shade if desired. Buy tube water color paints. Put a few drops, or until the shade desired is reached, in washbasin. After well dissolved, dip waists in and continue dipping until shade is desired. You can color feather in this way also.

SICK BRUTES ARE TORTURED

Cruel and Inhuman Methods Often Used in Treating Domestic Animals, Declares Writer.

Barbarous methods of treating sick animals as practiced in certain parts of this country are described as follows by a writer in Farm and Fireside, "Numerous crows in our neighborhood have had holes bored in their heads and turpentine poured in. They have had their tails split and salt and pepper inserted, when all the poor brutes needed was to have the vacancy in their stomachs filled with nourishing food. A neighbor who lately lost a mule from a sick chicken used, among other crude remedies, turpentine poured directly into the ears. Hog diseases frequently appear in our community, and every sick hog is supposed to have the cholera. Some people pour coal oil into their hogs' ears as a remedy for cholera, but I cannot see where the good comes from irritating the delicate membranes inside the head when the trouble lies in another part of the body.

"Then when chickens begin to die suddenly, cholera is again credited, and among the remedies employed by some people to stamp out the disease is to burn a sick chicken alive. "Considerable mental effort is needed to realize that here in a supposedly enlightened land, filled with schools, churches and charitable organizations today, in 1917, such barbarism persists."

BETTER MOST NUMEROUS

They Are Adaptable Creatures, Being Found Almost Everywhere, on Face of the Globe.

One of the most amazing things in natural history is the way in which beetles have triumphed in the struggle for existence. Of all creatures they are by far the most numerous, no fewer than 150,000 distinct species having been identified—three times the number of backboned animals.

Beetles are wonderfully adaptable. They are found practically everywhere—in the frost-bound tracts of Iceland and in the hot desert sands of Africa; on the highest mountains, under the ground, and as fossils, in the deepest strata; on land and in water; on plants, among stones and in wood and earth, and even in the very craters of volcanoes.

But there is one place where no beetle has yet been found—it is the inhospitable land of Spitzbergen, to the north of Russia. Here are mammals, birds, fish, mollusks, crustaceans, a few insects of varied species and many spiders, but not a single beetle.—Popular Science Monthly.

Give the Flag Play.

A writer in the New York Sun says in regard to holding the flag: "Very often the two ropes are secured quite tight, whereas the lower corner of the flag should be allowed to fly as far as it will away from the pole. It is thus it floats readily with every zephyr, and in a fair wind flaps merrily and has a good time generally, while with a lively breeze the bottom rises to soar upward above the top of the pole. This freedom is particularly becoming for Old Glory, which is at his best in fighting or playing in the winds and sunlight. On the contrary, when strapped down with light cords he is apt to wrap himself about the staff, reminding one of an old-fashioned stick of checker-berry candy or a suburban barber's pole. Letty returned from the South. I frequently noted flags floating from diagonal cross sticks at the top of the usual staff, with the result that the banner is always 'opened out' even in a dead calm." It also flies prettily in the wind, and you are never in doubt as to whether 'the flag is still there.'"

Old Paper Money.

England, unlike Scotland and Ireland, is not quite reconciled to the general use of "paper money." A writer, appealing to the conservative instincts of the race, reminds them that the Chinese 2,300 years before the Christian era had "flying money." These were printed in blue on rather thick paper made from the fiber of the mulberry tree, one of these issued 1339 B. C. is to be found in the Asiatic museum in Petrograd, and in the British museum there is one dating from the Ming dynasty of the fourteenth century, fifty years before the first European bank was established at Barcelona.

An Old Love Secret.

A youth or maiden pulls a primrose from its stalk, and, after cutting off the top of the stem with a pair of scissors, puts it in some secret place where no human eye can see it. All through that day the loved one must be thought of, and dreamed of through the night. Next day the flower is to be taken from its hiding-place. If the stamens are found to have shrunk out, the youth or maiden is to be thought of, and dreamed of through the night. Next day the flower is to be taken from its hiding-place. If the stamens are found to have shrunk out, the youth or maiden is to be thought of, and dreamed of through the night.

High Brow Stuff.

"What are you giving your cows now in the way of galactagogues?" asked the professor of the milkman. "Oh," said the milkman who had just graduated from the agricultural college and was not to be stupified, "their sustenance is wholly of vegetable origin, rich in chlorophyll and deficient in butyric-acid quantities." "A pint if you please," said the professor. "Oh, up," said the milkman.

A student of social and economic problems says it's wrong to lead a sheltered life. A large number of convicts who are just now living sheltered lives in the penitentiaries of the country would gladly forego the privilege.

The United States smoked 25,000,000 cigarettes last year—or 250 per capita. No wonder there's a paper shortage.

Economists hear the sound of approaching fear in wooden shoes.

"How to Tell a Married Man" is the subject of an interesting article, but it's best not to tell a married woman or any other kind.

There wouldn't have been any league to enforce peace if every nation made up its mind not to have wars.

One of the advantages of current systems of economy is that they are not retroactive.

One of the needs of the expensive hour is liquid butter and an atomizer to spray it upon the bread.

Breiden teaching a necessary art of war, trench digging supplies the digger with a lot of fish bait.

Sure Thing. Yeast—They say, as a rule, terrors do not accompany a baby's cries until it is three months old. (Crimewave)—Well, suppose they don't. If you get within earshot of the kid you'll know it's crying, all right.

FENDERS IN FARROWING PEN

They Should Be of Sufficient Strength to Support Weight of Sow to Protect Young Pigs.

The farrowing pen should be provided with fenders around at least three sides, about 6 or 8 inches from the floor and about the same distance from the wall. These should be strong enough to support the weight of the

Farrowing Pen With Fenders.

sow should lie on them. They will, to a great extent, protect the pigs from being lain upon during the first few days of their lives. The little fellows will soon learn to creep under these fenders when the sow lies down. The illustration shows a farrowing pen with fenders made of 2 by 4 scantling fastened around the walls.

Speaking of economy, perhaps by the use of some additional cloth mother's street frock can be made long enough for little sister.

Even the prospect of a selective draft has caused some people to catch cold in the feet.

The farmer is the man of the house,

WALTON DEPARTMENT.

D. B. WALLACE, Manager.

Hand your news items to Mr. D. B. Wallace at the Walton Equitable Bank and Trust Co.'s building. He is also authorized to receive subscriptions and collect other accounts.

For Sale—Fine Duroc Jersey boar. Apply to John Ransler, Richwood. Miss Pearl Steinhilber spent the week in Gallatin county with relatives and friends.

Wm. O'Neal, of Ghent, spent part of last week here, the guest of his brother, John B. O'Neal.

E. Bruce Wallace spent part of the week in the city with friends and doing some electrical work.

Miss Amy Shaw of White Tower, Kenton county, spent the past week here the guest of her cousin Miss Eva Cram.

Joe W. Miller and son, Halford, of Anderson, Indiana, spent part of last week here with his cousin, John C. Miller.

Miss Emma Jane Miller is spending a couple of weeks in Lexington, guest of Mr. and Mrs. MacGruder, who formerly resided here.

W. F. Bradford, of Florence, candidate for county clerk on the Democratic ticket, was here Monday soliciting the support of the voters.

J. T. Cramer of near Erlanger, spent Saturday here with friends. He is looking for a nice farm in this quarter as he is very much attached to this locality.

Mart Benson cut his middle finger badly in a joiner at the Walton planing mill last Saturday. Rankin dressed the wound and will be able to save the finger.

John C. White of Burlington, candidate for the Democratic nomination for judge of Boone county, was here Tuesday shaking the bushes in the final roundup.

Mrs. Sidney Hume is making arrangements to move to Indianapolis to make her home with her daughter Mrs. Belle Hume, and is selling at private sale all of her household goods.

B. Hume of Covington, was here Saturday enroute home from Verona where the funeral of his mother took place that day. Mrs. Hume died at her home in Burlington last Thursday at an advanced age.

J. Curry Browning, of Falmouth, spent Wednesday here looking into the lighting system employer at Walton—loose leaf warehouse, with a view to adopting a similar electric system at his own leaf warehouse that he is erecting at Falmouth.

Mrs. J. R. Craven who resided at Walton many years ago died at her home in St. Paul, Minn., last Wednesday from a complication of diseases. Mr. Craven is in poor health. Both were very popular with a large number of friends at Walton, and the greatest sympathy is felt for Mr. Craven in his bereavement.

Geo. B. Powers, the real estate man, sold for Geo. W. Steed, of Crittenden, his home farm of 125 acres to C. H. Sidwell, of Maysville, for \$15,000, sufficient to be given March 1st. Mr. Steed has moved to Dry Ridge, where he comes with the reputation of being a first-class farmer, and he is gladly welcomed to this section.

Rev. Rivoletto P. DeMoisey spent Saturday and Sunday at Ghent, filling the pulpit of the Baptist church for the pastor Rev. A. Kirtley Johnson who was engaged in a protracted meeting.

Rev. DeMoisey made a fine impression and was invited to take the pastorate of the Baptist church at Haywood, Hancock county, by a member from that place who heard him preach.

W. D. Collins of Louisville, purchasing agent for the American Tobacco Company, spent Monday here, guest of Mr. Hugh D. Hays, of his lovely home near Richwood. Mr. Collins bought extensively on the Walton loose leaf market last season and made arrangements Monday to have the house handle a large amount of tobacco for him the coming season which he expects to purchase on this market.

Mr. and Mrs. Wm. H. Moffett of Savannah, Georgia, arrived here the first of the week on a visit to her old home. Mrs. Moffett is a daughter of the late Will A. Roberts and a niece of Mrs. D. M. Bagby and was born and reared here and educated in the Walton schools. Mr. Moffett represents the Atlantic Coast Line Railroad at Savannah. Their many friends here were delighted to renew their very pleasant acquaintance.

Gaines Levi Robinson entertained a number of his friends last Thursday afternoon. The same of his parents Mr. and Mrs. Robert G. Robinson, in honor of his anniversary. Those present were: Gladys McCarty, Mary Amanda Bedinger, Lucy and John R. DeMoisey, Holly and Harold Webb Aylor, Lucy Rensler, James Robert Glacken, Ruby and Blanche Carpenter, Lou Ewell, David and Bessie Roberts, Mary Ella and George Gaines Bedinger, Scudder, Elizabeth, Olivia and Dorothy Bots.

M. L. Kirkpatrick of Cincinnati, John A. Dierhard, of Cincinnati, B. Brown of Warsaw, Courland, R. Scott of Ghent, Thos. M. Baker and W. T. Turner of Sanders, and John Stonewall of Owen county, and C. C. Hughes, of Richwood, met here Thursday with local representatives and organized and incorporated the Sanders Loose Leaf Tobacco Warehouse Company with a capital stock of \$15,000 to open and operate a loose leaf tobacco warehouse at Sanders this year.

M. L. Kirkpatrick is president and D. B. Wallace secretary and treasurer. The location is in the heart of the best burley tobacco district in the State, and there is every prospect will be a successful business.

For Sale—A limited amount of choice extracted honey. J. G. Crisler, Walton, Ky.

Miss Effie May Arnold of Bardonia, Nelson county, arrived here last week on a visit to Miss Brookings Tompkins.

Stephen Ingram who has been ill with typhoid fever is convalescing and has every indication of early and complete recovery.

Wm. T. Hill of Carrollton, and Jas. E. Young, of Verona, were here Monday on business relating to their tobacco trade in this quarter for the coming year.

Mr. and Mrs. Wilbur Bachelder and two children Grant and Lucille of Decatur, Ill., spent part of last week here the guests of their cousin Mrs. S. L. Edwards and family.

Mrs. Jos. B. Harris and children of Covington, spent the past two weeks here with her parents Mr. and Mrs. W. R. Rouse while her husband was at Verona Lake in lecture work.

Miss Isabel Fawcett of Earlington, Hopkins county, who has been here on a visit to her schoolmate Miss Louvenia Edwards left Monday.

Mr. and Mrs. W. R. Rouse, who have been here on a visit to her schoolmate Miss Louvenia Edwards left Monday.

Mr. and Mrs. W. R. Rouse, who have been here on a visit to her schoolmate Miss Louvenia Edwards left Monday.

JELLY MAKING.

Jelly Making.—Pectin is a carbohydrate of which little is known, but is essential in jelly making. It is found in most fruit juices and its presence makes them jelly.

Test for pectin in fruit juice.—Mix one tablespoon alcohol with 1 tablespoon hot fruit juice; if the mixture becomes thick like gelatin, pectin is present.

Amount of Sugar.—One cup of juice to one cup of sugar is the general proportion for jellies and this is used when the pectin test thickens immediately. If little pectin is present use less sugar. Not enough sugar makes a tough jelly and too much gives a stringy mass.

Juices rich in pectin and acid require one cup sugar to one cup juice. Currants and grapes are examples. Crabapples, sour apples, cranberries and raspberries require less sugar and the proportion is three-fourths cup sugar to one cup juice. If fruits contain a large amount of water and pectin test is deficient use less sugar.

Meaning of—Boil until it jellies.—When jelly drops from spoon in two drops instead of one the jelly is usually done. Always remember that tough jelly is caused from not enough sugar and stringy jelly from too much sugar.

Unshaken product not perfect.—It can be recooked, adding either sugar or fruit juice which ever may be needed.

If jelly is set, slightly soft after it has set, leave in the sun a day or two.

Apple Jelly.—Wash and core apples. Cook in as small amount of water as possible to extract juice. Make pectin test. Put in a bag and allow to drain, do not squeeze if a clear jelly is desired. Measure juice, put in a clean vessel and heat. Add sugar and cook until it jellies. Pour into sterilized glasses and when cold, cover with a thin layer of paraffine to keep out dust.

Blackberry Jelly.—Wash berries, cook in water which hardly covers fruit. Test for pectin to determine amount of sugar. Put in a clean cloth bag and allow to drain. It drains much quicker if it is tied up so the juice drips from one corner of the bag. Measure juice, add sugar and cook until it jellies.

Berries which are still red, mixed with the one that give a good color to the jelly.

Sealing Jar.—Great care should be taken in sealing jars of canned fruit and vegetables. After the jars have cooled the tops should again be gone over to make sure they are perfectly tight. This is especially important in vegetables.

The "Triumph Fruit Jar Wrench" to be used is most convenient and also may be used to open the cans.

MAUD N. ASBURY.

Tobacco News.

Tobacco in Southwest Ohio looks very fine.

In Sumner county, Tennessee, the crop is looking fine.

In Maryland the tobacco is backward, and labor is approaching the crop in Pennsylvania is doing nicely despite a few cool days.

Fayette county has a fine crop. Recent rains did it much good.

In Maryland tobacco is growing rapidly, owing to copious rains.

In Wisconsin the weather has been too cool for the tobacco crop. Rains in Woodford county made a wonderful change in the tobacco crop.

In Bourbon county the crop has been well cultivated and is in fine condition.

Recent rains advanced the crop materially. Several crops have been sold at 15 to 16 cents.

The Connecticut valley the early setting. In approaching the stage at which it will be able to mature without further rain.

Generally throughout Nicholas county the crop presents a fine appearance, and is about ready for topping. Hail has damaged it in some sections.

Never has there been a year when tobacco was set under more favorable conditions. Though the crop was transplanted late, most of the plants lived and have made wonderful growth, many now think that the crop will not be better than the year.

Indications are also for good quality.

Never in the history of the tobacco growing industry around Carthage, Tenn., has the crop been so seasonable and the growers have not been troubled with worms. Fields are all clean.

The conservative estimate of the average annual average is about 85 per cent. of last year's acreage.

W. R. ROGERS, Clerk Boone County Court.

For Trade.

Beautiful registered trotting stallion and 2 also high bred stallion. Will trade each for a first class cow or land.

Call FRANKLIN SANFORD, Cincinnati, Ohio. Avon, 814-X.

You may have had ancestors? Everybody's ancestry will help you find their ancestors. Write to New Jersey, N. J., Indianapolis, Ind.

Notice is hereby given that my lands are being sold against trespassers and all kinds and hunters and trappers are forbidden to go on the lands.

A. B. DINSMORE.

MINNESOTA LETTER.

Rochester, Minn., July 21, 1917.
Boone County Recorder:

I hope I will not be that presumptuous for writing this letter to the Recorder for certainly such is not the case. I have read letters to the Recorder, written by Boone county people, visiting various parts of the country and always, to me, they were interesting and enjoyable. While I am not an "ecologist" enough, I thought possibly it might be of interest to some to read a sketch of the Mayo Clinic which is so widely known and has done so much for humanity.

The trip to Rochester is an interesting one from the mere fact of passing thru so many cities and towns of much greater population—cities such as the Cook County of Chicago, and the hospitals of Milwaukee, St. Paul and Minneapolis, to come finally to a little town, scarcely more than a hamlet, to see to and what was one of the greatest physicians in the country or even the world.

The town has very poor railroad connections which is a great surprise to the visitor who thinks of the endless stream and go. Yet, people pour into this little "burg" from every country on the Union and every corner of the globe, either to seek medical knowledge or to receive the benefit of their debt hands.

Of course the European visitors have been practically nil since the outbreak of the great war, but even at the present time there is an average of about 3,000 physicians alone, visiting this clinic annually.

A few words about the town itself: It nestles in the beautiful valley of the Zumbro River. You can stand on one of the hills and see over the entire low-lying area beyond, and it does seem to nestle between really these lines of hills. I have never been in a town like Rochester. As soon as you approach the town, the occupations and businesses of its people, made so by the great variety of the clinic. The chief business is the hotel, boarding and rooming houses, by comparison. Covington has about 70,000 people and about 13,000 hotels and twenty-six first-class hotels and about three hundred boarding and rooming houses. They all seem to be doing well. They are still building and for they are still building and the clerk at one hotel told me they once called 23 different hotels before one person.

The town has several nice parks, although almost any part of it is nice enough for a park. You see well kept lawns, flowers and trees. The largest and most beautiful park was donated by the Mayo family and contains the statues of Washington, Lincoln and Dr. William Worrall Mayo, father of Drs. C. H. and W. J. Mayo. It also contains a magnificent band stand where they have concerts three times a week.

About the clinic. This wonderful machine which was given by the untiring efforts of Drs. Chas. H. and Wm. J. Mayo, is now composed of over 100 physicians, representing a speciality of practically every conceivable branch of the medical sciences, and having some of the best men in the country connected with it. Dr. Rosenow, bacteriologist, research work that has already proven of inestimable value in the prevention and treatment of various diseases, is still working untiringly to solve the great problems of the disease, transmission, prevention and treatment of these diseases. He gives to the waiting world that would otherwise be snapped away by such dreaded diseases as infantile paralysis. He has proven practically conclusively that this dreadful disease is caused by an infection that enters through the tonsils, and that by removing diseased and unhealthy tonsils, and many other serious diseases may be prevented.

I had the pleasure of attending an illustrated lecture by him in which he explained his work, his results and his conclusions. After he had finished it all seemed so plain and reasonable that one could not help wondering why it had not been worked out long ago.

When a visiting physician enters St. Mary's Hospital to attend the operations of the Mayo clinic, he is requested to register. He is then given a white coat, a program and a list of the operations for that day. There are six operating rooms and they are busy from 8 a. m. until 10 p. m. daily. One can see here almost any operation he can imagine. The visiting physician is always at liberty to ask questions regarding cases and the surgeons seem glad to answer them. This privilege I have not abused.

There were performed in St. Mary's Hospital, alone, during 1916 over 10,000 operations, representing patients from practically every state in the union, Canada and 26 foreign countries. Besides these operations there are about as many performed at the Convalescent Hotel which has been turned into a hospital.

When one enters the Mayo Clinic building proper and sees the great numbers of patients waiting, he is apt to think he is alone in his lecture room and leave. I have talked to people who have been here for a week before they could even get an appointment with a doctor.

When I had seen the clinic and had studied it over this thought

came to my mind: "Thou a man dwell in a wilderness, and the place of his abode is unknown, if he does something—that is worth something the world will beat a path to his door."
E. W. NORTHCUTT, M. D.

BE DEAF TO APPEALS FOR SYMPATHY, SAYS NOTE TO DRAFT BOARDS

Washington, July 28.—The gravity of the task which faces members of local draft exemption boards is called to their attention in solemn language in a communication sent broadcast by the War Department and made public tonight by Provost Marshal General Crowder.

"The selected man offers his life," says General Crowder's communication, mailed to all boards, reads as follows: "You are entering on a difficult task, the gravity of which is beyond words. It is a task in the way of discussion. You realize the significance of that you are to do, and you know that a responsibility, heavier, perhaps, than you have ever faced, is upon you."

"War demands individual sacrifice to the common cause. No people ever approached war with a calmer appreciation of that sacrifice or a firmer resolve to bear it and to present themselves to be classified for service in the place to which it shall best serve the common good to call them."

"This calm determination could not exist were it not for the confidence of the nation in its institutions. In this public confidence is found the very spirit of a selective service law. The most sacred right of every citizen and family are entrusted for adjudication to local citizens and officials, nominated by state Governors and appointed by the President."

"The most equitable rules that could be devised have been prescribed for guidance and the administration of these rules and the sacrifice that is offered by your neighbors are entrusted to your hands."

"From every one is demanded a sacrifice. But there is one thought to be kept always in your mind. The selected man offers his life. There is no greater giving than this, and that thought should guide you always. There are few who will urge upon you claims for exemption or discharge that, whatever may be your inclinations of sympathy or affection, you will know ought not to be granted."

"It will strengthen you to remember that for every exemption or discharge that is made for individual convenience or to escape personal loss of money or property, or for favor or for affection, some other man whose time otherwise would not have come must incur the risk of losing his life."

"There can be no room for hesitation in such a case."

"Another fundamental thought is this: 'You are not a court for the adjustment of differences between two persons in controversy. You are agents of the Government, engaged in selecting men for the army and there is no controversy. You, acting for the Government, are to investigate each case in the interests of the nation, and never in the interests of any individual.'

"There is not one exemption or discharge in the law or regulations that is put there for the benefit of any individual. All are there for the benefit of the nation and to the end that the whole nation may be a team in which each man shall play the part for which he is best fitted."

"Therefore no one has a vested right, by himself or by attorney, to urge, by argument or pleading, his individual case upon you. You should rigidly exclude this. Ordinarily you should act on the affidavits. If you desire more information you may proceed to get it. If you doubt the affidavits you may interrogate other persons. If you desire more proof you may get it. But no claimant has a right to submit other proof than that called for by the affidavits or that than you may call for."

"There should be no rules like those of Court procedure, no technical rules of evidence. You should proceed to investigate cases about which you are not satisfied exactly, as you, as an individual, would proceed to inform your self of any fact about which you are in doubt."

"Last of all, it is important to say a word about your own sacrifice. The place to which you have been called is one which no man would seek save in the performance of one of the highest of his duties."

"There is not, in any real sense, any remuneration. Because thousands of citizens urged that men be placed in a position of performing their grave duties for pay, the resolutions provide that ordinarily the men shall be compensated. Because it was not desired that any man be prevented from rendering the service by the necessity for earning his daily bread, small remuneration was provided."

"The nation needs men, and needs them quickly. The hours will reward them and the work absorbing. The duty always is to take and never to give, and human nature is such there will be little praise and some blame."

"The reward of many of those whose cases are to be decided is no greater than that of the men who are to decide them; and your duty is to decide them. You know that, at great personal sacrifice, you are rendering your country an indispensable service in a matter of the utmost moment."

Can't Afford to Keep the Veal Calves.

I saw in the RECORDR and also in the Stock Record of Cincinnati an article from Mr. W. H. Embury advocating that the National Government should put a stop to the slaughter of veal calves. I am not answering the article because I ever expect the Government doing so foolish a thing. I am only writing as a protest, a righteous indignation that one would propose to the Government to do something that would work such a hardship on so many of the poor of our country. Men who are only able to keep a few cows and have not the pasture to keep the extra calves. You would force them to keep these calves until weaning time on milk which could much more profitably be fed to hogs for meat for his family, and the farmer who has a cow and a calf for his calves. He would be forced to sell his calf to his rich neighbor who would have the pasture and he would be compelled to sell his calf at three to six months old for a few paltry dollars where he can sell it as a veal for twenty or twenty-five dollars. The large dairymen near our cities, who depend largely on buying their feed. What would they do with their calves? Could they keep them? You would force them out of business and they are going out already all to fast because of the high price of feed and high prices of unreliable milk. The true type of a dairy calf is worth nearly as much for veal, "it makes good veal," as it is at two years old. Why waste it to feed until it is two years old? He would have poor judgment of feeding cattle. It would force dairymen to do one of two things—go out of business at once—cause them to use beef steers which would eventually put them out of commission as dairymen. Mr. Embury says for us not to be a Judas and cry out against the loss of spikenard. I am not a Judas expecting to fill my money bag with money from veal calves. Neither am I going to sit idly by and see some other fellow fill his bag by oppressing the poor and quote a passage from the Bible to justify his act which has no connection whatever with the subject under discussion. Mr. Embury speaks of untold quantities of grasses, wheat, fodder, etc., going to waste in a radius of 25 miles of Cincinnati. I with thousands of others would like to take it up. We could use it in our business for we have been paying rather high prices for it if it is so plentiful. All too high to feed dairy calves on until they are two years old. C. C. SLEET.

Maxwell Proves Economy in an International Contest

Fifty Maxwell motor cars carrying four passengers each, in fifty different cities and towns, ran an average of 39.67 miles on one gallon of gasoline each.

An average of 27.47 miles was made by a total of 892 Maxwells running on one gallon of gasoline each.

These were the big, outstanding results of the Maxwell Dealers' Gasoline Economy Contest which took place in the United States and Canada on Wednesday, May 23rd.

In all the runs, privately owned Maxwells, in actual daily use by purchasers, were employed.

In each car were three observers—newspaper men, public officials, or officials of local Chambers of Commerce or Automobile Clubs.

These observers made affidavits as to the results of the runs they watched.

The Maxwell Motor Company offers these certified contest figures as proof of its claims regarding the Maxwell's economy.

If you want to hold down gasoline bills, buy a Maxwell.

Roadster \$650, Touring Car \$665, Cabriolet \$865, Town Car \$915, Sedan, \$985; completely equipped, including electric starter and lights. All prices f.o.b. Detroit.

"The Five Tires"

Take No Chances in Tire Buying

There is risk in a chance—but not when you buy a tire of known quality—of known endurance.

United States Tires—all five of them, 'Royal Cord,' 'Nobby,' 'Chain,' 'Ucco,' 'Plain.'

—are tires of known, demonstrated and proved service and endurance.

—the make of tires that cost less per mile today than any other make of tire—now or ever.

Proof—the consistent and persistent year-by-year, month-by-month sales increases of United States Tires.

Your experience, too, will prove their quality.

United States Tires Are Good Tires

A Tire for Every Need of Price and Use
'Royal Cord' 'Nobby' 'Chain' 'Ucco' 'Plain'

United States TUBES and TIRE ACCESSORIES Have All the Sizing Worth and Wear that Make United States Tire Supreme

A Complete Stock of United States Tires carried by Eddins & Baker, Burlington, Ky.

Card of Thanks.

We hereby express our heart-felt thanks to the kindness and shown Mrs. Mary Hume during her last illness, and assure those who were so attentive and took such an interest in her that assistance is appreciated and will always be remembered by us as will be Dr. Duncan for the promptness with which he responded to every call; Rev. Edgar Bailey for his comforting discourses and undertaker C. Scott Chambers for his efficient service.

THE FAMILY.

Leo Ball, of near Wades Mill is suffering from the effects of being bitten by a large rat Monday night. The rat bit Mr. Ball shortly after he had retired, and the pain was so great that medical attention was necessary. Unless complications develop the wound is not serious. Winches and Sun.

Following is the schedule that will be in effect on the Covington and Burlington mail route that will go into effect the first day of next August:

Leaves Covington daily at 6:45 a. m. and arrives in Burlington at 8:15 a. m.

Leaves Burlington at 8:30 a. m. and arrives in Covington at 10 a. m.

Leaves Covington at 4 p. m. and arrives in Burlington at 5:30 p. m.

Leaves Burlington at 5:45 p. m. and arrives in Covington at 7:15 p. m. Sunday, only the morning schedule.

DR. T. E. RANDALL
of Petersburg,

VETERANIAN

is now ready to answer calls day or night. Charges reasonable.

COMMISSIONER'S NOTICE.

Boone Circuit Court, Ky.

B. F. Zimner, &c., Plaintiffs

vs. Henry Kottmeyer, Adm'r. of Fred Zimner, dec'd., &c. Defs.

All creditors of the estate of Fred Zimner, deceased, are hereby notified to present their claims against same, properly proven, before me in my office in the Court House, Boone County, Ky., on or before the 15th day of September, 1917.

For your choice, see Smith, G. B. & Co.

SNAIL IS WELL PROTECTED

Withdraws Into Shell at Hint of Danger and Tightly Closes the Only Opening.

Snails are most interesting creatures and are easily observed, especially if one has an aquarium. The big Japanese water snail, crawling up the side of the glass, shows all its parts, and they are virtually the same in all species. An article in the Children's Museum News describes it as follows:

"Above the flat, gray foot is a snout at the end of which we see a mouth opening and closing deliberately like a winking eye, except that it opens laterally instead of up and down. A ribbonlike tongue darts in and out to rasp away particles of plant by means of the tiny, horny points all over it. The eyes are on the little bumps which you see at the base of the horns or tentacles, one on each side of the snout. The tubelike opening on one side above the foot forms a passageway for the water to enter the gills through which this snail breathes."

The foot and head of the snail are the only parts of the body we can see, for the rest of it is wound about spirally within the coils of the shell. Now if we tap on the glass of the aquarium the snail suddenly drops to the bottom of the tank, pulling in its tentacles, its mouth, and finally its foot, and tightly closes the opening to its shell by means of a round, horny operculum, of the same substance as the shell and fastened to the back of the foot. The shell will bite at that closely shut body in vain if they expect to make a meal of the soft body within."

BEST WAY TO OBTAIN MONEY

Inheriting It Has Many Advantages Over Getting It by Marriage, Experience Has Shown.

Perhaps the best way to get money is to inherit it. This usually requires no brains, skill, trouble or special aptitude on the part of the recipient. Neither does it involve any obligations of an embarrassing nature. In this respect it has a distinct advantage over getting money by marriage.

Getting money by marriage is, of course, tremendously popular and most authorities unhesitatingly recommend it as the best method next to inheriting, but the fact remains that it involves many pitfalls. The wife or husband who brings the money to the marriage may turn out to be considerable of a nuisance and therefore decidedly annoying to have hanging around.

This confronts one with the very difficult task of getting rid of the said husband or wife without at the same time getting rid of the said all-important money. The inventor of this difficult money has served to obviate this difficulty somewhat so far as the female sex is concerned.

Another excellent way to get money is to have a piece of property, which has been a great burden to you, and which you have been unable to get rid of at any price, suddenly turn out to be immensely valuable because of a big public improvement in the vicinity or the movement of business in that direction. This method, however, requires a certain amount of initial capital and perhaps a medium of judgment—Life.

Language of Flags.

There is no international language of flags established by law but by common consent flags of a certain color are used for certain purposes. All over the world a yellow flag is a signal of contagious disease. A ship hoists it to denote that there are some on board suffering from such disease and it remains hoisted until she has received quarantine. The white flag is universally used as a flag of truce. The black flag was formerly the symbol of piracy and now in some countries it is flown after an execution is performed to indicate that the requirements of the law have been carried out. Other features of flag language are that a flag flying at half mast is a universal sign of mourning, and when a ship has to make a sign of distress she does it by raising the national ensign reversed, or upside down. Even this can be emphasized by knotting the flag in the middle to indicate great distress and imminent danger.

Do "Good Turns."

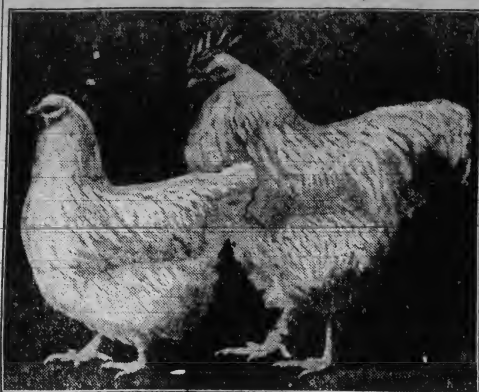

Most of us can look back to a day when the kind word of some good friend made us forget how dark and cheerless was life's way. Then why should we hesitate about doing a "good turn" for someone now, even though we know that "good turn" will "pay us out" a little?

The woman who waits for a "convenient" time to put her "good intentions" into effect will always have a long list of things to do tomorrow. Today, whether the sun is shining or great storm clouds darken the sky, is the time to do what we have decided to do. —Exchange.

Saved.

It was a wedding of prominence, and the proofer on a Columbus newspaper was watching for errors when the story came in from the composing room. Suddenly the proofer gasped and saw a woman and a hurriedly printed copy. Then she marked "saved" and the story was printed.

IMPORTANT WORK IN THE POULTRY YARD

WHITE ORPINGTON COCK AND HEN.

(From the United States Department of Agriculture.)

The poultry raiser on farm or in city who wishes to produce fall and winter eggs with a by-product of spring "fryers" should begin now to plan for the early setting of eggs, say poultry specialists of the United States department of agriculture. In the states of the extreme South settings should be made from the first to the middle of February; in the central group of states, from the early part to the last of February; and in the northern tier of states, from the latter part of February to the early part of April. With settings timed on this schedule the chicks will hatch in ample time to allow their maturity before cold weather. The pullets from these broods lay during the late fall or early winter when eggs are scarce.

The setting schedule outlined also will permit the use of early spring "fryers." The young chicks will be developed to the point where they may be turned out on the ground by the time vegetation is out, and so may augment their feed with green stuff. The smaller breeds of chickens can be hatched later than those which are larger and slower to develop.

Incubation.

One difficulty in setting eggs in spring at selected dates if the natural system of incubation is followed is in finding broody hens at the proper time. If natural incubation is depended upon exclusively it probably will be best for the poultry raiser to disregard dates and make settings whenever broody hens are available. A good nest for setting is made of wood, 15 inches square and about 15 inches high, with a top. The front is open except for a board six inches high. Three or four inches of damp earth should be placed

in such a nest and on this straw, hay, or chaff should be firmly packed. The hens should be dusted thoroughly with insect powder. It is a good plan, also, to sprinkle a little of the powder in the nests.

Using an Incubator.

The suggested schedule can be followed exactly if an incubator is used. The machine should be operated in a warm room, preferably a cellar, as a protection against outside temperature changes. It should be disinfected thoroughly before being used, with a solution of a reliable coal-tar disinfectant. Instead of using such a solution a small receptacle containing one-half ounce of permanganate of potash on which one-half ounce of formalin has been poured may be shut up in the incubator. The resulting gas will thoroughly disinfect the machine. After disinfection the incubator should be run empty for several days to get it in good operating condition. After the eggs are in place the temperature should be at from 101½ to 102 degrees Fahrenheit the first week, 102 to 103 degrees the second week, and at 103 degrees the third week.

The eggs usually are turned for the first time at the end of the second day and twice daily through the eighth or ninth day. The eggs are cooled outside the hatching chamber once daily after the seventh and up to the nineteenth day. Moisture should be furnished in artificial incubation in South, in high altitudes, and when the incubator room is dry. This may be done by sprinkling the eggs with warm water or by placing a wet sponge or pan of water under the egg tray.

During the hatching period carefully fill the lamp and trim the wick each day.

HANDY EGG CANDLERS

Some Sort of Inexpensive Device Should Be at Hand.

Simplest Kind of Tester Is Made From Piece of Wrapping Paper, Rolled to Form Tube—Fresh Egg Has Pink Tinge.

Eggs intended for private trade should be tested or candled for quality. With this in mind, some sort of inexpensive candling device should be had. The simplest kind of a tester is made from a piece of wrapping paper 12 by 24 inches, rolled to form a tube 12 inches long. To inspect the egg the tube is placed to the eye and then the egg, with the large end uppermost, is so placed that the sunlight will strike it. Many times a dark room can be had, but not the sunlight. An ordinary shoe box and a bedroom lamp will be just the thing. A hole is made in the top of the box and one at the bottom for the free circulation of air about the lamp. In front of the lamp a hole the size of a quarter is made. This candling device is efficient and will, in most cases, meet the needs on the farm.

When electric lighting service is available and a great many eggs are to be candled, a round cylinder eight inches high and four inches in diameter, with two holes in front and one small one in the bottom, is attached to a large "2" extending about 35 inches from the wall. The lamp cord is dropped down the perpendicular pipe to which the cylinder is attached. A 60-candle-power lamp is used to give the best results. With this device four eggs may be handled at a time by an experienced candler.

A fresh egg has a pinkish tinge. An egg that has a dark spot the size of a dime on the yolk shows that incubation has taken place and the egg is no longer fit for food under ordinary circumstances.

EXERCISE FOR LAYING HENS

All Grain Should Be Scattered in Deep, Clean Litter of Straw, Hay or Other Material.

No hen can be healthy unless she exercises considerably; therefore, all grain should be fed in a clean, deep litter of straw, hay or other material.

TO DETERMINE LAYING FOWL

Pelvic Bones Are Spread Apart About Diameter of an Egg—Some Layers Have Thin Bones.

When a hen is laying, the two pelvic bones are spread apart about the diameter of an egg (1½ inches); otherwise it would be impossible for the eggs to pass from the hen without the shell being crushed. As such an accident would prove fatal to the layer, nature precluded its occurrence by expanding or separating the pelvic bones in correlation with the development of the eggs.

In the nonlayer, for illustration, the distance between the pelvic bones is the width of one finger or less, and it usually requires from four to six weeks for this hen to graduate from the "one-finger" unproductive class to the "three-finger" active layer. It is apparent that the expansion of the bones is secondary to the development of the eggs; hence, the more rapidly the hen forms her eggs, the faster her pelvic bones are adjusted to the laying condition.

A few layers have thin, flexible bones (apparently a desirable condition) that do not expand so wide as hens with firm bones, and care must be exercised in judging whether such hens are laying or not.—Clemson College Bulletin.

ERADICATE VERMIN ON HENS

Coal Ashes or Dust of Any Kind Will Accomplish Purpose—Keep Supply in Henhouse.

In every poultry house there should be a dust pan where the hens may get rid of lice.

Poultry lice breed through pores in their sides and fine dust fills these pores and suffocates the vermin. Road dust, hard coal ashes or dry dust of any kind will accomplish the purpose.

PROPER EGGS FOR HATCHING

Sound Doctrine Is to Say That We Should Breed Only From Hens—Discard Eggs From Pullets.

Pullets' eggs should not be used for hatching. It is a sound doctrine to say that we should breed only from hens.

The hens do not lay so many eggs before the breeding season and care should be taken to lay large eggs.

The KITCHEN CABINET

Let us realize that thoughts are forces, that like creates like, and attracts like and to determine one's thinking therefore is to determine his life.—Ralph Waldo Trine.

SHELLFISH DISHES.

When the oyster season closes clams, crabs and shrimps have their season.

In many parts of our country these may be obtained fresh from the water, but the canned variety is not to be despised.

Plain boiled crabs, eaten right from the shell with a bowl of melted butter to dip them into, must once be eaten to prove it is one of the choicest of dishes.

Crab Salad.—The crab meat is carefully removed from the shell after being cooked in boiling salted water, mixed with salad dressing and served on lettuce or a bed of water cross.

Deviled Crab.—To the meat from a dozen crabs add a tablespoonful of bread crumbs, one tablespoonful of melted butter, one hard cooked egg, chopped fine, a dash of pepper, two tablespoonfuls of salad dressing and one catchup to suit the taste. Put this mixture into the cleaned shells, sprinkle with buttered crumbs and bake until the crumbs are brown.

Clam Chowder.—Fry four slices of salt pork, cut in fine dice, until brown; then add two tablespoonfuls of flour, and one large onion chopped fine. When the onion is light yellow add a cupful or two of diced raw potato and a pint of boiling water and when they are nearly tender drop in a quart of clams that have been chopped or ground, season with salt and pepper, add a pint of hot milk and serve piping hot with crackers.

Crab Stew.—Melt a tablespoonful of butter, add two of flour and cook until well blended. Add a beaten egg with a pint of milk, a pinch of soda and the meat of half a dozen crabs, salt, pepper and celery salt to taste. Serve with hot hominy. Shrimps carefully cleaned are served with celery on a bed of lettuce with salad dressing.

Crab Croquettes.—Prepare the crabs as for deviled crab, removing the brown part. Mold in the form of croquettes, add a little baking powder to the bread crumbs used for dipping, using a yolk of egg and as much cold water as egg. Dip the croquettes in the crumbs, then egg and crumbs again and fry as usual in deep fat.

Happiness depends quite as much on what we do as upon what we do.

Gold is good in its place; but living, patriotic men are better than gold.—J. B. Lowell.

GOOD SEASONING.

There seems to be no difference of opinion in regard to the value of properly seasoning food. A plain dish, with an artist's hand in seasoning, becomes something unusual and delightful, while all the rich foods in the world put together, with no care as to combination or of proper seasoning will be "a mixture and a mess."

We must revive the old-fashioned herb garden of our grandmothers if we would realize the true test of well-preserved herbs. The spices that her meats, soups, as well as cakes, doughnuts and crullers, lacked charm without the well-chosen herbs or spices. She did not know that when she used a bit of parsley to garnish her platter of cold meat she was contributing to the health of her family as well as their artistic sense. Presley acts upon the kidneys, assisting in the elimination of waste.

Some of the most inexpensive seasonings that may be grown in the kitchen garden, and will prove a delight to see growing as well as to use in winter to increase the palatability of various dishes, are the following: Parsley, mint, dill, tarragon, sage, thyme, marjoram, chervil, horseradish, mustard, celery (celery tips dried), caraway seed, and mushrooms. To these we add curry, mace, nutmeg, cloves, mixed pickle spices and bay leaves.

Mint is used with lamb in different salads and as an addition to a refreshing drink.

Sage as a seasoning in stuffings for pork roasts or poultry or ham. Added to cornmeal mush for frying or as a seasoning for string beans.

Thyme and marjoram, with fowl, squash or fish and dressing for meats and with boiled beans. Chervil as a garnish for salads and meats, green mustard sprinkled over lettuce or any salad, horseradish as a relish for meat and a seasoning for pickles as well as sauce for fish. Curry adds zest to various meat dishes or served with rice or cabbage, cauliflower, carrots or onions.

GREAT NEED OF FOOD

No Danger of Overproduction This Year—Dean Mumford.

Any Surplus Which American Farmers Can Produce Will Be Quickly Absorbed by Hungry People of England and France.

While the farmer is being urged to greater and greater production, he naturally considers the possibility of overproduction. Many farmers in the state have advanced this question. According to Dean F. B. Mumford in the Missouri College of Agriculture, overproduction is exceedingly improbable this year. It has been agreed that this country's part in the war will be largely to supply food. "Our food resources have been increased by shipments to Europe and by several poor crop years," said Dean Mumford recently, "and now with the restriction of export to the allies, the small reserve which we have will be further decreased. Any surplus which the American farmers can produce will be quickly absorbed at war-time prices. Millions of people in England, France and other countries at war with the German powers are in need of food. They must have food not only for their civilian population but for their armies. They are too busy fighting to provide that food themselves. It then behooves the United States to supply food."

"But it is not alone for the allies that we must produce maximum crops. If we should have a poor crop year throughout the country, our own people may actually suffer."

"If Germany is able to continue the ruthless submarine warfare unhindered, some food will be lost on its way to Europe. Consequently the losses will tend toward a further shortage and to absorb any surplus even if there were danger of overproduction."

What would happen if peace should come within the next few weeks?

"Would not the markets be glutted?" In answer to these questions, Dean Mumford said: "It is doubtful if there will be a great decrease in the demand for food immediately following the war. With commerce restored, every nation which is now at war will become a market place for American farm products. Those countries have no food reserve left and they will turn to the United States to furnish food during reconstruction, and until they can feed themselves."

As an example of the actual scarcity of food in America, Dean Mumford stated the condition of wheat. "In 1915 the United States produced 10 bushels of wheat per capita; in 1916 we produced 6 bushels per capita, but used 6 1/3 bushels for seed and ordinary consumption and exported 2 1/4 bushels per capita. The present condition of wheat in the United States is 98 per cent of a normal crop. The country is 23 per cent below the average for the last ten years. The condition in Missouri is even worse—59 as compared with the 15-year average of 85 per cent. The latest reports are that the world crop of wheat is far below average." Other foods are correspondingly scarce.

DEVICE TO HOLD DOOR OPEN

Half-Inch Piece of Board, Eight Inches Long and Three Wide Is Easily Arranged.

(By R. PHILLIPS, Washington.)

A simple device may be made which is useful for holding doors open when the old-fashioned lock is used. Take a half-inch board, eight inches long and three inches wide and shape it like the above cut. Screw it to a 2 by 4 on the barn where the stick on the lock

projects. Nail it so the projecting stick hits the lock about one-fourth of an inch above the point. With a little pressure, the slope of the lock will make the projecting stick move up. When it comes to the notch in the lock it will drop down, locking the door back securely.

GROUNDED WIRE FOR FENCES

Danger of Death to Farm Animals From Lightning May Be Avoided With Little Work.

All danger of death to farm animals coming in contact with fence wires heavily charged may be avoided by attaching a wire to the strands of the fence every two or three hundred feet, running one end of it into the ground about four feet deep.

This provides an outlet for the electricity and render the wire fence as safe as any other.

PROPER EGGS FOR HATCHING

Costly Mistake to Use Those From Uncleaned Flock—Best to Have Small Breeding Pen.

It is a costly mistake to hatch eggs from the whole uncleaned flock, and keep males enough the year around that the eggs will be fertile.

Far better get the eggs from a neighbor who culls his hens for hatching eggs, or send to some breeder who does. This is not an expensive thing to have a small yard for some own best hens and mate.

WORK WHILE ITS COOL

You'd better speed up on the work while the weather's still cool. Statistics show you'll very likely not get it done when it gets hot.

A person will do 15 per cent less physical work at 75 degrees and 27 per cent less work at 86 degrees than he will at 68 degrees when he has full choice of doing or not doing, quotes K. G. Smith, extension engineer at Ames, from an investigation carried on by the New York state commission on ventilation. It was found that the power to do either physical or mental work, by subjects doing their utmost, was not diminished by a room temperature of 86 degrees. It's the inclination that lags when the mercury begins to rise.

BUYING AND SELLING EGGS

Prominent Dealer in Food Supplies Opposed to Practice of Handling Them by Dozen.

A prominent dealer in food supplies has gone on record as opposed to buying and selling eggs by the dozen.

"I am strongly in favor of selling eggs by weight," he says. "It is the only just way for both seller and purchaser. As things are now, one man may buy a carton of eggs, very good, but very small, while another may buy a carton of the big eggs. Yet both will pay the same price. It is not fair. The only fair and just method is to buy and sell them by weight."

Eggs vary so in size that a dozen large and a dozen small eggs purchased at the same price per dozen

Eggs of Various Sizes.

may differ as much as 25 per cent in the value of the food elements furnished. Perhaps the fairest way to buy or sell eggs is by weight. Because of the wide variations in the size of eggs, it is also coming to be recognized that more accurate results in recipes can be obtained by weighing or measuring the eggs out of their shells.

WHY TOMATO PLANTS WITHER

Those Raised in Cold Frame Are Less Hardy Than Those Grown in Open—North Wind Hurts.

Frequently it is found by those who start tomato plants in a cold frame that the blossoms which appear so thrifty and which give such promise of future returns wither and drop from the plant a few days after the latter is transplanted to the open field. Consequently a new set of blossoms must be developed and the plants lose all advantage that was theirs in the way of an early start.

There may be two reasons for this. Plants raised in a cold frame are necessarily less hardy than those grown in the open. If the weather happens to be sufficiently mild for two or three days after the transplanting occurs the plant will adapt itself to the change. But if the wind veers about into the north or northwest and there is a marked drop in temperature the shock is too great and the blossoms go. Experienced growers watch for what they anticipate will be a settled spell of spring weather—even delaying the removal of their plants to the open for a week or ten days beyond the time they feel the change should occur, in order to avoid loss of blossoms.

USING MANURE FOR ALFALFA

Astonishing to See Extraordinary Growth Where 'Strip of Fertilizer' Had Been Spread.

Many alfalfa growers claim that manure makes an excellent substitute for lime for alfalfa. Some have gone so far as to claim that manure inoculates alfalfa, says a writer in an exchange. However that may be, we have several times been astonished to see the extraordinary growth of alfalfa where a strip of manure had been spread across the field for experimental purposes.

Recently, 626 alfalfa growers who had spread manure on alfalfa, reported an average yield of 3.5 tons to the acre, whereas 414 who had used no manure reported only 3.4 tons to the acre. A half ton of alfalfa will pay for considerable manure. Moreover, manure is applied to alfalfa ground before seeding.

GOOD GARDEN SEED FAVORED

Essential in Successful Gardening—Best Way Is to Patronize Some Reliable House.

Good garden seed is an essential in successful gardening. If we are going to plant something, we want it to grow. The worst thing possible is to plant seed that won't germinate, and it is almost as bad to find that the seed which has been planted is untrue to name.

In order to avoid all annoyances it is best to secure good seed. When buying garden seed demand that it be fresh; likewise insist that it be true to name. The easiest way of avoiding poor seed is to purchase the product of some reliable house.

GOOD ROADS

SURFACE OF IMPROVED ROAD

Oval Should Be as Flat as Character of Material Employed and Lay of Land Will Permit.

"Everybody agrees that the surface of a road must be oval in its contour," says Farm and Fireside, "but not all understand that this oval ought to be as flat as the character of the road material and the lay of the land will permit. With brick or concrete construction the oval may be very flat, because the traffic makes no ruts to carry the water lengthwise of the road, nor does the pavement—ten and develop depressions when kept in contact with water. But broken stone (unbound macadam), being susceptible to penetration by water, and subject to great damage if frozen while soaked, must be given a higher oval; and for gravel roads a still steeper pitch is demanded.

"As for earth roads, the steepness must be governed by the combined influence of a number of factors. Perhaps the leading factor is the quality of the earth in each particular case. And next might be placed the presence or absence of 'seeps' or 'spouts,' while another of these vital factors would be the longitudinal pitch of the highway."

OIL FOR ROAD IMPROVEMENT

When Properly Applied Good Surface Is Obtained—Experiments Being Made in Missouri.

(By E. T. MCAUSTLAND, Missouri Agricultural College.)

Attempts are now being made in several parts of the state to keep dust down by the use of road oils. Supervisors should be careful to investigate the quality of the oil they use before putting it on the highways. It is not generally understood that there are two distinct types of oil on the market. One of these oils has an asphalt base which serves as a binder on the road as soon as the lighter oil evaporates. The other has a paraffin base and is so all intents and purposes a lubricating oil. This kind of oil, however, does not hold the road hard, or is not binding. It leaves the roads musty and sticky.

Road oiling, properly done, gives a good surface. The City of Joplin has done some oiling on its roads that have already carried heavy traffic more than a year and now look as good as asphalt pavement.

Any Missourian may send samples of road oils to the Engineering Experiment Station University of Missouri Columbia, and have them examined at

Oiled Highway in Missouri.

a moderate cost—merely enough to pay for the use of materials in the laboratory. Some time ago the experiment station issued a bulletin giving complete information on the quality of various materials throughout the state for road-making purposes. This bulletin is still in print and will be sent free. Its title is "Investigator of Road-Making Properties of Missouri Stone and Gravel."

\$1,500,000,000 FOR ROADS

Predicted This Amount Will Be Spent in Next Five Years on Highways of United States.

"It is predicted on good authority that from \$1,000,000,000 to \$1,500,000,000 will be spent on the highways of the United States in the next five years," says Lincoln Highway, the organ of the transcontinental highway association of that name. "Herein lies the proof of the general interest on the part of all of the people in road improvement, an interest which went soaring with the passage of the Bankhead-Shinkelford act allowing \$75,000,000 of federal funds to the various states for this purpose."

Money for Rural Roads.

Under the federal-aid road act, within the next five years \$160,000,000 will be spent by federal and state governments in improving rural roads.

Reduce Cost of Hauling.

Good roads reduce the cost of hauling produce to and from the farm as much as 25 cents per ton-mile.

Beautifully Roadside.

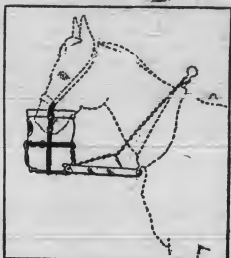

Why not plant parts of our roadsides with suitable native shrubs or perennials?

LIVE STOCK

OFFERS FREEDOM FOR HORSE

Recently Invented Nose Bag, Mounted on Rigid Frame, Permits Animal to Breathe Freely.

A humane nose bag for the accommodation of the work horse when he is compelled to take his meals out of many of these animals are compelled to do frequently, has been sought for

Humane Nose Bag.

a long time and the one in the accompanying illustration seems to offer the desired convenience. The nose bag is mounted on a somewhat rigid frame and is supported from the upper and lower parts of the horse's collar so that it is held firmly in place in front of the animal and at the same time gives the horse all the freedom of his head that may be desired. In addition to this advantage it also saves feed for a great deal of valuable material of this character is lost in the endeavors of the animal to effect a transfer of the grain from the bottom of the bag to his mouth. This is generally accomplished by tossing his head in the air and catching the grain in his mouth.

FAVORS TWO LITTER SYSTEM

Advantages and Disadvantages of Plan Are Enumerated by Expert of Missouri College.

A system of swine management which is growing in popularity is that of keeping on the farm a breeding herd large enough to produce all the pigs needed for feeding. The sows are bred to produce, as nearly as possible, two litters per year. Sows are usually bred in November so that the pigs will be farrowed during the late February, or early March. The pigs are weaned at eight or ten weeks of age and sows bred again for a September litter. The practice of raising two litters a year is more or less successful but if three litters are produced in two years, results are about as good as can be expected. The pigs produced in this way are crowded from birth, and are marketed at from six to eight months of age, when they weigh 200-250 pounds. The advantages of the system are: 1. The system requires maximum amount of grain and minimum amount of forage, and cheap feeds. 2. Early spring and fall pigs require more care than late spring pigs.

1. Gains are put on young growing animals. Such animals gain more economically than older animals. 2. Maximum returns may be had from money invested in breeding herds. In other words brood sows are kept busy the whole year. 3. Money is turned most quickly. 4. Twice as many hogs may be fattened. The spring litter is finished and put on the market in the fall and the fall litter is marketed in the spring. 5. This method gives minimum risk from hog cholera and other losses since hogs are held on the farm only a short time.

The disadvantages of the system are: 1. The system requires maximum amount of grain and minimum amount of forage, and cheap feeds. 2. Early spring and fall pigs require more care than late spring pigs.

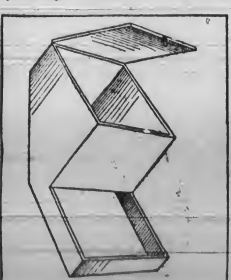

SELF-FEEDERS FOR BOLTERS

Where Horse Has Acquired Habit of Eating Too Rapidly He Can Be Restrained By Device Shown.

SELF-FEEDERS FOR BOLTERS

Where Horse Has Acquired Habit of Eating Too Rapidly He Can Be Restrained By Device Shown.

If your horse has the habit of bolting his feed, you can easily remedy it by making a self-feeder for him. The

Feedbox for Bolters.

drawing shows how it may be made, similar to a poultry feeder, says a writer in The Farmer. It should be made of such boards, large enough to hold one feed. The horse can get the grain only in small quantities, and cannot eat more rapidly than he should.

A. A. Murat, for Coroner.

J. W. Conley, for Surveyor.

W. R. ROGERS, County Clerk.

By LIZZIE ROGERS, D. C.

Raise Rabbits to Increase the Meat Supply

Rabbits, which have proved a valuable source of food in Europe during the present war, may well be raised more extensively in America by way of reducing the strain on the ordinary meat supply, according to biologists of the United States Department of Agriculture. The business of growing rabbits, the specialists point out, can be carried on by youths and adults not engaged in military or other national service, or in regular industrial employment.

The animals may be raised in back yards of cities and towns as well as on farms.

The Belgian hare, says a statement by the United States Department of Agriculture, breeds rapidly, matures quickly, and produces a palatable and highly nutritious meat. The cost of production is less than that of any other meat, not excepting poultry. The supply can be greatly increased within a few months, without requiring much space, and a cost of about five cents per pound.

Practical experience has demonstrated that rabbit meat can be produced in unlimited quantities at a cost of about five cents per pound, and by utilizing lawn cuttings and other vegetable waste that would otherwise be wasted the cost can be made even lower.

The Belgian and Flemish giant rabbits are recommended for meat production, as the ordinary tame rabbit is smaller and develops more slowly. Stock of Belgian hares may be bought from breeders in nearly all the States at \$1 to \$3 each. They may occasionally be had from pet stock dealers.

Fancy pedigreed stock is not required for meat production. Rabbits are easily kept. They eat hay, grass, lawn cuttings and green vegetation of many kinds. Females should be allowed to breed when eight or ten months old, and during the year should raise four litters of about six or eight each. Well fed, the young reach marketable size when three to four months old and average from five to six pounds live weight.

If you voted for Woodrow Wilson, you are entitled to vote at the coming primary election which will be Democratic as the Republicans did not have candidates for the different offices. A person to be entitled to vote must have voted for or supported the Woodrow Wilson electors at the last regular election, those who voted for or supported the Hughes electors are not entitled to an old fashioned Democratic primary. The law on this subject is as follows:

Sec. Fifteen hundred and fifty, Sub. Sec. 19, of the Election Law provides that "Before a person shall be qualified to vote in the primary election, he shall possess all of the qualifications now prescribed by the constitution and as are now required of voters in the regular election."

He shall, in addition to said qualifications be a member of the party for whose nominees he intends to cast his vote, and shall have affiliated with the party in whose primary he seeks to vote if he cast his vote against the nominee or nominees of such party."

Said qualifications of the primary, without respect to the qualifications or disqualifications as they may exist in succeeding regular elections."

Next Monday is county court day, and the Monday following circuit court will convene for two weeks' term if the business requires it.

Renewing the subscription to the Recorder, Prof. J. H. Cray, principal of Eighth District School, Covington, writes: "It has come regularly to my parents and me for over 10 years and I would feel lost without it."

DROWNED IN THE OHIO

Howard Morehead, Brother of Mrs. F. L. Peddicord, Skiff Overturns in the River.

Louisville, Ky., July 29.—Howard Morehead, 32 years old, a guard at the Jefferson county jail, and a brother-in-law of F. L. Peddicord, Superintendent of the Central State Hospital for the Insane, at Lakeland, was drowned in the river here today when the skiff in which he and his fiancée, Miss Edna Boone, were riding upset. Miss Boone struggled thru the water for 20 feet to the shore. Morehead's body was recovered shortly after the drowning by life savers. The couple were members of a picnic party, and had gone out in the skiff to take kodak pictures. It was when they attempted to stand up in the skiff to take a picture that it tipped upset. The accident occurred just opposite Gibson's lane.

Mr. Morehead visited Dr. and Mrs. Peddicord while they lived in Burlington and became acquainted with many of the citizens.

Red Cross News.

The Walton Branch of the Red Cross will give a "Garden Party" Saturday, August 11th, for the purpose of raising funds to buy the material for the making of hospital supplies. We ask you to be one of the many who will attend and by your help and presence aid us in this most worthy cause. If you have not become a member of the Walton Red Cross be sure to see the membership committee, Mrs. Edith Baker, Mrs. Fannie Bedinger and Miss Jane Hance, and let your membership do its "bit."

The committee in charge hopes to make this one of the biggest and most successful affairs ever given in Walton. Don't forget the date, Saturday, August 11, at the school yard, where there will be plenty of entertainment for both old and young.

Headquarters open as last week on Wednesday and Thursday. All auxiliaries not having work are urged to come for it.

Walton has organized a branch rather than an auxiliary; the only difference is as to degrees of independence—an auxiliary working altogether through the chapters.

The Covington Surgical Dressing Department has given next Wednesday to the Boone county chapter. Each representative will be instructed in different kind of bandage or dressing, and the auxiliary under their direction will make that article.

Union is really working; their rooms are furnished with sewing machines, and on their last regular meeting, Wednesday, they made about 35 hospital shirts.

Once again will each Auxiliary appoint some one or request our secretary to report, either written or by phone, all items of interest to Mrs. G. W. Tolin, Burlington. Every one will be interested in this week's Collier's "Using and Misusing the Red Cross."

All scraps of white material can be used—the small ones and the pillow fillings; the larger, for napkins, tray cloths, etc.—so please save them.

Kentucky Crop News.

In Fleming county wheat is yielding 10 to 15 bushels to the acre, quality good.

Bourbon county will have a bumper corn crop.

In Fayette county potatoes are selling for \$1.30 a bushel. Corn and tobacco are growing nicely.

Recent rains saved the crops in Nelson county.

Barren county land has been washed badly by recent heavy rains that followed a dry period.

Jesseamine county has the best crop of wheat produced in 10 years. Rice also very fine.

Rains the past two weeks did an abundance of good in Hardin county, where it has been quite dry.

Nicholas county wheat yield is from 30 to 35 bushels per acre.

Trigg county got rains just at the right time, and prospects indicate the greatest crop of corn ever produced in that county.

In Calloway county corn is late but growing nicely.

Marion county crops look fine, corn and tobacco being extra good with the largest potato crop in the history of the county.

Letcher county has its largest potato and corn crops.

Corn never looked better in Woodford county.

Orchard Information

GOOD GRAFTING WAX

1. The most common formula is: Resin, 4 parts by weight; beeswax, 2 parts; tallow, 1 part. Melt together and pour into a pail of cold water. Then grease the hands and pull the wax until it is nearly white.

2. For use in cold weather, when the above will not work, take 6 pounds resin, 1 pound beeswax and 1 pint lard or oil. Apply this hot all over the joints with a brush. It should be put on one-eighth of an inch thick.

3. For use in warm weather the following is used: Four parts of resin, 1 pound of beeswax and from half a pint to a pint of raw linseed oil. Melt all together, gradually turn it into cold water and pull. The linseed oil should be entirely free from cottonseed oil.

TO MAKE BORDEAUX MIXTURE

Copper Sulphate, Quicklime and Water Are Necessary Ingredients—Mix and Apply at Once.

The necessary ingredients for making bordeaux mixture are: Copper sulphate, 4 pounds; quicklime, 4 pounds; water to make 50 gallons.

Prepare the copper sulphate by suspending it in a gunny sack just below the surface of several gallons of water in a clean barrel. When the sulphate is dissolved, which requires three or four hours, remove the sack and stir into the barrel enough additional water to make exactly 25 gallons of the copper solution.

Prepare the lime by slacking it slowly and thoroughly in a clean barrel, strain, and add enough additional water to make exactly 25 gallons of lime milk. Stir thoroughly.

Pour the two ingredients together into another barrel, or better, directly into the spray tank. If it will hold 50 gallons. It is highly important to stir the mixture very thoroughly and to strain both ingredients before they are combined, as otherwise clogging of the spray nozzles might result. Use a copper or bronze wire strainer of 18 meshes to the inch. Do not put copper sulphate or bordeaux mixture into tin or iron vessels; use only wood or copper containers. Mix the bordeaux as needed and apply at once. It is never as good after it has settled.

Various Methods Used in Great Apple Orchards of Washington to Protect Branches.

Out in the great apple orchards of Washington various methods are used for propping up the heavily laden trees. The one shown is known as the center pole and wire prop. When following this plan, screw-eyes are placed in the main limbs, and to these are

attached long strands of wire. At the end of each strand is a loop, which is placed over a nail driven in the end of a pole. This pole is raised to a position nearly parallel with the trunk of the tree and then firmly set in the ground. This has the effect of drawing the wires tight, holding the tree in shape and keeping the laden limbs from breaking under the strain.

HONEY BEES ARE NECESSITY

They Are Greatest Factor in Distribution of Pollen Among Fruits and Berries.

An abundance of honey bees is a safeguard to horticulture. They are the greatest factor in the distribution of pollen among fruits and berries of a few other insects—bees, but if all honey bees were removed during fruit blossom season, it is safe to say that there would be not enough fruit or berries produced to pay for the gathering of the crop.

MRS. SUSAN UTZ

Celebrates Her Eighty-Sixth Birthday — Many Friends and Relatives Present.

Friends and relatives to the number of 92 met at the home of Mrs. Susan Utz near Union, a few days since to assist in the celebration of her 86th birthday.
At the noon hour a bountiful dinner was spread on the lawn and ended to those present, and it was enjoyed by all.
Those present felt it an honor to have the opportunity to wish "Aunt Susie," who has lived such a noble and good life, and all feel thankful and very grateful to her for her long life with Mrs. Utz.
After the noon hour Bro. Royer gave a very beautiful talk, in which he expressed the wish of each one present that "Aunt Susie" may spend other pleasant days as this one.
All joined in singing "Nearer My God to Thee," "Best Be the Tie That Binds," and other appropriate hymns. The singing was led by Mr. Ezra Tanner, and the piano was also features of the day.
"Aunt Susie" was the recipient of some useful presents.
Those present were James Houston, wife and two sons; Leslie Stephenson and wife, Mrs. Jas. Head and daughter, Mrs. Sallie Adams, Stanley Utz and wife, Mrs. J. M. Jack, Miss Edith Macrauder, Mrs. Emma Conner and son, Worth, Mrs. Alice Utz, Mrs. Ida Myers and son, Rafe, Ezra Garnett, wife and son, David Houston and wife, Stephen Houston, Miss Ollie Smith and brother, Kirby, Waite Cross and wife, Walter Wolfe and wife, J. T. Stephenson and wife, Mrs. E. G. and wife, Mrs. Sid Ambrose, Mrs. Lillie Utz, Misses Hettie and Lillie Rouse, Lonnie Utz, Mrs. Laura Head, Mrs. Nannie Stephenson and two sons, Misses Mary Utz, Pearl Stephenson, Bessie Craven, Dinkie and Addie Lee Tanner, Helen and Marie Stephenson, Ethel Patterson, Elizabeth Purney, Anna Mae Bristow, Alpha Hance, Ola Marksberry, Mrs. Robt. Robinson and son, Leslie Macrauder, wife and four sons, Miss Sallie Allen, Robert Allen, Mosby Allen, J. Seebree and wife, Ira Aylor, wife and two children, Mrs. Joe Cleek, Mrs. Jennie Osman, N. H. Clements, wife and sons, Mrs. Edith Macrauder, Ella, Sarah and Elizabeth Weaver, Rose Adams, Misses Ella, Kathryn and Virginia Utz, Layton Allen, Guelsh, Henry and wife, Stephen, Robert Stephenson, Rafe Myers, Lewis Beeson, Charles White.
At a late hour each departed for home.

DEVON.
James Bristow has sold quite a few pigs and still has more for sale.
Miss Virginia Norman had for her guest, Mrs. Nina Pope, of Covington, last week.
The little daughter of Mr. and Mrs. Geo. Coyle who was accidentally shot, is recovering slowly.
Misses Lillian and Susan Katharine Bristow, Sunday with their cousins, Mrs. C. E. Miller and Jas. Eristow.
Messrs. N. S. Bristow, of Union, and J. E. Bristow, of Walton, were guests of Benj. Bristow and family Sunday.
Miss Mary Elizabeth Childress, of Erlanger, came out last Saturday evening and remained until Sunday morning, guest of her parents, Mr. and Mrs. Ben Norman.
Death has called home our dear friend and neighbor, Mrs. Sarah A. Rector, aged 67 years on July 30th, at the home of her daughter, Mrs. Ben Cluttschuck, of Kensington, where she had gone on a visit several weeks ago, and while there was stricken with paralysis. She had been ailing for many years to come. The funeral services were conducted by Bro. Bedinger at the Mt. Zion church Sunday afternoon which the remains were taken to the Independence cemetery and laid by the side of her husband, who departed this life several years ago. Mrs. Rector leaves one son, Clarence, and two daughters, Mrs. Benjamin Cleek, of Kensington, and Mrs. C. D. Carpenter, and five grandchildren and many friends to mourn her death.

A Delightful Birthday.
Relatives to the number of about 30 gathered at the home of Mrs. Samuel Shinkle, in Petersburg, July 29th, to help her celebrate her 71st birthday. All took well filled baskets and the noon hour dinner was served under the shade trees. She received several nice presents.
Those present from a distance were Bolivar Shinkle and wife, of Flickertown; Roy Ryle, wife and son, Ivin, of Rabbit Hash; Boone Ryle, wife and two sons, Reginald and Irvin, of Woolper; Fritz Shinkle, wife and three children, and Leslie Shinkle, of Constance; John's sister, Mrs. Chas. Maurer, of the latter part of last week, returning home last Sunday.
Logan Gaines, wife and son and his sister, Miss Ella, all of Carrollton, left home last Sunday morning in a machine, made one visit in Indiana and live in this county, and returned here that night.
Some who have been digging their potatoes pronounce the yield poor, and the potatoes small.

PERSONAL MENTION.
Mr. and Mrs. O. N. Scott were Sunday guests at Chas. Maurer's.
Mrs. F. P. Walton, of Covington, is the guest of her sister, Mrs. Eliza Rouse.
W. R. Davinville, of Newport, spent Sunday with his wife and son in Burlington.
W. E. Rice, of Grant, was transacting business in Burlington Wednesday morning.
Mrs. M. L. Riddell spent last week with W. T. Riddell and wife in Dayton, Ohio.
W. L. Kirkpatrick and wife entertained about thirty of their friends and relatives at dinner, last Sunday.
Mr. J. W. Kelly and wife and Howard Kelly and wife spent last Sunday with Mr. and Mrs. Henry Dixon at Richmond.
John O. Richards and wife and a gentleman friend and wife of Covington, were in Burlington a short time Monday evening.
Mr. and Mrs. Newton Sullivan, Jr., spent Sunday with his father, Newton Sullivan, Sr., and wife, out of the Petersburg place.
Prof. J. A. Crawford and wife returned home Tuesday evening from a visit of several days with relatives in Mason county.
Mr. Corde and Miss Nell Trotter, of Newport, and Mr. William Bookers, of Hyde Park, Ohio, were guests of Mr. and Mrs. F. A. Hall, last Wednesday evening.
Mr. and Mrs. Frank Riley after a tour of several days in Illinois and Indiana, were guests of Mrs. Riley's sister, Mrs. Chas. Maurer, the latter part of last week, returning home last Sunday.

UNION.
Mrs. Anna Lassing who has been sick the past week is better.
Jake Youell and wife were Sunday guests at W. J. Atterkirk's.
Mr. and Mrs. James Head and daughter spent Sunday at Joseph Wilson's.
H. Sleevy, wife and children, of Cranston, Ohio, were guests of Mrs. Emma Judge, last week.
J. W. Atterkirk and wife gave the young people a delightful party last Saturday night.
Misses Marietta Love and Allene Clements attended the picnic at Harvest Home Saturday afternoon.
Misses Sue and Martha Emily Ristow spent the night with their uncle, Mr. Frazier, one night the past week.
Harry Atterkirk, who enlisted in the army recently, has been honorably discharged, because of weak ankles and bad feet.
Kirb Crisler gave a party for his son Saturday night. A great number of the young folks attended and had a fine time.
Union ball team won another game Saturday at Verona, making eight games out of ten they have won this season. Score 13 to 3.
Next Saturday being election day the Ladies Society of Union Presbyterian church will serve lunch and the ball team will have one game if not too the same day.

BELLEVUE.
Dr. Richmond has a two passenger Ford.
Blackberries are plentiful and quality the best.
Dr. J. A. Richmond, wife and daughter spent Monday in the city.
Robert Crisler and Miss Allene Clore spent last Tuesday in Covington.
Geo. Buchner, of Newport, is spending his vacation here with relatives.
Mr. and Mrs. A. S. Burcham and Mrs. Maurer spent Sunday with J. J. Maurer.
Mr. and Mrs. T. H. Sandford spent last Sunday with relatives in Covington.
Robt. Ryle is taking his vacation and Orville Rice is delivering the mail for him.
G. W. Sandford and wife and Linnie Love and family spent Sunday with Mrs. Belle Crisler.
Misses Beulah and Fannie Smith are guests of their grand parents, Mr. and Mrs. C. S. Smith.
Mrs. H. B. Gust and son, Seeborn, are the guest of her brother, J. H. Walton, near Rabbit Hash.
Mr. and Mrs. Lewis Stephens and son, and Mr. and Mrs. J. G. Smith and son, spent Sunday at J. W. Ryle's.

Mrs. Charles Sandford and children, of Lawrenceburg, spent last week with their parents, Jas. Smith and wife.
Mrs. Harriet Walton and daughter, Mrs. Frances Fish, spent last Friday with Mrs. Loulah Walton, of Walton Heights.
After a visit here of several weeks, with relatives, Rev. Geo. Smith and wife returned to their home in Georgetown.
Miss Cynthia Kelly's sale was well attended and everything sold at good prices. Josiah Rice purchased the house and lot.
After an extended visit with her daughter, Mrs. Weeden Williamson in Ashland, Kansas, Mrs. B. F. Rogers home, returned home.
Mrs. Nannie Maurer entertained at dinner, Thursday, Messdames W. Green, Laura Botts, Ben Scott, G. Kite and daughter, J. Q. Stephens, John Rogers, James G. Smith and J. J. Maurer.

James Gaines and wife, Stephen Gaines and wife, Elijah Grant and wife, E. A. Strickland and wife, Judge Sidney Gaines spent last Sunday at Big Bone Springs.

OFFICIAL LIST

Of Young Men Who Will Be Called Before the Exemption Board.

Boone County Will Be Required to Furnish 69 Men.

If this list is exhausted others will be called.

FIRST CALL.

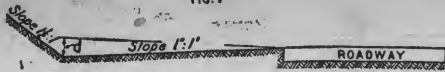

- 238 Lewis Hodges, Burlington.
- 373 John Murre, Addyston, O.
- 488 Stanley C. Ryle, Grant.
- 600 Dan Slayback, Union.
- 507 Dalton Rice, Burlington.
- 328 Calvin Jordan, Petersburg.
- 437 Cecil G. Presser, Union.
- 604 Garnett Tolin, Burlington.
- 439 W. R. Bradford, Florence.
- 450 Eliza M. Poston, Florence.
- 514 Coral G. Reed, Richmond.
- 433 Joel Peno, Florence.
- 10 Henry L. Aylor, Burlington.
- 487 Hug Ryle, Grant.
- 140 Jas. M. Code, Walton.
- 432 Chas. A. Peno, Constance.
- 18 Wm. Aydelotte, Florence.
- 652 Wm. A. Waters, Erlanger.
- 600 Myron Smith, Union.
- 606 Chester L. Tanner, Florence.
- 182 Henry S. Dixon, Richmond.
- 203 Robert Crisler, Union.
- 46 Thos. J. Black, Union.
- 223 Harold Gaines, Burlington.
- 117 Edward E. Collins, Burlington.
- 602 Albert M. Stephens, Union.
- 390 David A. Morris, Walton.
- 75 Robert E. Berkshire, Petersburg.
- 280 Howard M. Humphrey, Constance.
- 332 Howard J. Kelly, Burlington.
- 383 Chas. Markesbury, Berkshire.
- 542 Henry W. Siekmann, Burlington.
- 192 Elmer Ernst, Hebron.
- 552 Elmer Snyder, Burlington.
- 298 Strobeard Hoard, Walton.
- 343 Samuel W. Kite, Big Bone.
- 15 Lee Abdon, Burlington.
- 52 Mrs. H. B. Gust and son, Seeborn, are the guest of her brother, J. H. Walton, near Rabbit Hash.
- 530 Chas. P. Williams, Erlanger.
- 218 Elmer Goodridge, Burlington.
- 629 Lreoy Utz, Burlington.
- 574 Henry D. Souther, Burlington.
- 31 John T. Alphin, Berkshire.
- 137 John Steeles, Walton.
- 56 Frank Biddle, No P. O.
- 5 Frank Aylor, Burlington.
- 54 John Baker, Erlanger.
- 541 Elmer Snyder, Burlington.
- 40 Wyatt Powell, Richmond.
- 638 Chas. M. Waller, Verona.
- 623 D. Hess Vett, Verona.
- 337 Arthur W. Kelly, Burlington.
- 193 Gusrich Rich, Union.

SECOND CALL.

- 341 Emmitt Kilgore, Burlington.
- 391 Harry D. Maxfield, Walton.
- 353 Rafe Koons, Grant.
- 637 Boyd Webster, Verona.
- 600 Walter B. Lewis, Constance.
- 571 Robert Strader, Burlington.
- 488 Manley Ryle, Burlington.
- 72 John C. Beeson, Burlington.
- 356 Chas. W. Lassing, Union.
- 117 Edward E. Collins, Burlington.
- 128 Stanley C. Ryle, Grant.
- 11 Joseph Allen, Verona.
- 363 Wm. R. Morris, Erlanger.
- 327 Harry Johnson, Florence.
- 664 Wm. H. Warner, Constance.
- 93 Albert R. Botthoff, Walton.
- 345 Frank R. Klasmann, Constance.
- 103 Chas. M. Carpenter, Florence.
- 566 John Snelling, Petersburg.
- 154 Elmer Cahill, Florence.
- 30 John L. Brooks, Verona.
- 30 James Allen, Verona.
- 199 Jerry Fowler, Burlington.
- 388 Benj. E. McElroy, Walton.
- 604 John A. Turner, Verona.
- 406 John McGuire, Burlington.
- 519 Geo. M. Sparks, Union.
- 25 Henry W. Atterkirk, Union.
- 323 Chas. E. Royer, Constance.
- 588 Emory B. Smith, Burlington.
- 576 Lewis Slayback, Florence.
- 122 Wm. P. Chambers, Landing.
- 612 Herman Wingate, Burlington.
- 222 Robt. E. Grant, Burlington.
- 297 Harmon W. Hearn, Richmond.
- 321 Edgar Jacobs, Verona.
- 368 Thos. E. Masters, Burlington.
- 320 Robert L. Jones, Walton.
- 656 Montgomery P. Williams, Grant.
- 121 Clay Castleman, Florence.
- 221 Jas. Allie Grant, Burlington.
- 282 Elmer Hood, Florence.
- 432 John E. Reeves, Constance.
- 312 Robert Jumper, Petersburg.
- 90 Chester V. Barlow, Hebron.
- 191 Elly Early, Burlington.
- 41 Stanley D. S. Ransome, Burlington.
- 130 Ralph Z. Cason, Petersburg.
- 168 Wm. H. Delph, Grant.
- 448 Chas. W. L. Pepper, Burlington.
- 657 Cecil Williamson, Grant.
- 175 Allen M. Darby, Constance.
- 278 Herbert Humphrey, Constance.
- 324 Roy D. Stamler, Walton.
- 329 Bernard Schuker, Verona.
- 212 Benj. Griffith, Burlington.
- 494 Claud E. Black, Big Bone.
- 30 Kenneth W. Aylor, Union.
- 537 McKinley Snodgrass, Landing.
- 602 Allen P. Uta, Florence.
- 585 John L. Sullivan, Union.
- 493 Jan R. Poston, Petersburg.
- 41 Ernie C. Pigg, Union.

EARTH, SAND-CLAY AND GRAVEL ROADS

SIDE DITCH
FIG. 1

(Prepared by the United States Department of Agriculture.)

Effective drainage usually should be the very first consideration in connection with the location and design of any road. This statement requires no explanation, because the action of water in changing clay into mud and in causing all kinds of soils, except sand, to give way when a load is applied, is familiar to every person living in a humid climate. The following summary supplies a few suggestions as to how water may best be removed from a road bed:

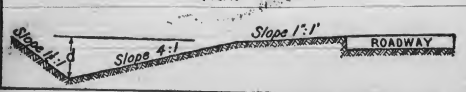

1. The road surface should be crowned so as to shed water off to the side ditches as rapidly as it falls on the road.
2. Wherever the road is in an excavation, suitable side ditches or gutters

section of a road surface depends on two opposed factors:

- (a) It is desirable to get water away from the surface as quickly as practicable, so as to prevent the surface material from being softened by saturation or washed by water collecting in, and flowing along, ruts.
- (b) It is desirable to keep the cross section of the road as flat as is consistent with good drainage, because traffic distributes itself over a flat road surface much better than over one that is heavily crowned, and an even distribution of traffic makes toward uniform wear and comparatively light maintenance. There is also less danger of skidding on a road of flat cross section than where the surface is crowned.

In general, the amount of crown should be greater on grades than on

SIDE DITCH
FIG. 2

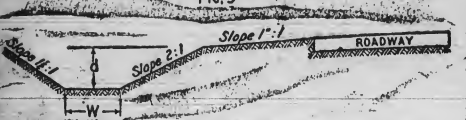

should be provided along the sides so that the water may be conducted to some point where it may be turned off from the road. The accompanying figures show typical cross sections of earth side ditches. The cross section shown in the first figure is suitable for steep grades where the depth of water in the side ditches must be kept low in order to prevent washing of the soil. The second figure shows a modified section which gives a greater capacity for the same width of ditch than the cross section shown in the preceding figure, but which can be employed only on comparatively flat grades if washing is to be prevented. Figure 3 shows

level stretches of road, because the tendency for water to wash away the surface by collecting in and flowing along ruts depends largely upon the steepness of the grade. Also the care with which a road is to be maintained may have an important influence on the amount of crown that should be given to the surface. It is evident that a road surface maintained in a smooth uniform condition will shed water off to the side ditches with much less crown than would be required where ruts are allowed to form.

Instead of crowning the road surface sufficiently to prevent water from flowing along the traveled way and

SIDE DITCH
FIG. 3

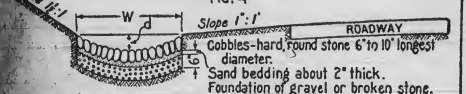

a cross section adapted especially to flat grades where a considerable volume of water must be carried. Ditches in the cross sections shown in figures 2 and 3 have the advantage in that they may be constructed with an ordinary road grader, which is not true of the section shown in figure 3.

3. Where it is impracticable to construct side ditches that will carry the required amount of water without washing, paved gutters should be employed. Suitable cross sections for a cobble gutter are shown in figures 4 and 5. Where it is impracticable to construct gutters, earth side ditches frequently may be kept from washing by the use of breakers.
4. If the material composing the roadbed consists of springy earth, some form of underdrainage is essential. A

causing washes on steep grades, resort is sometimes had to "water breaks," or "thank-you-ma-mans," constructed across the road at short intervals. These water breaks may consist of either broad, shallow ditches or flat ridges constructed at a slight angle with the road so as to turn water from the traveled way into the side ditches. Such devices usually are much more objectionable, especially to automobile traffic, than a rather low crowned road, provided the surface is not constructed of material which becomes very slippery when wet, and they should be dispensed with except in extreme cases.

An exception to the general rules for crowning a road surface perhaps should be noted as applying to cases where the roadbed and surface are of

COBBLE GUTTER
FIG. 4

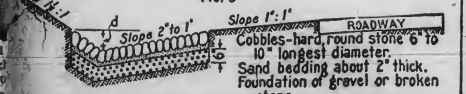

line of farm tile laid to proper grade under each side ditch is, in general, the most satisfactory way of securing adequate underdrainage. Either four-inch or six-inch tile is employed for this purpose.

5. Outlets or bridges should be constructed wherever it is necessary to carry water across the road.
6. Avoid turning water from one in-coming road down the side ditches another. Also avoid draining adjacent fields into the side ditches.

Crown.

The proper crown to give the cross

good "use" of the venen- tion long EFFICIENT FOOD FOR BEES

Higher Yields Obtained by Alternating With Early and Late Maturing Varieties of Crop.

Methods of planting corn by which one or two rows of an early-maturing variety alternate with one or two rows of a late-maturing variety planted alone, according to the annual report of the bureau of plant industry. Where there is likely to be a shortage of moisture during certain periods of growing season, dependence should not be placed in a single variety; under such conditions two or three varieties which differ considerably in length of growing season should be grown.

Take Your County Paper

Week's News

Pastures look green.
Circuit court convenes next Monday.

Born on the 1st inst., to Henry Aylor and wife, a boy.

The new church building at Hopeful will soon be under roof.

John Hogan, of Mt. Zion neighborhood, has become a citizen of Florence.

The election passed very quietly at Burlington, no electioneering being apparent.

Joe Pugh was nominated for assessor last Saturday by the Democrats of Kenton county.

The voters made their drive last Saturday and the candidates retired from the field.

It is to be that home grown watermelons were on the market by this time of the year.

The candidates were a good, clever set of fellows, and it is a pity they could not all win.

Joseph Huey has bought a Maxwell truck of W. L. Kirkpatrick and is now doing all of his own hauling.

Better insure that tobacco of yours against damage by fire. Call on or apply to N. E. McGinnis, Burlington, and get rates.

R. S. Cowan has been remodeling the interior of his residence to some extent. His brother-in-law, B. P. Rice, of Covington, doing the work.

B. B. Hume closed a deal one day last week with M. F. Wingate and sons, of Petersburg, whereby he got two automobiles and some cash for a first passenger latest model Hupmobile.

A good sized crowd attended the sale of John W. Hogan in Mt. Zion neighborhood, on the 1st inst., and good prices prevailed. Sheep brought \$17.50 a head and hogs sold accordingly.

J. T. Stephenson and wife and Lewis Beemon made a trip up to Grant county, on the 1st inst. They report the tobacco in the neighborhood visited the poorest they ever saw at this time of the year.

The Lawrenceburg fair is in progress this week. About Friday and Saturday Boone county people will begin taking in the attractions and doing their part toward making it a success. It is a good place to enjoy yourself.

Mr. Crawford, who lives on Jas. Jones farm on Gunpowder creek, was in Saturday, and informed that he has six acres of the best tobacco in the county, one half of which he had topped at 16 to 18 leaves.

J. C. Wiles, former Lawrenceburg business man, has at the age of seventy-six gone on the chautauque circuit with Colonel Pate's Old Soldier Fiddlers. This made his first appearance with the organization at Erie, Pa.—Lawrenceburg Press.

Everett Hall has two acres of the finest corn in this neighborhood. The last time a horse and plow was in the field was when the land was laid off for planting. He dropped the corn by hand, covered it with a hoe and all the cultivation given it was with a hoe.

The county's draft board, composed of Messrs. Edgar C. Riley of Burlington; A. M. Yealey, of Florence, and Dr. O. E. Senour, of Union, met at the court house in Burlington last Saturday afternoon and organized for work. Those in this county who will have to appear before the board will receive notice this week. The board will meet next Saturday to hear from those who will claim exemptions.

Ellis Roland, who is raising a crop of tobacco on J. W. Higgin's farm, near town, sold his crop to Leo Aversus, a Dry Ridge speculator, last week for 22 cents per pound. Mr. Roland's crop was in the weed growing and in fine condition. Last year Mr. Roland sold his crop at 12 cents per pound to a speculator, and this year he sold on the loose leaf row for 19 cents per pound. It is said that 20 cents per pound has been offered several growers for this year's crop.—Grant County News.

The great ship Vaterland, the biggest vessel in the world which the Hamburg-American Line had in Hoboken when the war was declared in August 1914 and which has remained there ever since, now flies the American flag. It was run up the other day. The vessel has been taken over by the Navy Department, and has been repaired at a cost of \$1,000,000 because of damage done by German agents when the U. S. declared war on Germany. It will likely carry troops to fight against the Germans.

Forty Years Ago Today

Items Taken From the Issue of The Recorder of August 9th, 1877

The Boone county court made 17 citizens of the United States this month.

The personal estate of O. W. Huey will be sold at public sale on the 21st inst.

Three thousand attended the Grange picnic last Saturday in W. Smith's woods. Everybody was fed.

C. V. Rouse defeated Reuben Corner for Representative at the general election last Monday 350 votes, 2,640 being cast for the two candidates.

Florence—Basket meeting at Mt. Zion was attended by a very large crowd. A thief entered the room of Felix Moses at the Southern hotel and stole a pair of pants and a new hat.

Walton—Justus Hudson found three agents of gold pieces near an old chimney on his farm. Passenger trains run daily each way on the Southern road—Geo. Gaines has returned from a trip to Texas.

I. W. W. LEAPER IS HANGED.

Had Referred to United States Troops As Uncle Sam's Scab In Uniform.

Butte, Mont., Aug. 1.—Frank Little, member of the executive board of the Industrial Workers of the World and a leader in labor troubles in Arizona, was taken from a lodging house early today by masked men and hanged to a railroad trestle on the outskirts of the city.

The body was cut down at 8 a. m., by the Chief of Police, Jerry Murphy, who identified it. Little, a recent speech here, referred to United States troops as "Uncle Sam's scabs in uniform."

Since his arrival in Butte recently from Globe, Arizona, Little had made a number of speeches to strikers in all of which he had attacked the government and urged the men to shut down the mines of the Butte district. He was bitter in his denunciation of the government. His record was under investigation by the Federal authorities whose attention had been called to his activities. On the other hand, the report was current that Little was in the company of a detective agency and one theory was that he was the victim of the radical element of whom he appeared to be a member.

Little took a leading part in recent labor trouble in Arizona. He addressed a letter to Governor Campbell of Arizona, protesting against the deportation of I. W. W. members from Globe. This letter was written from Salt Lake. Gov. Campbell replied, telling Little he resented his interference and his threats. Little was understood to have the confidence of William D. Haywood, Secretary of the I. W. W. National Organization, and was regarded here as one of Haywood's confidential agents.

Little was a cripple, but active and a forceful speaker.

On Little's body was a card bearing the words: "First and last warning. Other take notice. Vigilantes."

Little was taken out of the building in which he lodged by a party of masked men who took him away in an automobile. He was not given time to dress.

Be Canny.

Get that canny impulse.

Make your hoe this summer keep your can opener busy next winter.

Regrets are the only things ever canned in the jars you forgot to order.

Can nothing that can be kept without canning. Dry such vegetables as corn, string beans, navy beans, mature Lima beans, okra, etc.

You can brag about your garden all winter if you have your canned evidence on the dinner table. Concentrate products, especially soup mixtures, so that each container will hold as much canned food and as little water as possible.

Really there is nothing to canning fruits and vegetables, excelsior, care, cleanliness, fresh products, jars and heat.

Home canning is kitchen patriotism. Canned fruits and vegetables help fight the blues.

Let empty cans and jars wait for fruit. Don't try to make fruit wait long for containers.

Home preparedness—cans loaded with food.

VOTE IN THE PRIMARY ELECTION.

75 PER CENT MEN

DRAFTED WILL BE EXEMPT—COLONEL.

In an address before the Joint Lodges of the Knights of Pythias Col. Wm. A. Colston, of the First Regiment, estimated that about four men would have to be examined before one was selected for the new draft army. He said that instead of calling double the quota of 1,500 men for examination nearly twice that number would be called.

"What chance do you think there will be in getting 775 men out of the first 1,500 examined?" Colston asked. Continuing he said: "Why, out of the volunteers who come to us, the men who are willing and anxious to serve their country fully 50 per cent are rejected for physical reasons. And all of those men want to go. Have you any reason to suspect that the men who have been called by the selective draft will show up any better physically?"

REVIVAL OF RIVER TRAFFIC CERTAIN.

Walter Parker, assistant to Secretary Redfield of the U. S. Department of Commerce, accompanied by several assistants, has completed an inspection of the Ohio river from Pittsburg to Cincinnati, and has made a suggestion as to available wharves, piers, ways, docks and floating stock.

Mr. Parker says that the re-establishment of water commerce between the river terminals and storage equipment have appealed to Secretary Redfield, who has begun to seek aid of bankers to finance what may develop into a great revival of river commerce.

Mr. Parker says that the elimination some years ago of water transportation by the railroads, while at the time was beneficial to the railroads, has now so turned the tide that in order to care for the rapid advance of commerce, boats will again become in demand.

Commerce has expanded more rapidly than has railroad equipment, and boats and barges are now needed to relieve the railroads of a great portion of their burden.—Lawrenceburg Press.

Son of Ex-Mayor of Cincinnati.

New York, August 2.—Charles Fleischmann, son of Julius Fleischmann, former Mayor of Cincinnati, was instantly killed today when the hydro-airplane in which he was flying collapsed in the South Bay.

Harry Witz, pilot of the machine, also was killed.

Fleischmann was a member of the First Battalion, Aviation Corps, had left the naval station at Bay Shore, L. I., for a flight with friends, who owned the machine, and gave exhibition flights.

They had risen to a height of about 100 feet when the machine was seen to turn and to fall. Fleischmann was thrown out, falling in shallow water. Witz, who was strapped to his seat, went down with the plane.

Persons on board a power boat witnessed the accident and recovered the bodies. It was said that no one on the machine heard just before the machine dropped.

KAISER'S ADDRESS.

Issues Optimistic, Bombastic Address to His People Predicting Victory.

Copenhagen, August 2.—Emperor William yesterday issued a proclamation to the German people in which he said they might rest assured that German blood and German zeal were not being gambled with for an empty shadow of ambition or for schemes of conquest, but in defense of a strong empire, in which their children might live in security.

"To the German People: Three years of hard fighting are behind us. With grief we remember our dead. With pride our soldiers now fight, with confidence all our workers and with a heavy heart those who are languishing in captivity, but above all our thoughts are turned to the duty of prosecution to prosecute this righteous war of defense to a successful termination."

"The enemy is stretching out his hands toward German territory, but he shall never have it. New nations continue to enter into the war against us. We know our strength and we are determined to make use of it. They wish to see us weak and powerless at their feet, they shall not have it."

"They received disdainfully our words of peace; they did not know how Germany could fight. Throughout the world they have slandered the German name, but they cannot extinguish the glory of German deeds."

"Thus we stand erect at the close of this year unmovable, victorious. Our enemies may still await us, but we shall meet them with a grave mission and full of faith. Throughout the three years of this war the German people has become firm in its resistance against all that the power of the enemy can conceive. If the enemy wishes to prolong this war, they must weigh more heavily upon them than upon us."

"For that which has been accomplished on the front line, we must still continue to fight and to furnish arms for it. But our people may rest assured that German blood and German zeal are not being gambled with for an empty shadow of ambition or schemes of conquest and subjugation, but in defense of a strong empire, in which our children may live in security."

"Let all our actions and all our thought be devoted to this fight. Let this be our solemn promise of this day, August 2, 1917."

"WILLIAM, I. R."

Right You Are.

If the Democrat printed what the tuberculosis commissions sends each week it would be only a medical journal; if it printed what the moonlight school enthusiasts send it would be a school journal; if it printed what the road commission sends it would be a handy companion on road building; if it printed what the agriculture experiment station sends it would be an agricultural journal and so on ad infinitum. Being merely a country newspaper it has no space for the expiation of other peoples' schemes, and consigns them to the waste basket. As we see very little of the star in our exchange, they are probably following the same course. Some day, maybe, folks who are paid to write the "tumble" to the readers that their efforts are appreciated.

—Cynthiana Democrat.

A Strange Phenomenon.

Several of our people who have lived or traveled thru the Western States, and who have seen a large number of people attracted to an interesting extent, and their recitals of this peculiar phenomenon have been listened to with a deep interest. Monday and Tuesday evenings of this week the people of this vicinity were afforded a sight of this phenomenon which appeared in the southeastern skies. Towns were plainly visible, the outlines of buildings being plainly marked. The noise was like a hurra, a score of people—Mr. Oliver Tribune-Democrat.

THE MOST VALUABLE COME FROM THE U. S.

It is pointed out that nine of the most important and valuable weapons of war that are being used in Europe came from the U. S. There are many more, but the remarkable fact stands out prominently that the nine chief instruments for the conduct of the present big war are being said to bear the imprint, "Made in America."

The nine weapons, named are the Lewis machine gun, the aeroplane, the tank tractor, the gas head for the heavy mortars, the depression range finder, the telephone for fire control and the field telephone.

Nearly all of the artillery fire in the big war is controlled and directed by telephone from observing stations and the telephone is the medium for the general direction of the armies. How these inventions were born in America is well known.

"But the public does not know that another American, Simon Lakem took a page from Jules Verne's 'Twenty Thousand Leagues Under the Sea' and realized it into a submarine craft that would go under water and become a powerful weapon. Many of the submarines now used by some of the nations are made in the United States. Before the U. S. entered the war it was decided that it would be a violation of neutrality to turn out complete craft, and accordingly, the manufacturers in this country made the unassembled parts and shipped them to Europe, where they were assembled and taken across the sea."

The Wright brothers, of Dayton, made practical the development of the aeroplane. It is the most powerful agency for obtaining information of the enemy, and it is used to locate hostile batteries so that the guns might be aimed. It has become the "eyes" of the armies.

An old-fashioned choke bore musket kicked out of Maxim out of a ducking boat over in New Jersey year ago, and thereby brought to life the machine gun. Napoleon's army was equipped with a medicine gun of the pepper box style, but it never reached any finished stage. When the gun kicked Maxim out of the boat, it began studying how the recoil could be used to work a gun and he evolved the scheme of boring a little hole in the barrel and making the escaping gas from the first shot throw out the old shell, reload the gun and fire it. Thus came to life the machine gun.

The machine gun's young brother, which uses the same general principle, is the Lewis gun, the invention of Colonel Lewis, of the U. S. Army. It is a much lighter gun than the Maxim, and is being extensively used for aeroplanes and for trench fighting. It is a much more mobile and easier to carry. For position fire the army folk prefer the heavier gun, but the Lewis is said to be one of the chief weapons of the western front.

Colonel Lewis also invented the depression range finder, used on battle ships and for coast and other fortifications. It ranks at the top of its species and has played a great, although little known part in the war.

The famous "tank tractor"—armored machines carrying machine guns—were not only made in this country, but the original idea is reported to have been suggested by a Western inventor.

This type of fighting machine is merely a large farm tractor with an extra long caterpillar gear that enables it to go over rough country and cross trenches and ditches. It protects the occupants from fire and machine guns.

After the artillery has cleared the front of hostile big guns, the fus head for the high explosive shells is the big forty-two centimeter guns was so invented in this country.

Another development, rather than an invention, is the Whitehead torpedo. While it was invented in England and developed in France, Austria, the chief manufacturer is an American concern.

Wiring for Electric Lights

Many residences in Florence are wired and ready to connect up for the electric lights. The supply wires go through the town on the Lexington pike to Shelby at the turn of the turnpike and Florence pike.

KENTUCKY CROPS GOOD.

Weather During Past Week Has Been Generally Favorable.

The summary of weather in Kentucky for the week ending July 31 follows:

Showers the first half of the week were more or less general over the State and greatly helped out all growing crops, although interfering in some localities with oats harvesting, haying and threshing. The latter part of the week was hot and dry and more rain will be needed soon.

Reports of condition of growing crops this week generally have a decidedly favorable tone. Corn is growing nicely and in many places a good improvement in nearly all crops, either growing or being harvested. Wheat is being threshed and is of good quality. Corn is growing nicely and in many places a good improvement in nearly all crops, either growing or being harvested. Wheat is being threshed and is of good quality.

There are many more good rains in the next two weeks will assure a large crop. Pastures are much improved. Alfalfa, a second crop of clover, sorghum beans and grapes are reported good. Sweet potatoes and tobacco are small, but growing nicely. The early potato crop is good and conditions are favorable for the second crop. The truck is now plentiful and of excellent quality.

To The Drafted.

To you fortunate ones who are about to go forward to that long line where the armies of autocracy and oppression are facing the armies of the free, congratulations and Godspeed!

In imagination you are the victims of misfortune or a fatal chance, but rather as our chosen ones; the pick and flower of our manhood, whose body is sound in mind and spirit—all that of us should like to be. And we who are too old or too weak, or in some other respect unfortunates in body, shall go with you in spirit. We know that we ask much of you, and we expect much, we expect things to happen with our great traditions—things born of the spirit of Nathan Hale; but we know that we shall not be disappointed.

We shall be there with you on the firing line, and at home we shall do all that we can to make our contribution to the effort. We pray that you may return in safety, but even more fervently we shall pray that our courage may be the cause of your determination be dulled.

You are to fight in the noblest cause in which man ever took up arms, for the sake of a nation as generous in all the world to her soldier sons. You go with her blessing, for she trusts you, and she will hold your names in honor and grateful memory until the end of time—Youth's Companion.

What Big Bone Taxpayers Think

To the Judge of the Boone County Circuit and the Justices of the Boone County Court: The taxpayers of the Big Bone, Rabbit Hash and Union precincts think that the county seat road to Gallatin county should be built from Union and Big Bone Springs. It is 14 miles from Florence to the Gallatin county line. From Big Bone Springs to the Gallatin county line is two miles through lands of Slater, Turner Taylor and Hartman to the Fish Trap. On this route the back water or road never be in the way, and Boone county would have no bridges to build until the Gallatin county line is reached. This is the route over which all the railroad surveys have been made. Gallatin county has a road that comes to the Fish Trap.

Now we do not mean the people in the Beaver neighborhood for wanting the county seat road to come their way; nor do we blame the people in the Verona precinct for wanting the road to come through that precinct, but I think Big Bone is entitled to something, and I ask the court to give the people of the Big Bone a hearing and impartial verdict in this matter.

W. W. GRIMSLEY.

A Would-be Dead Head

If permitted—the Cincinnati Speedway would be a first-class dead beat advertiser. Every week there is received at this office an installment of its plate matter for being assigned to the heap. The Speedway people will continue this game so long as the country papers encourage it by using its plate matter. The Speedway is able to pay for its advertising and will have to pay for what space is used in this paper week after week.

Lewis R. Terrill Dead

Lewis R. Terrill, son of the late Robert Terrill, died at his home near Lawrenceburg, Ky., early on Wednesday morning, having been in feeble health for several years. He is survived by his wife, four sons, Robert, Wymond, Elmer and John, and one daughter, Nellie. The funeral was held at the residence of the late Mrs. Terrill, at 9 a. m. last Friday. Interment at Petersburg.

Woodford county meadows of about three-fourths of a mile of corn and tobacco are being harvested.

WALTON DEPARTMENT.

D. B. WALLACE, Manager.

Hand your news items to Mr. D. B. Wallace at the Walton Equitable Bank and Trust Co. building. He is also authorized to receive subscriptions and collect other accounts.

Miss Susie Bedinger of Atlanta, Ga., is here on a visit to relatives.

John W. Conley of Beaver Lick, spent Saturday with his many friends here.

Mr. and Mrs. A. Records Johnson left Monday for Greenfield, Ind., to spend a week with friends and relatives.

Mr. and Mrs. Robt. Fields and little son Robert of Ludlow, spent Saturday and Sunday here with relatives.

Mrs. M. E. Hance is spending the week at her home at Big Bone Springs where she has so many friends.

J. Waite Cross of near Union, spent Tuesday here visiting his mother Mrs. Jas. Cross, who is slightly improved in health.

Misses Mary Price and Catherine Miller of Anderson, Ind., spent the past week here the guests of Mr. and Mrs. J. C. Miller and family.

Mrs. Carrie Stephens-Durr left Monday for Springfield, Ill., after an enjoyable visit to her parents Mr. and Mrs. Robt. Stephens near town.

Mr. and Mrs. Thos. Watson and children of Covington, spent the past week with their parents James Watson and wife on the farm near town.

Mrs. D. M. Bagby returned the first of the week from a two week's visit with her daughter, Mrs. Mable Atwood, at Albuquerque, New Mexico.

McClure Chapter, Royal Arch Masons will have work in the most excellent Master and Royal Arch degrees Friday night, August 17, being the regular meeting.

Dr. J. W. Stapleton who is in dental business at Youngstown, Ohio, arrived here last week to enjoy a visit on the farm to his mother Mrs. Anna C. Stapleton.

Mrs. Leola Remick, Miss Sadie Toney and Miss Lula Bollington of Cincinnati, were the guests of Mr. and Mrs. N. T. Welsh and James Bollington and family Sunday.

Mrs. Chas. T. Best and two little sons Richard and Charles of Paris, Bourbon county, arrived at this place last week on a visit to their parents Mr. and Mrs. Henry C. Diers.

Carroll Dugan of Newport, was a visitor here Saturday. He had been looking at the "White Haven" farm near Union with a view to purchasing it from its owner, Chas. G. Abernathy.

Mr. and Mrs. Darrell Joyce of Hamilton, Ohio, spent part of last week here guests of their relatives Mr. and Mrs. John C. Bedinger, enroute home from Mammoth Cave, motoring through.

Mrs. B. K. Sleet who is undergoing treatment in a Cincinnati hospital for an internal trouble is not improving very much, but her condition is not serious, and she expects to come home shortly.

Walton Lodge, F. & A. M., conferred the fellowcraft degree on A. Records Johnson at a regular meeting last Friday night. There will be work every regular meeting, the first Friday night in the month.

Dr. and Mrs. B. W. Stallard and little daughter of Toledo, O., arrived here last week on a visit to her parents Judge and Mrs. Thos. F. Carley, and will spend part of the time with relatives at Sparta and in Owen county.

Bruce Wallace entertained about fifty of his young friends at an opera house Tuesday evening with a social dance in honor of Miss Emily May Arnold of Bardstown, who returned home Friday after a pleasant visit here the guest of Misses Isabel and Mariah Brook.

Refreshments were served and a most enjoyable evening was spent by the young people.

Last Friday a party of young folks enjoyed a delightful day ride and outing to Hamilton on the Ohio river where the day was spent in motor boat riding, bathing in the river, fishing, and the enjoyment of a good dinner.

It was nearly midnight before the party returned home having a fine drive in the moonlight. The party was chaperoned by Mr. and Mrs. Chas. S. Boles.

Roscoe Cripe of Rockfield, Ind., field man of the Swine World of Chicago, a magazine published in the interest of successful hog raising, was here last Friday looking at hogs that are going to prize hog sale Sept. 29th.

The entering hogs in the sale are Harry D. Mayhugh, Thos. Powers, Jan. Demosville. He inspected Mr. Mayhugh's herd and stated they are as fine as there is in the west.

John E. Williams left Saturday for Kansas City and Chicago to look over some herds of Hereford cattle expecting to purchase quite a number to feed through the winter. They are the white faced cattle and are the best feeders and the highest bred on the farm. Mr. Williams bought a lot of a couple of years ago at Kansas City and states that he about doubled his money on them at selling time.

J. P. Tocher, of Lexington, Div. Freight Agent of the Q. & C. Railway, was the first of the week arranging to make the necessary changes in the railroad tracks at the Walton Loose Leaf Tobacco Warehouse so as to improve the shipping facilities. The warehouse company has arranged to build a shipping shed alongside of the tracks and the tracks

had to be moved and grading done to accommodate the addition to the building.

James J. Smith of Sugar Creek, Kansas, spent Monday at this place guest of his cousin, John C. Miller and family. Mr. Smith is an expert on the growing of alfalfa and has the finest field of this wonderful plant in this part of Kentucky, as it is not only vigorous and yields enormously, but it has a uniform growth of about four feet. Mr. Smith advocates very deep plowing in preparing for the crop and sowing of the seed in April.

His easy method of growing the second time that a drag harrow should be run all over the field at this disposal of the crab grass which smother out many a fine young field of alfalfa. Where the land is sour an application of pulverized lime stone is necessary to produce a good alfalfa crop.

Mrs. Jas. Smith is visiting her children in Lawrenceburg, Ind. Dr. John C. Rogers, of Louisville, is visiting his parents here.

Hubert Parsons of Cincinnati, C. A. Berkshire and wife and G. T. Rue and wife Sunday at Chas. Rue's.

Mrs. J. E. McAttee and children, of Chicago, are visiting at C. E. McNeely's.

Mrs. Helen Weindel, of Covington, is visiting her aunt, Mrs. H. E. Arnold.

Mrs. E. M. Bouton was the guest of Mrs. Nat Rogers the latter part of last week.

G. S. Walrath, of Pleasant Plains, Ohio, was a visitor here one day last week.

Mrs. Bertha Baker has been the guest of her brother, Rev. C. E. Geo. Baker, for several days.

Geo. Baker and wife, of Chicago, are guests of her parents, Mr. and Mrs. Robert Brasher.

Mr. and Mrs. J. J. Maurer and Sunday at Starline, Ohio.

The Red Cross here sold ice cream last Saturday and cleared \$15 for the Red Cross organization.

VERONA.

Large crowds have been attending the tent meetings.

Late Stephenson has purchased a Bush auto and is learning to operate his machine.

Mr. and Mrs. Irvin Conrad and son, Powers, of Dry Ridge, were guests of Mrs. Belle Powers, last Sunday.

Mr. and Mrs. Earl Conrad and son, of Dry Ridge, were visiting Mr. and Mrs. Joseph Florence, last Sunday.

A revival meeting will begin at New Bethel church on the 13th inst. Good music and splendid sermons.

The tent revival meetings here are being well attended and great interests are manifested.

Rev. Wilson who is doing the preaching is related to President Wilson. Bro. Wilson is a great gospel expounder.

R. D. No. 3.

Blackberries are about gone.

A fine rain fell in this community Monday.

Harry Kilgour called on his son, Emmet, Sunday.

Mr. and Mrs. Wm. Houze and daughter, of Ludlow, here with sister, Mrs. J. S. Eggleston and family Monday.

Mr. and Mrs. John York and son, Willie, of Gumpsville, here with daughter, of their daughter Mrs. Wm. Kruse. Miss Julia accompanied them home.

Mr. and Mrs. F. F. Eggleston, Mr. Fred Reimann and Miss Lucy Eggleston dined with Mr. and Mrs. Walter Swaney and family near Bellevue, Sunday.

Mr. and Mrs. Henry Quick and daughter have returned to their home in Hebron after a few months' stay in Ludlow, and are entertaining several young folks from the city.

RABBIT HASH.

John Loudon has very sick child.

All Wingers of Connersville, Indiana, spent Sunday here.

Paul Bailey of Rising Sun, was here last Sunday renewing old acquaintances.

The Red Cross Lodges served lunch here on election day and net about \$25.

Dr. Carlyle and R. M. Wilson attended Music Lodge at Big Bone, Saturday night.

Mrs. Minnie Miller, of Gallatin county, is visiting her parents, Mr. and Mrs. R. T. Stephens.

Charlie Bodie, Sr., of Marion Scott, Hugh Stephens and Chas. Wilson, went to Cincinnati Sunday, to see the ball game.

Mrs. Jennie Biggs, of Birmingham, Ala., arrived here Sunday to spend several weeks with her parents Mr. and Mrs. S. N. Riggs, who her home in their auto.

A Substantial Endorsement

In the result of the primary election last Saturday is to be a substantial endorsement of the past record of the county officials. Beginning with the county judge, Judge Cason was nominated for a fifth term by a handsome majority over his opponent, R. B. Huey, than whom there is not a cleaner nor more gentleman in the county.

W. R. Rogers for county clerk won a decisive victory over his opponent, W. F. Bradford, a splendid gentleman—a man against whom no charge can be said. To accomplish this Mr. Rogers had to overcome conditions that never before confronted a candidate for which office.

The third term, which has been so fatal to the aspirations of candidates in the past.

Four of the justices of the R. H. Tanner, were given their certificates of nomination without opposition, while N. C. Tanner and John C. Bedinger, the two good margins. It looks like a majority of the people are satisfied with their officials.

Commencement Exercises

The commencement exercises for the common school grad class were held in the school building in Burlington, Tuesday afternoon.

Pro. J. C. Gorton delivered the address which was very practical and contained some splendid thoughts for the young people who are just finishing the common school work. Sup't Riley delivered the diploma.

Thirty-six young people successfully passed the examination this year for common school diploma.

The exercises were held in the school building in Burlington, Tuesday afternoon.

Pro. J. C. Gorton delivered the address which was very practical and contained some splendid thoughts for the young people who are just finishing the common school work. Sup't Riley delivered the diploma.

Thirty-six young people successfully passed the examination this year for common school diploma.

Tax-Payers, Notice!

The Tax-Payers of Boone County are hereby notified that I, or my, Deputy will be at the places and on the dates named below to collect the 1917 State, County and County School Taxes. Will also collect the 1917 Graded Common School taxes in Verona, Bellevue, Union and Florence Districts on the same days other taxes are collected:

BIG BONE July 5th a. m. and Oct. 8th.	Bullittsville July 10th p. m. and Oct. 16th.
BEAVER July 5th p. m. and Oct. 9th.	RABBIT HASH July 12th a. m. & Oct. 4th.
UNION July 6th a. m. and Oct. 10th.	BELLEVUE July 12th p. m. and Oct. 5th.
FLORENCE July 6th p. m. and Oct. 19th.	PETERSBURG July 13 and Oct. 11th.
VERONA July 9th a. m. and Oct. 15th.	HEBRON October 23d.
WALTON July 9th p. m. and Oct. 18th.	RICHWOOD October 24th.
CONSTANCE July 10th a. m. and Oct. 22.	

RATES—State 55c; County 70c; School 20c on the \$100. Poll-Tax \$1.50. School \$1. Dog tax \$1. Graded School Rates—Verona 50c; Bellevue 50c; Union 20c and Florence 25c on the \$100. Graded School Poll-Tax—Verona \$1; Union \$1, and Florence 50c.

All unpaid taxes become delinquent after Nov. 30. Six per cent. penalty due County and State added Dec. 1st on all delinquent taxes; Six per cent. commission in addition to penalty is allowed Sheriff for collecting delinquent taxes. Cost of levy, 60c; advertising \$1.

Please make inquiries for amount of your taxes before Nov. 15th. We can not receive every ones taxes on the last few days of November.

W. D. CROPPER, Sheriff Boone County.

Red Cross Notes.

We wish to thank Mr. Kelly for his kindly delivering our material and Dr. Crouch for the phone which he had installed at headquarters.

The Burlington Auxiliary has been a very active one during the past week—the ladies working every day.

As announced last week, members and friends of the A. R. C. were requested to bring all available old white goods, such as discarded bed and table linen to headquarters. This is very much needed in making hospital supplies and packing gauze work.

The Boone county Red Cross desires the name and present address of any Boone county boy now serving in our army or navy. Please send names to Mrs. Chas. Goodridge, county secretary.

Over 300 shirts have been cut at the county rooms during the past two weeks.

The Union Auxiliary has over 50 hospital shirts made and ready to pack.

The Chapter is anxious to send its first box of hospital supplies and surgical dressings to the recruiting station in Cleveland, by September 1.

A state meeting of the Red Cross chapter officers will be held in Lexington about September 1, last night two days, at which general manager of A. R. C. Hon. Harvey D. Gibson, and chairman of War Council, Harvey P. Davidson, will preside. The meeting will be of great interest to all Red Cross workers.

About 30 members from the different Auxiliaries in the county met in Covington, last Wednesday to receive instructions in the making of surgical dressings. Mrs. Chas. Goodridge, Mrs. Albert Conner, Mrs. J. T. Tilton and Miss Frances Riddell, of Burlington, attended.

Members and friends willing to do knitting are asked to give names to chairman of the Auxiliary in this county. There is a great need of cotton knitted wipes, the directions for which will be furnished at headquarters.

Mrs. B. C. Gains, county vice-chairman, is personally interested in each Auxiliary of the county. She hopes to visit all of them soon.

A Garden Party will be given at the school campus at Walton, Saturday evening, August 11th for benefit of the Red Cross.

Local Happenings.

The candidates made an eyelash finish.

Growing crops begin to need rain again.

Rev. Edgar C. Riley will speak in the interest of the Red Cross Society at Hebron next Saturday night.

Harry Wilson, of Union precinct, was a business caller at this office last Tuesday, and reported peace and plenty over there.

Geo. E. McGlasson received a wire from his son, Lieut. Archibald McGlasson, Saturday, announcing his marriage to Miss Natalie M. Blake, of Washington, D. C.

A heavy rain and electric storm accompanied by considerable hail visited Locust Grove neighborhood Monday afternoon. The hail cut the tobacco some.

A. W. Corn, of Bullittsville, sold a few days ago one hundred hogs that brought \$3.88. Some hogs, but it must be remembered that Mr. Corn is some farmer.

Dr. Gotfield, of Center College, Danville, will be at Richmond next Friday, August 10th, and will speak to the young people at the Presbyterian church. All are cordially invited.

Anso Gadd, of Union precinct, was a caller at this office Tuesday. He reported his crop looking fine, and that he sold his coming crop of tobacco to S. C. Hicks at fourteen dollars per hundred all round.

During the electrical storm last Monday afternoon lightning struck the large maple tree in corner of the yard across the street north of the Peoples Bank building. Persons in the buildings near by were frightened considerably.

Mr. and Mrs. Lewis Cloro, of Locust Grove neighborhood, entertained, Sunday, Joseph Grimley and family, of Bellevue, and Chester Stephens and wife, of Covington. Chester being a Boone county boy always comes home to vote.

Some of those who get their mail at Grant, this county, over the rural route from that office have suggested that their mail ought to come from Covington by way of Burlington, which would be a much better route, especially in winter.

I wish to thank my friends for the support given me in the recent primary election. I am surely grateful and it elected will do my utmost to be a trustworthy officer. To my opponents: I thank them for their fair and honorable conduct during their canvass.

HARRY W. RILEY.

Congressman A. E. Rouse, wife and child, arrived in Burlington, last Saturday for a few days stay. Mr. Rouse expects to return to Washington in the next few days, when the House will take up some of the Senate's work to ascertain if it needs readjusting before a final passage by Congress.

The county board of election commissioners, Sheriff W. D. Crop, J. B. B. Alphin, of Burlington, and E. B. Alphin, of Walton, met at the court house Tuesday and canvassed the vote cast at the primary election last Saturday. The official count appears on the first page.

Dr. T. H. Baker and wife, of Louisville, who are guests of Mrs. Carrie Slater, of Erlanger, accompanied by Mrs. Carrie Slater and Mrs. Claud Slater visited Burlington, last Tuesday afternoon, where Dr. Baker met several of those well known to him when a citizen of the town back in the 1880s and to say they were glad to meet him does not express the pleasure afforded and all were sorry he could not be with them longer. He is one of those big, noble hearted persons who draws men to him and makes of them lasting friends.

Personal Mention

Mrs. John O'Neal, of Walton, is the guest of Misses Sallie and Lizzie Rogers.

Miss Fay Louise Coy, of Newport, is the guest of Mrs. W. R. Davrainville.

Mrs. Sarah E. White, of Hathaway, spent Monday with her son, J. C. White and family.

Mrs. P. C. Huey, of Plymouth, Ill., is visiting her sisters, Mrs. Wm. Hodges and Mrs. Easie Rice.

Leland Snyder wife and son, of the Petersburg neighborhood, were Sunday guests at Dolpha Sebree's.

Samuel W. Hall and daughter, Miss Ruth, visited relatives at Loveland, Ohio, the first of the week.

Mrs. Joe C. Hughes, of Richmond, was a guest of Burlington friends a few hours last Saturday afternoon.

Elmo Gaines, claim clerk in the State Auditor's office, Frankfort came down to vote in Saturday's primary election.

Dr. E. L. Peddicord, Ed. Hawes and Pratt, Holway, of Lakeland, came up to vote at the primary election last Saturday.

Mrs. John M. Lassing and son, John, of Newport, are guests of her parents, Mr. and Mrs. R. A. Brady, on Middle creek.

Mr. and Mrs. R. A. Brady of Bellevue neighborhood, were the guests of their daughter, Mrs. Emma Brown, last Thursday.

John Furlong, of Pt. Pleasant neighborhood, came over last Saturday to visit his sisters, Miss Mary Furlong and Mrs. Kathryn Tanner.

Misses Kathryn Brown, Margaret Hughes, Louise Walton and Atha Eddins are spending several days with Mrs. T. A. Brady down on Middle creek.

Misses Eva and Hazel Akin, of Flickertown neighborhood, were the pleasant guests of Mrs. Newton Sullivan, Jr., Tuesday afternoon and Wednesday.

Miss Clara Sullivan, of Covington, and Miss Jessie Cloro, of Newport, were the guests of Mr. and Mrs. W. P. Sullivan, last week and the first of this.

J. A. Craig, one of Boone county's worthy young men who was operated on for appendicitis at Bethesda hospital, Cincinnati, is recovering at the home of his sister in Covington.

O. S. Crisler, came in Saturday, to vote at the primary election. He came direct from the mountains where he had been spending his summer time looking after the health of the livestock.

Jo. Case, of Crittenden, Grant county, was an early caller at this office last Monday Mr. Case has sold his farm and was on the hunt of Boone county property and would buy in Burlington if he could get a house and lot to suit him.

Miss Katie Stewart, who was residing with her grandmother, Mrs. Mary Hume, at the time of her death, has gone to her father's near Patriot, Indiana, where she will make her home. She was one of the operators at the local telephone exchange for a long time, and has many friends in Burlington and other parts of the county, who are sorry to see her quit the work and leave the county. She will be remembered as a patient, accommodating and efficient lady at all times and under all circumstances.

Card of Thanks

To the Voters of Boone County: I take this means of expressing my sincere gratitude to each and everyone of you who supported me in my campaign for the Democratic nomination for assessor, and I assure the good people of Boone county that I heartily appreciate the many kindnesses extended me during the campaign, and I desire to say that the only reason why I was not nominated is I did not receive votes enough.

Yours Respectfully, J. S. CARSON.

Those who were candidates at the primary election on the 4th inst., must be advised that the law requires the defeated candidate to file after the election, an itemized statement of his expenses.

FARM ANIMALS

CONTROLLING LICE ON HOGS

Important Factor in Development of Animals—Crude Oil Gives Satisfactory Results.

(Kansas State Agricultural College.) Control of lice on hogs is an important factor in their development. Crude oil not only kills lice, but in addition destroys the nits, softens the skin and brightens the hair.

Many hog dips are on the market, which are widely used, but the use of crude oil gives more satisfactory results, in the opinion of Ray Gatewood, instructor in animal husbandry in the Kansas State Agricultural college. This oil may be applied by the use of patent hog oilers, but as a rule these are not satisfactory for they are expensive and many do not apply the oil in a satisfactory manner.

One of the most satisfactory methods of applying crude oil is to drive as many of the hogs as possible at one time into an inclosure in which there is a cement floor. Oil may then

be applied to the hogs with an ordinary sprinkling can. They rub against each other and the oil becomes evenly distributed. They should not be let out of the pen until this is accomplished.

MILLIONS LOST BY DISEASE

Annual Loss Caused by Contagious Abortion Places Heavy Tax on Breeders—No Cure Known.

Twenty million dollars, and a good deal more, is the annual loss caused by contagious abortion of cows. The loss several years ago was placed at \$20,000,000, and since then the diseases has spread widely. Consequently it is safe to say that the loss now is a great deal larger. It is, in fact, a heavy annual tax on the cattle man.

Contagious abortion is a germ disease. No reliable cure is known. The problem is, therefore, largely one of prevention, says Farmers' Bulletin 750, issued by the United States department of agriculture.

Prevention and control, however, are not a lazy man's job. Eternal vigilance is the price of success.

Suggestions may be found in the bulletin referred to, which may be obtained by addressing Department of Agriculture, Washington, D. C.

HOGS NEED GOOD PASTURAGE

Cheap Pork Cannot Be Produced in Pens—Supply Plenty of Grazing of the Right Kind.

It will be necessary to plant a succession of pasture crops for your hogs if you do not have sufficient permanent pasture.

Cheap pork cannot be produced in pens; the hogs must have pasture crops that supply plenty of grazing of the right kind. Even where one has but one brood sow and expects to raise two litters a year, some grazing must be had to give the proper gains on the pigs.

Make your arrangements for pasture crops for your hogs.

ATTENTION TO YOUNG LAMBS

They May Be Expected to Grow Rapidly if Properly Cared For—Good Pasture Needed.

Lambs require considerable attention when very young, yet they may be properly cared for if they are properly cared for.

They need a good pasture where there is green food, shade and water. And when penned at night with the ewes they should have a minimum of pasture.

When a few sheep are properly cared for, one may expect a herd in a short time.

IMPORTANCE OF GOOD TEETH

Neglect Will Cause Falling Off in Flesh or Lack of Appetite in All of Farm Animals.

Many of the ills that attack the human family have been found to have their rise in neglected teeth. This is true of animals, and a falling off in flesh or lack of appetite in horses, sheep or other animals should lead the owner to look first to the

DAIRY

HAY SUPPLY FOR DAIRY COWS

Roughages Are Relatively Cheaper Than Grain, but Should Not Be Fed Exclusively.

"Because of the large hay crop and the small demand for it now, roughages should be fed to the limit of the dairy cow's capacity, says Prof. C. C. Hayden of the Ohio experiment station. 'Activity, the roughages, like hay and corn silage, are much cheaper than grain, and hay is of unusually good quality. Roughage, of course, should not be fed exclusively, as such feeding might lead to compaction and death, even in dry cows and heifers. Some grain is needed in every dairy ration.'"

This dairy specialist also declares: "Choice alfalfa hay at \$20 a ton is cheaper than bran at \$30. Our experiments show that soy bean hay is in the same class as alfalfa, and clover hay should be worth about \$20 a ton, or \$5 more than it is now quoted."

"Timothy hay is recommended for milking cows only in small quantities, to replace such grains as corn and hooley. Leguminous roughages have proved far superior in numerous experiments to timothy for cows in milk.

PROFIT IN DAIRYING

To make dollars in dairying, keep cows that are money makers.

Feed silage or other succulence, plenty of good roughage and grain in proportion to production.

Supply plenty of fresh water. Ventilate barn thoroughly. Produce the best possible products.

RECORDS OF BIG ASSISTANCE

Help Breeder Answer Questions From Prospective Buyer of Herd Sires—Write for Details.

The present sharp competition in the dairy business and the increased price of feed force the successful dairyman to secure the greatest return possible from his outlay. If he has registered cows he expects more for his progeny than if he had only grades. But to obtain more and enough more to pay to keep purebred stock, L. W. Wing, Jr. of the Missouri college of

Champion Shorthorn Bull.

agriculture, reminds the dairyman that he must be able to answer the following questions from the prospective buyer of a herd sire. Is the sire registered? What is the record of his dam? How many advance registry daughters and proved sons has his sire? And what are the records of his grandams and grandfathers? If the breeder is selling a registered cow he must answer: What is her record; the record of her dams and grandams and the ability of her sire and grandfathers to produce advance registry daughters and proved sons.

To answer these questions and meet the demands of buyer and breeder of purebred dairy cattle must do official testing. This testing is under the supervision of the various state colleges of agriculture. Breeders ready to take up this work or wishing further information, should write to the dairy department of the college of agriculture of their respective states.

CORK-BRICK BARN FLOORING

Non-Absorbent and Adapted to Needs of Farm Animals—Laid in Cement Over Concrete Base.

The search for a warm, non-absorbent flooring suited to the needs of horses, cows, hogs and sheep has led to the adoption of cork brick. The brick, as described in Popular Science Monthly, consists of finely granulated cork and refined asphalt, heated and thoroughly mixed, and then molded under pressure into bricks nine by four by two inches. The flooring is laid in cement mortar over a sub-base of concrete and crushed stones or ashes.

MILK ALL COWS THOROUGHLY

Little Extra Time Required After Usual Amount Has Been Secured—Will Pay Dividends.

Sufficient time ought to be taken to milk the cows thoroughly even if no much other work on the farm cannot be accomplished.

A little extra time required to work the milking machine by hand after the usual amount of milk has been obtained will pay dividends and sometimes main a profit where otherwise there would have been a loss.

ROAD BUILDING

MACADAM ROADS ARE URGED

Highway Commissioner of Michigan Favors Water-Bound Type—Cost of Maintenance Small.

Hon. Frank P. Rogers, state highway commissioner of Michigan, is the latest prominent road builder to give his testimony in favor of water-bound macadam, which a few years ago seemed likely to lose all standing as

Fine Type of Macadam Road.

a type of construction adapted for modern conditions. In his biennial report he has this to say: "During the early existence of the department, macadam roads constituted as much as 30 per cent of the mileage constructed. As the use of the automobile became more widespread, the percentage of macadam roads built in a condition comparable in the point of service to the higher types of roads. The first treatment, which is made after the road has 'seasoned' by opening it to traffic for three or four months, is essentially a part of the initial cost of construction, and can be applied at a cost of about five cents per square yard, or not to exceed \$500 per mile for a 16-foot road. Thereafter the road can be maintained in a satisfactory condition with a yearly treatment at a cost of about three cents per square yard."

PRaise FOR IMPROVED ROAD

Stimulate Friendly Rivalry Among Farmers to Keep Highways in Best Possible Condition.

A well-dragged road in front of the farm is a great satisfaction to the owner, but why not give him the additional satisfaction of letting him know that you appreciate what he has done as you drive by? Why not tell him what you think of his system of highway work and help establish a prize for the best-dragged place of the road? There are few ways in which a little money will bring bigger results in road work than in stimulating friendly rivalry among the workers. A careful use of the drag may save the use of the road-grader.

MAKE ROADS WITH CONVICTS

If Criminals Were Put to Work on Highways Country Would Soon Have Fine System.

There are nearly two and one-half millions of miles of public roads in Texas, of which less than three hundred thousand miles are improved. If the convicts of every state were put to work upon these roads, within ten years we would have a system of highways equal to that of France, and many of the grave evils and abuses of the convict system, including its inhuman waste, would be abolished. Waco (Tex.) News.

To Experiment With Oil.

Experiments in oiling the streets of Denver, both asphalt and gravelled, are to be made next summer by the department of parks and improvements.

Motive Force.

The same force that moves one ton on a smooth highroad will move eight tons on a railway or 32 tons on a canal.

Use Split-Log Drag. The splitting-log drag on your road. Get your neighbor to do the same.

The KITCHEN CABINET

The poorest education that teaches self-control is better than the best that neglects it—Sterling.

No false and falsehoods will waste to you; love, and adventures will flock to you, throbbing with love—Master-luck.

SEASONABLE DISHES.

Some of these dishes may find favor, adding variety to the diet and furnishing new combinations.

Chill Stew.—Cut in small pieces, or grind, one and a half pounds of round steak. Add to it one and a half cups of oil of olive oil and butter, add six tablespoons of chopped onion and one clove of garlic. Fry until a light brown color. Add one and a half tablespoons of Worcestershire sauce, and three tablespoons of chili powder, stirring well. Pour in enough hot water to cover the bottom of the frying pan and cook with the meat 15 minutes, then add three cups of tomato. Blend one and a half tablespoons of flour with some of the tomato juice, add to the stew and place in a casserole to cook well covered for an hour. Serve with rice or noodles.

Spring Salad.—Mix together three cups of finely shredded cabbage, half a cup of diced apple, one-fourth of a cup of diced celery, one cup of grated pineapple, all moistened with boiled dressing and served on lettuce.

Fish Souffle.—Make a white sauce of two tablespoons each of butter and flour; when well blended add a cupful and a half of milk, cook until smooth and add to this a teaspoonful of grated onion, a tablespoonful of minced parsley, and a large can of fish flakes which should be picked apart with a fork. Beat three egg yolks until light, add to this mixture and then fold in the stiffly beaten whites. Bake in a buttered dish until firm in the center, then serve at once with tomato sauce.

Fried Chicken de Luxe.—Sift a fourth of a teaspoonful of baking powder into the flour in which the chicken is rolled before frying. Beat one egg, add crumbs and baking powder, beating well; then dip veal or any meat to be breaded in this mixture, frying as usual. This method gives a richer crumbing than simply egg with crumbs.

The man who is really accomplishing something does not have time to stand around telling about it.

GOOD THINGS WORTH TRYING.

There is so little variety used in the preparation of tongue, that this recipe may appeal to the one who is fond of change.

Tongue With Blackberry Jelly.—Cook a fresh tongue until very tender in water containing a teaspoonful of mixed pickle-spice, one or two bay leaves in addition to those in the package, and a few dry celery tips. When very tender, remove the skin, trim off the root end and stick the meat with a few cloves. Place in a buttered baking dish, dust with salt and pour over a glass of blackberry jelly or jam, a cupful of raisins that have been softened in the juice of a lemon and cooked until tender in a cupful of water. Bake often and bake 20 minutes. Serve hot or cold.

Kidney Beans With Oxtails.—Soak two and half cups of kidney beans overnight. In the morning rinse thoroughly and put into a large kettle or saucepan with two tablespoons of sugar, a tablespoonful of salt, a fourth of a teaspoonful of soda, two large onions chopped, a third of a teaspoonful of pepper, and a quart can of tomatoes. Boil 30 minutes and then add two oxtails well cleaned and cut up. Simmer for four hours. This dish will serve a large family.

A half cupful of chopped, freshly roasted peanuts added to creamed potatoes, just as they are ready to serve, makes a new dish of creamed potatoes. A few peanuts added to a potato salad improves that also.

Cream Orange.—Put together three cups of water, two cups of sugar and a little yellow from the rind of an orange for five minutes. Remove the rind and chop, then add a half cupful each of lemon and orange juice; freeze slightly, turn in a cupful of cream or rich milk and finish freezing.

Orange Biscuit.—Make small dainty biscuits from rich baking powder biscuit dough. Grate the rind from an orange and press out the juice. Mix as many lumps of sugar in the orange juice as there are biscuits and plunge each lump into the center of each biscuit and bake in a hot oven. Serve hot or cold.

FAIR STOCK

MIXING AND WEIGHING FEED

Five Simple and Brief Rules Given for Preparing Best Combination of Hay and Grain.

Weighing and Mixing.

Concentrated feeds are the chief sources of protein, and the mixture should be made to fit the class in which the roughage belongs.

A few simple rules for making up a grain mixture are given briefly below:

1. Make up the mixture to fit the roughage available. With roughage entirely of a low-protein class the grain should contain approximately from 18 to 22 per cent. of protein, while with exclusively high protein roughage the grain ration need contain only 13 to 16 per cent.

2. Select grains that will furnish the various constituents, especially protein, at the least cost, using home-grown grains if possible.

3. Be sure that the mixture is light and bulky.

4. The mixture should be palatable.

5. See that the grain has the proper physiological effect upon the cow.

All these suggestions should be kept in mind in order to obtain the best possible combination of grains.

BEWARE OF GARGET IN EWES

Common Trouble at Lambing Time and Should Be Given Immediate Attention—Some Causes.

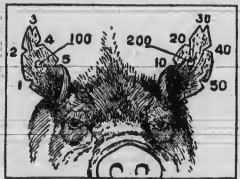

(By T. C. STONE, Ohio State University, College of Agriculture.)

Garget, or inflammation of the ewe's udder, is a common trouble at lambing time, and it should be given immediate attention. The udders of heavy milking ewes are likely to become inflamed and as a result the ewe may have milk fever. Overfeeding of grain, colds, chills, and lying on wet floors are some of the causes of this condition. When discovered, the ewe's udder should be bathed with hot water by means of woolen cloths, and the udder has been dried it can be rubbed with turpentine and lard, or with one-half ounce of lead acetate dissolved in one quart of water. The udder should be kept wet with acetate for half a day. It should be milked out thoroughly each time the application is made. It is also advisable to give the ewe a good dose of epsom salts as soon as the trouble is noticed.

EAR MARKS IDENTIFY SWINE

Illustration Given Herewith Shows Position of Incisions—Good Substitute for Tags.

As a substitute for permanent ear tags to identify purebred hogs, their numbers can be registered by cuts in

Simple Ear Marking.

the ears. The illustration shows how the position of the incision determines the figure. The right ear can be used for small numbers, the left for larger. —Farm and Home.

CARE OF HORSES' SHOULDERS

Some Timely Suggestions Given by Ohio College of Agriculture—Be Careful of Collars.

The Ohio College of Agriculture gives some timely suggestions for the care and protection of horses' shoulders:

Do not use sweat pads. Keep collars clean of mud and dirt, especially if soreness develops.

Sponge the shoulders of work horses with cold water at night after work. If they are sweaty at upon, sponge at noon also.

Care should be taken in fitting collars on work horses. Many collars are too big or too loose. If the withers are fat or especially full, the fitting of collars will need extra care.

DAIRY FACTS

CALVES DROPPED IN AUTUMN

More Easily Raised and at Lower Cost Than Those Coming in Spring—More Time for Care.

Calves dropped in the fall are more easily raised and at the lowest cost. Spring calves do not receive much benefit from grass the first season because for some months after birth the ruminating stomach is undeveloped, not to mention the effect of the annoyance from flies and the summer heat.

When given a good start milk and dry food can be given and the growth is not checked. In the fall there is more time to give to their care and feeding. Fed mostly on sweet skim milk and oatmeal porridge and given a warm, well-aired and lighted pen, which should be kept clean, dry and well bedded, they will make a vigorous healthy growth and when spring comes the full calf is large and strong enough to be turned into the pasture.

INCREASE QUALITY

Increase in quality of dairy products can be secured in four ways:

First—By buying only good cows.

Second—By breeding for improvement.

Third—By systematic milk and feed records.

Fourth—By better care and management.

LARGE PRODUCTION OF MILK

That From Jersey Has Higher Percentage of Protein Than That From Holstein or Ayrshire.

Which do you prefer, skim milk from a Holstein or from a Jersey cow? It is generally known that Holstein milk has a lower percentage of butterfat than milk from other breeds. Does the skim milk from it have a correspondingly lower percentage of its constituents, chiefly protein and sugar?

Chemical analyses made by A. E. Perkins, dairy chemist at the Ohio experiment station, show that milk

High-Producing Cow.

from Jersey cows has a higher percentage of protein and sugar than Holstein milk. Guernsey milk is quite similar to that of the Jersey, while Ayrshire milk is intermediate between that of these two breeds and the Holstein.

These analyses indicate that the percentage of protein in milk increases with the fat content, but not in proportion. Skim milk from Holstein milk having 3.3 per cent fat contained 3.5 per cent protein, while Jersey milk testing 4.7 per cent fat had 4.1 per cent protein. The variation in sugar content showed a similar tendency. Thus the fat content of milk offers a practical basis to compute the composition of skim milk derived from it.

RAISING CALF ON SKIM MILK

Young Animal Should Be Taught to Eat Grain Early—in No Case Feed It in Milk Ration.

The calf which is to be raised on skim milk should be taught to eat grain early. When they have access to it, many of them will begin eating at two weeks of age or three at the latest.

The grain should be placed in a box where they can easily get at it, and they can be encouraged at first by placing a little in their mouths after they have consumed their milk. Grain can be given after the milk is fed.

In no case should it be fed in the milk, as in that case it will be gulped down without chewing, which is bad for the digestion.

PREVENT BACTERIA IN MILK

Best Way to Hinder Formation Is to Cool Liquid as Soon as Possible After Being Drawn.

Perhaps the best way to hinder the formation of bacteria in milk is to cool it as quickly as possible in order to remove the "animal heat" after it has been drawn from the udder. Then heat it to a temperature of 130 degrees or even to the boiling point, after which it should be put into bottles, sealed tightly and set away in a place where the temperature is about 50 degrees. Leave it there till you are ready to use it.

ORCHARD TOPICS

PLEASURE IN FRUIT GARDEN

Owner Must Give It Attention From Early Spring to Late Autumn—Use Early-Bearing Plants.

Besides increasing the fruit supply and cultivating a taste for quality, the maintenance of a fruit garden may be made a great source of pleasure. The possession of a tree which one himself has planted and reared to fruit production carries an added interest in its product, as well as in the operation by which it was secured. The unfolding of the leaf, the exposure of the blossom buds, the development of the flowers, and the formation of the fruit are all processes which measure the skill of the cultivator, and when the crowning result of all these natural functions has been attained in a crop of perfect fruit, the man under whose care these results have been achieved will himself have been made happier and better.

To those familiar with the facilities at command for the culture of fruit and the general interest in the subject, the remarkable absence of successful fruit gardens about city, suburban and country residences can be explained only on the ground that those who would be most likely to give

Raspberries Between Apple Trees.

attention to their care and maintenance have no object lessons or literature at hand to guide them in laying out such gardens.

Most persons engaging in the cultivation of a home fruit garden will have as their chief aim the production of fruit for the family table and the pleasure it affords; others will go a step further and find an added source of pleasure in the problem of cross-pollination and the production of new forms. In a majority of cases, however, the aim will be the one first mentioned.

In order to prove a source of constant pleasure and gratification, a fruit plantation must claim the attention of its owner from early spring to late autumn; its products, too, must be so planned as to cover the greatest possible portion of the seasons between frosts. The problem presented involves a succession of fruits, from earliest to latest, as well as a combination of light-loving and shade-enduring plants. The intensive culture and the liberal feeding to be given demands that all plants be of types which bear early and heavily in proportion to their size. The question of longevity is of no moment; immediate fruit production is the object. With this view of the question, taken in connection with the great variety of conditions presented both by the extent of the country and the manner of life of those interested, it is manifestly impossible to make general statements.

BADLY GNAWED TREES SAVED

Scions Cut Long Enough to Insert Into Bark Above and Below Wound Are Efficacious.

Trees that are badly gnawed may be saved by bridge grafting. Cover the wound with grafting wax, after which wrap securely with burlap or cover with earth. The scions are cut long enough to insert into the bark below and above the wound. From three to five are commonly used on injured trees.

If the injury extends to less than half the distance around the tree it is not necessary to bridge graft as the bark will grow over the wound in one or two years if the injured portion is covered and protected to prevent rot and infection.

If trees are badly injured it will not pay to transplant them.

BORDEAUX FOR LEAF BLIGHT

New York Station Repeats Assertion That Mixture Is Effective as Trouble Preventive.

A bulletin of the New York experiment station repeats that there is no question as to the efficacy of the bordeaux mixture as a preventive of the leaf blight, which has been so destructive to strawberries in many parts of the country.

The young plants should be sprayed the first year as soon as they become established, and the mixture should be applied four times during the first season, and at least twice before fruiting the second season.

The mixture is now prepared with only half the strength originally used, the formula being two pounds of lime and three pounds of copper sulphate, with 22 gallons of water.

Horticultural NEWS

LOCATION OF BUDS

Apple and pear—Terminally on spurs. One and two-year-old wood. Occasionally either terminally or laterally on one-year-old wood—not on spurs.

Peach—Laterally on one-year-old wood—borne singly or in clusters of three. When in clusters the central bud is a wood bud.

Apricot—Mostly laterally on spurs from one-year-old wood.

Plum—Laterally on one-year-old wood on spurs.

Cherry—Laterally on one-year-old wood and in clusters on very short spurs.

HINTS FOR PLANTING TREES

Apples Require Much Space, While Peaches and Plums Will Do With Less—Use Good Soil.

Don't try to economize on space, unless it is absolutely necessary. Apple trees need plenty of room—40 feet each way is none too much—although it is possible to get good results much closer by pruning and fertilizing. Peaches and plums do well 20 feet apart, but 24 feet is better.

Trees should always be planted in good soil. If your soil is shallow dig a hole at least six inches deeper than the lowest roots of your young tree—a foot is better—and fill it in with good dirt, even if you have to haul it from a distance in a wagon. Make the hole twice the diameter of the spread of the roots. This means a lot of work, but it will pay.

Loosen the subsoil in the bottom of the hole, the deeper the better, but loosen it a few inches, anyway, and set the tree just the same depth it formerly stood. An inch or two deeper will do no harm, but don't get it too deep or it will smother. Sift the good top soil around the roots and don't start to tramp it until the roots are covered. If tramped before they are covered with soil the roots will be injured—the dirt protects them. Leave the dirt loose on top, although packed beneath. Either slope it toward the trunk or leave it level. Don't heap it up around the base of the tree. This sheds water and may cause the roots to get too dry.

SPRAYING FOR PEAR PSYLLA

Just Before Blossom Buds Open at End in Spring Spray With Lime-Sulphur Solution.

Nicotine and soap are the best materials to use for controlling pear psylla. Use one pint nicotine and four pounds soap to 100 gallons of water. The soap helps to make it stick. Spray in November or December after a spell of cold weather, on a day when the

Pear Psylla.

temperature is rising and is about 40 degrees or more. You will then kill many of the psylla which winter in the mature stage.

In spring just before the blossom buds open at the end spray with winter strength lime-sulphur, 1 to 8. By that time the eggs are deposited and are very susceptible to injury. Two applications a year made in this way will hold the psylla in check.

FORMULA FOR GRAFTING WAX

Nothing Better Than Combination of Resin, Beeswax and Tallow—Roll It Into Sticks.

There is nothing better than the old and well-known formula of four pounds resin, two pounds beeswax and one pound tallow for grafting wax. Shave the beeswax into thin slices and pulverize the resin so that the materials will melt quickly when subjected to heat. As soon as the materials are melted, pour the liquid into cold water, then pull and work it like molasses candy, rolling it into sticks 1 1/2 inches in diameter and six inches long. When properly made, the wax is good grain, is tough and of a light yellowish-white color.

TO CONTROL SCALE INSECTS

Lime-Sulphur Spray, With Soluble Oils, Is Effective When Properly Applied, Says Ohio.

Spraying fruit trees with lime-sulphur wash and with soluble oils controlled San Jose scale when properly applied, while powdered sulphur compounds gave promising results in experiments conducted by the entomologists of the Ohio Experiment station. Chemicals were unsuccessful.

Little difference in effectiveness was noted between home-bottled lime-sulphur and the commercial form mixed with seven parts of water and applied in early spring. Soluble oils, mixed with 10 parts of water, are also recommended.

Babies' Health Contest Draws Mothers to the State Fair

COMMISSIONER COHEN AND PRIZE CUP AND BABY.

You would guard your baby with your life, but how much better to guard it with your brain. One million babies are now entering on their first summer, and one out of every fifteen of these will die, according to medical statistics, from lack of proper nourishment and the wrong clothes. Do you want your baby to be one of the fifteen? If not, learn how to keep your little one from heat suffering from the wrong food and from clothes that sap its little strength.

Through the examinations, mental and physical, the scoring of points both good and bad, the scientific object lessons and reading matter provided by the Babies' Health Contest at the Kentucky State Fair, which will be held this year the week of Sept. 10, thousands of mothers are enabled to judge just what dangers are threatening their babies, just what ills to remedy and just how to keep them in prime condition.

If you had a hog, a horse or a cow you would learn and know something of its care, because it is valuable. Isn't your baby worth more than a hog or a cow or a pig? Is the query of those interested in the promotion of scientific baby care. They argue that, no matter how lovely, how dimpled, how pink

and white and sweet it is, there may be disease or deformity lurking under this beauty, and this is an evil of which you should be forewarned.

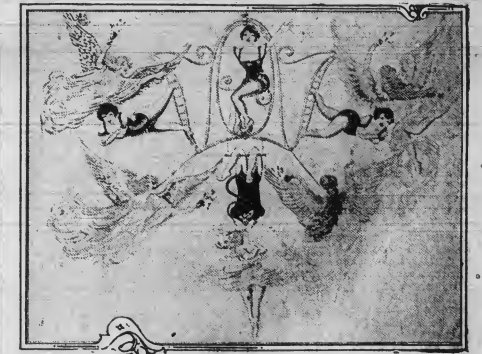

Up to date mothers throughout Kentucky are not only entering this contest to find out about their babies, but are coming back year by year to mark the progress this knowledge has given them and the improvement it has made in their children.

The contest this year, which is under the supervision of Mrs. John L. Woodbury, will be marked by a number of innovations, among which will be an elaborate display of knitted goods for babies and the giving away of patterns for these articles to the mothers desiring them.

Another attractive feature will be the spectacular parade which will find the baby contest. This parade will be arranged as a beautiful spectacle in the Hippodrome pavilion and will show every little tot entered in the contest to the greatest advantage.

Entrance to the Babies' Health Contest is free and is open to babies between twelve and thirty-six months throughout the state of Kentucky. For catalogue or information address Fount T. Kremer, Secretary Kentucky State Fair, Suite 604 Republic Building, Louisville, Ky.

Marvelous Entertainment Features On the State Fair Program

THE WHIRLING ERFORDS.

THE Kentucky State Fair is a valuable, instructive and progressive institution, but to the average person it is the amusements offered by the Fair which constitute its greatest appeal.

In the Hippodrome exhibition, to be held nightly in the Live Stock Pavilion, there has been secured an entertainment which will outlive anything of the kind ever offered. The horse show which has heretofore distinguished the Kentucky State Fair will again be given in its entirety, and in addition to these features, which are well worthy a \$2 admission fee in themselves, the management is providing the added and unrivaled glory of a world's championship five galloped saddle horse stake of \$10,000, which will be offered in combination with both Hippodrome and horse show for the unprecedented admission price of 50 cents per person.

Some of the features will be:

- The Helen Leach-Wallin Trio in a grand aerial whirling exhibition which is said to be the most thrilling of its kind ever offered.

- They will be followed by the Four Hoosiers, who are equilibristas of unbelievable skill and strength.

- The Trueme-Three are a trio of fascinating young girls who present one of the most dangerous and sensational acts in the show business.

down a steep incline in a miniature auto, loops a great arc and flies from the abandoned car on to the outstretched hands of his partner, who holds him aloft despite the terrific impact.

The Novel Brothers are described by their billing. Their specialty is clowning and music.

Olympia Des Vail & Co. is reported to be one of the most beautiful and wonderful equine and canine exhibitions in America.

Holland and Dockrill offer sensational bareback riding and whirling driving with four magnificent Arabian horses and a gold Roman chariot.

Adela Von Ohl boasts but the one horse, but she is said to provide a whole show. Miss Von Ohl is regarded as the most noted cowgirl in America.

The place de resistance of the roster will, it is claimed, be Erford's Marvelous Whirling Sensations. The keynote of this act is aerial whirling in picturesque array of angels and demons.

One of the "hottest" features is the "Dance of the Demons" and a finale on musical bells.

This entire wonderful program will be crowned and completed by Cavallo's great Concert Band of forty musicians. They are said to be richly entertained.

The Kentucky State Fair Catalogue for the 1917 Fair, to be held in Louisville the week of Sept. 10, has been printed in a money-saving way.

War Planes and Weapons on View At Kentucky's Great State Fair

Remarkable Features of Festal Week Secured by
Energy and Enterprise of Hard Work-
ing Fair Officials

HON. MAT S. COHEN,
President Kentucky State Fair.

FOUNT T. KREMER,
Secretary Kentucky State Fair.

THE Kentucky State Fair belongs to the people, is of the people and for the people, but credit for this great achievement, which during a period of fourteen years has meant much to the commonwealth at large, and which now bears vital relation to the welfare of the state, belongs in fullest measure to two officials, the commissioner of agriculture and the State Fair secretary.

Upon the shoulders of these two men falls the burden of responsibility for the gigantic undertaking of summing up in one festal week the agricultural and live stock industries, accomplishments and achievements of the entire state for the year, and both must be possessor of abilities beyond the ordinary measure of man.

Commissioner Cohen's Fine Record.

Commissioner of Agriculture Mat S. Cohen steps into the arena of State Fair accomplishment this year with the poise and assurance of a prior year's unsequenced and universally applauded success in the handling of his colossal task and with the pre-eminent satisfaction of knowing that he has succeeded in adding to the fifteenth annual Kentucky State Fair, to be held in Louisville the week of Sept. 10, the most remarkable features ever associated with a State Fair. Spectacular among his accomplishments is the securing of the \$10,000 stake for five gaited saddle horses and the unprecedented increase to \$1,000 in premiums for county exhibits. Both these brilliant feats are in direct line with the appeal of the Washington government for a stimulation and increased activity in stock raising and food production and follow his several consultations at Washington with national bodies in regard to keying up the state to its highest point of output both in food as well as stock. From these meetings resulted the government's decision to get behind the State Fair with exhibits which will double its already mammoth list of attractions.

Of keenest interest to the public in general will doubtless be the governmental showing on manikins of the arms, uniforms and paraphernalia of all the nations now engaged in the great European war, together with war planes and weapons of destruction. Government officers say that the country has been combed for cavalry and artillery horses, and Commissioner Cohen's great plan and splendid achievement in securing for the State Fair the \$10,000 stake, as announced, comes at a psychological time and is expected to have a saving stimulus on

the horse breeding industry of the state.

In contrast to the country wide scope of the commissioner's activities may be cited the fact that he has likewise brought the interests of the State Fair to an intensive point by placing each county agent on the advisory board of the Fair and thus securing the personal, individual and enthusiastic support of every Kentucky county as an unit.

Kremer, an Efficient Secretary.

Pontaine T. Kremer, who was elected Kentucky State Fair secretary at the beginning of the present year upon the lauded death of former Secretary W. J. Gooch, while newly vested with secretarial title and dignities, is by no means a novice in secretarial experience, having been the "power behind" preceding Kentucky State Fair secretaries for the past eight years in the comparatively inconspicuous but immensely important post of active manager and director of finances for the entire vast institution. To the lay mind the magnitude of this undertaking is impossible of conception, and only those concerned in the mammothness of detail, infinitude of demands and urgency of action surging around the operative forces of the Fair can grasp the significance of this experience. As to man occupies a distinctive position without a training which has conclusively or unconsciously fitted him for the duties of his post, so Mr. Kremer's entire career has been one of preparation for the brilliant and efficient handling of the task before him. In his early manhood he saw long service in important positions with the Louisville and Nashville railroad general offices and with the law and equity division of the Jefferson circuit court, thereby absorbing a grasp of detail, knowledge of law and familiarity with finance which grounded him well in knowledge vital to the handling of the Fair. In fact, it was this unusual all round ability, demonstrated year after year to the state board of agriculture, that prompted Mr. Kremer's election by the board as secretary to the Fair. To the agricultural element his selection was eminently satisfying from the fact that Mr. Kremer has been a practical farmer for the past twelve years, owning and operating at Shiloh, Ky., one of the prettiest and most prosperous farms in the state.

For catalogue or information address Fount T. Kremer, Secretary Kentucky State Fair, Suit 604 Republic Building, Louisville, Ky.

PRIZE LIST OF \$1,000 FOR STATE FAIR COUNTY EXHIBITS

Through the efforts of Commissioner of Agriculture Mat S. Cohen the agricultural products of Kentucky will occupy a very conspicuous and distinctive position at the fifteenth annual Kentucky State Fair, to be held in Louisville the week of Sept. 10. This year the prize list for county exhibits has been placed at the remarkable figure of \$1,000, and in consequence the attention of the entire agricultural interests of the state will be centered on this particular feature of the big annual celebration. The prize list was announced the first part of the year as reaching the sum of \$750. This sum was increased recently through the efforts of Mr. Wood Cady of the Louisville Chemical works and of the agricultural committee of the board of trade. He induced the board of trade members to vote an additional sum of \$250 and in return to add monthly \$100 to this amount, thus securing for the county exhibits of the state the unprecedented sum total of \$1,000. As the list now stands the county winning the first prize will receive \$400 in prize money and the winner of second prize will receive \$100. This list

the three prizes from \$250, \$150 and \$100 to the above figures and gives to the Kentucky State Fair the largest prize list for county exhibits ever offered by any state fair in the United States. With the exception of Dallas, Tex., which is the largest and richest fair in the country and has been in existence twice as long as the Kentucky State Fair. In addition to the cash awards for the best county exhibits, Colonel E. H. Taylor, Jr., of Frankfort, Ky., will give to the county winning first prize a handsome sterling silver cup, which will be known as the "Old Taylor cup" and which will be worth \$100.

To the man or woman working up interest in the county exhibit winning a prize will be given a "booster's award" of \$50 for the representative of the county winning first prize, \$25 for the representative of the county winning second prize and \$15 to the representative of the third prize winner.

For catalogue or information address Fount T. Kremer, Secretary Kentucky State Fair, Suit 604 Republic Building, Louisville, Ky.

Make your plans to visit the fifteenth annual Kentucky State Fair, to be held in Louisville the week of Sept. 10. This is "doing your bit" toward stimulating and encouraging agriculture and stock raising in accordance with the government's call.

THE KITCHEN CABINET

Time turns his hours once again. The sands in an unending stream. Fall just as swiftly now as when Youth's sunshine held them with its gleam.

Life has its seasons, as the year. Turns softly on from day to day; Ere we may sense it, change is here; No hour for us may ever stay.

GOOD, PLAIN DISHES.

Among these dishes you will be sure to find some favorite dish that may have been forgotten.

Cabbage With Sausage.—Remove the outer leaves of a hard head of cabbage and cut out the center, filling it with well-seasoned, uncooked sausage. Tie up and drop into boiling water to cook for an hour. Serve sliced hot or cold.

Liver Balls.—Parboil and chop enough liver for a cupful, mix it with an equal quantity of crumbs soaked in milk; add a tablespoonful of softened butter, little salt and pepper, cloves and powdered parsley, then three beaten eggs. Cook until thick. Make into balls, drop into a kettle of boiling water and cook half an hour; drain and serve with parsley as a garnish.

Sauerbraten.—Cover a piece of beef steak with vinegar and let stand two days, drain and lard it with strips of salt pork, sprinkle with spices and fry in drippings. When well browned all over, put into a pot with a lemon rind, two each of sliced carrots and leeks and add a little hot water. Simmer until the meat is tender, then strain the liquid, leaving left with flour and add enough lemon juice or vinegar to make it tart. Serve the meat with auerkraut.

Potato Salad.—Chop one onion and sprinkle with salt; let stand an hour. Boil in their jackets two large potatoes, peel and slice while hot. Alternate the hot sliced potato and the onion in a salad bowl, sprinkling with parsley, pepper and dry mustard. Pour over the whole a tablespoonful of hot goose grease or olive oil. Add two and a half tablespoonfuls of water mixed with one and a half tablespoonfuls of vinegar and a teaspoonful of sugar. Serve warm.

Beet Fritters.—Mash five cooked beets, mix with four eggs, beaten, three tablespoonfuls of cream and two tablespoonfuls of flour, the grated rind of a lemon, nutmeg and sugar to taste. Mix and shape into fritters and bake in butter. Garnish with fruit.

Nellie Maxwell The KITCHEN CABINET

How easy it is for one benevolent being to diffuse pleasure around him and how hard it is for one selfish being to find gladness making everything in its vicinity to freshen into smiles. —Washington Irving.

WAYS WITH BRAN.

As the health bread is so popular it may be helpful to give a few ways to vary it in bread as well as other dishes.

Bran Bread.—Use two cupfuls of clean bran, one cupful of flour, one cupful of butter, one-half cupful of molasses or brown sugar, one teaspoonful each of soda and salt. Mix well and bake in moderate oven one and a quarter hours.

Another good bran bread: Take two cupfuls of bran, one cupful of flour, two cupfuls of sour milk, one cupful of brown sugar, one cupful of raisins, one teaspoonful of soda, and one-half teaspoonful of salt. After sifting the flour into a basin, add the bran and other dry ingredients. Mix the soda with the sour milk and pour this into the dry ingredients, turn when well blended into a well-greased pan and bake in a hot oven one hour.

Fruit Bran Muffins.—Take two tablespoonfuls of molasses, one pint of milk, one cupful of bran, one-fourth of a cupful of walnut meats, one cupful of entire wheat flour, one teaspoonful of salt, three teaspoonfuls of baking powder and one-half cupful of raisins. Mix the molasses, bran, milk, flour, salt and baking powder, nut meats and raisins cut in pieces. Bake in a hot oven in muffin tins for 30 minutes.

Bran Orangeade.—Take a fourth of a cupful of bran and cover with two cupfuls of cold water; let it stand overnight. Strain, chill and add the juice of an orange and serve.

Bran Gems.—Take a cupful each of bran and Graham flour, add seven-eighths of a cup of milk, one teaspoonful of salt, one teaspoonful of sugar, three teaspoonfuls of baking powder and four tablespoonfuls of melted butter. Mix the bran and other dry ingredients together and add the melted butter, turn into buttered muffin pans and bake in a hot oven 20 to 30 minutes.

Bran Biscuits.—Take a half cupful each of bran and flour, a teaspoonful of baking powder, one teaspoonful of melted butter, a little salt and mix to make a dough to roll. Cut in rounds and bake in a moderate oven.

THE KITCHEN CABINET

When you get into a tight place and everything goes against you, until it seems you cannot hold on a minute longer, never give then, for that is just the place and time when the tide will turn.—Harriet Beecher Stowe.

SEASONABLE DISHES.

This dish may be served hot with tomato sauce or cold, thinly sliced.

Veal Omelet.—Put three cupfuls of cold cooked veal through the food chopper, with one slice of salt pork, add three crackers rolled fine, one beaten egg, two tablespoonfuls of butter, a teaspoonful of salt and a little pepper and nutmeg. Mold in an oblong loaf, put in a pan with a little cold water, rub over the loaf with softened butter and sprinkle with crumbs. Bake while roasting and serve when the crumbs are brown.

Planked White Fish.—Clean and split a white fish and put it skin side down on a well buttered plank one and a half inches thick. Sprinkle with salt and paprika, lemon juice and melted butter. Cook the fish in a hot oven until tender. Garnish with hot mashed potato forced through a pastry bag. Brown the potatoes slightly before serving.

Caper Stuffing for Fish.—Take three slices of bread and a slice of salt pork finely chopped. Add a tablespoonful of butter, one teaspoonful of capers, one-half teaspoonful of sweet marjoram and stuff the fish.

Cucumber Cream Sauce for Fish.—Whip one cupful of cream until stiff, add a tablespoonful of vinegar, salt and paprika to taste and continue beating. When stiff enough to hold its shape fold in one pared and chopped cucumber.

Hollandaise Sauce for Fish.—Wash a half cupful of butter in cold water, using a wooden spoon to press out the water. Put one-third of the butter in a double boiler with the yolks of two eggs and a tablespoonful of lemon juice. Place the saucepan over hot water and beat constantly until the butter is melted; then another third of the butter, beating as before; as it thickens add the last third with the salt and seasonings needed.

Onion Cream Sauce for Meat.—Make a rich white sauce and add a cupful of boiled onions chopped fine, season well with salt and pepper and serve with veal, mutton or poultry.

Nellie Maxwell The KITCHEN CABINET

One who claims that he knows about it. Tell me the world is a vale of sin; But I and the bees and the birds, we doubt it. And think it a world worth living in. —Ella Wheeler Wilcox.

A DAY WITH THE OMELET.

We have begun to take courage again at the price of eggs and to see times when an omelet will not cause ruin to the family finances.

A small omelet is easiest to prepare and altogether more satisfactory than one made with eight to ten eggs unless they are cooked as small omelets, for too large a one is apt to be tough and either under or overdone. Four eggs make a good-sized omelet to be successful.

Italian Cheese Omelet.—Separate whites and yolks of three eggs, add three tablespoonfuls of water, a pinch of salt and a dash of pepper to the yolks, beating well. Whip the whites until light and stiff but not dry, stir in the yolks lightly and put into a hot buttered omelet pan. When ready to fold sprinkle thickly with a well flavored cheese, fold in half and place in a hot oven after sprinkling with cheese. Remove when the cheese is melted and sprinkle with finely minced parsley.

Celery Omelet.—Beat the yolks of two eggs and two tablespoonfuls of cream, two of chopped celery, salt and pepper to season. Fold in the well beaten whites of the eggs, cook in a hot buttered pan until lightly browned underneath, then place in the oven to finish on top. Fold and turn out on a hot platter. A rich white sauce may be served with this, making a most satisfactory luncheon dish.

Bread Omelet.—To a cupful of bread crumbs add one cupful of cream or rich milk, one tablespoonful of butter a little nutmeg and salt and pepper to taste. When the crumbs have absorbed the cream add three well beaten eggs and fry in a well buttered pan. **Jelly Omelet.**—Beat the yolks of three eggs, add a fourth of a cupful of sugar, two tablespoonfuls of milk, one-fourth of a teaspoonful of baking powder mixed with one-half tablespoonful of flour, a little salt and a fourth of a teaspoonful of vanilla, and the whites of the eggs beaten stiff. Cook as any omelet, cover with jelly and sprinkle with powdered sugar before folding.

WALTON DEPARTMENT.

D. B. WALLACE, Manager.

Hand your news items to Mr. D. B. Wallace at the Walton Equitable Bank and Trust Co. building. He is also authorized to receive subscriptions and collect other accounts.

William Grimsley, of Hamilton, spent Friday here.

Wm. Sturgeon, of near Verona, spent Saturday here with friends.

Mrs. Thos. W. Marshall who has been ill for some time is much improved.

Mrs. T. O. Ballard spent the past week at her former home in Cynthiana.

Stephen Ingram has about recovered from an attack of typhoid fever.

Mr. and Mrs. L. R. Miller of Landing, were visitors here last Wednesday.

Mrs. G. C. Rankins left Thursday for Mason county on a visit to her parents.

Judge J. G. Tomlin spent Friday at Lexington, taking depositions in a law case.

Rev. and Mrs. W. M. Britt of Pennsylvania, are here on a visit to relatives and friends.

Jordan A. Harris of Ryle, Gallatin county, spent last Saturday here visiting his uncle William E. Moore.

Mrs. H. E. Miller and son Russell, wife and baby of Big Bone Springs were visitors here Friday.

Mr. and Mrs. Floyd Armstrong and little daughter of Atwood, Kenton county, were visitors here Saturday.

Prof. and Mrs. J. H. Craven, of Latonia, spent Saturday and Sunday here, guests of Mr. and Mrs. Jas. W. Stephenson.

Dr. and Mrs. Joseph Baker of Columbus, Ohio, arrived here Saturday on a visit to her parents, Mr. and Mrs. Thos. F. Curley.

David Points of Dry Ridge, spent Wednesday here with friends and listing some farm and city property with Geo. B. Powers for sale.

The members of Walton Christian church and Sunday school enjoyed a delightful picnic on the fair grounds at Florence last Wednesday.

E. P. Pennington left Friday for Clay county, Ky., where he formerly resided, expecting to spend a couple of weeks with friends and relatives.

Samuel Spradling has bought a farm of 40 acres near Independence from his brother-in-law Alvin Perry to which he expects to move in the spring.

E. W. Ammerman of Millersburg, Bourbon county, was the guest of Geo. B. Powers the first of the week looking over some real estate bargains that Mr. Powers has.

Mr. and Mrs. W. P. Averett and little daughter of Lexington, were here Saturday, enroute home from Carrollton where they attended the funeral of his niece.

Miss Marie Arnold who has a nice position with the Cincinnati Dry Goods Co., Cincinnati, is enjoying her vacation here with her parents, Mr. and Mrs. J. M. Arnold.

Mr. and Mrs. John Ingram, of Cincinnati, spent part of the week here, guest of his mother, Mrs. Motney Ingram, and gathering a supply of blackberries for home use.

Mrs. T. B. Northcutt spent last Sunday at Fort Benjamin Harrison near Indianapolis, visiting her son, Thos. Northcutt, who is one of the soldiers enlisted from this quarter.

Mr. and Mrs. J. R. Conrad and near Verona, motored to Campbellburg, Henry county, Thursday of last week and spent a couple of days with Mr. and Mrs. H. M. Herndon.

The lawn party in the school house yard last Saturday night for the benefit of the Red Cross organization was a very successful and enjoyable affair, about \$125 being realized.

Misses Alberta Stephens and Hazel Wells of Brooksville, Bracken county, arrived last week on a visit to Miss Wells' sister Mrs. J. R. Feagan and family on the farm in Kenton county.

Ed. Berry of Falmouth, was here this week enroute to Sanders to attend the fair with a string of nice horses. Mr. Berry showed the horses at Ripley, Ohio, last week and was quite successful.

Mrs. Maggie Whaley of Erlanger, was a visitor here Saturday the guest of her daughter Mrs. Chas. Colston, who sold Mrs. Whaley a house and several lots in the subdivision of Walton for \$3,000.

Mrs. Jos. C. Hughes, of near Richmond, and her brother, Dr. Thos. Dickey of Middletown, Ohio, left the first of the week for Wrightsville, North Carolina, to enjoy a couple of weeks sojourn in that delightful locality.

Thieves entered the residence of M. E. Hance last Thursday night and stole four pairs of pants belonging to Mr. Hance, but becoming frightened at something dropping the clothing on the lawn where it was found next morning.

W. Lee Johnson who moved to Latonia last spring has decided that he likes the country the best and desires to rent a dairy farm on the shares in this quarter. Mr. Johnson is very proficient in the dairy business and is a good man in every respect.

Wm. C. Readnour, of Cincinnati, spent the past week with his parents Mr. and Mrs. Jos. Readnour on the farm near town enjoying his vacation. Mr. Readnour and B. Wallace spent Thursday and Friday with friends making the trip in Mr. Readnour's auto.

Mr. and Mrs. Owen S. Watts, of Petersburg, spent Saturday and Sunday here. Mr. Watts is cashier of the Farmers Bank at Petersburg, and his bank is constantly growing under his industrious management. They were accompanied by their nephew Attile Nelson of Cincinnati who is spending the summer months with them.

John Binder of the river country was here Wednesday on business, buying lumber for improvements on his nice farm. Mr. Binder marketed 69 hogs on the Cincinnati market on Tuesday that brought him \$22.24, and will have a lot of other live stock for the market. Mr. Binder is one of the most successful hog raisers in the county and markets a big herd every year.

Samuel Mullins, an old resident of the Bracht neighborhood, died at his home there last Saturday on the 78th year of his age. The funeral took place Monday, the services being conducted by Rev. Ogas Hamilton of the Baptist church, and the funeral being in charge of Edwards & Edwards who conveyed the remains to Highland cemetery where the interment took place.

L. P. Powers of Erlanger, was here the first of the week with several prospective buyers of real estate from the Bracken and Mason counties, all seeking farms. This section is constantly rowing in favor and while the price of real estate has advanced wonderfully yet it is said that the prices of farming lands and town property hereabouts is cheaper than any other quarter so favorably situated.

VERONA.

We learn that Henry Maxwell's family are all quite ill of scarlet fever.

Joseph Gardt was called to the bedside of his father at Warsaw, last Sunday.

A large lot of hogs sheep and cattle was shipped from this place the past week.

A revival meeting is in progress at New Bethel church, Rev. Eddie doing some splendid preaching.

Joseph Gardt has purchased a Republic truck, which will be put in operation between Verona and Cincinnati.

Mr. and Mrs. O. K. Whitson entertained with a six o'clock dinner at their home last Saturday.

Rev. and Mrs. Geo. F. Eddie and daughter, Jane, of Louisville; Rev. E. L. Wilson, of Lexington, and Rev. Collins, of Crittenden.

The Presbyterian Tent meeting closed last Saturday evening. Those uniting with the church were Mrs. Geo. Anderson, by lot; Mrs. Geo. E. Akin, and Alma Anderson, by baptism. The meeting pronounced a splendid success.

J. S. ADAMS.

The Department has advised the Postmaster at Erlanger that a new Rural Route known as R. R. No. 2 leading from Erlanger and serving approximately 200 families will be established effective September 1, 1917. These families served will be between Erlanger and Independence via Crescent Springs and in a southerly direction to Devon, thence through Florence to Erlanger. Congressman Rouse will be compensated on securing this route as the appropriation for new routes this year is very small.

THERE IS AN OLD SAYING THAT "Money Talks" but money Works

For You when Deposited in this Bank.

We share the profits with you by paying 3 per cent. interest on a time deposit, or if you have a checking account with us we act as your book-keeper, keeping a complete record of every deposit you make and every check you give.

No trouble to have us refer to your account to see if you have paid a certain bill by check should there be doubt as to your having paid it.

All business confidential.

Remember we pay the taxes on all money deposited with us.

Local Happenings.

E. E. Kelly has purchased a six cylinder Buick automobile.

There is considerable very poor looking tobacco in this county.

Nearly every stalk of corn is putting forth two nice shoots.

J. Walte Cross, of the Hathaway neighborhood, will begin cutting a crop of fine tobacco in a few days.

Miss Fearless & Co., will safely entertain you at Hebron town hall on the evening of August 18th.

Everybody has an abundance of garden produce, and the surplus should be canned or dried for winter consumption.

Mr. E. Mannin, of the Lawrenceburg ferry neighborhood, was transacting business in Burlington last Saturday morning.

William Craddock has a stalk of Boone County White corn on which are two well developed ears that are 10 feet from the ground.

W. R. Bradford, who died at his home near Florence, last Sunday, was buried Monday, Philip Talbot, of Erlanger, having charge of the funeral.

Charles Kelly, of the Waterloo neighborhood, is shipping to Cincinnati, a 3000 barrel crop of apples, many of them Heggies. The crop will bring a handsome stack of money.

I heroby tender my thanks to the voters of Boone county for their assistance at the recent primary election, and assure them they will always be remembered.

Fred Louen has the contract for reconstructing the turnpike from Petersburg by the way of Idlewild to Dry Creek at Constance at something over \$12,000 the county to furnish the stone. Distance 15 miles.

Many petitions from the Western States asking Congress to take some action to check I. W. W. activities were presented to the Senate. Members are seriously thinking of means to remedy the situation.

Don't forget the picnic at Harvest Home grounds next Saturday afternoon. Chas. Cross says it will eclipse anything so far this season. Splendid music and excellent refreshments are being particularly looked after by him.

Lawrenceburg had a good week for its fair this year. Many Kentucky people attended the last three days, and enjoyed the exhibition immensely. The north part of Boone county could not exist without the annual fair at Lawrenceburg.

Provost Marshal General Crowder says renewed emphasis on the fact that Congress framed the army draft law in the interest of the nation and not the individual. For that reason the lines are being drawn tight in the matter of exemptions, and all claims will be closely scrutinized by district boards.

Ernest M. Arnold, who has been engaged engineering roads in this county for some time, has received notice to report on the 25th inst., to go to the officers' training camp at Fort Benjamin Harrison. He passed the necessary physical examination several weeks ago for admission to the officers' reserve corps.

Computations made by M. M. Logan, member of the Kentucky State Tax Commission, disclose the inequality of the taxation in the Commonwealth, inasmuch as some rich agricultural and mining counties assess the land at a very low figure. The figures range from \$92.89 per acre in Jefferson county to \$3.68 in Menefee.

Only twenty per cent of the men drafted for the national army in Kentucky and Indiana will be called for training at Camp Taylor early in September. The entire army will not be called to the colors before the latter part of October. Inasmuch as difficulties make it impossible to get the force into training before this time.

A committee appointed by the Arizona Federation of Labor to investigate the deportation of more than 1,000 men from Arizona, recently and labor conditions in the district were turned back by men from Bisbee who declared that State officials investigating the incident and that no unofficial investigation was desired.

The following prices for milk have been agreed upon as satisfactory to both the producers and Cincinnati dealers: For milk delivered to the platform of the dealer, per 100 pounds, \$3; for milk f. o. b. railroad station, Cincinnati, \$2.90; for milk delivered at country plants, \$2.40. The above prices are based upon milk containing 4 per cent butter fat.

A premium of four cents per hundred pounds for each tenth of a per cent butterfat over and above 4 per cent and a discount of 34 cents under 4 per cent will be paid for milk delivered at country plants.

Milk delivered at city platform or railroad station will take the above flat rate without premium or discount.

The above prices take effect September 1st, 1917.

Broke Camp

The four young ladies, Kathryn Brown, Margaret Hughes, Louise Walton and Atha Mae Eddins, who broke camp at the Brady bathing beach down on Middle creek, last Friday evening, had a pleasant sojourn there for several days.

A Close Finish

In the matter of a close finish in the primary election held on the 4th inst., Carroll county leads the list, the successful candidates here for assessor winning nomination by one vote.

The Erlanger Fair Next Week

The Erlanger fair will be on next week, and with good weather a very large attendance is anticipated, especially on the last two days when half the population of Covington will pass thru the gates.

A Separator Ran Wild

Snelling's separator broke loose from the engine just as it arrived at White's threshing yard at Lawrenceburg ferry, last Friday, and ran down the hill striking a tree and damaging the machine considerably. It took hard work and a long time to get the machine back to the yard.

Base Ball Next Saturday

The Gunpowder undefeated base ball team went to Union last Saturday afternoon and defeated the fast nine at that place 6 to 5. The same teams will meet on the Gunpowder grounds next Saturday afternoon. Any other teams wanting a game with the Gunpowder team call Walter Whitcomb, Burlington, phone 220.

Showing Enterprise

James E. Smith is furnishing and putting on the pike between his house and Burlington the water necessary to water blind the road. Mr. Smith is not afraid that he will do a little more than someone else in assisting to make a good road, and it is hoped his example will be followed by others along that road while it is being reconstructed.

Card of Thanks.

I wish to thank my friends and the voters of Boone county for their many favors and support given me in the last primary of August 4th. I was not the successful candidate to be nominated but I do appreciate the kind favors extended me by the voters of our county and hope to meet them again in the future.

W. F. BRADFORD.

New Tobacco Sells High.

The South Carolina tobacco market opened two weeks ago with a very strong tone notwithstanding the unusually large crop. Prices were about 2 cents higher than last year, when prices were high. The opening prices in South Carolina are always taken as a forecast of Burley prices, and would indicate higher prices this season than last on all grades.

Wise Fish.

Scientists have discovered how fish can find their way to fresh water. Their studies of the resistance of saltwater fishes to the decayed and decomposed things, has led to an explanation of their habits.

It appears that herrings can sense differences in heat and cold as small as a quarter of a degree or less. They appreciate the fact that only a trace of acid or alkali is present in water. So sensitive are herring said to be to acids and alkalis that the scientists propose that these and other fish be used to detect the chemicals instead of the litmus paper, which chemists use, and in the same manner that canary birds are used to discover traces of poison coal gas in mines and elsewhere.

Red Cross Notes.

Bellevue Auxiliary will have a flag raising next Saturday afternoon in the school yard. There will be a band and after the exercises ice cream and cake will be served. Similar exercises in the county have been in every way a success, we are sure this will not prove the exception. Everyone is urged to attend.

The work in surgical dressings is progressing rapidly. Florence turned in eight and one-half dozen sponges, compressors and eye-wipes; Beaver reported 11 dozen sponges and compressors finished in a single afternoon; Burlington has close to 20 dozen different dressings. At the same time, only three Auxiliaries reported, a regulation box does not seem far fetched. Let's work hard.

Bellevue sent for two dozen more shirts.

Mrs. Babe Riddell is finishing her second half dozen hospital shirts. The first six were turned in last week.

Last Wednesday was Burlington's "banner day," fourteen workers were present besides a few observers.

Petersburg secured another dozen hospital shirts.

Florence expects to furnish their Auxiliary headquarters with 100 shirts. Previous to this time they have been working in the homes of different members.

Mrs. Bradford, Mrs. Beeson and Mrs. Fulton, of Florence, visited the County Headquarters, Friday, and as they put it, "took notes." They incidentally turned in some extremely good garter work.

Mrs. Warren Lassing, chairman of the Union Auxiliary, turned in 52 finished hospital shirts Monday afternoon and secured more.

Hebron organized last Saturday night with 41 members, two of which took a life membership.

DAY and NIGHT—Always on the Job

Never closes its doors—never misses a day. Your cream is handled immediately upon arrival. Your cream safe in our care. When you make a shipment to the TRI-STATE BUTTER CO., you have no fear or worry no matter what the weather is or what happens. The Tri-State Butter Co. has earned its reputation by eight years of fair dealing with nearly 25,000 cream producers in Ohio, Indiana and Kentucky. There is only TRI-STATE—no branches, stations or commission buyers.

ONE LARGE CREAMERY

handling nothing but cream. Every transaction direct with the shipper—a fair and equitable system which gives you all the profits from your labor, no one taking toll from your effort.

FAIRNESS TO ALL—FAVORITISM TO NONE.

Ask any Tri State patron to order you free trial can for 30 days or write us direct. We will send the can prepaid.

Tri-State Butter Company.

The Attitude of Siam.

Siam's break with Germany is concerned upon with humorous appreciation by Americans who lack perhaps actual appreciation of the attitude of this small far-away absolute monarchy toward Prussia. The fact is that the King is an up-to-date, wide awake ruler who knows a hawk from a hand-saw when the wind is from the direction of Potsdam.

In Siam the white elephant is a sacred animal. Money is made in the shape of marbles, that it may be more readily raked from the board by gamblers, so Westerners say, and there are various customs and observances which lend themselves admirably to the purposes of burlesque in occidental musical comedy, but the King is a college man. Like his father before him he is an advocate and a promoter of progress in Siam, and an intelligent observer of events and tendencies abroad. The Siamese boast themselves the one unconquered people of Asia. They enjoy complete independence and freedom from European interference. They know that the status quo would be more likely to be affected to their injury by a victory for Germany than by the victory of the Allies. They are therefore nearly concerned with the outcome of the war.

Many Americans may believe them to be. Great Britain has the Malay States in hand on one side of Siam. French Indo-China borders Siam on the other. There was an understanding between these Powers before the war that Siam was to be left alone. The German would use Siam to advantage economically. A naval base in the Gulf of Siam would be valuable to Germany.

The retention of sovereignty and freedom from European interference is the ideal of the Siamese. The promotion of the culture and material progress of Siam is the ambition of the King. Like the republics of South America, Siam knows the Germans. The King of Siam knows that a German victory would mean the world's gain for the sovereignty of Siam.

Love and Patriotism.

The spirit of adventure may lead a boy to join the army. Patriotism or love of country induces many men to offer their lives to the service of their nation. Pride directs some to the ranks, and do not want to be thought cowardly. Always, with one who enters the army, there is a hope of reward of some kind, some degree of success, some incentive for him to join the colors and do his part as a soldier—there is no compensation for her, no inducement for her to give her boy, no hope of reward for the anguish she will endure. It is well enough to talk about the bravery of the mother who gives her boy to the nation; it is well that we praise about the loyalty of the mother and refer to their patriotism and refer to their love. But the truth is, when a boy joins the army, the mother is robbed of something over or above all else in the world and taught to never have a mother who would prefer to see her child in battle than sitting wearily at home. The long, weary, anxious nights she spends, the fitful slumber that does for sleep, the heart-void which she knows, the fear with which she listens to the tinkling of the telephone or the ringing of the doorbell, lest it be an announcement of her boy's misfortune, these are the men who are past understanding by the men who are not lessened by the boy himself. And that hollow mockery to try to console a mother whose boy has given up his life for his country. Reason tells her that the value of the sacrifice she makes, but mother love is not that she knows it is the misery of the idle words of those who sympathize.—Lebanon Patriot.

Warm Weather Rules.

Load lightly and drive slowly. Stop in the shade if possible. Do not use a horse-hat, unless it is a canopy-top hat. The ordinary bell-shaped hat does more harm than good. A sponge on top of the head, or even a cloth, is good if kept wet. If dry it is worse than nothing. When he comes in after work, sponge off the harness marks with sweat, his eyes, his nose and mouth with the dock. Wash his feet but not his legs. If the thermometer is 75 degrees or higher, wipe him all over with a damp sponge. Use vinegar water if possible. Do not turn the hose on him. Saturday night, give a bran mash lukewarm; and add a tablespoonful of saltpeper.

Puts Lid On.

The United States will control the shipping of the world during the war; after the conflict she will be the expert of the world in the seas with this became apparent when President Wilson is in the order placing an embargo on the export of steel and iron products. Every ounce of steel that might enter into the building of ships will be kept in this country for the upbuilding of the sea at the expense of the war. Japan, it is believed, will suffer a heavy blow. Immense quantities of steel have been exported to Japan for the building of ships. Japan would be mistress of the Pacific and have a large share of the trade in the Atlantic.

The Embargo.

In that single word there are involved the most important political, military and economic moment of our life. That we should clearly see and heroically do our duty in settling the down questions—precipitated by the possibility of shutting off the supplies which we have been sending to neutral countries—is the most imperative obligation. Let us, therefore, state the issue plainly.

If we continue to send provisions to Norway, Sweden, Denmark, Holland and Switzerland, those countries will technically fulfill their treaty obligations by consuming them themselves and then selling their equivalent to Germany. By this means the German army will be nourished, as it has been, and continuously enabled to butcher our allied soldiers and our own.

If, on the other hand, we establish the embargo, there is every reason to believe that, as the economic pressure constantly increasing, we shall ultimately force millions of men, women and children in those neutral countries to hunger, perhaps starvation.

This is a terrible dilemma, but between its cruel horns we stand, and by one or the other of them must be pierced. We are not ostriches, and cannot escape from the moral responsibilities of deciding this question by hiding our heads in the sand. While the actual fiat must issue from the lips of our President, the nation itself must decide. Upon your soul and upon ours the solemn weight rests. Are you ready with your answer? For ourselves we choose: Are our wills are firm.

That terrible embargo must be established; let the consequences be what they may; for this is the quickest, the surest, the kindest, and perhaps the only way to "make the world safe for democracy." Degraded from those neutral peoples are coming to us—and to beg. Their supplications will wring tears from our eyes. It will cost us torture to refuse their pleas.

Our national life is at stake, and so are civilization and religion as well. The only alternative to refusal is defeat. If there were another we might hesitate, but there is not and we must decide. It is its refusal to look these things in the eye which constitutes the weakness of pacifism. There are intellectual natures too illogical to perceive the limitations of human conduct and moral action to make the necessary choice between two only and equally painful courses of conduct. In hours of peril they are taken out of the world, and people of a clearer vision and sterner purpose must step into the breach and bear the burdens of responsibility for action.

This is all of the war, and this is a sacred and awful responsibility, but the President ought to try to find this embargo at once, and the nation ought to never have him like a mountain wall.—Enquirer.

CONSIDER THE SILO.

For many years past agricultural economists have claimed that 10 per cent. of the value of a corn crop is in the stalk, or in other words, the embryo which is put up at the proper stage is worth nearly one-half more than the matured corn and the dry fodder.

The present price paid the farmer is \$9 per barrel. This means that the stalks producing a \$9 barrel of corn are worth \$3.60 in silage. When allowed to mature they are worth \$1.80, or 50 per cent. In other words an average farmer producing 400 barrels of corn, who doesn't cut any silage, is actually losing \$720 worth of food, or its equivalent in food. That this is being done almost universally is a lamentable but patent fact.

We are, of course, aware that there is a limit to the percentage of the corn crop that should be made into silage, since there is a demand for the matured grain that must be supplied, but that limit will never be reached.

In all big cattle raising and dairy sections the silo has come into very general use, but it is astonishing to note the number of corn-producing counties in this State in which scarcely a single silo can be found.

When corn is normal in price—say \$2.50 per barrel at hatching time—this loss is bad enough, but at its present price, the highest probably in the history of the State, it is horrendous, and in the eyes of the hungry world, it is criminal.

The cost of the silo itself is a mere trifle, and at the prevailing prices of feed, hay, butter and beef, and its by-products it would earn its cost several times over in one season.

Than this, the food conservation problem is a very serious one. A more profitable field of endeavor. When a small farmer wastes the equivalent of 140 barrels of corn, thereby throwing away \$350, it is a tragedy. No man one day, it might be well for Mr. Hoover and his co-workers to call his attention to it. I might suggest several new silos about the proper silage stage.—Geo. E. Gary, in Courier-Journal.

In Lincoln county as oil well of fifty barrels a day is brought in and many strikes of gas have been recorded, which are thought to develop into a vast source of energy. Lincoln county has made several new strikes both in oil and gas as well as coal and some sections of Laurel county.—Campbellsville News-Herald.

DRYING IN THE SUN

Have All Fruits and Vegetables Properly Prepared.

SIMPLE APPARATUS FOR WORK

Bright, Hot Sunny Days Are Best, and Close Watch Should Be Kept That Rain or Dew Does Not Hit Product—Avoid Insects.

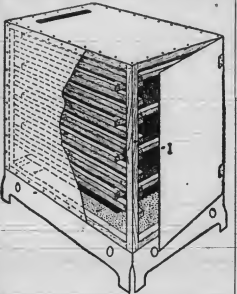

(From FARMER'S BULLETIN No. 141, United States Department of Agriculture.)

The drying of fruits and vegetables in the sun is a simple process if they have been prepared properly. In its simplest form, such drying consists in spreading the freshly prepared slices or pieces on sheets of paper, or, if there is danger of the product's sticking, spreading on old pieces of muslin held down with stones. Bright, hot, sunny days are chosen for this work, and a close watch is kept to see that no rain or dew does the product. If flies and other insects are abundant, a mosquito bar is thrown over the product. Once or twice a day the slices are stirred or turned over with the hand and the thin ones which dry first are removed. Sun drying has much to recommend it, since it requires no expenditure of fuel and there is little danger of the product becoming overheated. Dust, however, gathers on the product, and, unless it is protected carefully, flies, and especially certain fruit flies, which habitually attack dried fruits, will lay their eggs upon it. These eggs later will hatch out, and the worms, or larvae, will riddle the dried fruits or vegetables, rendering them unfit for the table.

Trays of Uniform Size.

Fruits and vegetables, when dried in the sun, generally are spread on large trays of uniform size, so constructed that they can be stacked one on top of the other and protected from rain by means of a cover made of oilcloth, canvas or roofing paper.

A very cheap tray can be made of strips of wood, three-fourths of an inch thick and two inches wide, to form the sides and ends, and lath, which is nailed on to form the bottom. Spaces one-eighth inch wide should be left between the laths for ventilation, and the trays can be raised off the ground by placing them on poles or on improvised trestles. As laths are four

Metal-Covered Cabinet Tray of Home-made Drier.

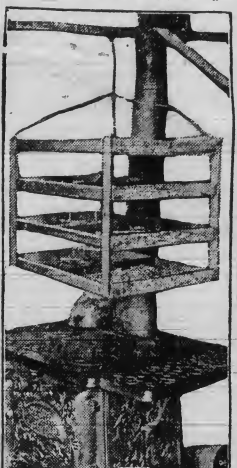

feet long, these lath trays are most economical of material when made four feet in length.

Better but more expensive trays can be made by substituting galvanized wire for the lath. The wire should be one-half inch thick and two inches wide. The screen may be tacked directly on the framework to make the drying shelves, or the wire may be tacked to separate trays. By using two laths nailed together, the framework can be stiffened and larger trays made if desirable. This form or any of the lighter makes of driers can be suspended from the ceiling over the kitchen range or over the oil, gasoline or gas stove, and will utilize the hot air which rises during the cooking hour. It can be raised out of the way or swung to one side by a crane made of lath when the stove is required for cooking purposes, and lowered or swung back to utilize the heat which otherwise would be wasted when the top of the stove is not in use.

Another homemade cookstove drier can be used on a wood or coal range or a kerosene stove can be made easily and cheaply. Dimensions: Base 24 by 16 inches; height 36 inches. A base six inches high of wood or galvanized sheet iron. This base slightly flares toward the bottom and has two small openings for ventilation in each of the four sides. On the base rests a boxlike frame made of 1 or 1 1/4-inch strips of wood. The two sides are braced with 1 1/4-inch strips which serve as supports for the trays in the drier. These are placed at intervals of three inches. The frame is covered with tin or galvanized sheet iron which is tacked to the wooden strips of the frame. Thin strips of wood may be used instead of tin or sheet iron. The tray is fastened on small hinges and fastened with a thumb screw. It uses wire, so that the trays can be removed easily. The bottom of the drier is made of a piece of perforated galvanized sheet iron. Two inches above the bottom is placed a solid sheet of

galvanized iron which is three inches less in length and width than the bottom. This sheet rests on two wires fastened to the sides of the drier. This prevents the direct heat from coming in contact with the product and serves as a radiator to spread the heat more evenly.

The first tray is placed three inches above the radiator. The trays rest on the cleats three inches apart. A drier of the given dimensions will hold eight trays. The frame of the tray is made of galvanized strips on which is tacked the bottom of the tray. The tray is 21 by 15 inches, making it three inches less in depth than the drier. The lowest tray, when placed in the drier, is pushed to the back, leaving the three-inch space in front. The next tray is placed even with the front, leaving a

Homemade Drier, Made of Lath and Wire Netting.

three-inch space in the back. The other trays alternate in the same way. This permits the current of heated air to pass around and over the trays. A ventilator opening, about two inches wide and six inches long, is left in the top of the drier, through which the moist air may pass away.

This principle of construction is followed so that currents of air will pass over the product as well as up through it, gathering the moisture and passing away. The movement of the current of air induces a more rapid and uniform drying. The upper trays can be shifted to the lower part of the drier, and the heated air rises, carrying part as drying proceeds, so as to dry the products uniformly throughout.

Another Home Drier.

Still another home drier is the cookstove oven. Bits of food, leftovers, especially sweet corn, can be dried on plates in a very slow oven or on the shelf of the stove or over the range for winter use. If the oven is very warm the door should be left ajar and the temperature of the oven often noted. Trays for use in the oven can be made from a convenient-sized galvanized wire screen by bending up the edges one or two inches.

Cookstove driers on the market are of two types. One type consists of a series of trays upon which the material to be dried is spread. These trays are placed in a framework one above the other, forming a compartment through which the heated air rises, carrying off the moisture. The second type consists of a shallow flat metal box filled with water and designed so that one end can rest on the back of the stove

Drying Fruits and Vegetables on Homemade Racks by Forcing Air at Room Temperature Across Them.

and the other on a leg reaching to the floor. It also may be supported over a lamp.

Use of Electric Fan.

The use of an electric fan in facilitating drying is feasible for those who already own a fan. It has been found that many sliced vegetables and fruits placed in long trays three by one foot and stacked in a few hours, and to effect before an electric fan can be dried to the requisite dryness within twenty-four hours. Some require much less time. For instance, sliced string beans and shredded sweet potatoes will dry before a fan running at a moderate speed within a few hours, and in many cases the electric fan will cost not more than one-fourth of a cent an hour to run. The fan should be placed close to the stack of trays, and they should not be filled so full that the air cannot pass freely through them. The fan should be turned on at intervals so that the product keeps cool and that evaporation while it is being dried, thus tending to retain the color and eliminate spoilage.

INTERNATIONAL SUNDAY SCHOOL LESSON

(By REV. F. B. FITZWATER, D. D., Teacher of English Bible in the Moody Bible Institute of Chicago.)
(Copyright, 1917, Western Newspaper Union.)

LESSON FOR AUGUST 19

FINDING THE BOOK OF THE LAW.

LESSON TEXT—II Chronicles 34:1-35. GOLDEN TEXT—I will not forget thy word.—Psa. 119:18.

1. The Book of the Law Found (vv. 14-17). The occasion (v. 14). It was found while the work of repairing the temple was going on. At what part in the temple we do not know; perhaps in the treasure house, for it was while bringing out the money to pay for the repairs. Perhaps this was in or near the ark, for the law was usually kept in or by the ark.

2. By whom (v. 14). Hilkiah, the high priest, was the finder. It is strange that the high priest was ignorant of the place where the law was found. It is a sad comment upon the moral and spiritual condition of priests and kings, since they were appointed guardians of God's law. It is, however, always true that when one does not want to have his life ordered by the Bible he will put it out of his sight. The disappearance of the Bible from our homes and the neglect of it in our study is a certain sign of certain lives. Be assured, however, that though the law of the Lord be removed from our sight it shall sooner or later come before us to judge us. God has declared that his Word shall not return unto him void, but shall accomplish that which he hath purposed.

3. Its disposition (v. 16). Hilkiah gave the law to Shaphan the scribe, who delivered it to the king along with his report as to the disposition of the money which had been collected.

II. The Book of the Law Read (vv. 18-20).

1. The king (v. 18). The king (v. 18). This was a most impressive scene, listening to the reading of the law of God. It was the proper thing to do, for those appointed by God to rule over the people should be anxious to know the will of God concerning them. The pliers king, believing in it as God's Word, was anxious to know God's thought concerning the nation. His interest became intense, as he was made conscious of the apostasy of his people from God's law. His chief anxiety was to know what God's purpose was as to the nation in view of their idolatry. It is something to know God's own intelligent as to his responsibilities, even to know what judgments shall befall those who have turned from God. One should know the worst while there is time yet to escape his wrath, for repentance is the only door of escape.

2. To the people (v. 20). In the direction of the king the priests, elders and all the people were called together, to hear God's Word read. This was as it ever should be. People have a right to hear what God has to say to them as well as the king. To keep the people ignorant of the Word of the Lord is a great crime. The crying need of the age, with all its boasted knowledge, fine church equipment and cultured ministry, is for the Word of God to be brought to the ears of the people.

III. The Effect of the Reading of the Law (vv. 20-28). The Word of God is intelligently read and understood there is bound to be an impression made.

1. The king rent his clothes (v. 19). The man who will honestly listen to the reading of God's Word will be brought to his knees, for he will be convicted of sin, and will take the place of self-abasement before the Lord. The king first saw his own sins and confessed them. It is a good sign when one sees his own shortcomings and failures, and not primarily those of others.

2. The king made inquiry of the Lord through Huldah the prophetess (v. 22-28). His supreme motive in this inquiry was to find out whether there was some way to avert the awful judgments which were impending, as set forth in the Word of God. After all, Huldah's message, which threatened him with threatened war to inquire whether there is not a way of escape. Alongside of the flaming, thundering Sinai was placed the Levitical system of offerings. Law and grace are not far removed. The law becomes our schoolmaster to bring us to Christ. Through Huldah the message came that God had taken account of all his sins and that judgment must fall, but Josiah would be spared the sight of all God's visitation of wrath. The penitence of the king turned aside God's wrath from himself, but the nation would be obliged to suffer for its awful apostasy.

3. The king made a covenant (v. 34, 35). This was to the effect that he would walk in the commandments of the Lord. He also made the people stand to this covenant. He no doubt acted from the sincerity of his heart. 4. Further reforms (v. 33). Josiah now reached out as far as the national boundaries, took away their altars and made Israel to serve the Lord their God. The fact that the book of the law was found implies that it had been lost. The way it had been lost is not definitely set forth, but numerous ways may be suggested. The Bible is a book to which every professing Christian today may through lack of interest in it, willful neglect or neglect through the stress of life's business and pleasures. May we not, therefore, inquire as to whether we are not lost?

World's Most Pow-

ful Searchlight.

It is ten feet high, its mirror has a diameter of five feet, and it weighs three tons. Its beam is as brilliant as the sun at eight o'clock in the morning or four in the afternoon, New York latitude, and you can read a newspaper by its light 30 miles away. The heat of its focused beam is so intense that it will set paper afire at a distance of 250 feet. It has a dipower of more than one and a quarter billion.

These are a few astonishing facts about the Sperry searchlight, the invention of Elmer A. Sperry of Brooklyn, N. Y., who is already known as the inventor of the airplane stabilizer and ship gyroscopes bearing his name, and the first electric arc light. When the last big air raid over London was made by Zeppelins, the Sperry searchlight in the big dirigibles in beams of light they could not escape. According to some London accounts the Sperry searchlight is the Zeppelin's Nemesis.

One of the most powerful beams along the coast is the Sandy Hook lighthouse. But the Sperry searchlight is 32 times more brilliant than that light. Were the Sperry lamp substituted for the lighthouse beacon, a ship passing out to sea could be bathed in light until it disappeared below the horizon. By swinging the light back and forth across the sky, it has been made visible 100 miles away. For navy use the Sperry lamp illuminates a target 10 times more brilliantly than any other projector device.

Equipped with a carriage that permits the lamp to be turned in a circle and in any direction up to 90 degrees, the giant searchlight is of the greatest value in detecting aircraft. The operator cannot control it near at hand, the great heat prevents that. He must stand 50 feet away. At that distance he is able to focus accurately upon any moving object. Because the rays project by the lamp are nearly parallel, there is no diffusion of light over a wide area. The beam is concentrated.

When the searchlight is being operated, the temperature of the arc is 9,000 degrees Fahrenheit—7,000 degrees higher than the melting point of the metal holders of the carbon rods. Consequently, in order to prevent these parts from melting, a current of air is forced by means of a motor-driven blower through the carbon supports and discharged through the heat radiating disks that surround the holders. Is the Beck searchlight is sprayed with alcohol to prevent them from melting.

Thus several factors which combine to make the Sperry lamp so powerful are the small electrodes, the special carbons used, the manner in which they burn and the parabolic mirror.—Popular Science Monthly.

Will American Soldiers Marry English Girls?

Speculating editorially on whether the men of the American army will marry English wives to any appreciable extent, the Liverpool Post says:

"Will American men marry here? We wonder if the coming of the American army will have any effect upon the matrimonial prospects of our girls. For some reason the men of the new world have hitherto never shown any great eagerness to take brides from the old, and even the theory that this is because it has not been the way of the American man to cross the Atlantic, thoit is consoling to our national vanity, does not work. For it is noticeable that the Canadians, who have abounded in our midst during the past three years, are not nearly as fond of marrying in this country as, for example, Australians.

Few of the young men from Australia seem to want to return home without English brides, but the Canadians either are married when they come or show a disposition to remain single.

"Still, there is no need for the girls to despair yet, and if some of them do not spend their lives as matrons in the United States they shall be surprised. Certainly it will not be their fault, as they show a most admirable desire to like any of the American naval and military and medical men they have seen, although in some ways the fellow citizens of President Wilson are as curiously-unlike our own men."

E. E. Kidwell, manager of the Dover branch of the New Jersey Machine Works, has returned from Madison Ind., where he purchased 150 tons of shells for the local cutting plant. This lot added to the supply purchased on a recent trip up the river, which are now in the yards, gives this factory a stock of upward of 500 tons of raw material to work upon, which will keep all hands busy full time for many months.—Dover News.

DRAFT EXAMINATIONS.

One Hundred and Thirty-Eight Young Men Respond to the Call For Examination.

Responding to the notice sent out by the local board of examiners, 138 men who had been drafted for service in the United States Army presented themselves here for examination last Saturday, Monday and Tuesday. Examinations were held in the High School building and were conducted by the three members of the board—Dr. O. E. Senour, Health Officer of the county; Edgar C. Riley and A. M. Vesley, assisted by Dr. H. H. Hays and M. A. Yell.

A great many of those examined were married and there were many exemptions claimed on the ground of the party examined having others dependent upon him for support.

The following results were obtained as to the physical examination:

The following named persons were examined by the local draft board and were accepted: Lewis Hodges 255, Frank Klopff, Jr., 337, Lawrence Hartman, 275, Orville Rice 509, John Cunningham 107, Lloyd Underhill 616, Stanley Ryle 486, Walton Rice 507, Calvin Jordan 309, Cecil Prosser 437, J. W. R. Bradford 43, Henry Lee Aylor 10, Hugh Ryle 487, James M. Code 110, William Waters 652, Myron Smith 601, Chester Tanner 606, Charles Rye 313, Thos. B. Black 46, Edward Collins 117, Albert Stevenson 602, David Morris 390, Snowden Humphrey 280, Howard Kelly 332, Charles Markberry 379, Daniel Slayback 600, Samuel W. Kite, 313, Harry E. Roberts 152 passed Ohio Board.

Richard Loudon, 530, Claude Sturgeon, 530, Elmer Goodridge, 218, Harold Gaines, 223, Leroy Tate, 620, Elbert Sullivan, 550, Henry Southern, 574, Harry R. Dixon, 183, John Baker, 54, Herbert Snyder, 519, Garnett Tolin 604, Gammet Kilgour, 341, Harry D. Mayhugh, 391, Rafe Koons 333, Boyd Webster, 637, Walter Lewis, 360, Manley Ryle, 486, C. W. Lassing, 356, Stanley C. Clure, 128, Jos. Allen, 11, To Report Later, William Morris, 363, Edgar Aylor, 6, William Warner, 664, Albert Botthoff, 93, Charlie Carpenter, 103, John Snelling, 596, Elmer Cahill 154, James Allen 30, Benj. Ellis McElroy 388, John McGuire 406, Geo. M. Sparks 519, Emery Basil Smith 588, Wm. Thomas Chambers 122, Herman Wingate 642, Robt. E. Grant 232, H. Wayne Heurne 287, Dalton Jacobs 321, Thos. E. Masters 368, M. P. Williamson 656, Albie Grant 221, Elmer Hood 292, John E. Reeves 504, Perry T. Rector 470, S. D. S. Ramon 477, Ralph Z. Cason 130, Paul Damrath 163, Charles W. Pepper 424, Cecil Williamson 657, Allen M. Darby 175, Roy D. Stamler 524, Bernard Schuker 532, Ira J. Kittle 336, Fenj. Griffith 212, Kenneth W. Aylor 8, Albert Isaac 305, McKelley Snow 547, Allan P. Ute 622, Hoard Johnson 323.

The following failed to qualify under the physical examination:

Andrew Roberts 458, Kenneth Stephens 564, John Muntz 373, Eliza M. Poston 420, Coral G. Reed 514, Joel Peeno 433, Henry S. Dixon 182, Robert E. Berkshire 75, Henry Seikman 542, Lloyd Ernst 194, Leland Snyder 552, John C. Besmon 72, Strowbridge Hoard, 298, Harvey Williams, 645, John T. Allphin, 31, Frank Aylor, 5, Geo. Kottmeyer, 350, Wyatt Powell, 410, D. Hess Vest, 623, Benj. Huff, 269, Manley Clark, 112, Harrison Johnson, 327, Jerry Fowler 199, Robert Jump 312, Eli Early 191, Herbert Humphrey 276, John L. Sullivan 565, James R. Portwood 438, Chester V. Barlow 90.

The following were recalled and disqualified, cancelled, on account of lowering the standard of physical qualifications:

Garnett Tolin, 604, Daniel Slayback, 600.

The following are the only ones who passed and did not claim exemption: Sturgeon 534, Allen, Green Surface 548, Lloyd Stanley Cason 123, James Peeno 433, James S. Kittle 11, James S. Kittle 11, James S. Kittle 11.

Kirtley Steele, 525, Charles Waller, 638, Gusie Rich, 493, Frank Biddle, 56, Lloyd C. McElroy 392, Henry Clay Meyer 333, William Lawie Slayback 376, Claude E. Black 49, David T. Slayback did not claim exemption. All who sign affidavits and those who administer oaths are cautioned to read penalties on back of form. These affidavits must state the exact truth or danger might result. Weigh carefully every affidavit. The release of one man can be the cause of another. The publicly given action of the local board will cause those who are injured to ferret out wrong doers. The board has a solemn and particular duty.

CIRCUIT COURT IN SESSION.

The August term of the Boone Circuit Court convened last Monday at 9 a. m. Judge Sidney Gaines, presiding and Commonwealth's Attorney John J. Howe present to look after the interest of the Commonwealth. The grand jurors who had been summoned for the term answered promptly to the call of their names, and that arm of the court was soon organized and ready for business, having been instructed on the many offenses set out in the statutes.

The grand jury is composed of the following gentlemen: John S. Surface, Foreman, Florence, Lucien Stephens, Rabbit Hash, R. J. Akin, Burlington, John W. Clure, Hebron, Stanley Clure, Grant, W. W. Rector, Rabbit Hash, W. C. Weaver, Burlington, B. F. Bedinger, Walton, Russell Garrison, Union, Owen Blankenship, Union, J. W. Crosse, Union, William Armstrong, Big Bone. The petit jurors were not summoned to appear until Tuesday morning.

The petit juries are composed of the following gentlemen: No. 1, Ed. Borden, C. D. Melvin, Claud Stephenson, J. W. Satchell, Henry Aylor, Jr., G. S. Moore, Robert Green, Alfred Ogden, E. K. Stephens, Arthur Smith, W. B. Arnold, H. H. Clure.

No. 2, Ira Smith, John Utzinger, William Fleck, E. B. McClure, Hubert Rouse, Clem Kendall, Chas. Abernatha, J. B. Rouse, Colin Kohy, Lonnie Clure, J. W. Clure, W. H. Smith.

The grand jury adjourned Wednesday, having found nine indictments. In the case of the Commonwealth against Walter Carson, charged with carrying a concealed weapon, a pistol, the jury returned a verdict of not guilty. The charge grew out of the milk troubles last winter.

Truck and Buggy Collide. Monday morning a Bellevue truck driven by Carl Cason, collided with a buggy in which Joe Allen and J. T. Dempsey, of Hume, were riding. The buggy was going north on Jefferson street and the truck was moving east on Washington street. The vehicles were going very slow, and the buggy was turned over, throwing Dempsey and Allen out, bruising the latter's arm and hip while Dempsey escaped injury. Neither of the vehicles was damaged. Allen had come to Burlington to appear before the local draft board, but his examination was deferred several days on account of his injuries. Cason says that the brakes on the truck would not take hold sufficiently to bring it to a stand, hence the collision.

That Rotten Parole System.

Another illustration of the glaring unwisdom of the parole system of this State is furnished from Bracken county. Some two years ago one Elisha Hughes was sent to the penitentiary from Mason county for shooting at a couple of boys in Maysville and wounding one slightly. Recently he was paroled and returned to his home in Bracken county, and on Saturday night he was brought to Maysville by the Sheriff of Bracken county and lodged in jail for safe-keeping, on a charge of killing a negro man by cutting him in the head with a grasshook. If he had been allowed to serve out his term this tragedy would not have occurred. He felt that if he could get out of trouble so easy once he could do it again. Let it once be known that the sentence of the court means something and men will be more careful not to get into trouble.—Flemingsburg Times-Democrat.

Mr. J. C. Revill, who has been lying at the point of death since Monday morning was a live when the Recorder went to press Wednesday afternoon. All his children and grandchildren are at his bedside.

A. B. Ingram, of Marshall, Mo., was in Burlington, Tuesday meeting old acquaintances. He had been visiting relatives in Florence and vicinity for several days.

Don't forget this fair at Florence will begin on the 29th inst. for a four day session. Everything points to a big fair this year.

MAXWELL
Most Miles per Gallon Most Miles on Tires
The Maxwell is mechanically right.
All the world knows that today.
Why?
A Maxwell stock car went 22,022 miles without stopping the motor
—1092 Maxwells in our May gasoline economy contest averaged 27.15 miles on one gallon each.
2040 Maxwells in our June contest averaged 29.04 miles on one gallon each.
If the standardized, one model Maxwell were not mechanically right these achievements would have been impossible.
Isn't that the kind of efficiency—the kind of economy—you want in YOUR car?

RICHWOOD.

The following guests participated in the birthday festivities of Chas. Craven, last Sunday: Herman Craven, wife and son, Chas. Craven, Jr., and Geo. Schneider and Mrs. Harriet White, all of Cincinnati; John Hitt, and wife, Mrs. Sarah Cropper, Messrs. Jimmie and Mary Fulton, of Florence.

A delightful day was spent in all.

The small crop of wheat in this county is of fine quality.

Great \$10,000 Saddle Horse Stake For 1917 Kentucky State Fair

Owners and Breeders Throughout the Country Interested in President Cohen's Ambitious Enterprise.

HERMAN STRAUS & SONS' CO. CUT. LEVY BROTHERS' CO.

Two of the array of trophies offered in the great \$10,000 five gaited saddle horse stake at the fifteenth annual Kentucky State Fair, the week of Sept. 10, are magnificent silver cups donated

HON. MAT S. COHEN, commissioner of agriculture and, by virtue of this office, president of the Kentucky State Fair, has secured a \$10,000 five gaited saddle horse stake for the 1917 Kentucky State Fair to be held in Louisville the week of Sept. 10-15.

Commissioner Cohen, with the unanimous indorsement and enthusiastic support of the members of the state board of agriculture, was uniting in his efforts to secure the interest and co-operation of horse owners and breeders throughout the country, and his plans were crowned with splendid success. From nearly every city of any size in the United States letters have poured in upon the commissioner eulogizing his brilliant achievement and commending the vitalizing effect of such a project upon the horse interests of the country.

World Will Look to America.
The commissioner has made it known that this very motive inspired him in his efforts for this gigantic prize list, as it is his firm belief that at the close of the present disastrous and exhausting war all foreign nations will look to America for foundation stock and new blood and that this nation should prepare for the demand. At present he declares that the breeding operations of this country have ceased to an alarming extent and that just such inspiration as this hitherto unheard of stake is necessary to arouse the horsemen and breeders of the United States.

Entrance Fee Waived.
In addition to the magnitude of the prize money, the fact that any entrance fee is waived and the horse owner or breeder privileged to enter as many animals as he cares to nominate free of charge and that stable room and bedding are provided by the State Fair without cost to the owner is certain to attract the attention of the entire horse world and to make the five gaited saddle horse events of the 1917 Kentucky State Fair the most sensational saddle horse affair of the age.

The battle royal for the \$10,000 in prizes will open Monday night, Sept. 10, with a grand prize total of \$2,500 offered the five gaited saddle stallion of any age who bears off the championship honors of America in his sex class.

BIG SHOW FOR WOMEN PLANNED FOR STATE FAIR

One of the Most Creditable Exhibits in the Entire Gigantic Display.

Bury housewives and experts in arts and crafts are taking advantage of every moment in preparation for the showing to be made at the fifteenth annual Kentucky State Fair, to be held in Louisville the week of Sept. 10.

The woman's department is naturally the most interesting portion of the State Fair to womanhood and is like wise one of the most creditable exhibitions in the entire gigantic display.

The entry list for this department will close Aug. 27, and a "bury up" will be issued by Kentucky State Fair, Louisville, Ky.

For catalogue or information address Paul T. Kremer, Secretary Kentucky State Fair, 904 Republic Building, Louisville, Ky.

The KITCHEN CABINET

New occasions teach new duties:
Time makes ancient good uncouth,
They must upward still and onward,
Who would keep abreast of truth.
—Lowell.

SOMETHING YOU WILL LIKE.

Something new is hard to find; but someone will find among these something new as well as suggestive of other combinations which will be easy to prepare.

Pineapple Salad With Golden Dressing.—Arrange slices of pineapple in nests of head lettuce, sprinkle with cream cheese which has been put through a sieve, fill the holes with these yellow cherries and serve with the golden dressing which is to be passed with wafers.

Golden Dressing.—Take a fourth of a cupful each of pineapple juice, orange or cherry juice, and lemon juice, heat in a double boiler, beat two eggs lightly; add a half cupful of sugar, pour over the hot juice and cook until smooth, remove to a dish of cold. This dressing is good with any fruit salad.

Virginia Baked Ham.—Soak six or eight pounds of smoked ham over night, drain and bring to the boiling point. Remove the skin, dot over with peanut butter, stick in a dozen cloves and place fat side up in the roasting pan. Put a little peanut butter with some celery or celery seed in the pan with four bay leaves, adding a little water, baste occasionally and roast three hours. Use a half pound of peanut butter; this gives the flavor so well liked in peanut-baked hogs.

Delicious Sweet Potatoes.—Peel and cook sweet potatoes, mash, using three cupfuls; add a half cupful of sugar, a fourth of a cupful each of butter and raisins, a fourth of a cupful of pecans, a third of a teaspoonful of salt and a few grains of cinnamon or nutmeg. Mix after beating like a baking dish, dot with quartered marshmallows and brown in the oven. This is an especially pretty dish as well as tasty.

Cymin or Summer Squash.—This delicious vegetable is in season in the South and for those who can afford them in the North. Cook, mash and season them generously with butter and salt, with a dash of pepper. Place in a baking dish, cover with crumbs and bits of bacon; bake till the crumbs are brown; serve from the baking dish.

French toast, fried bread as sandwiches with cheese, to serve with a salad of lettuce is a good dish, and nourishing.

Nellie Maxwell The KITCHEN CABINET

Mirth continually upsets the glass of Time and mocks the solemn sower Discontent.

Words are forces in the realm of life, Be careful of their use.
—Ella Wheeler Wilcox.

MEALS FOR THE FAMILY.

A good filling for pies and tarts is cranberries and raisins, cooked together, using two parts of the berries and one part raisins. This combination also is good for steamed fruit pudding.

Filipino Beef.—Take one and a half pounds of round of beef, one-half pound of fresh pork, one onion and two peppers, all chopped fine; mix well, add a cupful of dried bread crumbs and salt to taste. Knead for a few minutes to blend well, then form into a roll and place in a greased baking pan. Lay three slices of salt pork over the top and pour over a can of tomatoes. Bake in a moderate oven for an hour and a half. Remove the meat to a hot platter, add a little hot water to the liquor in the pan, thicken, season and pour round the meat. This is very good sliced cold.—Take the strip left from pickled peaches, drop into it well softened prunes, and allow them to stand until well spiced. Serve as pickled peaches. Very delicious.

Cabbage Cooked in Milk.—The following is a most digestible dish of cabbage: Cut the cabbage with a sharp knife into thin shreds, cover with milk and seasonings, and cook for 20 minutes and serve hot.

Rice With Meat.—Boil a cupful of rice, line a buttered pan with the hot rice. When it is cold fill the center with chopped, well-seasoned meat with gravy added. Set into a pan of water and bake an hour. Turn out on a dish and serve with tomato or brown sauce.

Rice Corn Bread.—Take two-thirds of a cupful of boiled rice, well salted, a tablespoonful of butter and a cupful of milk. Beat two eggs, add two tablespoonfuls of sugar, then the rice and two tablespoonfuls of flour, sifted with two teaspoonfuls of baking powder, a saltspoonful of salt, and a cupful of cornmeal. Mix well and bake a half hour in a moderate oven.

Sausage Rolls.—Make a pie crust, roll out and cut in four-inch squares, lay in each a pork link sausage which has been skinned, draw up the sides of the square and pinch them together. Bake in a dripping pan until brown.

THE KITCHEN CABINET

Take every good thing that comes your way. There are so many pleasures in life, and so many different viewpoints, but you think up some excuse and do not go.

FOR THE FAMILY MEAL.

A chafing dish is a most useful utensil to use in preparing a late lunch, a Sunday night supper or light refreshments at almost any time or season. Such a convenience is especially appreciated where there is no gas or electric conveniences in the summer or farm house.

Tomato Golden Buck.—Prepare a Welsh rabbit in the chafing dish with a tablespoonful of butter, half a pound of finely minced cheese, a teaspoonful of Worcestershire sauce, a saltspoonful of dry mustard, half a cupful of strained tomato puree, a pinch of soda and salt and paprika to taste; when well melted and smooth extinguish the flame and stir in two well beaten eggs. Cover for a moment or two and serve on squares of hot toast well buttered with a poached egg on each slice.

Salted mixed.—With one-half teaspoonful of mustard, two tablespoonfuls of butter and a half cupful of mild vinegar, simmered together for ten minutes, is another good dish for the chafing dish.

Mock Sausages.—Into a cupful of thick white sauce stir the beaten yolk of an egg, one teaspoonful of lemon juice and two cupfuls of shredded cooked fish. Shape to resemble sausages, dip each one in egg and bread crumbs and fry in deep fat. Arrange them with slices of tomato on a platter garnished with tufts of parsley.

Impanada.—Cut up a chicken and flour each piece well. Line a deep dish with slices of raw sweet potato, slices of fish, some chicken, a little scraped onion, a few slices of bacon, a little salt and pepper, a can of tomatoes, a little butter if the chicken licks in fat and a tablespoonful of vinegar. Cover the top of the dish with sweet potatoes and bake slowly for two or three hours. Serve hot.

Feed Grapefruit.—Cut Grapefruit in halves, remove the centers, cut around the edges to loosen the pulp, remove all seeds and cover with a simple icing colored with yellow color heating it up to cover the entire surface of the fruit. Into each stick a sprig of mint. The fruit should be well chilled and the icing placed just before serving.

DISHES FOR OCCASIONS.

These dishes may offer suggestions to the housewife even if not exactly followed.

Fish a la Vinaigrette.—Boil shad, mackerel or white fish in salted water. When cooked, put into a dish and pour over it two cupfuls of mild vinegar while the fish is hot. When it is cold pour the vinegar into a bowl, add to it two teaspoonfuls of Worcestershire sauce and salt and pepper to taste. Pour all this upon the fish. When ready to serve chop fine two hard-boiled eggs, one small onion, two tablespoonfuls each of parsley and celery finely minced, one boiled beet, and spread this mixture over the fish.

Soft Custard.—Beat two eggs slightly, add to a pint of milk, a half cupful of sugar, an eighth of a teaspoonful of salt and a half teaspoonful of grated lemon peel, or a little nutmeg, cinnamon or a half teaspoonful of any flavoring extract. Mix well and put into custard cups, set them in a pan of hot water and bake until the custard is set. This makes four small custards.

Apricot Blanc Manger.—Soak some dried apricots all night; stem them with sufficient sugar to sweeten them, and then add a cupful to a quart of blanc manger when cooking. Just before this is turned into a mold add two teaspoonfuls of vanilla and serve it very cold with thick cream.

Jam Cake.—Cream a half cupful of butter, add a cupful of sugar, the yolk of two eggs and two-thirds of a cupful of sour milk to which has been added a teaspoonful of soda. Sift two cupfuls of flour with two teaspoonfuls of baking powder; add one teaspoonful each of cinnamon, allspice, and cloves with the other ingredients. Then add the beaten whites of three eggs and stir in one cupful of blackberry jam or any other kind of jam. Bake in three layers and put soft frosting for filling in between and on top of the cake.

Salmon Omelet.—Take a large can of salmon, drained and chopped fine; add four beaten eggs, a pinch of salt and a dash of pepper. Mix well and fry by spoonfuls in a little hot fat. Serve on lettuce leaves hot or cold.

Keep Well
Do not allow the poisons of undigested food to accumulate in your bowels, where they are absorbed into your system. Indigestion, constipation, headache, bad blood, and numerous other troubles are bound to follow. Keep your system clean, as thousands of others do, by taking on occasional doses of the old, reliable, vegetable, family liver medicine.

Thedford's
Black-Draught

Mrs. W. F. Pickle, of Rising Fawn, Ga., writes: "We have used Thedford's Black-Draught as a family medicine. My mother-in-law could not take Calomel as it seemed too strong for her, so she used Black-Draught as a mild laxative and liver regulator. We use it in the family and believe it is the best medicine for the liver made." Try it. Insist on the genuine—avoid the cheap imitations.

FORTY YEARS AGO TODAY

Items Taken From the Issue of The Recorder of August 23rd, 1877

Not much stock being prepared for the fair.
Flux is prevalent in the county.
Six picnics in the county last Saturday.
Jonas-Clores wheat-crop was 77 bushels.
Professor Stephenson will begin school in Morgan Academy, September 1st.
Teachers' Institute was in session at Morgan Academy, last Thursday, Friday and Saturday, Prof. L. N. Early, critic.
Next Tuesday the 20th exhibition of the North Kentucky Agricultural Association will begin.
Big ball in Morgan Academy last Friday night.
Waterloo-The yield of wheat is large.-Harvey Marshall is building a barn.
Florence-Married, Jas. Waller and Hattie Dixon.-Sister Finnigan colored, preached to a congregation of negroes, Sunday.-A company of sharp-shoots has been organized with R. H. Ingram captain.

Began Life on a Farm

We began life on a farm, yet we know little about farming. Still, we can see through a barrel with both heads out, or can tell a horse from a cow 50 feet from us. Uncle Sam, our great-uncle, you know, guarantees two dollars per bushel for next year's wheat. That is the minimum price, and the prospects are that it will reach three dollars. There is a great deal of land in this country that will raise wheat, possibly produce 30 bushels to the acre. Would it not be well for some of our farmers to dip into twenty or thirty acres this fall, and see how wheat raising is that you get out of a great deal of hard work, and that is what we all want. This hard work proposition is a great deal like what Gen. Sherman said of the territory it will help the corn and tobacco wonderfully.

A Fine Rain Fell Yesterday

A heavy rain and considerable wind passed south and east of Burlington late Tuesday afternoon, the wind tearing the roof off of a few barns and demolishing a new house in Erlanger that was nearing completion Wednesday about 8 a.m., a good rain began falling here and continued several hours, and had the appearance of covering a considerable territory. It will help the corn and tobacco wonderfully.

Charles Abernathy, of "White Haven," who sold his farm a few days ago came in yesterday and ordered bills for advertising his big sale September 3rd.

Quite a number of ladies visited local Red Cross headquarters last Monday, and considerable business was considered.

Chas. White's health has improved until he is able to come to Burlington every few days.

The rain that fell Wednesday morning put the farmers about here in better spirits.

Rev. Bailey, of Cincinnati, will preach at Millersville next Sunday morning.

Red Cross News.

A meeting of the County Board was held at the Court House, Monday afternoon. Of the 14 auxiliaries in the county 11 were represented. Walton Branch Chapter was represented by Mrs. Vest and Mrs. Holloway.

Chairman, Mr. Riley read a letter from Chicago Headquarters, asking Boone County Chapter for 100 sweaters, 100 pairs socks, 100 mufflers, and 100 wristlets. Mr. Riley put it to a vote of the Board, and it was unanimously decided to do this work, and the Purchasing Committee will purchase yarn as soon as possible, and get work started.

Mrs. Chas. W. Goodridge, of the Boone County Chapter, and Mrs. Jno. L. Vest, of Walton Branch Chapter, were selected as delegates to the State Red Cross Convention to be held at Lexington, Wednesday and Thursday of this week.

In response to the request for the names of Boone County boys now in the service, the following names have been received:

Clayton Batchelor, 3rd Co. C. A. C., Fort Screven, Georgia.
Clarence Rogers, Schofield Barracks, H. Honolulu, Troupe D. H. T.

The County Secretary has 1,100 names enrolled now, and there are many more in the county that have not been enrolled by the local secretaries; we have also increased in August from 9 to 14 auxiliaries. Surely we should do a great work toward making our boys who go to the front comfortable.

Report of Boone County Chapter Association Red Cross: Month ending July 31, 1917.

(What we are doing for the Soldier Boys)

The W. C. T. U. Ladies of Walton Ky will give to every Boone Co Soldier Boy a Comfort Bag. These Bags are known as the housewife comfort bags & are preferred to any other comfort bag as stated by our Ky Soldiers. One Officer stated he would not take \$100.00 for his. These Bags are very useful in camps, & can be carried in the Pocket all during Military service. The equipment of these Bags are: Needles, Pins, Linen Thread, Darning Cotton, Trouser & Shirt Buttons, Shoe Laces & Testament. We are very desirous that every Mother shall know that these Bags contain no cigarettes but expression against the use of them.

We want our Boys to be pure in every way we represent Purity it is our emblem of which we are proud. The W. C. T. U. Ladies have given these Bags to the Soldiers & Sailors for years. We will also give to the National Ambulance Fund \$10. Will have a Motor Ambulance the battle front inscribed as a gift of the National W. C. T. U. & floating our white ribbon emblem beside our glorious flag, this will emphasize the Mothers' love of the Women's Christian Temperance Union. We have also made a donation. An Electric Fan in St. Bliss Hospital. There is one of our Comfort Bags at E. C. Rileys Office Burlington Ky for inspection for any of the Boys wishing to see them also at one at B. Jones Drug Store Walton Ky. Please send your Name & Address to E. C. Riley or to President Mrs. J. B. Allen Walton Ky. P. S. We have also enlisted in Red Cross Work.

A Big Meeting Closed

To the Recorder:
We have just closed a most glorious meeting at Gunpowder church, with 21 additions-13 on profession of faith, 7 by letter and 1 by relation. Rev. W. A. M. Wood, of Dayton, Kentucky, did the preaching, and he did it well. The music was one of the leading features. Our church is only 17 years old and has a membership of 126. You see we are, by the help of the Lord, growing.
C. T. CLAUICH, Pastor.

While enjoying herself in the shade in the yard last Sunday, Mrs. B. B. Hume spied a snake above her in the tree, when she secured a pistol and shot the reptile in two the first shot at it.

While working at the rock crusher out on the Petersburg pike, Tuesday, a rock flew out off the crusher and hit Smith Strader, colored, the head, cutting an ugly gash.

Walter Brown was struck on the side by a rock while working at the rock crusher out on the Petersburg pike, Monday, and had to lay off a day or two for repairs.

W. H. Pope, who resides down on Middle creek, is very ill, and because of his extreme age his friends fear he will not recover.

Joseph Maurer, of Bellevue, and Mrs. Edward Maurer, of Louisville, were guests of Caddie Maurer and family, several days last week.

Coal! Coal!

I will sell coal at 23 cents a bushel of 76 pounds up to September 1st next. After that date it will be 24 cents a bushel if there is no change in the market.

J. J. MAURER,
GRANT, KY.

Interesting Facts Gathered During the Week by Our Regular Correspondents.

RICHWOOD.

On the 12th inst., a large number of friends with well filled baskets surprised Mrs. Cora D. Stephens, that being her 49th birthday. The dinner was spread in the shade beneath the large trees in the yard. Those present were Mr. and Mrs. Harmon Hearn, Mr. and Mrs. John Denny, Mrs. Mary E. Glacken, Dr. E. L. Glacken, Mr. and Mrs. W. E. Glacken and daughter, Sarah Elizabeth, Mr. and Mrs. Elmer Glacken and son, Mr. and Mrs. Chas. Fennell and son, Mrs. A. B. Carpenter, Mr. and Mrs. Ben Carpenter and daughter. All had a nice time and wish Mrs. Stephens many more happy birthday.

BEAVER

Rain is badly needed. J. A. Loomie and William Wilson spent Saturday in the city. Geo. Weden Sleet has been sick for several days, threatened with fever. G. O. Cleek purchased a Chevrolet auto of B. B. Hume for the enjoyment of his family. John J. Cleek's health has improved some lately, his many friends are glad to hear. Bro. Duval, of Warsaw, closed a very interesting meeting at the Christian church near Beaver, last Sunday night. Will Wilson shipped eleven fat cattle last week weighing 1120 pounds receiving 10¢ cents per pound for them. John J. Cleek, Joe W. Cleek and James Sleet shipped a car load of cattle recently for which they received satisfactory prices. Mr. and Mrs. G. W. Ossman, Mr. and Mrs. Joe W. Cleek and Miss Anna Cleek attended the funeral of J. C. Revitt at Burlington, last Friday.

Mr. and Mrs. Geo. Slayback and grandson, of Marshall, Illinois, are expected to arrive to visit his family, Slayback and family, this week. Mrs. R. E. Moore, who has been ill for several weeks, has recovered sufficiently to attend church and her friends are very glad to see her out again. Mr. and Mrs. J. Sam Johnson and Hugh Johnson, of Lewisport, Ky., spent several days with his brother, W. C. Johnson, returning home in their Ford by way of Louisville.

Mrs. B. K. Sleet, of the Bracht neighborhood, who has been in a hospital in the city for several weeks, being treated for liver trouble is visiting friends and relatives and recuperating her health in Beaver neighborhood.

Geo. R. McGlasson and A. W. Corn, of Bullittsville, each bought a Buick auto last week.

B. B. Hume sold to Russell Smith, one day the past week a five passenger Hupmobile.

GUNPOWDER.

Perry Barlow and family broke bread at J. W. Rouse's last Sunday. R. E. Tanner and wife and P. J. Allen and wife dined with this writer last Sunday. Lloyd Tanner and wife visited at his brother Chester's near Limburg, last Sunday. The Ladies of Hopeful church will have a cake sale at C. W. Myers store, Florence, Tuesday the 28th inst. This community is experiencing a very severe drouth and unless we have rains in a few days the corn and tobacco crops will be greatly damaged. LOST STRAYED OR STOLEN—Fox terrier, four months old, any information leading to its recovery will be gladly received by Lute Bradford.

The death angel has visited this community again and taken from our midst little Joseph Earl, infant son of N. A. Zimmerman and wife, at the age of 2 years, six months and 28 days. After a brief illness he was called to his reward on Tuesday the 15th inst. He was a bright and cheerful little fellow and his presence in the home will be greatly missed. Funeral services were conducted at Florence on the following Thursday by Pastor Royer, after which the remains were buried at Hopeful in the presence of a large concourse of sorrowing friends and relatives. The bereaved family have the sympathy of the entire community. For the kind assistance rendered by the neighbors during the illness and death of their son Mr. and Mrs. Zimmerman extend their heartfelt and sincere thanks.

UNION.

Nann D. Bristow spent Monday with her aunt Marietta. Burlington folks have become frequent callers in this vicinity. Miss Norma Rachel visited relatives at Petersburg last week. A crowd of young folks attended the last Harvest Home picnic. Lyman and Ned Rice were the guests at W. J. Slayback's, Sunday.

John and Robt. Slayback visited relatives in Florence last Saturday evening. Mr. and Mrs. C. E. Steinfert, of Covington, spent Sunday at N. S. Bristow's.

Mrs. Millie Baker and daughter, Alma, were visiting relatives here the past week.

Mrs. Cam White and children returned home Sunday after a ten days' visit with her parents, Mr. and Mrs. Jake Cook, near Waterloo.

Richard and Jas. Northcutt united with the Baptist church and were baptized Sunday afternoon and Sunday night Chas. Holt united, and Jack Koons was restored.

Mr. and Mrs. W. W. Green, Mrs. Jas. Batts, Mr. and Mrs. James Pelcher, Mrs. Geo. Smith, and Mrs. Lou Scott spent last Sunday with Mr. and Mrs. Jas. Batts near Rising Sun, Indiana.

The Red Cross Rally here last Saturday was a success in every way \$25 was netted from the collection and a \$40 collection was taken up in the flag. Twenty-seven new members were enrolled, making 115 members at present. Everyone worked hard to make this a success, and the public of Bellevue school ought to appreciate the pole and flag raised on the school campus. The Aurora band rendered excellent music and the speeches by Burt, E. C. Riley and S. W. Tolin were excellent while the prayer by Rev.

C. E. Baker was one that will be long remembered. Each and every one that helped in any way to make this meeting a success deserve praise and especially do we wish to remember those that are not Red Cross members for the time and means they contributed to help this good cause.

HUME.

Arch Noel and wife were in Verona Saturday.

Thos. Black is a visitor at Uncle Reuben Noel's.

Miss Susie Noel made a business trip to Walton Tuesday.

A. A. Alphin shipped 20 fine cattle from his Mudlick farm Tuesday.

Jess Alphin, wife and son, of Walton, called on relatives here Thursday.

T. B. Roberts and sons, Harry and Dick, made a business trip to the city Saturday.

Howard Williamson of near Rab bit Hash, was a guest at T. B. Roberts' Saturday.

Mrs. Katie Abdon was the guest of her daughter, Mrs. John Burdick, near Big Bone, the first of the week.

Died, of scarlet fever on the 12th, Henry, little son of Maggie and Henry Maxwell. He was 11 years old. Burial at Concord by undertaker Jesse Hamilton, of Verona. The family have the sympathy of this community.

Protracted meeting began at South Fork on the 19th and is in progress and will continue until Rev. Alphin, of Kansas, and Rev. Yeager of Warsaw, the latter the regular pastor, are conducting the meeting. Large crowds are attending.

RABBIT HASH.

S. N. Riggs and family spent last Sunday with Mort Sink near Erlanger, Indiana.

Mrs. Lucy Bruce, of Liberty, Mo., is the guest of relatives in this neighborhood.

Era Aylor sold to Hugh Pate, of Rising Sun, last week, 60 stock hogs that cleared him about \$100.

C. G. Riddell and S. N. Riggs made a business trip to Cincinnati Monday going in Mr. Riggs' auto.

A little girl of Frank Mirrick, of down stairs last Thursday and broke her collar bone, Dr. Carlyle attended her and she is doing nicely.

Lee Stephens returned Monday from Cincinnati where he has been to leave his work on account of asthma.

T. B. Miller and wife, of Gallatin county, came up Saturday to visit Mrs. Miller's parents, R. T. Stephens and wife. They returned home Sunday. Mrs. Stephens and Mrs. Frances Moler and son accompanied them for a week's visit.

The cement pavement in front of the Peoples Bank has been reconstructed to correspond with the pavement in front of the Wall building.

DUTY OF MEN MADE PLAIN

Rules For Drafted Soldiers Issued By President.

Regulations governing the conduct of men who have been accepted into the national army are very plain, although somewhat long, and if studied carefully will enable every drafted man to do all, and only those things which he should do. They were prescribed by the President on August 3, and a digest is herewith given:

The local boards, after examining men and certifying those not exempted to the district boards, will select from the district lists of those finally accepted for military service. The local boards will thereupon notify each man accepted to hold himself in readiness to report for military duty at a time and place to be specified later. Each man will be mailed his individual notice, and the whole list for each local district will be posted in a public place and probably printed in the news papers, but it is the duty of every man involved to make sure that he receives his notice. Failure to receive it will not exempt any man from punishment for failure to report for duty.

Upon receipt of instructions from the proper authorities, the local boards will notify the proper number of men to report for military duty at the office of the local board at a specified hour and on a certain day, the time to be between 8 a. m. and 5 p. m. at that time, and not more than twenty-four hours before the scheduled time for taking the train to the mobilization camp. From the time specified for reporting to the local board, each man involved will be in the military service of the United States. Registrants should remember that they will be in the military service whether they receive the notification by mail or not.

The local boards will make all arrangements for meals and lodging for selected men from report to time to entrainment time. The boards may, in their discretion, grant permission to the selected men to spend the night at home, but all alternate selected men must go to the hotels or boarding houses selected by the local boards. The orders of the local boards must be obeyed just the same as those of the commander-in-chief of the army.

In addition to notifying the alternate quota of men, each board will notify the alternate quota of men to report at the same time as the others.

When the notified men report they will be formed in line and given orders by the local board members, all of whom are required to be present and to have all the assistants they need. The board will notify the selected men that they are to report to the board office at a specified time, and which time must be at least forty-five minutes before train time, plus a sufficient time to reach the board office. The men will also be instructed that they must report back to the board for retreat roll call at 5:30 p. m. on that day. Then an assistant of the board or one of the board members will conduct the men to their boarding houses (unless they have been permitted to spend the night at home), show them their quarters, and personally inspect all arrangements made for them. The men will then be given liberty until retreat roll call.

At the retreat roll call the men will again be cautioned as to the hour to report next day for entrainment. They must be reminded that on assembly to march to the train they will be allowed to take with them only light baggage or, preferably, bundles containing the light toilet articles and changes of underclothing that they were cautioned to bring in their orders to report. Those who have not procured these articles will again be cautioned to procure them forthwith.

At this time the board will also designate one member of the board to be in charge of the parade from that time until they reach mobilization camp. The order of the leader and of his assistant, whom he will select, must be obeyed, for he will act under military authority.

Upon arrival of the selected men at the board office on the second day, the leader designated by the board will line up the men and call the roll. Thereafter the men will be required to remain in one group. At that time the board will accompany them to the station.

Arrived at the station, the board will secure tickets and give them, together with certain military papers, to the leader. Fifteen minutes before train time the roll will be called. If any number of alternates will be put in their place and the alternates from that time forward will be in the military service of the U. S. By that time the roll has been called and a few hurried good-byes have been said the train will arrive.

The selected men will then board the train, at which time they will have nothing to do except what the leader tells them to do. The leader will look after their meals and sleeping accommodations, if it is necessary to sleep during the journey to the mobilization camp, and will see that no liquor is furnished at any way station.

The leader will be in charge of the mobilization camp, is reached, and even then until he hands them over to the camp commander.

BIG ERLANGER FAIR

Now In Progress, and Everybody From Everywhere In Attendance.

Amusements for Young and Old

The Erlanger fair opened its gates to the public Wednesday morning with excellent prospects of having the most successful fair in every particular of any ever held on the grounds. Notwithstanding the war has cast a gloom over many homes in the territory from which the fair draws its patronage, conditions are otherwise such that the management is making an especial effort for the entertainment of the very large crowds that will visit the fair this year. It has been well advertised and the public has made ample arrangements for attending and every day is counted upon to bring a greater attendance than the corresponding day any preceding year. If you want to have a real good time you will not miss the Erlanger fair this year.

THE NEW KENTUCKY TAX LAWS

There will be many changes in the Kentucky Tax Laws, which go into effect September 1st, and taxpayers should be deeply interested.

Farmers will be benefited by the lower State tax rate on Lands and Improvements from 55 to 40 cents on each \$100 valuation and on Live Stock from 55 to 10 cents for State purposes. Bonds, Stocks, Mortgages and Accounts will be exempt from local taxation, as will also Agricultural Implements and Products grown within the year are exempt from all taxation. Money deposited in Bank will be taxed at only 10 cents on the \$100, instead of 55 as heretofore. This will result in a large saving to taxpayers, who have been listing their property at a fair valuation.

Merchants will have only State taxes to pay on their Notes and Accounts at the rate of 40 cents on each \$100 and 10 cents on Bank Deposits. Other property, such as Real Estate, Merchandise, etc., is subject to State tax rate of only 40 instead of 55 cents.

Manufacturers are exempted from local taxes on their Machinery, Raw Material and Product, Notes and Accounts and will be taxed for State purposes only on such property at 40 cents on the \$100 and 10 cents on Bank Deposits. On all other property the State tax is only 40 cents on each \$100 and the local taxes as fixed in the localities where their business is conducted.

Bonds, Stocks, Mortgages, Notes and Accounts are taxable for State purposes only at 40 cents on the \$100 and exempt from local taxation. The State tax on Real Estate, Household Goods, Merchandise, Vehicles and other property owned by individuals has been reduced from 55 to 40 cents; a reduction of 37 1/2 per cent.

Additional Revenue to justify the reduction and increase the State revenue is to come from Bonds, Stocks, Notes, Rights and Royalties and by equalization of notoriously undervalued assessments, and as each class of property, no matter by whom owned, will be assessed and taxed uniformly, the advantage to taxpayers generally and the State at large will be very great.

The State needs more revenue to meet the present deficit, and the idea is to get more property to tax rather than to impose more taxes on property now paying more than its share, and under the new and more equitable laws this can be accomplished.

The State Tax Commission is going about the work in the right way to subject every kind of property to its fair share of taxation and correct the evils heretofore existing whereby many property owners paid more than their just due and others escaped entirely. The Commission is endowed with power to enforce the laws and bring the delinquents to a sense of their responsibility and obligation to the State, and every Taxpayer, Assessor and Supervisor should aid in securing for the State the successful operation of the new laws, which are fair and just to all.

Where accurate returns are made as of September 1st, the property owners will be immune from past omissions and delinquents may be proceeded against for ten years back, so there is every inducement to comply with such just and equitable laws, and as the principles involved are worked out in the tax rates, and in time the entire exemption of land for State purposes, as in other States where the same laws are in practice.

The cement walks in front of Dr. Yulston's property and two sides of the Walton property are completed, which add materially to the appearance of the center of the town.

INTERNATIONAL SUNDAY SCHOOL LESSON

(By REV. F. B. FITZWATER, D. D., English of English Bible in the Moody Bible Institute of Chicago.)
(Copyright, 1917, Western Newspaper Union.)

LESSON FOR AUGUST 26.

THE CAPTIVITY OF JUDAH.

LESSON TEXT—II Kings 24:1-21.
GOLDEN TEXT—As I live, saith the Lord God, I have no pleasure in the death of the wicked.—Ezekiel 33:11.

Many years after the kingdom of Israel was taken captive by the Assyrians, Judah was carried away to Babylon. Judah's captivity was in three stages, covering about twenty years. The first deportation was while Jehoiakim was king. Daniel and his friends went into captivity at this time (Dan. 1:1-6). The seventy years captivity dates from this time. The second deportation was while Jehoiachin reigned. Most likely Ezekiel was carried away with this second company (Ezekiel 1:1-2). The third deportation, some twelve years after the second, is the one described in our lesson. At this time the greater part of the nation was removed to Babylon. Only the poor and unimportant were left. Jerusalem itself was destroyed at this time.

I. Jerusalem Besieged (vv. 1-3). Zedekiah owed his kingship to the king of Babylon (chapter 24:17), who appointed him to the throne after the removal of Jehoiakim. His name was changed from Mattaniah to Zedekiah. He was not a good man (24:19). Though having his position by the will of the king of Babylon, he rebelled against that king. He thought that by the aid of the surrounding nations, the Chaldeans of Babylon, Zedekiah could resist submission, but the king refused. Nebuchadnezzar came in person with all his host and laid siege to Jerusalem, even building forts against it (v. 1). This siege lasted for about a year and a half. For a while during that period the Chaldean army withdrew because of the appearance of Pharaoh's army (Jer. 37:5). Shut out from help from without, the Jews soon were famishing for want of bread. The horrors of this famine were awful. For a description of it one should read the book of Lamentations (Lam. 4:10). The richest, even ladies in silken robes, wandered about searching for scraps in the dung heaps (Lam. 4:5-10). Their tongues clave to the roofs of their mouths, and their skins were dried up. Added to these horrors were murderous fights between the Jews and the Chaldeans. Some wanted to surrender; others insisted upon holding out.

II. Zedekiah's Flight (vv. 4-7). At length the city was broken up, and the king and his warriors fled by night. His thought was to escape to the country beyond the Jordan. The Chaldean army overtook him, scattered his army, and carried Zedekiah to Riblah, where Nebuchadnezzar had his headquarters. Here judgment was passed upon him. In his trial it was shown that his solemn oath of allegiance to the Chaldeans had been broken, thus showing himself a traitor (II Chron. 36:13). As a punishment for his treachery his own sons were slain before him, his eyes put out (v. 7), and he himself carried to Babylon, where he remained a prisoner till his death (Jer. 52:11). In this we have a marvelous fulfillment of prophecy (Ezekiel 12:3), which says that Zedekiah shall be taken to Babylon and die there and yet not see the city. He could not see it because his eyes were out. Let us learn from this that which God says will surely come to pass, even though we cannot explain its details.

III. The Destruction of the City (vv. 8-10). Not only were the people taken captive, but the city itself was subjected to the utmost rigors of war. They plundered the house of the Lord, the palace and the houses of the rich, and then consigned them to the flames (v. 9). They even broke down the walls of Jerusalem (v. 10) and massacred many of the people (Lam. 2:3-4).

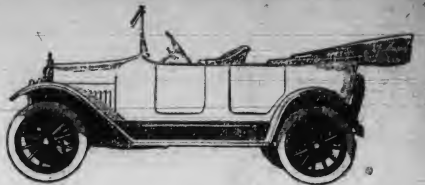

IV. Disposition of the Inhabitants and the Contents of the Temple (vv. 11-21). 1. The inhabitants (vv. 11, 12). They were divided into two classes, those who had deserted to the Babylonians during the siege, and those who were found inside of the city at the time it was taken. Many doubtless deserted to the Babylonians during this siege, as even Jeremiah was arrested on this charge (Jer. 38:13). The poor of the land were left to be vine dressers and husbandmen. The wealthy and influential were taken away, as they would be of value to the conquering nation; besides they would be a menace if left behind. The poor were left because pauper captives would be a burden.

2. The contents of the temple (vv. 13-21). From the temple which had been twice plundered before (II Chron. 36:7, 10), much of gold, silver and bronze vessels as still remained were taken, even the great pillars of the molten sea. The captives and the treasure were delivered to Nebuchadnezzar at Babel, where some of the captives were put to death.

Maxwell Means Small Up-keep.

Maxwell Means Durability.

WHY THAT CAR SHOULD BE A

MAXWELL.

Most miles per gallon. Most miles on tires. The Maxwell Car is mechanically right. The price is right \$745.00 f. o. b. Detroit. Before you buy, we want that you to give us a chance to show you one of these cars, and explain same fully. Yours to please

JOHN SMITH, Grant, Ky.

All of the Year's...

PICTURES BRIGHT SIDE OF BATTLE FRONT

That the battle front in France to which American soldiers are now going has its bright sides, is not appreciated, was brought out strongly by John Barrett, director of the Pan American Union, in addressing the Officers Corps at Fort Myer. Directors Barrett, who based his conclusions, which he made at the front when in France last autumn, said:

"So much is written and said about the terrible phases of war and the battle front, which frighten parents, discourage enlisting, and inspire efforts at exemption, that something should be said without exaggeration, and the brighter conditions upon and behind the firing line. Also every man who fights or visits the front agrees that the scenes are happenings in 'no man's land' and the advanced trenches during actual battle are literally horrible. He knows that there are other phases of the situation which prove that war is not, after all, entirely 'hell.' Some of these favorable facts I now give.

"Only a very small percentage of the men at the so-called front are at one and the same time in the advance trenches or engaged in battle, and those stationed at the very front are relieved every few days. At regular and frequent intervals the men in the advance lines are brought back behind the rear lines for rest and change, and a certain percentage of them are furloughed occasionally to visit London or Paris.

"In the rear camps just behind the firing line there are for real organized arrangements for sports games, amateur theatricals, and other amusements to give diversion to the men, and, and always special attention given to the religious needs of the soldiers, not offensive but sympathetic, under carefully chosen leaders of the representative faiths.

"Those actually killed do not average one in ten and not more than 3 in 10 are severely wounded, while a surprising large percentage of those injured in battle recover and return to their regiments. The system of caring for the wounded and sick, from carrying men off the battle field until they are finally turned over to the hospitals far away from the din of the struggle, is now developed to a scientific perfection that can only be appreciated by those who see it working out.

"Cases of real cowardice and desertion are so rare as to be hardly the subject of comment or discussion. The esprit de corps of the rank and file, the cooperation of every man for the good of all, their team play, and their intense desire to punish the enemy impress all observers.

"The facilities for feeding the soldiers, both at the front and in the rear, including the most advanced trenches, are astonishingly perfected and very seldom is there any complaint as to the quantity or quality of the food. The arrangements for the receiving and the sending of mail, even for the men under fire, are almost as efficient as in any city during peace time, and an unrelenting effort is made to supply the dugouts as well as headquarters with papers, magazines, and books.

"There is no question that the experience at the front, no matter how terrible, instead of making brutes of the men, makes them more human, more sympathetic, more unselfish, and better men generally than they were before. The fearful strain of the battle front affects harmfully the nerves and strength of many men, the great majority who are undisturbed are in splendid physical condition and will not come out of the war as mental and bodily wrecks, as often predicted."

Dead Man Found at Constance

Henry Lory, 40, boat builder of Dayton, Ky., who for the past week had been missing from his home, was found dead on the river bank at Constance, Sunday at 11 a. m.

He apparently had been dead for more than a week. Near his body was found a revolver, with which police believe he ended his life, as several shot wounds were found in his body.

The body was found by Charles Ottens, at Third avenue, Dayton, Ky., who for several days had been a member of searching parties sent to find Lory.

Members of the family knew of no reason for him to end his life. He, until about a month ago, had enjoyed perfect health. He had his habit, they said, to go on fishing excursions without notifying the family where he was going. He would stay away for several days at a time, the family said, however, that he remained away was for four days.

W. L. Kirkpatrick sold last week to Louis A. Agn, of Lima, a neighborhood, a Maxwell touring car, and to Lester Gully, near Burlington, a one-ton Maxwell truck.

WALTON DEPARTMENT.

D. B. WALLACE, Manager.

Hand your news items to Mr. D. B. Wallace at the Walton Equitable Bank and Trust Co.'s building. He is also authorized to receive subscriptions and collect other accounts.

Mrs. Eli Conrad has bought a fine player piano.

Mr. and Mrs. Charles Slater, of Ludlow, spent Sunday here, guests at J. C. Miller's.

J. P. Johnson, of Union, and Robert W. Allen, of Landon, spent part of last week here.

Miss Beulah Rusk of Kenton-co. is spending the week here the guest of Miss Lena Bollington.

Found.—Lady's black ruffle neck lace on the highway. Call at the Equitable Bank and get property.

Chas. Childers of Latonia, spent part of the week here on his farm the guest of Mr. and Mrs. A. C. Norman.

Chas. L. Griffith left Monday for a motor trip thru the Blue Grass country in the interest of some of his farming supplies.

Misses Lottie and Emma J. Miller left last Friday for Louisville on a visit to their relatives Dr. W. W. Smith and family.

J. D. Renaker, of near Dry Ridge, one of the progressive and public spirited farmers of Grant county, spent Saturday here.

John W. Conley, of the Beaver Lick neighborhood, who was recently nominated as our county surveyor, spent Monday here.

Jao, E. Jones and three grandsons, and Conner Carroll of the Big Bone Springs section, visited friends and relatives here Tuesday.

Mrs. B. K. Sleet and little daughter Lucille who have been taking treatment in a hospital in Cincinnati, returned home Monday morning improved.

Lost—Gold watch Waltham movement; had a shoe string attached. Return to owner Robt. Chambers or to Equitable Bank and receive reward.

E. M. Schweizer, of Frankfort, spent Saturday here trying to close a trade for a farm in this quarter but was unable to consummate the deal.

Rev. and Mrs. E. C. Lacy and children returned last week from a very pleasant visit to their relatives at their former home in Tennessee, enjoying his month's vacation.

Dr. W. W. Evans, who has been visiting his nephew at Carlisle, Nicholas county, is now enjoying a visit to his old friend Smith Davis and family on the farm near Owenton.

Mr. and Mrs. J. T. Brugh and three children of Roanoke, Va., are here on a visit to their relatives Mr. and Mrs. J. C. Beedinger and are thinking of purchasing a farm in this quarter and locating.

Lambert Rouse, who has been here on a visit to his parents W. R. Rouse and wife, has returned to Stone, Pike county, where he is in charge of a department connected with a large coal corporation.

W. Robert Powers, the popular clerk in E. P. Northcutt's store, is enjoying a couple of weeks' vacation. Mr. Northcutt's daughter, Mrs. Wayne Byland, is assisting in the clerical work during Mr. Powers' absence.

Mr. and Mrs. G. W. Bassett of Dayton, Ohio, were here a part of the week having Geo. B. Powers show them some real estate with a view to making a purchase and becoming residents of this quarter.

Chas. Colston and wife who recently sold their new residence to Mrs. Maggie Whaley of Erlanger, has bought the lot of Lloyd L. Frakes in the Clark subdivision to Walton for \$225 and will erect a residence thereon.

Mrs. W. I. Johnson, of Mobile, Alabama, spent the first of the week here, guest of her uncle Judge Thos. E. Curley and wife. Her husband has been visiting relatives in Covington and is expected here this week.

There will be home coming meeting held at Richwood Presbyterian church Sunday, Sept. 2nd, and all of the old residents are expected to be there. A fine dinner will be served on the occasion. Everybody invited to attend.

Mrs. Laura Hayes-Riley, wife of D. P. Riley, died at her home in Kenton county, Aug. 14th, from blood poisoning. She was about 65 years old, and was the widow of John Hayes, when she married D. P. Riley about a year ago.

Miss Jennie Johnson of Williamstown, and sister Mrs. C. E. Jones of Lexington, were visitors here Monday looking over the property of Geo. B. Powers, the real estate agent, with a view to buying a good little farm in this quarter.

Jerry Lillard, of Williamstown, was here last week looking at several farms with a view to purchasing and moving to this quarter. Mr. Lillard is jailer of Grant county but his times expires Jan. 1st when he expects to return to the farm.

Archibald Acra and sons, Owen and E. S., and son-in-law J. W. McCordie and Geo. Thole, of Waterloo, were here last week getting the Riley saw mill outfit bought by Mr. Acra with which to cut a good sized tract of timber on land in his neighborhood.

Mrs. Lucy Williams spent Saturday and Sunday with relatives and friends at La Orange where her daughter Miss Juanita has been visiting the past couple of weeks, making the journey in their auto and at the same time taking a part of the Blue Grass section.

Funeral who has been in charge of the funeral home at La Orange, died at his home in that city last week.

Tuesday morning George Hewitt was backing his engine to attach it to the saw mill to move his threshing outfit from Thos. Hensley's to O. T. Gaines', and had lost control of the engine and the mill engine both went in the water and only the mill engine was saved.

JNO. E. WILLIAMS, Pres., Verona, Ky.

HUBERT CONNER, Secty. Burlington, Ky.

Local Happenings.

Personal Mention

C. C. Roberts is annoyed with his annual attack of hay fever. Harold Conner is clerking for W. L. Kirkpatrick, having begun last Monday.

Mrs. Anna Kirkpatrick was the guest of Burlington friends a few days last week.

E. E. Kelly has been suffering considerably the past week from an attack of shingles.

Mrs. Marcus Collins, of Prescott, Arizona, was in Burlington a short time last Sunday afternoon.

Mrs. David Brown and Mrs. Mary Carpenter, of Florence, were calling on Kirtley Rice, Monday.

Calvert Kirkpatrick and family of Bromley, were guests of relatives in Burlington, last Sunday.

Mrs. H. W. Shearer, of Newport, spent Saturday night and Sunday with her parents, Mr. and Mrs. P. A. Hall.

Mrs. John Tanner, of Erlanger, was the guest of Mr. and Mrs. Elmer Kirkpatrick from Friday until Monday.

Wm. Carpenter, wife and son, Denzel, returned Tuesday from a visit of several days to friends in Gallatin county.

Col. John R. Whitson, of Florence, was the guest of Mr. and Mrs. Dolphie Sobree a few days the past week.

Mr. and Mrs. R. A. Brady, of Bellevue neighborhood, were the guests of their daughter, Mrs. Emma Brown, Monday.

Misses Lucy Vaughn, of California, and Sallie Vaughn, of Walnut Hills, Ohio, are guests of their mother, Mrs. Mary Vaughn.

Miss Atha Mae Eddins assisted Mrs. Brown in the postoffice the past week while Miss Kathryn was visiting relatives in Bellevue.

Mrs. John Bots and son, Carl, and Miss Ruth Snyder, all of Petersburg, and Dudley Blyth, wife and two children, visited the Cincinnati Zoo last Sunday.

Lieutenant Ray Edwards, of Harrel, Ill., was the guest of his sister, Mrs. G. W. Tolin, several days the past week. He expects to leave for France about the 1st of next month.

Last Sunday Bud Baker, Carl Anderson and a couple of their lady friends visited the soldiers in the camp at Lexington, making the trip in Mr. Baker's Maxwell car. They report a very enjoyable day.

Dr. Reeves, Mr. and Mrs. John Henderson and Mrs. C. Hartsoog, of Owenton, and Mrs. George J. Jesse Ellis, of Covington, attended the funeral of

Mr. J. B. Buntz, who died last Friday.

Mr. Buntz shipped his household goods, Tuesday to Georgetown in E. Kelly's truck. Prof. and Mrs. Buntz will reside in Georgetown, although he is principal of the High School at Great Crossing, Scott county.

Ernest Arnold, who has been employed in this county engineering county roads, left Tuesday morning for Falmouth, Pendleton county, to spend a few days with his parents before reporting on the 25th inst. at the officers training camp at Fort Benjamin Harrison, near Indianapolis.

INCREASE GASOLINE

Through Reduction of the Gravity Two Degrees, Suggested By Oil Man.

New York.—In the August issue of the E. H. Clarke Monthly Investment Review Mr. Jefferson D. Shattford, President of the Barnett Oil and Gas Company, offers a new solution for the prevailing shortage in gasoline.

"By reducing the gravity from 66 degrees—the measure of standard—now supplied to 64 degrees, the actual output can be increased by about 900,000 barrels," he declares. "Moreover, such gasoline being heavier than that now in use, would produce about 5,000 more heat units per gallon, which would effect an additional saving of 350,000 barrels. This added to the increase obtained through the reduction of the gravity would give approximately 1,250,000 barrels additional supply."

"The total amount of gasoline then available would be sufficient to meet the demand during the year 1917. An annual amount of approximately 55,000,000 barrels is consumed in the U. S. by the 4,500,000 automobiles in use."

"The lowering of the gravity of gasoline to 64 degrees will not make the 'end' point too high to properly vaporize in any gasoline engine, and the efficiency of a gasoline of this quality, being straight refinery run, will be greater, costing less per mile than a higher gravity and solve the problem at least temporarily."

"Another important item in connection with the distribution of the gasoline is the car supply, the movement of tank cars being so wretchedly bad that refiners are unable to ship gasoline as fast as they make it, which assists in curtailing the supply at many points. It is essential that the Government insist upon the railroads moving tank cars promptly."

Moved Back to the Old Home

William Tiz and wife, colored, who went to Ft. Mitchell to work for Geo. W. Hill, Jr., have moved back. They were pleased with the position they had and would have remained. Wife's health had not begun to annoy him.

A Big Meeting Closed

A very successful protracted meeting held with Gunpowder Baptist church closed last Sunday when a considerable list of additions to the church was baptized. A big basket dinner was served at the noon hour.

The local draft board has sent out notices to 100 more of the men drafted in this county to appear before it next Friday and Saturday for examination. In all probability exemptions and disqualifications will exhaust the last 100 names before the county's quota is secured.

The exceptions filed to the sale of the land sold under a judgment of the Boone circuit court to settle the estate of J. S. Cullum, deceased, were heard by the court one day last week and overruled. The matter will be taken to the Court of Appeals.

Kentucky Crop News.

The crop in Scott county needs rain.

Tobacco around Riley is firing. In Brockbridge county there was never a finer prospect for tobacco.

The crop in Coffee county, Tennessee, is doing fine.

The South Carolina crop is coming on fine. High prices are indicated.

The situation in Bourbon county is very favorable. Plants are large and maturing rapidly and present prospects are that it will be housed in better condition than usual.

In Nicholas county the crop presents a fine appearance.

Rain is needed for the crop in Jessamine county. From many sections of that county comes the report of poor crop.

Rain in the tobacco section of Wisconsin has relieved the drought conditions somewhat, but general and copious rains are needed to insure a leafy crop.

In Fayette county it is thought the crop will be ready for cutting at about the usual time. The quality of the weed is better than last year and although buyers are offering 15 cents per pound for the new crop, not many sales are being reported. Farmers prefer to hold, feeling that they will receive around the 20 cent average.

The crops set out early in Montgomery county are in excellent shape. Some of the late is very short, not having produced much growth since transplanting.

Tobacco in Clark county is growing very fast in sections where rain has fallen but is at a stand still in the dry parts of the county. A few crops have been considerably damaged by hail.

Witnessed the Flag Raising

Several Burlington people attended the flag raising at Bellevue last Saturday afternoon. Sixty-five dollars was donated by the crowd for the benefit of the local Red Cross Auxiliary. A very pleasant and profitable afternoon was spent by all.

The entertainment given at Hobson Town Hall, Saturday night (Miss Fearless & Co.), by the Ladies Club of Bullittsburg and Bullittsville was a success in every way. The hall was filled and some had to be turned away as there was no standing room. The ladies deserve great credit for the way in which they put on their respective parts. Taking it all in all it was the best play that has struck the town in a long time. The proceeds of the night club about \$50, which will be used for the relief of the Ky. boys who have been called to the front. The Ladies' Society wishes to most heartily thank all who assisted in making the entertainment a success.

County Assessor W. P. Deeman is lying in a critical condition at his home in Pleasant Valley neighborhood. Several days ago a small pupil appeared on one of his lower limbs, and has in eloped into a very painful trouble, and the limb is badly swollen.

Tray of Packed Jars Ready to Be Placed in Homemade Water-Bath Outfit—Aluminum Pressure Cooker Also Shown.

PROFITABLE DISPOSITION OF ALL SURPLUS FRUITS AND VEGETABLES

Every Ounce of Food That Can Possibly Be Produced
This Year Will Be Needed—Housewives Can
Avoid Much Waste by Canning.

FIRST MAKE ALL NECESSARY PREPARATIONS

"One Hour From the Field to the Can," Is Motto Every Canner Should
Have in Mind—Unless Fresh, Crisp and Clean Produce
Is Used, High-Grade Article Is Impossible—
Equipment Necessary.

(PREPARED BY UNITED STATES DEPARTMENT OF AGRICULTURE.)

CAN SURPLUS FOOD, BUT USE JARS AND CANS WISELY

Don't have an empty preserving jar in your home next fall. Reserve regular light-sealing containers for canning foods. Concentrate products so that each jar or can will hold as much food and as little water as possible. Put up jams, jellies and preserves in wide-necked glasses sealed with cork or paper and paraffin. Don't can anything that can be kept just as well dried or in other forms. Dry navy and mature lima beans for winter use. Produce in your garden lots of cabbage, potatoes, and root crops that can be kept for winter without canning.—U. S. Department of Agriculture.

The waste of surplus fruits and vegetables in this country each year is large. It would be deplorable if this normal waste were allowed to go on this year when every ounce of food that can be produced is needed. The waste can be avoided in large part if housewives will can as large a part of the surplus perishables as possible. The first step is to see that all the necessary preparations are made before the vegetables or fruit are picked. "One hour from the field to the can" is a motto that every canner should have in mind. This is impossible if one has to prepare utensils and wash and scald cans after the fruits and vegetables have been brought into the house. The condition of these is a prime factor in determining the quality of the finished product. Unless they are absolutely fresh, crisp, and clean when they are put into the cans, a high-grade article is impossible.

When canning in small quantities, it is not necessary to purchase special equipment, although inexpensive portable equipment for use in or out of doors may be purchased. If considerable canning is done, such outfits will prove convenient and save labor. Especially is this true when a comfortable out-of-door place can be selected for the work.

The method of packing fruits and vegetables into containers and sterilizing the product after it is packed has superseded to a very large extent the old plan of cooking the food in an open kettle, transferring it hot to the jar, and sealing without any further sterilization. Since this is true, the first consideration is a sterilizing ves-

Primitive Decorations.

Townsend, an early Western traveler, tells that one day he met about a hundred Indians of the Sac tribe. "They were dressed and decorated in the true primitive style, their heads shaved closely and painted with alternate stripes of fiery red and deep black, leaving only the long scarping tuft, in which was interwoven a quantity of elk hair and eagle's feathers. Each man was furnished with a good blanket, and some had an undershirt of calico, but the greater number were entirely naked to the waist. The faces and bodies of the men were, almost without an exception, fantastically painted, the predominant color being deep red, with occasionally a few stripes of dull clay white around the eyes and mouth. . . . The squaws, of which there were about twenty, were dressed very much like the men, and at a little distance could hardly be distinguished from them. Among them was an old, superannuated crane, who, soon after her arrival, had been presented with a broken umbrella. The only use that she made of it was to wrench the plated ends from the whalebones, string them on a piece of wire, take her knife from her belt, with which she deliberately cut a slit of an inch in length along the upper rim of her ear, and insert them in it."—Youth's Companion.

Artificial Leg Made 300 B. C.

There is in the museum of the Royal College of Surgeons, Lincoln's Inn Fields, London, an artificial leg, made about 300 B. C., of bronze, wood and iron. Who has not heard of the famous "Iron Hand" made in Nuremberg, Germany, in 1504, for the German knight, Gort von Berlichingen? Among the old-time Indians ears, noses and lips of plaster were quite common, one of their ordinary punishments being to cut off these useful parts of the human anatomy. Greek and Roman veterans who had lost a leg or an arm in the wars used to replace them by substitutes, and Flinius speaks of a Roman soldier who about 150 years B. C.—was famous for the wooden hand with which he was still able to fight the Roman legions. In 1004 the Duke of Brunswick had to use an artificial hand.

Physical Courage in War.

Nearly always physical courage results from a comparative lack of perception. It leaves out many considerations, some of them important. In wartime it finds justification in its generosity. To the cause it is working for it freely gives all that it has behind it, including love of life itself. It actually seems to court death. With joy it takes the road of sacrifice. For this reason it is always beautiful. And with it there must go a marvelous exhilaration, like a spiritual intoxication. When it reveals itself in mass courage, multitudes of men exposing themselves for the same cause, it must open up the profoundest depths of emotion.

Looking Forward.

To refuse to be satisfied with one's accomplishments, however well a work has been done, or however much it is praised, is essential for real progress. When a noted astronomer modestly explained his triumph by saying, "It is because from the time I was a boy, no matter what I had to do, I tried to do it a little better than it had been done before," he suggested a worthy purpose for everyone. For such an ideal is always looking forward; the famous man considered not so much what others had done as what he, with the benefit of others' experience, could do. And when he had done well, he thought not of his past successes but of his future possibilities.

Prefer Dynamite to Sugar.

At first sight it would seem that dynamite was a cargo to be carefully avoided. But from a sailor's point of view there are far more dangerous loads. He dreads for instance, a cargo of sugar. Put hundreds of tons of cane sugar in casks in the hold of a vessel and let the ship steam through a bale of hot weather. The odor is sickening. The sailors cannot get the sweet taste out of their mouths and crave vinegar or lemon juice—anything sour. They lose their appetites and are always glad when a voyage on which the cargo is sugar is over. Coffee is as disagreeable as sugar, in addition being very dangerous.

A Traveler's Companion.

A girl who was setting out on quite a long journey was provided by her friends with a joke-book as an antidote to homesickness. Naturally she did not keep its contents to herself, so sociability was promoted among her fellow travelers. The book was just a small, plain notebook, with an amusing inscription on the flyleaf. In it were jokes and funny pictures cut out of magazines and papers and pasted in. Such a book is easily made, and comes in well for soldiers and hospital patients as well as girl travelers.

Guatemala Is Cosmopolitan.

Guatemala is the most cosmopolitan of countries. Although little more than half the size of Great Britain, no fewer than 18 different languages are spoken by its inhabitants. An official proclamation, containing a declaration in each one of these tongues, is a very cumbersome-looking document. The capital of the country—a handsome city of the same name—is laid out on a gridiron plan, with wide streets and

THE KITCHEN CABINET

Don't ever stop to realize that no one is wholly indispensable in this world. Someone can take our places if we drop out of the picture. That is offered to us and get the most out of life we can?

GOOD COMPANY DISHES.

With eggs and butter so high we need to use both of these precious foods with care, hence cakes with large amounts of eggs or butter are quite too costly for everyday use.

Imperial Pound Cake.

—To a half pound of softened, not melted butter add a half pound of sugar; when well blended add the grated rind and juice of a lemon, a half cupful of citron, finely shredded, and a half pound of raisins, dredging the fruit with part of the flour. Sift a half pound of flour with a fourth of a teaspoonful of soda; the yolks of five eggs are added to the sugar and butter, the whites beaten stiff and added alternately with the flour. Add a half cupful of cold meats and bake in a tube pan an hour and a half in a moderate oven.

Orange Sauce to Serve With Roast Lamb.—Use a half cupful of gravy from the roast; make a brown sauce, using three fourths of a cupful of water, adding the gravy, two tablespoonfuls of flour, the juice of two oranges and the finely shredded peeling of an orange which has been boiled in hot water five minutes then drained; season with salt, cayenne and the juice of a lemon.

Apple Fritters.—Make a batter of one and a third cupfuls of flour, two teaspoonfuls of baking powder and a fourth of a teaspoonful of salt, sifted together, and mixed with two-thirds of a cup of milk and an egg. Cut two sour apples into bits and stir into this batter. Drop by spoonfuls into hot fat and brown. Roll in powdered sugar and serve with roast pork or chicken.

Caramel Sponge.—Soften a fourth of a package of gelatin in a fourth of a cupful of water. Brown a half cupful of sugar, then add a cupful of boiling water; stir until dissolved; add the gelatin and stir over ice water until the mixture thickens. Have ready two eggs white, beaten stiff; add them to the gelatin mixture, continue beating until it will hold its shape when turned into a mold. Serve with a cupful and a half of rich milk. Flavor with vanilla if desired.

Nellie Maxwell The KITCHEN CABINET

Just whistle a bit if the day is dark.
And the sky be overcast;
If mite be the voice of the piping hawk,
Why, pipe your own small blast.

DAINTIES FOR THE TEA TABLE.

A sandwich or two with a small cake or cookie with a cupful of tea is sufficiently sustaining for a light refreshment.

German Cookies.—Stir until foamy one and a third cupfuls of powdered sugar and three eggs, add a few drops of vanilla and two cupfuls of flour. Grease the tins, sprinkle with flour, then drop in teaspoonfuls in round heaps far enough apart so they do not touch and bake in a moderate oven.

Bund Kuchen.—Beat a half cupful of softened butter with one half cupful of sugar, four eggs, the grated rind of a lemon, one-half pound of raisins, one teaspoonful of salt; add a yeast cake, softened in a little warm water; one pint of lukewarm milk and three and three-quarters cupfuls of sifted flour. Work the dough with a wooden spoon, butter the pan well and sprinkle with flour, pour in the dough and let it rise for three hours in a warm place, then bake in a hot oven. Cover with paper if it browns too quickly.

Schwarzbred Tort.—Cut in thin slices rye bread well dried, or dry in the oven, then grate fine. Pour over a cupful of the crumbs, a tablespoonful of vanilla and a half cupful of grape juice. Add two cupfuls of finely chopped almonds, four ounces of citron, the rind of a lemon, one teaspoonful of cinnamon, one saltspoonful of cloves, and two tablespoonfuls of flour. Now stir one and a third cupfuls of powdered sugar and the yolks of a dozen eggs until foamy, using four yolks to begin with and adding them one by one, stirring well after each addition. Mix lightly, then add the stiffly beaten whites. Butter the baking pan, sprinkle with crumbs and put in the cake mixture. Bake forty-five minutes. If it browns too rapidly, cover with paper.

Butter Cookies.—Stir and beat a cupful of butter, one-half cupful of sugar, one whole egg and the yolks of two, flavor with almond and add two cupfuls of flour, sifted with a teaspoonful of baking powder. Cook for an hour, then cut out with a small cookie cutter, brush with the white of an egg and sprinkle with granulated sugar.

It Helps!

There can be no doubt as to the merit of Cardui, the woman's tonic, in the treatment of many troubles peculiar to women. The thousands of women who have been helped by Cardui in the past 40 years, is conclusive proof that it is a good medicine for women who suffer. It should help you, too.

Take CARDUI

The Woman's Tonic

Mrs. N. E. Varner, of Hixson, Tenn., writes: "I was passing through the . . . My back and sides were terrible, and my suffering indescribable. I can't tell just how and where I hurt, about all over, I think. I began Cardui, and my pains grew less and less until I was cured. I am remarkably strong for a woman of 64 years. I do all my housework. Try Cardui, today. E-46"

Take Your County Paper.

LEARNING A NEW JOB.

To many a young man "going to the war" has another meaning than that of facing danger, perhaps meeting death. Of course, no man really wishes to be killed or wounded, but, after all, his father or his grandfather took the chance, and he would not wish to do less than they, says Columbia (S. C.) State. But it does go hard with many a lad to face the prospect of giving up a comfortable living, a place of some little consequence, perhaps, in his small world, a berth which he has won for himself by the sweat of his brow or the not less laborious sweat of his brain. All his store of business knowledge goes for naught and he must start over again at an unaccustomed trade to carve out a new niche in which he can take his place. There is something pathetic in this, but there is also much of the inspiring. For how many of our young men have done or will do just that—abandon the tasks they know and like for tasks which they do not know and which they never will learn to like? But they do, not grumble at the need. "The serf," as the old Saxon motto puts it, "has a warm seat by the fire, while the free man fares to the fight." But who of the young Americans of today would not rather be the free man in danger and trouble than a serf in safety?

It is not doctrine that will save the world. Nearly all of it is man's view made up of small experience and varied facts. Truth does not come that way. It comes through the heart and not through the head. The neglect to recognize this idea is what tears politics, society, religion into shreds. There are 160 churches in this county holding different doctrines, and new ones are constantly and incessantly springing up. This is because of the false notion of independence and a determination to do one's own thinking. That is the course which makes men drift farther apart in religion. The thing to do to correct this tendency is to substitute faith for belief. The former is of the heart, the latter of the mind. One is an attitude, the other an uncertainty. How can the situation be improved? Simply by practicing faith in God and loving one's fellow-creatures, says Ohio State Journal. We talk about church union. This is the only way to reach it—forget doctrine and grow the fruits of the spirit.

One effect of the British conscription act has been to take many men from service on Atlantic liners. The executive officers are not disturbed, but firemen and seamen under forty-one years of age are likely to be taken for the army, necessitating the employment of older men in their places. All the waiters and bedroom stewards under the age named are also liable to be conscripted for the war. Their places will be supplied in many instances not by old men, but by young women. Stewardesses have looked after women passengers in their cabins for the last 75 years. It is safe to expect a considerable increase in the number of stewardesses and also the employment of women instead of men to perform the service of waiting on table on the ocean liners.

Late statistics show that uneducated laborers earn on the average \$500 per annum for 40 years, a total of \$20,000; high-school graduates earn on the average \$1,000 a year for 40 years, a total of \$40,000. This additional education requires 12 years of schooling of 180 days each, a total of 2,160 days of school. If that many days add \$20,000 to the income of life, then each day at school adds \$9.02. The child that stays out of school to earn less than \$9 per day is losing money, not making money.

The account of the deeds of the aviators in the battle of Messines sounds more like flights of the liveliest imagination than like sober fact. What the future will develop in aerial activity can only be guessed at, judging by the achievements of the present. This new and wonderful military art is going to be among the chief factors in revolutionizing modern warfare.

A mistake in keeping dates revealed the fact that a San Francisco man had two wives and two homes. The modern Solomon must either be a coal baron or a food speculator. Nobody with ordinary means would attempt such an arrangement in these times.

The woman writer who wants to know "Why do men prefer second-rate women?" may not have guessed that it's because they know second-rate women are plenty good enough for them.

It is now proposed to eliminate the teaching of German from the public schools. Some of us have wondered all along what it was put there for.

45 OUT OF 138 MEN

Examined Were Accepted By The County Board and Certified to District Board.

Thirty-One More Required to Furnish Boone's Quota.

The County Exemption Board completed its examination of exemption claims last Friday. Forty-five of the men examined were accepted and certified to the District Board; 55 were excused on account of being married and having dependents; three were exempted on account of infirm parents; one was passed to an Ohio Board; one had already enlisted, one was crippled and will report later, and 32 failed to pass the physical examination.

The following were accepted and certified to the District Board: Lawrence Hartman, 275. William Rice 568. Walter Jones 597. Cecil Presser 437. Hugh Ryle 487. James M. Code 140. Harold Gaines 432. Albert Stevenson 692. Claude Sturgeon, 530. John Baker, 54. Harry M. Hughes, 391. Rafe Koons 353. Allie Grant 221. Perry T. Rector 470. Roy S. Hanson 177. Roy D. Stamber 324. Howard Johnson 323. Herbert Snyder, 549. William Morris, 363. Herman Wingate 642. Harvey Sturgeon 536. Luther Green Surface 545. Alfred Stanley Carson 126. Charles Peck 432. William Aydelotte 18. Henry L. Stucky, 596. Lee Abdon, 155. Albert Stucker 571. Kirtley Steele, 525. Charles Waller, 638. Gussie Rich, 493. Frank Adde, 560. Lloyd C. McElroy 392. Henry Clay Moyer 383. William Laver Slayback 576. Claude E. Black 49. Stanley Ryder 430. Frank Klaerner, 345. Garnett Tolin 604. Harry R. Dixon, 183. Dalton Jones 321. Myron Smith 601. Geo. M. Sparks 519. Paul Damrath 168. Allen M. Darby 175.

The following were exempted on account of being married and having others depending upon them: Frank Klapp, Jr., 337. John Cunningham 107. Lloyd Underhill 616. Stanley Ryder 430. Calvin Jordan 309. J. W. R. Bradford 43. Henry Lee Ayler 40. William H. Hays 187. Chester Tanner 606. Charles Rue 513. Thos. B. Black 46. Edward Collins 117. David Smith 390. Snowden Humphrey 280. Howard Kelly 332. Charles Marksberry 379. Samuel W. Kite, 243. Richard Loudon, 530. Elmer Goodridge, 218. Leroy Utz 620. Henry Sullivan 550. Henry Southern 374. Emmett Kilgour, 341. Walter Lewis, 360. Harry G. Gable, 458. C. W. Lawrence 356. Stanley C. Clora, 128. Edgar Ayler, 6. William Warner, 664. Charles W. Carpenter, 103. John Snelling, 556. Elmer Cahill 154. John Allen 30. Ben E. McHugh 388. Emory Basil Smith 588. Wm. Thomas Chambers 122. Thos. E. Henson 222. Thos. P. Williamson 656. Elmer Hood 292. Ralph E. Reeves 504. Charles W. Pepper 437. Cecil Williamson 621. Bernard Schuler 532. Ira J. Griffith 212. Fenj. Griffith 212. Kenneth W. Ayler 8. McKinley Snow 567. Allan P. Utz 622.

The following were exempted on account of infirm parents: Wayne Hearne 297. Boyd Webster 307. Albert Isaac 305.

Notices to Lodges of Boone Co.
It has been thought for some time that the lodges of Boone county were as follows: The general met at Big Bone Springs on the afternoon of August 11th, and began the work. By vote of the body the meeting was called to meet Sept. 8th, 1917, in the afternoon, at Court House in Burlington.

The lodge in the county are cordially invited to send representatives to this meeting, and take part in the work. Come and let us discuss plans. We believe that great good can come only by cooperation. Fraternally Yours, MRS. E. H. CLOHE, Secy

OUR WEALTH IN THE WAR.

Rich Americans Are Showing at Present a Commendable Spirit.

Some demagogues who are not above doing the Kaiser a service would make the impression, if they could, that the war in which the country is engaged is a "rich man's war." That is what it was before the United States became involved in it. There were American manufacturers of arms and munitions of war who made enormous profits out of the war. Among these were the big steel companies.

But at a recent meeting of manufacturers of steel in Washington they expressed a willingness to do for their own country what they had been doing for other countries, with this difference—they left it to the Government to fix the price of the steel they might make and sell to the Government. When the seller permits the purchaser to fix his own price in the country he is buying, that is as fair as could be reasonably asked or expected.

Quite a number of the wealthy in the country have expressed not only a willingness to aid a desire to use their wealth for the country's good in this time of stress.

The great railroad systems of the country have of their own free will and accord organized and united their efforts so they have been doing splendid work in aiding the Government to make preparations for the war. All rich men are not as patriotic as they might be, but most wealthy Americans are showing at present a commendable spirit. The policy of Congress is to make the rich of the country pay the bulk of the war taxes, and about all that has been said about that has been not to tax the wealth of the country to an extent as to prevent investment in the industries and reduce the volume of production.

FUNERAL ARRANGEMENTS

Made and Friends Will Sing, Hail! Hail! The Gang's All Here.

Paris, Ky. — W. T. Fickel, of Paris, in his ninetieth year, died last night after a long illness. He has been a resident of Paris for many years, and is well known to the people here. He is not a believer in the Bible, yet he has read it through many times and is now posted on its contents, being able to quote almost any verse or chapter from memory. For 40 years he has been a member of the French church, and he has been a very active member of the church. He has been a very active member of the church, and he has been a very active member of the church.

A few months ago, feeling that his days on earth were numbered, and not believing in the existence of the soul after death, he made all arrangements for his funeral. These arrangements were carried out to the letter by his friend, George W. Stuart, to whom he has entrusted his plans. The funeral was held in the Paris cemetery, he arranged with Chas. Shea, a Paris sculptor, to carve his likeness upon the tombstone, and the date of his birth and death was carved upon the tombstone. When the sculptor had completed his work and the monument had been set up, Fickel had his photograph made sitting besides his tombstone. He is especially pleased over the fact that he has been able to visit his own grave and stand by his features upon his own tombstone.

In lengthy instructions to his executor he provides for his funeral as follows: The funeral is to be held in the Paris Opera House. Mrs. Josephine K. Henry, of Versailles, or Dr. Wilson, of Cincinnati, deliver the funeral oration. Signs of mourning whatever shall be indulged in, but on the contrary he wishes all who attend to have a good time. Refreshments will be served to the ladies and cigars to the gentlemen. At the conclusion of the ceremonies at the Opera House the body is to be taken to the cemetery, headed by a brass band playing "Dixie," the Star Spangled Banner, and his favorite hymn, "The Battle Hymn of the Lord." A Hot Time in the Old Town Tonight. No services are to be held at the grave other than that of a cheer by the band, which will be for the benefit of his friends who attend.

Notwithstanding the peculiar conditions for his burial prepared by him, Mr. Fickel is a man of unusually strong mind. His disposition is childlike and he believes in everyone. At one time many years ago he was a prominent member of the Christian church of Paris, but an injury done him real or fancied, drove him from the church and turned him into an infidel.

Will Meet Sept. 5, 6 and 7.

Announcement has been made that the fourteenth annual reunion of the Morgan's Men Association will be held at the Olympic Springs, Bath County, Ky., again this year, the dates selected being September 5, 6 and 7. In addition to the Morgan's Men, an invitation has been extended to the Sons and Daughters of the Confederacy to be present.

WAR EFFICIENCY.

The System Begins to Work More Smoothly In Capital.

Washington — Washington is beginning to develop real efficiency. Work is progressing with greater precision and rapidly than ever before. Even now, of course, with due regard for the sudden transition from a peace to a war basis, this efficiency is only of comparative character. But no one who has been constantly on the ground will deny that conditions have improved and that the system, which only a few weeks ago seemed to have collapsed under the strain, has straightened out and stiffened up and asserted itself as a real factor in the more or less grim proceedings.

One particular thing required to enthrone the American people is not yet in evidence. System works too smoothly and too quietly to appeal to the imagination. Personality must do it. And thus far personality has been lacking in the men who are in charge among the generals of the army and the admirals of the navy; but, after all, with the exception of the mention of Funtun, but Funtun is dead. The name of Leonard Wood was one to conjure with, but the duties assigned to Gen. Wood are of a character to keep him busy and prevent the Government from exercising the magic of his name. Gen. Pershing, who has made a place for himself in the American heart, is too far away to make his appeals count.

Enough to be stirring. Nor does the American navy supply the deficiency of the work of the navy and the achievements of its personnel, are the force of circumstances, are shrouded in mystery when on occasion some of its performances may be given to the public in such form as Secretary Joseph Daniels elects. Or course, keep him out of the American figure in the war is Woodrow Wilson. But the President, by virtue of his reclusive habits, has not been able to soften by the care and burdens war has imposed upon him, comes but little into contact with the men of the outer world and his scant opportunity to impress his personality direct upon the American people it would be putting it too strongly to say that his love of isolation is the subject of complaint or criticism; rather it has been the occasion of marvel that in spite of Wilson's desire to be alone, and his unwillingness to be disturbed, he is engaged with the people and to respond to them with instinct so unfailing. When the United States of the world apparently existing as the result of the President's idiosyncrasy has been reported to the White House, and President Wilson's desire to be alone, and his unwillingness to be disturbed, he is engaged with the people and to respond to them with instinct so unfailing. When the United States of the world apparently existing as the result of the President's idiosyncrasy has been reported to the White House, and President Wilson's desire to be alone, and his unwillingness to be disturbed, he is engaged with the people and to respond to them with instinct so unfailing.

THE ERLANGER FAIR

Was a Big Success In Both Attendance and Financially.

The Erlanger fair was attended by an immense crowd last Friday and Saturday, and everything indicated that the fair was a big financial success this year for the first time. The races Friday and Saturday afternoon were exciting and there was no loss of interest between heats as is often the case, consequently the spectators were entertained all the time, which was very much to their liking. The rain, that was feared to ruin the fair, did not come until the first day proved a great blessing as it cleaned up the dust so thoroughly that it did not become annoying at any time during the remainder of the week. The exhibition of horses, dogs, cats and in floral hall, was very satisfactory to the management.

Crops Greatly Benefitted.
The rains that fell in the county last week will do a world of good both for the tobacco and corn crops and will be a great help to gardeners who had not already burned up. Pasture and live gardens will be especially benefited. This change in the appearance of vegetation was apparent in a few hours after the rains.

An epidemic of typhoid is raging in many counties of the State.

Forty Years Ago Today

Items Taken From the Issue of The Recorder of August 30th, 1877

Goldsmith Maid's best time at Cynthiana was 2:17 1/4. Considerable tobacco in south end of county destroyed by hail. Jas. Westaby announces that he will take passengers to and from the Florence fair this week at 50 cents round trip.

Allen Southern was bitten by a dog and the Tanner mad-bone adhered to the wound two hours and ten minutes.

The Old Baptist Association held last week at Dry creek church was well attended.

The sale of the personal estate of O. W. Huey was largely attended last Thursday.

Miss Margaret Kelly has been dangerously ill of typhoid fever for several weeks.

EDGAR C. RILEY

Resigns as Superintendent of Boone County Schools to Take Effect Sept. 1st.

Edgar C. Riley has resigned the office of County Superintendent of Schools to take effect September 1st, when, doubtless, J. C. Gordon, Democratic nominee for that office, will be appointed to fill the vacant place. Mr. Riley has done a good work handling the schools in this county for the last seven years and eight months and has been a marked improvement in Boone county educational matters under his administration, and the incoming superintendent, while he will have the advantage of Mr. Riley's work for many years, will find that, to keep local educational matters up to their present standard of efficiency, will require much time and a great deal of work.

Took Everything But the Auto.

A thief swiped two tires, two metal rims, two inner tubes and two wheels from Sherry W. D. Cropper's automobile at the Erlanger fair last Friday afternoon. The property stolen composed an emergency outfit and was strapped onto the back of the machine, and to release the thief had only to cut the leather straps. The outfit was worth \$25 and the sheriff says it would have been much cheaper to him had they got his pocketbook. A policeman was in the vicinity of the car and the thief, but, of course, the thief watched for an opportunity to do the job.

Will Get Value Received.

The work of waterbinding the repair work on the Burlington and Petersburg pike, started by James B. Smith and sons, will, in all probability extend to Idlewild, as the land owners along the road and several renters have signed their willingness to furnish the water and put it on the work. Where screenings and water have been used a nice road is the result and the road being properly crowned there is no question but what those who are contributing the extra time and labor in getting the road watered, will get value received.

Miracle Wheat Wins.

Mr. Adams, who owns a small farm near Payne's Depot, took prizes at the Lexington Fair amounting to \$24 on a half-bushel of "Miracle" wheat. He raised about 20 bushels of this wheat, cut it with a cradle bound it by hand, beat it out in a hog box with a flail, fanned it and took half a bushel of it to the Lexington Fair and won first prize.

Institute Next Week.

The Boone County Teachers' Institute will convene in Burlington next Monday for a week's session. This annual is not at all popular with the teachers, yet it can be said it is not entirely barren of good results.

Getting Along Nicely.

Geo. Hewitt, who was thought to be very seriously hurt one day last week when caught between a traction engine and a separator, is getting along nicely and has about recovered from the effects of the accident.

WALTON DEPARTMENT.

D. B. WALLACE, Manager.

Hand your news items to Mr. D. B. Wallace at the Walton Equitable Bank and Trust Co.'s building. He is also authorized to receive subscriptions and collect other accounts.

FOR RENT—Nice dwelling house of six rooms in Walton, D. B. Wallace, Walton, Ky.

Mr. and Mrs. Minnie Robinson, of Gallatin county, near Napoleon, were visitors here Saturday.

Mrs. Mollie Roswell of Carrollton, visited friends here Monday, going to Florence to visit some relatives.

Frank Rook, of Williamstown, and Mr. and Mrs. Caldwell of Jonesville, were visitors here last Thursday.

Miss Leota Caldwell of Norwood Ohio, spent part of the past week here, guest of her aunt, Mrs. Mattie Daubman.

Mrs. W. P. Foreman and children of Corinth, Grant county, spent part of last week here and at Verona with friends.

FOR RENT—House of 4 rooms, furnished, or three unfurnished, during the school term. C. C. Metcalfe, Walton, Ky.

Raymond Roberts, employed on the L. & N. Railroad at Jonesville, spent part of the week here with his mother, J. Kirkley Roberts.

Robert P. Coffman who has been with a coal company in West Va. arrived here last week, and is now to his mother Mrs. Alice Booth.

J. W. Glover, of Williamstown, and Joe Noel of Carrollton, were here Wednesday looking over the tobacco situation in this county.

Mrs. Chas. H. Young of Folsom, Grant county, was a visitor here last week, returning from a visit to her parents at Lawrenceburg, Indiana.

Robert Littrell who moved from Beaver Lake to Metamora, Ind., where he resides on his farm, has been in very poor health the past several months.

O. Y. Webster of Gallatin county, near Warsaw, was here last Friday looking over some farms with a view to buying and moving to this quarter.

Mrs. A. J. Littrell, who has been very ill with rheumatism in her leg, and is able to discard her crutches which she had been using for some time.

Geo. M. Stevenson and Court Lillard of near Blount, Ind., were here Friday looking at the stock sheep offered for sale by Alphin & Dugden with a view to making a purchase.

Mr. and Mrs. Claude T. Harris of Covington, were visitors here Wednesday. His mother who has been the guest of Mr. and Mrs. L. L. Hopkins in Kenton county, accompanied them home.

Mr. and Mrs. Jno. C. Miller spent Thursday at Landing the guests of Mr. and Mrs. John L. Jones who have bought the Chas. Craig farm of ninety-seven acres in the East Bend bottoms for \$7,500.

Wm. Littrell who formerly resided near Walton is seriously ill with tuberculosis at his home near Vanceburg, Lewis county. His brothers Conner and Claude Littrell spent the past couple of weeks with him.

Mrs. Genevieve Greenoe of Louisville, was here on a visit to her cousin Mrs. Edward Fullilove. Her little daughters who have been here on a visit for some time will return home with her the latter part of the week.

Mr. and Mrs. J. B. Woolery, of Falmouth, who have been enjoying a visit to his farm near Crittenden, the Politt farm, visited here Saturday. Mr. Woolery is cashier of the Citizens Bank at Falmouth and it is enjoying unusual prosperity.

Dr. and Mrs. Jos. Baker of Columbus, Ohio, and Dr. and Mrs. H. W. Stallard and little daughter of Toledo, Ohio, are here on a visit to Judge and Mrs. Thos. F. Curley, after a pleasant visit to relatives in Nelson county and at Sanders.

Rev. Albert S. Alphin and wife of Pawnee Rock, Kansas, are here on a visit, and Rev. Alphin is conducting a protracted meeting at South Fork Christian church. He was born and reared in Grant county and is a son of Zeb Alphin of that county.

Wm. C. Readnor of Cincinnati, spent the first of the week here visiting his father Jos. Readnor who still continues ill. Mr. Readnor and his son Willie went to Stamping Ground, Scott county, Monday, to visit relatives and Willie remained for the week.

Charles E. Butler will sell at Chas. Abernathy's sale, Sept. 3d, 10 extra Jersey cows and heifers—a grand lot of cows in full flow of milk; 17 extra black-faced ewes, and one cream separator, 750 lb. capacity and has been used only sixty days.

M. J. Worthington of near Ellis Station, spent Friday here with friends and left Sunday for Rouleau, Saskatchewan, Canada, where he has interests and will assist in harvesting the big grain crop of that section the cutting and threshing beginning next week.

Mrs. Julia Brinley of Jacksonville, Florida, arrived here last week on a visit to her sister Mrs. L. C. Hill with her husband who has been seriously ill with rheumatism which has affected her heart. Mrs. Brinley's condition was very serious last week but she is now improved.

Prof. J. C. Gordon and two daughters Misses Mary and Edna moved to Burlington the first of the week where they will make their home as Prof. Gordon was recently nominated as County School Superintendent. Prof. Gordon and daughters are very popular here with a large circle, and their departure from Walton is sorely regretted as Prof. Gordon has been a very good and successful worker.

a most estimable young lady, the daughter of Mr. and Mrs. John C. Miller, and had recently gone to Louisville on a visit, Mr. Kinslear who is a nephew of Mr. and Mrs. R. I. Ratcliff, has been at Cincinnati for some time in the employ of the Cincinnati Traction Co. in the office, and he and his charming bride have been sweethearts for some time, and knowing that she was visiting in Louisville he took advantage of the occasion to go there and persuade her to join her sister, Mrs. Robert Clements. They mortored through from Indianapolis and had a fine trip.

Wednesday morning a most refreshing rain visited this section and saved many thousands of dollars worth of corn and tobacco that was being destroyed by the long protracted drought. The rain came just in time to save much of the crop as it was in a sorry shape in some localities.

Prof. and Mrs. T. C. Frye-mov, here on a faneboing, Lewis county, last week and will make their home with Mrs. Alice Booth for the present. Prof. Frye is to have charge of the Walton Graded School this year and will come with the highest of commendation for high character and efficient work.

Chas. Shibley, our clever citizen who moved here from Huron, Alabama, several months ago, left Sunday for Brevoort Lake, Mich. to spend about a month for the purpose of disposing of a severe attack of hay fever with which he has been suffering. Mr. Shibley goes there every year in August and remains until October.

Edgar S. Albright and son, John and Chas. Rice, of Rockcastle co., and A. C. Blanford, of Livingston, were here Saturday en route home in their automobile. Mr. Albright is the publisher of the Mt. Vernon Signal, and the other gentlemen are employees of the L. & N. Railroad Company.

Prof. Ellsworth Regenstien of Newport, and Stanley Reed, of Louisville, were here Wednesday in the interest of the Inter-South Life Insurance Company. Prof. Regenstien was State Superintendent of Public Instruction under Gov. Wilson's administration and made an excellent official.

The residents of the Richmond neighborhood will have a "Home Coming" at Richmond Presbyterian church, Sunday, September 2, and all former residents who can be on hand expect to enjoy the pleasures of the occasion. A fine dinner will be served on the grounds and everybody is most cordially invited.

Prof. Cleveland Hedges and wife who have been in North Carolina for their health, going there from Texas, where he is in charge of a department of the State College at Bryan, spent part of the week here with his parents Mr. and Mrs. J. W. Hedges. Both are much improved in health, and he will be able to resume work next month.

Miss Jennie Lee Gaines has been very ill at the home of her parents Mr. and Mrs. W. Lee Gaines, and her condition was such Monday that a specialist was called from Cincinnati. He stated that while her condition was serious no immediate danger need be apprehended. Intestinal trouble is the cause of her illness.

Judge J. G. Tomlin, Jno. L. Vest, and W. T. Loomis, of Independence, spent Thursday at Dry Ridge looking over the affairs of the Caribol Hotel Company which was recently forced into bankruptcy. Mr. Loomis was appointed trustee of the property last Wednesday by the U. S. Court, and has taken charge with a view to continuing the hotel in operation until some satisfactory settlement is made with the creditors.

The general merchandise firm of Richey & Renaker will be dissolved. Raymond M. Renaker selling his interest to his father-in-law W. B. Johnson who will continue the business with his other son-in-law C. Milton Richey and will incorporate under the firm name of The Walton Mercantile Co. The business has been very prosperous, but Mr. Renaker desires to engage in other pursuits and Mr. Johnson is familiar with the trade and will be able to add to the business by his presence.

Judge J. G. Tomlin will leave next Saturday for Saratoga Springs, New York, to attend the annual meeting of the American Bar Association of which he has been a prominent member for many years and is the member for Kentucky for Kentucky. Judge Tomlin has been invited to stop at Philadelphia by Hon. Edward Merchant, a leading attorney of that city and make the remainder of the journey to Saratoga Springs in his car as it would be much more pleasant to motor through and enjoy the pretty scenery than to go on the railroad. Judge Tomlin has accepted the invitation.

The announcement of the marriage of Miss Hannah Heise, accomplished daughter of Mr. and Mrs. H. R. Heise of Richmond to Charles Edison Smith at Covington, Saturday, Aug. 24th, was quite a surprise to her many friends. The bride has held a position as teacher in the Covington Public School for the past two years. The groom whose home is in Central Kentucky, was the principal of the high school at Brooksville, Bracken county, last year. Mr. and Mrs. Smith were at Cold Springs, Campbell county, where Mr. Smith will take charge of the school and continue his studies at the Cincinnati University. Their many friends wish them a successful and happy wedded life.

J. J. Wilmot Kinslear of Cincinnati, and Miss Leticia Miller of Walton, were married at the residence of her aunt, Mr. and Mrs. Wm. Smith in Louisville, Saturday, Aug. 25th, by the pastor of the M. E. church, and the presence of a few of their immediate relatives. Miss Miller is N. W. Burkett, Auctioneer.

Tax-Payers, Notice!

The Tax-Payers of Boone County are hereby notified that I, or my Deputy will be at the places and on the dates named below to collect the 1917 State, County and County School Taxes. Will also collect the 1917 Graded Common School taxes in Verona, Bellevue, Union and Florence Districts on the same days other taxes are collected:

BIG BONE July 5th a. m. and Oct. 8th.	Bullittsville July 10th p. m. and Oct. 16th.

An Old Time Home-Coming Week for Boone County People.

16 to 1 Chance Soldier

Will Not Die in France.

Oscar Babson, statistician, sends this message to mothers of soldiers from his studies of figures of the French army:

Don't worry if your son is drafted. Fifteen men out of every sixteen have been safe from death during this war.

Under present conditions, where man power is being saved, not more than one in thirty is killed. Disease has taken no more than in peace times.

Only one man in 500 loses a limb, a chance no greater than in hazardous occupations at home.

Giving the matter further thought, Babson decided that it was the right of every conscripted young man, every volunteer, and the mothers and fathers of both, to know just what chances soldiers take. So he has arranged, publicly for the result of his investigations.

Babson's conclusions are based on the mortality figures of the French army during the full three years of the war. It should be remembered that the present fighting is not resulting in anywhere near the number of deaths that occurred during the first two years, when such battles as that at Marne, at Ypres and at Verdun sent the mortality rate soaring.

In short, the war has resolved itself into one of attrition; each army is trying to wear the other down without losing itself any more men than necessary. There is no reason to believe that this method of fighting will not continue when our troops reach the firing line. If it does, the chances of an American soldier returning safe and sound are even better than that quoted.

"In the first place," Babson said, "the terrible disease scourges which used to raise havoc with armies in the field are no more. Cholera, dysentery, and typhoid no more take a horrible toll from the ranks; modern methods of sanitation and prevention have made these things of the past."

"Let's take a look at the figures in the matter. In round numbers, 8,000,000 men have fought under the banner of France since the beginning of the war. Of these approximately 60,000 have died from diseases of various kinds; comparing these with the mortality figures of peace times for men of the same ages, we find that they are about the same. Remember that during the first months of the war, before it was possible to care properly for falling soldiers, deaths were at a terrible rate, which brought the rate for the three years much higher than it is at present. So under present methods of sanitation a man is as likely to die from disease in any army as he is at home."

"About 920,000 men in the French army have been killed or died from wounds received during the three years of war; half of these died during the first year. But in compiling the statistics, we take the average, which is 320,000 per year, or about one sixteenth of the total number engaged. Thus, considering a man in this war for one year, he has fifteen chances of returning home to one of being killed."

OF WOMAN INTEREST.

Girl bootblacks are numerous in Boston.

Nebraska will vote on woman suffrage at the next election.

Nearly 125,000 women in New York City are employed as servants.

Women in New Zealand have enjoyed the right of suffrage since 1893.

Eighty British women physicians and surgeons are employed at the military hospitals at Malta.

Texas women are arranging to hold a patriotic demonstration at the State fair to be held in Dallas this fall.

Mrs. Henry A. Priamore, of Chicago, is the only woman who owns and operates an iron foundry in the United States.

Traverse City is preparing to entertain the annual convention of the Michigan State Federation of Women's Clubs this fall.

Aberdeen Washington, hosts of three girl rifle shots who are able to hit the bull's eye 50 in 50 shots at a 75-foot range.

Hammond, Ind. is to have a \$50,000 home for working girls, due to the philanthropy of Frank F. Retz, a wealthy manufacturer.

Mrs. John Patterson, of Aurora, Illinois, has taken her husband's job as a grocery store clerk in order that he may join the colors.

Mrs. Samuel Haight, a former prominent clubwoman of Minnesota, is the first woman to hold a seat in the provincial legislature at Saskatchewan.

Mrs. T. T. Gammage, of Palestine, Texas, spun, wove and knit for the soldiers during the Civil war, and is now "doing her bit" for the soldiers of today.

The only woman ever awarded the Medal of Honor is Dr. Mary E. Walker, the Civil War Physician and nurse, who received this honor for "services during the war."

In response to the call for national service a young girl of Manatee county, Fla., this year produced 5,760 pounds of tomatoes on a tenth of an acre patch.

Christina Nilsson, remembered by the older generation as one of the world's greatest singers, has celebrated her 75th birthday anniversary at her home in Sweden.

Thousands of Southern women who, before the war displayed little interest in practical household and farm work other than to direct their servants, have become practical and successful farmers as a result of work by agents of the Home Economics Bureau of the State Relations Service of the National Department of Agriculture.

We see that the Kentucky regiments are having considerable trouble in keeping their soldiers together. Four deserters were rounded up at Augusta last Sunday. It is different with our army of 200,000 regulars—all are satisfied and remain at the duty year after year. In ten years we have only had two deserters—men who read the paper and refused to pay for it.—Palm Beach Outlook.

THE LAW REQUIRES

Teachers to Attend The Institute Every Day While in Session.

Prof. J. C. Gordon, who will be County Sup't. of Schools when the Institute convenes in Burlington next Monday requests the Recorder to state for the benefit of the teachers that the law requires them to be present every day of the Institute, and if he or she fails in this the law revokes their certificate, and he is

J. C. GORDON

The New Superintendent of Schools.

very anxious that every one who holds a certificate to teach in Boone county will be present at every roll call during the Institute, and that no certificate will be revoked because of non-attendance at the Institute. Dr. Baker of the Educational Department of State University, Lexington, will conduct the Institute, which insures a very interesting and profitable session.

Card of Thanks.

To the People of Boone County: You have kept me in office for fifteen years and I now desire to thank my many friends for their service along that line. For had they not stood by me I could not have won my political battles, and I now wish friend and foe, if I have any of the latter, whether I know him personally or not, all the good luck imaginable. I have tried to do my duty at all times, and to do it well, and I leave it to the people of Boone county to say how well I have succeeded. I shall leave the county in a few weeks, to make my home among strangers, but be assured that wherever I am I shall have the kindest remembrance of the numberless favors and kindnesses shown me both as an individual and as one of your officials.

Your Humble Servant,
J. SAM ADAMS,
Jailer Boone County.

Made Close Connections.

Reuben Hager, who has a position in an automobile shop in Toledo, Ohio, was one of the 109 men called by the Boone Co. Draft Board for examination last Monday, and he left Toledo at 12:35 last Sunday night, coming straight to Burlington, going to the benefit quarters, where he entered just as his number was called—being a little more than 100 so on a minute later. He started back to Toledo Monday night.

As Jailer After Serving The
County for Fifteen Years.Was An Efficient Official and
Filled the Office to The
Satisfaction of All.

OFFICIAL SUMMARY

Of United States War Activities Will
Be Issued in a Few Days
By Baker.

The first official summary of the war activities of the United States will be issued in a few days by Secretary Baker, to be followed weekly thereafter with statements of such matters as may be disclosed without violating military precautions.

The exact nature of the statements have not been made known in announcing his intention to begin the practice however, Secretary Baker said he would go just as far as the military advisers of the government deemed it wise toward informing the public of what was in progress. Information of every sort reaching the department will be scrutinized for publishable matter and the impression was given that the statement would not be confined exclusively to past action, but would probably contain forecasts, however, permissible.

When American troops get into action in France daily a statement probably will be issued, founded upon the reports from General Pershing. This has been the British custom and would be followed by the United States.

Regarding the many rumors of disasters to American troops or shipping constantly being circulated, Mr. Baker reiterated emphatically the place of the administration to withhold no news of misadventure of the forces from the public. Every untoward happening will be announced promptly, he said, and the public may rest assured that no news means good news to that extent. Such rumors as have been current recently, which, however, were without any foundation whatever.

Oh, those Luscious Melons!

It is expected that the water-melon crop in the Petersburg and Bellevue bottoms will make a pretty good showing yet this year. The dry weather was very much to the advantage of that crop, and in a few days now melons will be plentiful. Years ago the melon crop was pretty nearly disposed of by this time, they always being on the market in large numbers by the 1st Monday in August, which is the annual election day in Kentucky.

A Dangerous Thoroughfare.

A man who was walking along the side of the Dixie Highway between Erlanger and the end of the car line was struck by an automobile last Saturday night and killed. The highway is a very dangerous place for pedestrians after night, as there are always a lot of careless drivers on the road, and persons who think others have no rights which they should respect.

Badly Injured.

The man who made the high dive at the Erlanger fair last Saturday afternoon was badly hurt, and for a time it was not certain that he would come out all right. He failed to strike the net properly and was carried to the tent unconscious where Dr. Hayes, of Bullittsville, was called to administer to him.

Buying Automobiles.

Five new automobiles came to this part of the county last week. L. A. Conner and A. W. Gaines each bought a Chevrolet of B. B. Hume, and James M. Craver and Edgar Berkshire each bought a Maxwell of W. L. Kirkpatrick, while Earl Garrett, the owner of a six cylinder Buick run about,

The Institute

The Teachers' Institute will begin next Monday and will be under the supervision of J. C. Gordon who will at that time be Superintendent of the Boone county schools. Mr. Riley having resigned, and Mr. Gordon being appointed to fill the vacancy.

You Are Wanted at the Fair

Be sure and attend the fair at Florence this week. Every citizen of Boone county should take an interest in the fair held in the county and show that appreciation, by his presence at least one day, and more if convenient to attend.

Officials Resign Sometimes

It cannot be said of Boone county that her officers never resign. The judge and county superintendent of schools have resigned, and their resignation to take effect September 1st.

Will Have Another Picnic

Charles Clore is arranging for at least one more big picnic at the Harvest Home grounds this year. Charles also does like to see the young people enjoy themselves.

The August term of the Boone circuit court completed its work last Thursday.

POULTRY

POPULAR RHODE ISLAND RED

They Are Good Foragers, Excellent
Layers and Hens Are Docile and
Make Best of Mothers.

Rhode Island Reds originated in Rhode Island about 50 years ago, taking their name from the state and the color of the male birds. They were produced by crossing Red Malay Game, Red Cochins, Red Javas, Chittagongs, Shanghais and possibly Brown Leghorn blood was introduced later. Little attention was paid to the color of the female until someone ex-

Rose Comb Rhode Island Red.

hibited a pen at a New York poultry show, when they attracted attention as a utility and fancier's fowl. They have been growing in favor ever since. They are good foragers, excellent layers, and the hens are docile and make the best of setters and mothers, though they are not persistently broody. The chicks are very hardy, mature early and begin laying younger than many others. They lay good all winter when eggs bring high prices.

The standard weight of the cock is 8 1/2 pounds, the cockerel 7 1/2 pounds, the hen 6 1/2 and the pullet 5 pounds. They have long, deep chests, meaty bodies, yellow skins and are free from black pinfeathers, making them good fowls for market or table use. Their meat has a sweet taste. Their beautiful color and the carriage make them a good fancier's fowl.

CHICKS ON A GRAIN RATION

Superior Method for Forcing Growth
and Maturity of Cockerels—
Mixture for Mash.

Chicks do well on a grain ration, but they do a great deal better when once they are started on a wet-mash ration and are fed alternately two feeds of wet mash per day with three feeds of grain, the latter being given morning, noon and night and the wet mash being given about ten in the morning and three in the afternoon.

For forcing growth and maturing the cockerels for market as quickly as possible such a method of feeding is far superior to the ordinary straight grain ration method. The following mixture makes a very palatable mash: Equal parts by weight of cornmeal, bran, middlings, corn gluten feed and commercial meat scrap.

CONSTANT SUPPLY OF WATER

Good Use Can Be Made of Tin Can
From Which Top Has Been Meited
—Brick Holds It Steady.

Fresh clean water is kept before the chicks constantly, and is kept clean by using a tin can from which the top has been melted with an opening made in the open end three-fourths inch long (high) and one-half inch wide. The can is filled and inverted in a common earthen flower-pot saucer (open end downward), making an automatic fountain which is raised one and one-half inches from the floor of the brooder or coop. If the fountain is used with some way may be provided to keep the hens from knocking the can over. Overcome this by placing a brick on top of the can.

FATAL DISEASE OF TURKEYS

Authorities Claim That Overfeeding
and Close Confinement Are
Causes of Blackhead.

Some authorities claim that overfeeding and close confinement cause the fatal disease of blackhead, and when poultry are crowded in their feeding liver soon enlarges, becomes diseased and death is the only result. Various other sources are given as the causes of the blackhead in turkeys, and the suggestion is made that the youngsters be kept on new ground, away from the other domestic fowls, free from wet and dampness, and fed carefully so as not to weaken or strain their digestive organs.

RATION FOR LITTLE TURKEYS

Dry Grain, Free From Mustiness or
Moldiness Is Easy to Feed—Bread
and Milk Is Good.

Dry grain chick feed which is free from mustiness or moldiness is easy for little turkeys to digest. Though sometimes a little bread and milk or Johnny cake baked hard and fed dry can be given.

INTERNATIONAL
SUNDAY SCHOOL
LESSON(By REV. F. B. FITZWATER, D. D.,
Teacher of English Bible in the Moody
Bible Institute of Chicago.)
(Copyright, 1917, Western Newspaper Union.)

LESSON FOR SEPTEMBER 2

THE SHEPHERD OF CAPTIVE IS-
RAEL.LESSON TEXT—Ezekiel 3.
GOLDEN TEXT—The Lord is my shepherd, I shall not want.—Psa. 23:1.

With the complete subversion of the kingdom of Judah, the national consciousness was largely crushed and the people were without heart for the common affairs of life. Ezekiel, though born in Jerusalem, prophesied in Babylon near the River Kebar. The object of his prophesying was to encourage the captives by placing before them God's promise of their return to their own land. His name signifies, "God will strengthen," which is very appropriate to the mission which in the providence of God he was called upon to fill.

1. Israel's Faithless Shepherds Denounced. (vv. 1-10). These false shepherds included the kings, princes, judges and priests. Ezekiel points out that the captivity was because of sin, but he shows that the greatest guilt obtains with reference to these leaders. They were negligent in the position to care for and protect the sheep. The following indictments are brought against them:

1. They fed themselves instead of the flock (v. 2). They were essentially selfish. They ministered to themselves instead of the sheep. Too many today are filling public offices for the sake of private gain. Sometimes even ministers are found who are more concerned about themselves, their pleasures and profits, than they are about the souls of the people who support them.

2. They were cruel (v. 3). They were not only mere hirelings, gully of looking after themselves, but they actually behaved like robbers, preying upon the flocks. All are guilty of this same sin who use their influence and power to the disadvantage of others. In the theocratic kingdom such behavior was peculiarly obnoxious, as the kings and ministers were representatives of Jehovah himself. The minister and public officer today is acting in his capacity for God, not for himself, therefore he should make the cause of heaven his chief concern.

3. They neglected the diseased, wounded, wayward, and lost (vv. 4-6). As a result of their selfish cruelty the sheep perished without food; they were exposed to disease; had no bond of unity, were exposed to the ravages of wild beasts. God's flocks are in many places thus suffering and dying because they have not been fed. God's judgments are against such (vv. 7-10).

4. The Faithful Shepherd. (vv. 11-10). The Shepherd here is none other than Jesus Christ. The wonderful blessings here described will be realized by Israel in millennial times. This blessed condition will be ushered in by the second coming of Christ. How sincerely all should pray: "Thy kingdom come." When the true Shepherd comes:

1. He will seek his lost sheep (v. 11). Though they have gone astray through wilfulness on their part, and neglect on the part of faithless shepherds, Jesus will seek them out and save them. To save the lost was his peculiar mission (Luke 19:10).

2. He will rescue them from the power of their enemies (v. 12). God's sheep have real enemies and they have fallen into the enemies' hands, but the Faithful Shepherd is able to deliver them. "No one is able to pluck them out of his hands" (John 10:28, 29).

3. He will bring them back to their own land (v. 13). Poor, scattered Israel shall one day (may it be soon!) be brought back to their own land. This is the one unmistakable sign by which we may know the beginning of the end of this dispensation. Be assured that it is not wars, nor pestilences that mark the sign of the close of this age, but the movements of Israel.

4. He will feed them (vv. 14, 15). "I will feed my flock, and I will cause them to lie down, saith the Lord God. I will seek that which was lost, and bring again that which was driven away, and will bind up that which was broken, and will strengthen that which was sick; but I will destroy the fat and the strong; and I will feed them with judgment."

5. He will seek that which was lost (v. 16). That which has been driven away he will seek and bring it back again.

6. He will heal them from weakness and suffering (v. 17). All the wounds which Israel has received these many centuries shall be healed.

7. The Golden Age (vv. 23-27). The vision of the world as it now is, is most disheartening. It is midnight darkness. In this blackness we wonder why God does not intervene. We wonder how he can be silent. While midnight is upon us as we are hopeful, for we see the bow of God's promise of better things dawning across the sky. This present order shall disappear before the new. In that new order:

"I, Jesus Christ, DAUGHTER SON, shall be king (vv. 23, 24). This new era of blessing shall only come into realization when God's own shall establish his kingdom upon the earth."

BIG ELECTRICAL DISPLAYIn Floral Hall at Florence Fair
This Week

There is an electrical display at the Florence Fair which is full of interest and educational value for everybody. This is an exhibit showing one of the latest model electric light and power plants which is coming rapidly into use for furnishing electric light, heat and power for farm homes, and for schools, churches, stores and similar properties.

A visit to this exhibit will reveal in a striking way what electricity means to the farmer and his family when he is able to use it in his home.

There is the matter of electric light. The clear, brilliant electric lights, furnished by the individual lighting plant are of just the same quality as the finest that you ever saw in a city home. You won't realize how dim and unsatisfactory those smoky kerosene lights are until you see, in comparison, the clear, bright, electric lamp in this exhibit.

You will see a "churn, wash-machine or other piece of farm machinery turning away, apparently all by itself, but a courteous attendant will explain that he has just turned an electric switch, starting the electric motor that is run off the lighting plant and that electricity is taking the place of the labor generally required to turn the crank.

It will be explained to you how with electric power you can operate an automatic water system, securing, without any hand pumping all the water you need for your stock, for kitchen use, for a modern bathroom, how you can use a hose for sprinkling or to throw a stream of water on to your buildings in case of fire.

You will learn that you can have electric fans all about your home in the hot weather and keep cool even when the mercury is doing its best to climb out of the top of the thermometer.

And how the vacuum sweeper your wife would like for Christmas can be run with electricity, so that there will be no more occasion for her to sweep with broom.

Then you will find out about electrical heating devices. An electric iron—a Godsend to the wife on ironing day—an electric toaster and percolator for the breakfast table, and maybe the man will show you about some little electrical "kitchen" like warming pads, vibrators, hair curlers and so on, things that your wife and girls would delight in, but which to a mere man, are just a hopeless conglomeration of "women's fixings."

The lighting plant itself you will find to be a remarkably simple piece of machinery, apparently as nearly "foolproof" and trouble-proof as a high order of inventive genius and manufacturing skill can make it.

And from a little time spent at this exhibit you will get this big idea: That electricity is finding and is coming to a big place in the life of the farm; that it is bringing vastly improved conditions of living by supplying modern electric lights to take the place of the out-of-date systems that we have known so long; by making the home life more comfortable through the use of electric fans, vacuum sweepers, bath-rooms; by taking the drudgery out of the homely, everyday tasks of farm life through the use of electric power to run all the machines that are now turned by hand, and you will realize why boys and girls are now finding a new incentive to stay in their farm homes instead of going away to the city, when these farm homes offer the same modern conveniences that are attractions to city life.

So it will pay you to see this exhibit. Maybe you will walk away with your jaw set in the grim determination that "One of these days, by George!"—well, see the exhibit anyway.

The undefeated Gunpowder ball team will play the Union team at Union next Monday afternoon. Gunpowder has not lost a game this season and will work hard next Monday to sustain her rep as a sure winner. Go see the game.

Lost—Tuesday between end of car line and my home a 1917 Gold Walton school ring—initials D. C. D. Finder will please return to Miss Isabelle Dickey, Walton, Ky.

Married on the evening of the 25th inst., at Phoenix Hotel, Lexington, by Rev. Baker, Mr. G. L. Alford, of Salvisa, Ky., and Miss Carrie Porter, of Burlington.

Permanent peace impossible under the Kaiser, says President Wilson, and, therefore, he rejects the Pope's peace proposal.

The State Road Department has sent a man to take the place of Ernest Arnold on the Lexington pike.

J. S. Conner, of Union, has a sale of personal property advertised in this issue for Sept. 4th.

Mrs. B. B. Hume was called to the city yesterday because of the sudden illness of her husband.

The work of building an addition to C. Roberts' residence at Fulton, Ky., is well along.

Revised will returned to C. W. McAllpin, 10-26-17.

WEDNESDAY

WILLIAM H. POPEPassed Away at His Home on
Middle Creek—Lacking a
Few Days of Being 82.

William H. Pope, who was reported seriously ill last week, died on the morning of the 23d inst., at the home of his son, Blanton, on Middle Creek.

Mr. Pope was born on Double Lick, this county, Sept. 13, 1835, consequently he would have been 82 years of age had he lived until the 19th day of next month. He spent his long life in his native county, and most of it on the farm where he died. He had seen the entire population of that neighborhood change one or more times, being the last of his generation in that locality.

He was a son of Lawrence and Jennie Graves Pope, pioneer settlers in the Middle Creek neighborhood, where they experienced many of the inconveniences of the frontier life.

W. H. Pope was married twice. His first wife, Miss Addie Robinson, of Missouri, to whom he was born, died in 1881. She was born in infancy; Charles, in October, 1884; Carrie, in July, 1892; and William, in July, 1913. Mrs. Laura Parsons, the first born, and Blanton the youngest child survive. Their mother died in March, 1883.

In 1885 Mr. Pope and Miss Nancy Jane Acra were married. She survived until August 1915. James K. Pope, a brother, is the only survivor of the Lawrence Pope family.

W. H. Pope spent his life on the farm, was a frugal man but always had about him the comforts of life, and delighted in dispensing hospitality to the true Kentucky type when his friends and neighbors visited his home where the latch-string was always suspended from the outside. He was always ready to assist where assistance was needed; was an indulgent husband and a kind and loving father. Mr. Pope's life was quiet and he always went about his affairs in a way that attracted no attention. He lived for his family and friends, and well it could be said that he laid down this: "Well done, thou good and faithful servant."

Red Cross News.

The Red Cross Convention which was held at Lexington on Wednesday and Thursday of last week was a success in the broadest terms. There were 500 delegates present from this State, and so many representatives from other States that the convention seemed more of a National than a State affair.

This meeting was held in the ball room at the Phoenix hotel, and here all subjects of interest to Red Cross workers were discussed by able speakers, while in an adjoining room the finished hospital garments and gauze dressings were exhibited, so that one was able to get much instruction in any phase of the work in which he is especially interested.

The people of Lexington were unlimited in their hospitality, and the music arranged by the people of the town made the program very pleasant as well as instructive. The enthusiasm through the whole of the convention showed that Kentuckians are trying to do their bit in this war.

The Chairman of the Auxiliaries in the county are requested to get their knitting committee together and make definite arrangements as to the amount of knitting each can do, and the amount of yarn that will be needed by each. A car load of this yarn is the way now to Cleveland headquarters and will be ordered here very soon.

Visit the Red Cross Booth at the Florence Fair grounds this week, and inspect the finished hospital garments and gauze dressing on exhibition there, and do not hesitate to ask those in charge for any information you may desire.

We are in receipt of a check for \$40 from the Union Auxiliary proceeds from the fish fry held July 4th; also one from the Blueview for their flag raising and new members secured on Saturday, August 18.

Hebron up to the present time has the banner for members. Mr. Benj. Paddock having sent a check for \$50 for life membership for himself and wife. This is the only auxiliary in the county having more than one life member.

Union Auxiliary has changed their work-room from the residence of Miss Burke to the Masonic Hall.

Mrs. C. W. Goodridge, Secy.

In Their New Home

Georgetown, Ky., August 26th, 1917. To the Recorder, Burlington, Ky.:

Will you please publish this letter? "Dear Home county friends: We are settled and, at home again, and are planning for a good year in school work."

"We expect to find friends here, but never expect to find a better place to live than Burlington. We only take this chance of expressing our appreciation for the many favors and the kindness with which we were there. We did not and shall never be able to repay one thousandth part of the kindness, but we will try to pass it on."

"This is a big world and there is lots and lots of work to be done. We pray that we may be given strength and ability to do our 'bit' well."

"Wishing you the greatest success in all that is for God and right we are Your true friends,"

MUSTER.

The Giant Awake.

We have but recently witnessed an event in this country the like of which the world has never before seen—at least, the world of our knowledge. We have witnessed the entrance into the ranks of a nation's fighting men, of ten million soldiers waiting for the call to colors. We see today an army of nearly two million men actually under arms, equipped and assembled, ready to die in their country's service.

It is an amazing sight, America, the peaceful; America the cradle of toleration, the nursery of justice and right—America in arms and springing to the fray.

And the strange creature of the case is, it has astonished even Americans themselves. We had so long been accustomed to hear ourselves referred to as a sleeping giant that we had come to so regard ourselves. We had thought that the affairs of the outside world concerned us no, and that we were sufficient unto ourselves.

But today sees the giant awake. A little groggy, it is true, but rapidly assimilating the power and before him when once he gets his stride. It also sees him shorn of his provincialism and taking his rightful place in the world—a man of power and might among men of power and might.

And being awake, we find confronting us one of the most stupendous tasks that ever confronted a people. We find ourselves the probable deciding factor in a world war, the balance of power that shall make this earth a safe place of abode for all men—a world in which RIGHT, and not MIGHT, shall reign.

And with this great task before us, we are going about our presumed as befits a people who have not only confidence in their own powers, but a full appreciation of the magnitude of the task as well. While we have not proclaimed it broadcast, yet deep within the hearts of our people there is a firm determination that the cause shall not be sneezed upon. The cause of humanity is triumphed over the forces of oppression and tyranny. There is but one sentiment heard from the lips of all loyal people, "WE MUST WIN."

Therein lies the meaning of the quiet, deep, but deadly purpose of our people. We must win for humanity's sake. And when we are called upon to perform a task for humanity, that they failed?

Our millions who have answered the call have come cheerfully. They have stepped forward with the fullest appreciation of the work before them, but also with supreme confidence in their ability to perform that task. This is the spirit that conquers, and will conquer in this instance.

Soldiers of America! Never in history could it be more truly said that "the eyes of the world are upon you."

Maryland's crop is making satisfactory progress and in some few instances cutting and housing has commenced.

CARROLL COUNTY NEWS.

(Carrollton News.)

A top of dynamite consigned to the Federal Zinc and Lead Co's mines at Gratz, exploded about half-past three last Thursday afternoon, a short distance above the L. & N. bridge at Worthville. The dynamite, which was in 80 boxes of 25 pounds each, has been unloaded at the Kentucky river landing and had been exposed to the hot sun all morning and afternoon. It had been loaded on the motor boat of William Deweese of this city, the boat started up the river with 40 boxes of explosive in both bow and stern.

The boat left the landing 150 yards below the bridge at 3:25 p. m. and when directly under the bridge broke into pieces, the boxes of dynamite flying in all directions. It was an explosion of such magnitude that it could not escape being wrecked, meaning death, perhaps to many, and great property loss and delay in transportation. Mr. Deweese told Roy Ellis, of Carrollton, who was helping him to jump, and himself stayed with the boat until about fifty yards above the bridge, when, after setting the steering gear to hold the craft in the stream as long as possible, and running under full power, abandoned the boat with its dangerous load and swam for the shore. It is thought one of the tiller ropes burned, the boat running into the bank about 150 yards above the bridge. When the flames reached the gasoline tank an explosion ensued, the concussion from the gas explosion detonating the dynamite tearing a great hole in the bank and shaking the country for miles around. The explosion did not occur until fire had almost consumed the boat. Mr. Deweese says that, in his opinion, half the dynamite had burned before the gasoline tank exploded. Not a vestige of the boat could be located after the explosion.

....

The drought of four weeks duration was broken Tuesday afternoon and a gentle rain fell from 11 until 11 yesterday forenoon. It will help late corn and tobacco, but the early corn is past redemption.

....

Miss Hallie Masterson, who is with her brother, Consul W. T. Masterson at Durban, in South Africa, wrote an interesting letter to her Sunday-school class, which was read Sunday. She is much impressed with the country, and says Durban is a lovely city; that at this time there are 17,000 German soldier prisoners, whom the Morde church of which her brother is a member are feeding one meal each day.

....

The heavy rains which fell in this county this week added a final shove to the growing crops which give promise of record-breaking yields. The county's corn crop is large and has stood the summer in good shape. The yield per acre being predicted as much larger than for many years.—Larue County Herald.

PHILIPPINE LOYALTY.

It is well that the United States has no disaffected subject people. The alliance against Prussianism is an alliance in behalf of nations and races that are held in thrall. It is a war in behalf of Germany's Alsaceans and Poles, in behalf of Austria's Italians and Bohemians and Serbs and Slovaks, in behalf of Turkey's Armenians and Lebanese. It is well that the one people which has in the past protested against American rule is now loyal and contented. Of the present loyalty of the Philippines there can be no doubt. It is the American custom to think of the Philippines as represented by intelligent and educated classes of Luzon. These men have been the only intelligent protesters against American rule. Now this element is satisfied that the United States is conscientiously working out the Philippine problem, and that Philippine independence is assured, says Cleveland Plain Dealer. The other Philippine peoples, the half-divided Mohammedans of Mindanao and Sulu and the quiet savage races of some of the interior, are not usually considered when Philippine wishes and aspirations are under discussion. The loyalty demonstration in Manila recently was a pleasing mark of gratitude. It indicated the Filipino appreciation of the American efforts for Philippine betterment.

In an address on mental hygiene before the Medical Psychological society of New York city, Dr. William A. White stated that dementia praecox, an incurable disease, has developed in 60 percent of the patients in American institutions for the insane, and that there is no larger group of persons in this country afflicted with a single malady. He also said that colonies of feeble-minded persons can be made self-supporting, and that this seems to offer a hopeful means of providing for a greatly increased number of cases at a minimum expense to the state. Here is a suggestion that should not be neglected. The economic aspect of the matter—the fact that by tending to make the insane self-supporting the plan would lighten the burden upon taxpayers—is important; but even this is secondary to the probability that occupation would be highly beneficial to patients.

There is a movement in modern life known as internationalism. Its devotees put the flag of humanity above the flag of their country. In effect such people are in danger of seeking too good for a great cause by doing violence to a smaller cause, says Christian Herald. The progress of civilization, the upward and upward march of humanity has not been by such a method. The end of the commandment is not love alone, but "love out of a pure heart and of a good conscience and of faith unfeigned." Christian love is love derived from and guided by a rational faith and duty. The truest internationalism does not abolish nationalism. Genuine patriotism does not forbid friendship. Real friendship does not interfere with family love. Unselfish family love is never in collision with the love that crowns Jesus Christ the Lord of all.

One of the most startling instances of infant precocity which has come to light lately is revealed in the story of two children of ten and eight, who confessed to shooting their father at the instigation of two older ones of thirteen and twelve. A crime of the kind planned and carried out in detail by children of such tender years seems incredible, and the precocity which admitted of it is of a sort which can well be spared in youthful development.

Fifty thousand women in England are being taught to wield the hoe and several millions are giving war aid of various kinds. From the industrial and muscular development of the feminine sex going on now, it is evident that after the war wife-beating as a domestic pastime will lose much of its ante-bellum popularity.

Five hundred cadets now studying at university aviation schools will carry the American colors to France next fall. It is to be hoped that the manufacture of airplanes will be speeded up so as to supply reliable machines for all who want them.

The department of commerce advises people to eat whole meat, but our idea is that it will be impossible to run any such victuals down the throats that have been trained thoroughly to fried chicken.

In the job of making industry more profitable, as urged by the president, we believe the poets have shown a little more good than any other class of workers.

ALLIES FAR FROM BELIEF

That a Hint From Wilson Will Overtake Kaiser.

It Can't Be Done While Russia Is Easy Prey to Armies of Hindenburg They Warn Peoples

Washington, Aug. 30.—The keenest and best informed representatives of the allied nations do not find it possible to share the optimism of those Americans who imagine that the President's note to Benedict XV would result in reformation of the German Government and thus pave the way for early peace conferences.

If Germany's army were endangered, Hindenburg's army would be open to invasion, her people rebellious or her spirit broken, there would be some solid foundation for expecting early peace. From all that can be learned of fundamental conditions, Germany is not compelled to make peace. She wants peace, but she still hopes to get it on highly favorable terms.

The suggestion that the German people will throw the Kaiser overboard in obedience to a hint from the United States does not strike the allied envoys as an accurate estimate of the situation. There will be a liberalization of the German Government, it is looked for, and, perhaps, some of the processes may be effected ostensibly for the sake of impressing outside democracies as well as to stop the mouths of domestic agitators. The wrecking of the German Empire, however, is quite another matter.

As matters stand Germany is ahead of her enemies. What will happen tomorrow when the United States strikes is another story. In territory occupied, battles on nations conquered, spoils gathered, forms of government overturned and resources utilized, Germany looms far above other antagonists.

Her allies have lost territory, notably Turkey, but not one of them has been overrun and conquered. Germany is feeding on enemy ground, drawing upon the enemy largely for the support of her army.

On the east Russia is nothing more than a huge prize of Germany, which is being absorbed by her own capacity for absorption. She is free to swallow as much of Russia as she can chew. Hindenburg is shrewdly grasping the process of biting off more. It must not be forgotten, however, that Germany can chew an enormous bite, especially when the moral terms of the peace are capable of feeding German soldiers.

Germany has completed several super-submarines capable of making 14,000 miles, strong as cruisers, with guns outranging the average cruiser. If one of these submarines does not show up in the Pacific to intercept shipments from San Francisco to Yokohama, it will surprise a British submarine expert who gave me this information.

He looks for more effective submarine operations in the fall. He also expects greater submarine mortality, but Germany is turning out standardized submarines at a steady rate and might possibly increase the output. Such American institutions as the Merchant Navy Company having factories in Germany, are turning out submarines at a rapid rate.

The building of Zeppelins has not ceased, as erroneously was reported. These dirigibles no longer are used for land warfare or for bomb dropping. That is all. They are employed for observation purposes, particularly in the North Sea. The British fleet is under practically continuous observation, as well as any good-sized squadrons that may operate in the North Sea. Wireless communication between the Zeppelins and Heligoland and the great headquarters is constant.

A new type of Zeppelin still to be described is under construction. At least 15 of them are being built.

Field Marshal von Mackensen is engaged in the delightful task of absorbing the last remnant of Rumania. This one fact is worth a ton of speculation in trying to gauge the temper of the German High Command. The Russian divisions virtually has presented Rumania to Germany on a plate of gold. So long as the Russians retreat the Germans likely are to pursue in that section. The result of German penetration of Bessarabia would be an iron grip upon the Balkans and the Turkish Empire.

It is pointed out to me with intense earnestness by agents of the allies, mainly British, that unless Austria is brought to her knees the acquisitions by Germany in the east and southeast will make it practically impossible to dislodge her from the Balkans or Turkey.

think the sky is filled with only one kind of airplane. Above all do not let the confidence in diplomacy as a substitute for military force in dealing with Germany. Make your preparations for a long and terrible war.

Plain Speech.

The President's plain spoken and discriminating reply to the Pope is adequate alike for the sworn foe of autocracy and the friend of democracy everywhere, even within Germany. With determination, but without vindictive news, with passion, but without prejudice, with hopefulness but without compromise, the President's statement rises clear of war and peace, and proceeds with sanity and balance to the issue before the nations. The incisive discernment and the utmost precision with which he has stated the situation mark a long advance toward clear and hopeful thinking. Our present stand and our future policy are reduced to the plainest expression. We will have no dealings on any terms with an autocratic German Government. We shall be found continuing by responsible representatives of the German people, in control of their own destinies.

Here is set up clearly in view, short of diplomatic ambiguities, the precise conditions under which and under which only, this Government will talk peace. For the hope of peace, alike of the German autocracy this is a gain. Potsdam may know that a "German peace," however cunningly disguised in its offer, will get no hearing. The democratic forces within Germany may know, on the highest possible authority and in the plainest terms, that the hope of their country rests with them, and with the programme that they have undertaken.

To those acquainted with internal conditions in Germany, that is a gratifying section of the President's note which foresees vindictiveness, dismemberment and bloodshed. For the world at large no such statement was needed. But it was needed by the Democratic Reichstag majority as an antidote to the German campaign of lies as to Allied intentions with which the military clique sought to mislead the German people. The conjured menace of dismemberment is exploded, and in its stead stands the promise of a free German people for all others. A more drastic undermining of the Government and armistice of the German people at a single stroke, could scarcely be conceived.

Herein the President has set the direction for the new departure of Allied strategy. It is to be a strategy stout in its purpose, frank in its utterances, informed and justified by a real hope.—C. J.

Work The Roads.

One of the most pressing questions in the country districts at this season is the working of the roads. The highways, the main thoroughfares taken care of by the county authorities (if there are many cross country and neighborhood roads, the crew, these are up to the people themselves to keep in passable condition.

In years past our people were possessed with a notion that the care of the public thoroughfares was a matter for the State or county entirely and that personally we need not concern ourselves further than to pay our taxes or contribute our assessed quota of labor.

Of late, however, we are awakened to the fact that roads are in fact OUR roads, and that neglect of them is neglect of our own property. There are one of our greatest assets, more especially if they be GOOD roads.

Pendleton Reformer.

Owenton a Swift Place.

Owenton is certainly getting to be a swift place, as it keeps along with larger towns when it comes to the boys engage in the crap games here who have scarcely donned long pants and these games are not confined to boys alone.

It would be well for some of the folks who are seeking great issues to argue about to look a little closer at their home. Gambling seems to be getting fashionable. Do not ask us who but ask the boys and young men of your town at their homes. They are laughed at and talked about upon every corner. We have not only gambling but other vices such as cigarette smoking, and the public highway and smoking cigarettes by boys under 18. Do not ask who but just open your eyes and ears and see what a ten days sentence in jail would break up some of these crap games and our younger boys would not learn the habits of our older ones.—Owen Co. Democrat.

Where Everybody Goes.

In this issue appears the Harvest Home advertisement for the 10th inst. The Harvest Home always closes the fair season in the part of the State and people take advantage of it for the last general meeting of the populace for the year. It is where many of them get acquainted with the people and the day is always brought with much enjoyment.

PRESIDENT WILSON

Rejects Pope Benedict's Peace Plan—Cannot Take German Rulers Word for Anything

Washington, August 28.—President Wilson today rejected the peace proposal of Pope Benedict XV.

In a note sent to the Pope he declared that the United States would be more than another "scrap of paper" to be torn by Germany's rulers at will.

While the President's note is a rejection of peace at this time, it leaves the road wide open for further discussion and negotiation. "We cannot take the word of the present rulers of Germany as a guarantee of anything that is to endure," he says. And later he adds:

"We must await some now evident of the purposes of the great peoples of the Central empires who do not desire peace, even soon, and in a way to restore the confidence of all peoples everywhere in the faith of nations and the present of the world."

President Wilson declared flatly against an economic war after peace is declared and against ineffectual peace proposals. To deal with such a power as the present rulers of Germany upon Pope Benedict's plan, declares the President, would involve a recuperation of the strength and renewal of the world domination of that power, "now balked out of the world by the blood of innocent women and children and the helpless poor as well as of soldiers."

The President's reply follows: "To His Holiness, Benedict XV, Pope: "In acknowledgement of the communication of Your Holiness to the belligerent people, dated August 1, 1917, the President of the United States requests me to express his hearty sympathy for the peace and of those that are strong."

"Every heart that has not been blinded and hardened by the terrible war must be touched by the moving appeal of His Holiness. The Pope must feel the dignity and force of the human and generous motives which prompt him to this appeal. We fervently wish that we might take the path of peace, he so persuasively points out."

"It would be folly to take it if it does not in fact lead to the goal he proposes. Our response must be based upon the stern facts and upon nothing else. We desire, it is a stable and enduring peace. This again must not be gone through with again, the fortune of a peace which is not a judgment that will insure us against it."

"His Holiness in substance proposes that we return to the status quo ante bellum and that there be a general condonation, disarmament and a concert of nations based upon an acceptance of the principle of arbitration; that by a similar concert freedom of the seas be established, and that the territorial claims of France and Italy, the perplexing problems of the Balkan states and the restitution of Poland be left to such conciliatory adjustments as may be possible."

"The new temper of such a peace, regard being paid to the aspirations of the peoples whose political fortunes and affiliations will be involved."

"It is manifest that no part of the program can be successfully carried out unless the restoration of status quo ante bellum is a firm and satisfactory basis for it. The object of this war is to deliver the free peoples of the world from the menace and the actual power of a vast military establishment controlled by an irresponsible Government, which having secretly planned to dominate the world proceeded to carry the plan out without regard either to the sacred obligations of treaty and long-cherished principles of international action and honor; which chose its own time for the war, declared it, and made it a bloody, unrelenting barrier either of law or mercy, swept a whole continent within the tide of blood—not the blood of the innocent only, but the blood of innocent women and children and now stands balked, but not broken, the enemy of four-fifths of the world."

"This power is not the German people. It is the ruthless master of the world, the great business of our day, that great people came under its control or submitted with temporary acquiescence to its domination. It is to it that the history of the rest of the world is no longer left to its handling."

"It is to it that a power by way of peace upon the plan proposed by His Holiness the Pope would, so far as we can see, involve a recuperation of the strength and a renewal of its policy; would make it necessary to

create a permanent hostile combination of nations against the German people, who are its instruments, and would result in abandoning the peace born Russia to the interference in which the manifold subtle interference and the certain counter revolution which would be attempted by all the malignant influence to which the German Government has of late accustomed the world. Can peace be based upon a restitution of its power or upon any word of honor it could pledge in a treaty or settlement and accommodation?"

"Responsible statesmen must now everywhere say, if they never saw before, that no peace can rest securely upon political or economic restrictions meant to benefit some nations and cripple and embarrass others upon a vindictive action of any sort, or any kind of revenge or deliberate injury."

"The American people have suffered intolerable wrongs at the hands of the Imperial German Government, but they desire no reprisal upon the German people, who have themselves suffered all things in this war, which they did not choose."

"It is based upon the faith of all the peoples involved or engaged in acknowledging the wrongs of the one hand or a group of free peoples on the other. This is a test which must be applied."

"The purposes of the U. S. in this war are to secure the opportunity to every people to whom the truth has been permitted to come. They do not need to be stated again. We seek no advantage of any kind. We believe that the intolerable wrongs done in this war by the furious and brutal power of the Imperial German Government ought to be repaired, but not at the expense of the sovereignty of any people."

"Punitive damages, the dismemberment of empires, establishment of artificial political and economic leagues we deem inexpedient, and in the end worse than futile, no proper basis for peace of any kind, least of all, the reconstruction of that must be based upon justice and fairness and the common rights of mankind."

"We cannot take the word of the present rulers of Germany as a guarantee of anything that is to endure, unless explicitly supported by such conclusive evidence as will give us the confidence of the German people themselves."

"Without such guarantee, treaties of settlement, agreements for the restoration of the status quo ante bellum, the place of force, territorial adjustments, reconstitutions of small nations, if made with the German Government, would depend on the German Government. We must await some new evidence of the purposes of the great peoples of the Central Powers. God grant it may be given soon and in a way to restore the confidence of all peoples everywhere to the faith of nations and the possibility of a covenanted peace."

ROBERT LANSING, "Secretary of State of the United States of America."

What It Costs to Feed Dogs.

We do not know how the computation was made, but it stated that there are 25,000,000 dogs in the United States and that the cost of feeding them is \$300,000,000, in addition to the value of the sheep they kill and other property that they destroy. This is a big figure, but it is not too big, considering the largest number of cases brings absolutely no return. To consider the food supply, reduced almost to scarcity Austria, Hungary has killed nearly all its dogs and Germany and France have realized the necessity of curbing their canines. It may come to pass that this country will have to do likewise and if the slaughter could be made only that make night hideous with their howls and barks good will come of evil and weary mortals can sleep, undisturbed.—Stanford Interior Journal.

Holstein Cattle Gaining Popularity.

Holstein cattle are rapidly gaining popularity with the dairy people in this county as was made evident by the show that breeders of the county gave at the fair last week. It is a handsome herd. The Holstein show was about the largest show of the kind that has been made at the fair for several years. These cattle coming into favor in this county is because of the large quantity of milk they give, while in many instances it is said to be nearly as rich as that of the Jersey.

Leave me dropping from the shade trees, which indicates early fall.

ROBBERY AT CONSTANCE

Albert Dolwick's Residence Robbed of \$80—Robber in Jail—Money Found.

John Smith, colored, a young negro man claiming Ohio as his home, was lodged in jail by Deputy Sheriff L. A. Conner last Friday, charged with stealing slightly more than \$80 from the residence of Albert Dolwick, in Constance. Smith said he had been working on the railroad along the river below Cincinnati. He came across the river at Constance and discovered nobody was at home at Dolwick's and he entered the house where he found the money in a drawer in the kitchen safe. It was discovered the house was being robbed and the negro fled, but was soon overtaken when the officer was called and took charge of the man and lodged him in jail.

Wagon Wrecked by Street Car.

A few days ago Chas. Moore, of Lincoln neighborhood, was in Ludlow, when a street car struck his wagon, wrecking it and crippling one of his horses, very badly. Mr. Moore was taken to the hospital with him, and fortunately they escaped with slight injuries. In the confusion that followed the collision Mr. Moore was taken to a near-by house, and when Mr. Moore looked for her could not locate her for some time, and he got somewhat excited because of her sudden and unaccountable disappearance.

New Auto Mail Conveyance.

The new auto mail conveyance which Mr. Conrad has put in commission, will carry comfortably sixteen passengers besides the mail which is now quite a bulk. Since the mail has been coming by auto, the passengers have been increased considerably on the mail auto, and with the comfortable conveyance and the very reasonable fare, the probability is that it will become much larger than at present. The schedule suits the passenger travel exactly.

Resigned as Deputy Assessor.

Boone Rogers having resigned as deputy under county assessor, Mr. Robert Berks, son of Ben H. Berks, of Petersburg, was appointed in his stead by Judge Cason, last Monday. Mr. Berks is well qualified for the position and will render his principal excellent service. Mr. Rogers has the job of superintending the reconstruction of a pike in his neighborhood.

Land in Fine Condition to Plow.

The rains have put land in fine condition for fall plowing, which work many of the farmers are about to commence. The price of high price of wheat, with every indication that the price will continue above two dollars a bushel, will encourage the farmer to sow an increased acreage this fall. At two dollars wheat is a paying crop.

E. T. Krutz Dead.

E. T. Krutz, who has been engaged in the mercantile business in Petersburg for many years died last Thursday morning. He was about the oldest merchant in this county, beginning his career as such at Normansville in the early seventies as clerk for Jas. W. Ken sey.

Meeting Old Friends.

Milton Goodridge, of Oldham county, put in his appearance the first day of the fair and stayed it through. It is a great pleasure for him to meet with his friends in this county, and he always avails himself of the opportunity.

Howard Huey went to a Cincinnati hospital last Saturday to have a growth removed from above one of his eyes. He will be away from home seven or eight days. The lump has been in evidence for some time and recently it has grown considerably, hence the operation.

An auto truck failed to make the proper turn when it came off the bridge this side of Limburg last Sunday and went over the bank and struck a tree, but not having enough to damage the machine, which was gotten back on the road without much trouble.

Joe Scott, of Florence, resides at the head of breeders of Jerseys in this county as he has done for many years, and he will maintain his position by his attention and investment in the finest of that breed that can be obtained.

Samuel Adams has shipped goods to Florida and after a few weeks visiting relatives he and his wife will return to the way Florence, everybody in Burlington hails to see them leave.

Not much work if any done on the full-time and acreage this year, and spring it will be in very little. It is a great pity it could not be repaid this year.

The usual day, but not the usual way.

WALTON DEPARTMENT.

D. B. WALLACE, Manager.

Send your news items to Mr. D. B. Wallace at the Walton Equitable Bank and Trust Co.'s building. He is also authorized to receive subscriptions and collect other accounts.

Miss Jennie Lee Gaines who has been very ill is much better. Mrs. W. H. Cram returned home Monday from a delightful visit to For Sale-Holstein heifer; had her first calf. Mrs. Susan Senour, Walton, Ky.

her children near Great Falls, Montana, and was greatly benefited by the visit. Mrs. Mammie Smith and son Allen of Covington, spent the week here the guest of A. W. Smith.

Wm. B. Sparks, F. M. Cleave and Roy P. Chapman of Verona neighborhood, were visitors here Tuesday. Hon. L. J. Crawford, a prominent attorney of New York, spent Wednesday here the guest of Judge J. G. Tomlin.

Robt. W. Jones, the local agent for the Buick, sold a beautiful car to Miss Cynthia Hudson of Kenton county last week.

Mrs. Joe B. Harris and little daughter of Covington, arrived here Tuesday on a visit to her parents Mr. and Mrs. W. A. Rouse.

H. D. Hearne of the Richwood neighborhood, spent last Saturday here with his many friends. His health is somewhat improved.

Mrs. Henry Koehler and son William of Cincinnati, spent the first of the week here the guest of the Misses Lillie and Alicia Neumeister at the farm near town.

Wilbur Rice, who has been visiting in Louisville and employed by the Avery Plow Co., arrived here last week to spend a couple of months with friends and relatives.

Mrs. B. K. Menefee, Mrs. Clara Heinrich and Mrs. L. D. Croninger of Covington, spent Friday here in the interest of the Eastern Star Chapter being officers on the Grand Chapter.

Mr. and Mrs. Geo. A. Caldwell, of Crittenden, visited friends at this place Tuesday. Mr. Caldwell is one of the rural mail men out from Crittenden and gives excellent satisfaction.

A. Records Johnson spent Thursday near Mr. Zion, Grant county, visiting relatives, being called there by the illness of his mother Mrs. Elizabeth Johnson who was visiting there and he brought her home with him.

W. B. Johnson sold to M. J. Simmons and wife Mrs. Edna Simmons, ten acres of land with the improvements, of the Mrs. Louise J. Stephenson land near Walton for \$4,000, possession given December 1st.

Rev. Ous Hamilton will hold his regular services at the Walton Baptist church Sunday morning, and his subject will be "Why the Believer Cannot be Lost." Services will also be held at night at 7:30. Everybody invited.

Courtland F. Scott, of Ghent, Supr. of the Sanders Lumber Co. Warehouse, spent Friday here inspecting the Walton warehouse with a view to adopting some of the features in the construction of the Sanders warehouse which is now being built.

Judge E. S. Clark of the Court of Appeals, C. W. Carnes, of C. R. Higway and two daughters, Misses Helen and Susan O. Farnough, were visitors here Friday, going to the fair at Florence, being personal friends of the President John E. Williams.

Miss Sybil Hurst spent the week at Williamstown attending the school teachers institute for the teachers of Grant county. Miss Hurst will teach the school at Jonesville the coming school year where she taught last year with very satisfactory results.

The Horse Protective Association of Boone county is respectfully requested to have a meeting at the Equitable Bank in Walton, Saturday, Sept. 16th, at two o'clock, p. m., for the purpose of dispatching business of importance. Every member urged to be in attendance. JAS. W. CLEGG, President.

Mrs. T. E. Converse and daughter Mrs. Sarah of Atlanta, Ga., were the guests of Judge and Mrs. J. G. Fomin a part of the week, and also spent some time with Mrs. Converse's sister Mrs. Belle Dickey at the farm near Union. Mrs. Converse and daughter go to St. Paul, Minn., where Mrs. Sarah will conduct a private school until next spring.

The all day meeting at the Baptist church Sunday was well attended and Rev. Powell preached a very interesting discourse to a large congregation. A special effort was made to get together enough money to pay the balance of the debt to the church amounting to about five thousand dollars, and it has been secured and the debt will be paid off in a week or so.

The North Bend Association meets this week with Bellevue Baptist church, and the Baptist church of Walton is sending in one of the best reports, if not the very best, that has ever come from this church. There have been during the past year about thirty additions to the church, if they have paid out the money was about \$5,000, besides contributions to missions beyond their apportionment of \$285, and the amount of all their gifts amounting to more than \$7,000 in cash and in kind.

The church is in every respect in a harmonious, united and happy condition. H. T. Larimore and H. T. Larimore were visitors here, making the tour of the county, and Mr. Larimore is enjoying every minute of his visit. Mr. Larimore is a very interesting man.

Miss Jennie Lee Gaines who has been very ill is much better. Mrs. W. H. Cram returned home Monday from a delightful visit to For Sale-Holstein heifer; had her first calf. Mrs. Susan Senour, Walton, Ky.

her children near Great Falls, Montana, and was greatly benefited by the visit. Mrs. Mammie Smith and son Allen of Covington, spent the week here the guest of A. W. Smith.

Wm. B. Sparks, F. M. Cleave and Roy P. Chapman of Verona neighborhood, were visitors here Tuesday. Hon. L. J. Crawford, a prominent attorney of New York, spent Wednesday here the guest of Judge J. G. Tomlin.

Robt. W. Jones, the local agent for the Buick, sold a beautiful car to Miss Cynthia Hudson of Kenton county last week.

Mrs. Joe B. Harris and little daughter of Covington, arrived here Tuesday on a visit to her parents Mr. and Mrs. W. A. Rouse.

H. D. Hearne of the Richwood neighborhood, spent last Saturday here with his many friends. His health is somewhat improved.

Mrs. Henry Koehler and son William of Cincinnati, spent the first of the week here the guest of the Misses Lillie and Alicia Neumeister at the farm near town.

Wilbur Rice, who has been visiting in Louisville and employed by the Avery Plow Co., arrived here last week to spend a couple of months with friends and relatives.

Mrs. B. K. Menefee, Mrs. Clara Heinrich and Mrs. L. D. Croninger of Covington, spent Friday here in the interest of the Eastern Star Chapter being officers on the Grand Chapter.

Mr. and Mrs. Geo. A. Caldwell, of Crittenden, visited friends at this place Tuesday. Mr. Caldwell is one of the rural mail men out from Crittenden and gives excellent satisfaction.

A. Records Johnson spent Thursday near Mr. Zion, Grant county, visiting relatives, being called there by the illness of his mother Mrs. Elizabeth Johnson who was visiting there and he brought her home with him.

DAILY FACTS

EXPENSE OF SAVING CALVES

Cost Just as Much to Raise Poor Animal as a Good One—Dispose of Culls Early in Life.

Calf conservation looks like a good thing to many of the wisacres, says the Farmer's Guide, but is it? Can the farmer afford to save the measly little specimens of bovinity that occasionally appear in the herd best? There are always some culls that cannot be turned to good account either as breeders or for beef. If every calf dropped were a high-class individual that could be raised and fed economically, the situation might be different. It costs just as much and sometimes more to raise a poor calf as a good one, and when you have it raised what is it good for? Let the conservationist go out into the open country and visit a number of farms where he can get next to the actual conditions; then let him study up on the economy of beef production and he may change his mind. Most certainly it is wise to save the good calves, the kind that can be raised into profitable breeders, milk or beef producers, but the other kind had better be disposed of early in life before they have time to become an expense.

SANITATION POINTS

1. Have the herd examined at least once a year by a competent veterinarian. Promptly remove animals suspected of being in bad health. Never add an animal to the herd until certain it is free from disease, particularly tuberculosis.
2. Never allow a cow to be excited by fast driving, abuse or unnecessary disturbance.
3. Clean the entire body of the cow daily. Hair in the region of the udder should be kept short by clipping.
4. Do not allow strong-flavored food, like cabbage or turnips, to be eaten except immediately after milking. Changes in feed should be made gradually.
5. Provide fresh, pure drinking water in abundance.

IMPORTANT FEATURE OF COW

Good Udders and Teats Are Often Overlooked by Dairy Cattle Breeders—Lack Wedge Shape.

There is so much real satisfaction in the milking and handling of cows that have good udders and good teats that it seems very strange that in dairy cattle breeding this important

Part of Splendid Jersey Herd.

feature has been so much neglected and by this second neglect far too many cows have small udders and consequently small, short teats. It will nearly always be noticed that cows with small udders, even in the best dairy breeds, usually carry too much flesh and lack that double-wedge shape which is so desirable in the eyes of the modern and progressive dairyman.

TAINT OF MILK AVOIDABLE

Unclean Utensils Are Common Source of Trouble—Particles Get Into Seams or Joints.

Unless some unusual food has been eaten, milk is delivered from the cow free from taint. It is also free from bacteria. Between the cow and the consumer it picks up a multitude of the latter and sometimes more or less of the former. The milk can be a common source of both. Minute particles of organic matter get into the seams or joints of the can, where they become the habitation of countless bacteria. Disagreeable odors arise as a result of the decomposition which ensues.

Put your nose into the mouth of an empty milk can after it has been cleaned and is ready to use. It is never entirely free from odor. But there is a distinct difference between a "clean" smell and a "foul" one.

HELPS GROWTH OF BACTERIA

Warm Milk Offers Splendid Medium for Growth of Organisms—Handle Milk Carefully.

The warm milk as it comes from the cow offers a splendid medium for the favorable growth of all kinds of bacteria that may gain access to it. To lessen this development talking should be done as carefully and quickly as possible and the milk should be strained and set away or pasteurized.

Tax-Payers, Notice!

The Tax-Payers of Boone County are hereby notified that I, or my Deputy will be at the places and on the dates named below to collect the 1917 State, County and County School Taxes. Children, under 10 years old, Free.

The Last Big Outdoor Outing of The Season

HUBERT CONNER, Secretary,

Burlington, Ky.

For Premium List Write to

Local Happenings.

The canning and preserving season is now in full blast.

C. C. Roberts is experiencing a severe attack of hay fever.

Tobacco has made a wonderful growth since the drought was broken.

Of course you will attend the Harvest Home which will be held on the 15th inst.

Dudley Rlyth has moved into the residence Bud Baker purchased of Samuel Adams recently.

J. G. Gordon is in full swing as County Superintendent of Schools, and has the institute in full blast.

Mrs. G. W. Tolin and Howard Huey, who are being treated in a Cincinnati hospital are each doing well.

The Boone County High School will begin next Monday, as will many of the other schools in the county.

John Furlong and son Thomas, of Point Pleasant neighborhood, were guests of his sisters in Burlington, Friday.

Petersburg ball club will play the Union team at Union next Saturday afternoon. Don't fail to see this game.

The rain last week came just in time to kill off the dust that threatened to become very annoying during the fair.

Joseph Eubanks, of Crescent Springs, was transacting business in Burlington, last Friday, and called at this office.

R. A. Brady and wife, residents of Bellevue neighborhood, will become citizens of Burlington before the snow flies again.

Riley & Riley have moved their law office to rooms over the Peoples Deposit Bank, at the corner of Union and Jefferson streets.

Jailer Adams did not give his successor in office an empty jail. He had one boarder in custody when the office was transferred.

The work on the new Hopeful church building is being rushed to completion, the brick work being done and the sheeting all put on the roof.

The annual session of the North Bend Association of Baptists is being held with the church at Belview, beginning yesterday. It will conclude its work today, Wednesday.

There will be a W. M. U. meeting of the North Bend Association at Belview today, Thursday, and Mrs. Janie Cree Rose will be present. Mrs. Rose is the new corresponding secretary.

J. S. D. Acra, of Locust Grove neighborhood, was in Burlington Tuesday morning, stocking up for feeding for visitors during the session of the association at Belview.

J. J. Tanner was in Burlington, last Monday, distributing Harvest Home advertising matter.

Dr. L. H. Crisler, of Covington, was in Burlington, Monday, administering to an equine patient or two.

The colored people of this county are considering the proposition to hold a fair on the fair grounds at Florence next year.

A large number of colored people passed thru Burlington last Monday enroute to the Labor Day picnic at Erlanger fair grounds.

William Stephens, of Petersburg precinct, is having a well sunk on his farm. He would not have the well plugged were it to produce oil or gas instead of water.

The Farmers Bank of Petersburg has been without a president since the death of E. T. Krutz. It is predicted that Dr. J. M. Grant will be elected to fill the vacancy.

The rains that visited this part of the county last week just about put the finishing touches on the corn and tobacco crops, and the farmers are feeling a pretty well I thank you.

The new County Superintendent of Schools, J. C. Gordon, and the new jailer, R. M. Wilson, are on their jobs, having been appointed to fill the vacancies occasioned by the resignation of their predecessors.

The game of ball played at Union last Monday by the Union and Gunpowder teams resulted in a defeat for Gunpowder, the score being 6 to 1 in favor of Union. The game was witnessed by a large crowd of enthusiastic rooters for each team.

The farm which R. C. Gaines sold to W. Lee Cropper some time since was sold one day last week by W. E. Vest, Covington real estate man, to a Mr. Anderson. Price not stated. The farm is near Idlewild, this county, and is recognized as one of the best hill farms in this part of the county.

Three wills were probated by the county court last Monday as follows:

W. H. Pope's—J. B. Pope, executor.
Jo C. Revill's—the widow, Monette Revill, executrix.
Joseph Graham's—Nellie Markland, executrix.

Harry Kilgour, of Francesville neighborhood, killed a spreading adder a few days ago in which were 32 young adders about six inches in length. The mother snake had swallowed the young snakes when she discovered they were in danger. Mr. Kilgour says the young vipers were ready and anxious for a scrap.

James N. Perkins, cashier of the Rising Sun National Bank, and a party of friends, one day last week, making Burlington one of their objective points. Mr. Perkins was a pupil of Miss Mary A. Thompson when a youth, and he delighted to see her, having not met her for many years, and each was delighted to see the other.

Red Cross News.

Half a million illustrated knitting circulars were sent out today from National headquarters to Red Cross Chapters throughout the country. The circulars contain full information on how to knit the eight standard articles, sleeveless sweaters, mufflers, hemlets, socks, wristlets, wash cloths, bed socks, and bottle covers, authorized by the Woman's Bureau of the Red Cross.

Recent cables from Major Grayson, M. P. Murphy, Red Cross Commissioner in France, again emphasize the necessity for warm knitted articles for the men who face the hardships of a winter in the trenches. Army officers request that the knitted articles be forwarded as soon as possible. The severity of the winter with a coal shortage to face and rising tuberculosis rate to combat demand that several million garments reach France before Thanksgiving.

Henry P. Davidson, Chairman of the Red Cross War Council, announces the launching of a Junior Red Cross open to all school children in the country. The new organization hopes to become a channel for patriotic service and interest to 22,000,000 boys and girls of school age in the United States.

Membership in the Junior Red Cross is to be by schools. When ever there has been placed in the local school fund an amount equal to 25c for every pupil, the school becomes a school auxiliary of the Red Cross, and is entitled to display a special Red Cross banner. At the same time every pupil becomes a Junior Member, and is entitled to wear the membership button.

The school fund can be raised by the school, or collected by subscription. Income states it will be raised by cities to cover all schools in the city districts. In other states the campaign will be for statewide fund and the enrollment of all the pupils in the state. In every case, however, the schools are to be associated with the local chapters of the Red Cross through a teachers' committee of the chapter.

Report of Boone County Chapter for August. Receipts:

Bal. on hand Aug. 1	\$297.97

A. B. Reinker, Treasurer.
Beattie Goodridge, Secretary.

The Institute Auxiliary will meet at the Christian Church, next Wednesday afternoon, Sept. 12. All members are requested to be present.

Teachers' Institute.

A very interesting session of the Teachers' Institute of Boone County began last Monday morning in the Circuit Court room in the Court House. Supt. J. C. Gordon is Chairman, Prof. E. H. Carter, Secretary, and Prof. Baker, of Kentucky State University, is instructor. Fifty-three teachers were enrolled Monday soon after which the work began.

A very large majority of the teachers in attendance are ladies. When the Institute adjourned Monday the roll contained the following names:

J. A. Caywood,
R. H. Carter,
N. E. Hamilton,
Rosalie Benson,
Mrs. Elva Melvin,
Rachael Pottinger,
Anna Cleek,
Janie Hance,
Mattie May,
Zayda Rouse,
Mary Bruce Roberts,
Virginia Clore,
Katie McDaniel,
Viola Sumner,
Annie Adams,
Maud Beemon,
Mary R. Tanner,
Lottie Rucker,
Pearl Kelly,
Pearl Stephenson,
Alice Carver,
Stella Stephens,
Wilford Mitchell,
Mrs. Stella Gaines,
Mrs. Ruby Baker,
Sadie Lee Snyder,
Martha E. Williams,
Lee Etta Myers,
Florence Young,
Jean Chaney,
Mamie Haley,
Auntie Hemphill,
Sally Casterton,
Florence C. Martin,
Mary Roberts,
Nannie Maurer,
M. A. Yealey,
W. Keen Snyder,
Mrs. C. C. McKee,
Jessie Lee Cleek,
Nannie Chambers,
Jean Chaney,
Mrs. Julia Rouse,
Willie Hance,
Nell Williams,
Gertrude Stephens,
Ora Bell Rouse,
Mayree Wood Campbell,
Sussie Wasson,
Katie Hodges,
W. Keen Snyder,
W. M. Smith.

The following teachers were enrolled Tuesday morning:

Mary West,
T. C. Frye,
Ruth Griffin,
Miss Eva Akin, of Petersburg precinct, was the guest of Mrs. Newton Sullivan, Jr., a few days last week and attended the fair.
Holman Wingate, of Petersburg, and his sister, Mrs. G. M. Terrell, of Lawrenceburg, were Saturday night and Sunday guests of their aunt, Mrs. Fannie Rice.
Congressman A. B. Rouse has returned to Washington, legislation that is under way requiring the presence of all the members of Congress.

Mr. and Mrs. B. C. Gaines returned last Monday from a three weeks' visit to Put-in-Bay and other points of interest on the Great Lakes.

W. E. Price, of Eminence, this State, and James W. Howe, of Hamilton, Ohio, attended the fair last week where they met many of their acquaintances of 40 years ago. They both look well.

W. W. Grimsley, from the mouth of Big Bone creek, was a business visitor to Burlington, Monday. He was here in the interest of some road improvement he desires in his neighborhood.

Persons who desire their names on the list to be voted the first Monday in October, 1917, for directors of the Farmers Mutual Fire Insurance Company of Boone County must notify R. H. Huey, Secretary of said company of the fact on or before Saturday, Sept. 8, 1917.

R. B. Huey, Secretary.

Personal Mention

Mrs. W. R. Davrainville, was shopping in Cincinnati, Wednesday.

Mrs. Browning, of Alabama, is the guest of her sister, Mrs. M. A. Yelton.

John Cloud went to Milan, Indiana, Monday, to visit his cousin, Geo. B. White.

Mrs. Eliza Rouse is spending a few days at Carlebad Springs, Grant county.

Ed. Hawes, of Lakeland, was the guest of his mother, Mrs. Martha Hawes, Tuesday night.

Wat. Walton and wife, of St. Louis, are guest of his grandmother, Mrs. Lucy Cloud.

Leonard Rouse, of Pleasant Valley neighborhood, is very ill of hardening of the arteries.

Mrs. Artimelia Ellis, of Covington, was the guest of Misses Lizzie and Sallie Rogers, last week.

John Adams, of Bracht, Kentucky, was the guest of Mrs. County Clerk Rupert Rogers, last Sunday.

Miss Emerald Mitchell, of Erlanger, was the guest of Miss Gwendolyn Goodridge, last week.

Edward Duncan has gone to Washington, D. C. where he will attend school this fall and winter.

Walton Dempsey left Wednesday for Lexington, where he will attend school this fall and winter.

Mrs. B. F. Akin, of Pickertown neighborhood, spent Monday in Burlington, guest of Mrs. Newton Sullivan.

Dr. M. A. Yelton was called to Bracken county, Sunday, on account of the serious illness of his mother.

Walter Jones, of Hamilton, and Joseph Weaver, of Union, were Tuesday.

Mrs. W. E. Carrol, of Louisville, has been the guest of her grandmother, Mrs. Mary Cropper, for several days.

Miss Katie Kirkpatrick, who has been in Chicago the past three months, is visiting her mother, Mrs. Lavina Kirkpatrick.

Mr. and Mrs. Thomas Fenton, of Cincinnati, and Mr. and Mrs. Edgar Berkshire motored to Madison, Indiana, last Sunday.

Miss Eva Akin, of Petersburg precinct, was the guest of Mrs. Newton Sullivan, Jr., a few days last week and attended the fair.

Holman Wingate, of Petersburg, and his sister, Mrs. G. M. Terrell, of Lawrenceburg, were Saturday night and Sunday guests of their aunt, Mrs. Fannie Rice.

Congressman A. B. Rouse has returned to Washington, legislation that is under way requiring the presence of all the members of Congress.

FORTY YEARS AGO TODAY

Items Taken From the Issue of The Recorder of September 6th, 1877

The corn crop will be immense. ****
North Bend Association is in session at Banklick.

The Aurora fair began Tuesday. ****
Prof. Stephenson began teaching in Morgan Academy, Monday.

Bay, M. B. Green presented to the RECORDER a sweet potato 15 inches long and 12 inches in circumference. ****

Gabriel T. Gaines' saddle turned and he fell and broke one of his legs last week. ****

Isaac McMullen reported threshing 9,000 bushels of wheat. ****

Miss Lizzie Nichols, lady rider who took the premium for lady horsemanship, at the fair last week, was thrown when leaving the ring, and for a while it was thought she was dangerously hurt. ****

W. S. Huey died Sunday about 2 p. m., of cholera morbus. ****

A. B. Parker, clerk on the steamboat Cons. Miller, was in town Monday. ****

Jas. Graves, of Jessamine county, captured many premiums at fair last week. Riddell & Norris captured the \$50 premium given by the Lexington Turnpike Company for the best all purpose horse. ****

A CARD.

To the People of Boone County: I have just tendered my resignation to the County Judge of Boone county as your Superintendent of Schools and Mr. J. C. Gordon has been appointed in my place. I have done this in order that the new Superintendent might begin with the beginning of the school term and not in the middle of the term. During these seven years and eight months we have seen many changes in the school work and in various campaigns unkind words have been said but I give up the work with a greater appreciation of the people of our county and wish all will toward no one and with great respect for those who saw things from a different angle than I did. Personally I ask that you give to Mr. Gordon the same hearty cooperation that you gave me. Again, thank every boy and girl, every man and woman, who either by cooperation or criticism has helped in this work. I have made mistakes, such mistakes have been the mistakes of one who did the best he or she could and not intend to repeat.

EDWARD C. RILEY

E. E. Kelly stocked up with provisions from the Baltimore market about the middle of the week.

Remorse.

For all the wisdom that is spilled, for all the punishment that is earned, it seems that life is always filled with lessons that are never learned; a mortal creature it appears will seldom fail to grab the chance to fill his little lot with tears and wail in woeful circumstance. He knows the paths that he should shun, he knows the better ways, of course, he knows the folly of the fun that brings him weeping and remorse, he knows that it is all a snare, yet falls he for temptation's lure to later moan and tear his hair and beat his bosom for a while. This train of moral platitudes (though wise, it is nothing new in truth) the writer pens in penesive mood for woes have prompted it forth; and many times he'd thought were learned the lessons that had cost him pain, but ah, the evil hour returned and he had slipped from grace again. O fates, withhold him with the strength to see the folly of his way, to find the better course at length and nevermore to fall or stray; pray lead him not through ways beset with thorns and rocks and holes and mire—he simply can't afford to get another sixty-dollar fire.—Illinois State Register.

Heyday of the Goldsmith.
The thirteenth and fourteenth centuries were the heyday of the English goldsmith. The crusaders had brought back with them from the Orient tales of jewels and enamels which they poured into the wondering ears of the fine craftsmen. Money was plentiful and the mighty church was the patron of art. There were whole streets of goldsmiths, shops which somewhat resembled the workshop of the armorer to the eyes of the collector at the Metropolitan museum. There were the same Gothic doorway, the same oaken paneling, the shrine of the saint was always present, too, but where the armorer patron saint was St. Eliot, St. Dunstan was the patron saint of all goldsmiths—no shop complete without him.

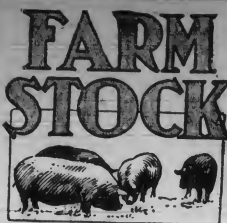

Wonder of the Age.
About the hottest thing this side of 'Old Sol' is an oxyacetylene torch, says 'The Wall Street Journal.' The little blue flame ejected by one of those looks like the picture of innocence, but it has the power of a dozen giants. It can bite through armor plate as easily as boring a hole in a plank. It has become a valuable aid in shipbuilding. Under the old method ship plate was cut with saws, but by the new method an oxyacetylene torch is attached to a small motor-driven car, which travels along a marked line and cuts any thickness of steel at a much more rapid rate. It is also valuable in tearing down buildings, where it is used to cut through beams, and as for rivets, it is only a matter of a few seconds to bite off the head of the largest.

Bird's Long Distance Flight.
A rancher living near Red Lodge, Mont., shot a large bird of the hawk family. Picking it up, he found that the bullet had grazed and stunned it, and that it had no serious injury. Instead of killing it as he would have been justified in doing in the protection of the farmer's fowls, he put a paper bearing his name and address in a little bottle which he tied around the bird's neck. Two months after, Luis Felipe Rulda of Bogota, Colombia, South America, shot the bird and, finding the name and address in the bottle, sent a letter to Red Lodge stating the facts. The bird had flown 3,000 miles with the bottle and message.

War Songs.
Sometimes war songs become real national anthems, and sometimes the tune of the national anthem is made fit to popular words, but in every instance each phase of a war has its particular song that is sung and whistled till it is implanted forever in the hearts of the men who fight and those who wait at home. Usually the tune is a swinging march, but sometimes it is a haunting melody whose sentimental quality makes it appeal to the man who is nearer to death than to home, and often friend and foe alike sing the same tune with different words.

New Method of Tanning.
A commercial agent of the United States in Melbourne writes of having seen two sheepskins tanned by the new process. The skins were pickled clean and reasonably free from dirt and then they were immersed for ten minutes in a pail containing a solution. They plunged rather quickly. At the end of ten minutes they were put into a water-bath extract tanning solution 50 per cent strong. The skins were manipulated by hand. In exactly four hours they were taken from the tub, washed, and stretched out to dry.

Emerald Is Ancient Jewel.
The emerald has been known since times, both in Europe and in the parts of the Orient, where its attractive color and rarity have endowed it in the highest rank of a varied gem. A mention is found in the Christian era in the writings of Pliny, he described somewhat on the proposed supposed medicinal virtues; even showed enough to satisfy curiosity with the much more costly, although eighteen centuries ago, he wrote that this precious stone was the most precious.

FARM STOCK

BEST ATTENTION FOR GILTS

They Should Be Given Plenty of Range and Forage So as to Develop Good Constitutions.

(By W. J. CARMICHAEL, Illinois Agricultural Experiment Station.)
After the gilts have been selected they need further attention, but not necessarily more expensive attention than the market animals require. They should be given plenty of range and forage, so as to develop good constitutions, and *other reasons* which are not very fattening in character.

Less corn and more high protein feeds should be included in their daily allowance, because they are being kept to be developed for an entirely different purpose than are the market hogs. Hogs for the block must be fat

Spring Pigs on Alfalfa.

to sell well, but those for the breeding pen should not be very fat to produce well.
Many people are deceived and buy gilts almost on the basis of their weight alone, they really lose sight of the size of the frame which supports the weight, consequently they not infrequently buy a 500-pound sow which is very fat and in reality of no larger frame than a smaller-looking 350-pound individual.

Keep the sows, then, in a good, thrifty condition, not overfat, and let them have all the necessary range, if possible away from other stock, especially horses.

Some say that the sows are but a half of the herd, or looking at it from the other angle, that the boar is a half of the herd, and it is fair to assume that this is true when we come to consider the character of the offspring, for they receive one-half of their characters from each parent. One very prominent breeder has stated that if the boar is an average boar he is half of the herd, but if he is a real poor one or an exceptionally good one he is all of it. There is a good bit of truth to that statement.

GRAIN-FED BREEDING SWINE

Breeders Want Hogs With Strong, Dense Bones—Feeds, High in Mineral Elements, Favored.

In order that losses by accident may be prevented and the period of usefulness of the animals for breeding purposes, lengthened, breeders want hogs with strong, dense bones. Since cereal grains are low in mineral elements, they should be supplemented by feeds rich in these constituents.

When confined in yards hogs are often fed largely or entirely on grain rations, so that their bones are soft and easily broken. Rations of corn supplemented by tankage and by skim-milk produce the most bone.

Because of the high protein and lime content, alfalfa and clover hay may be fed to advantage to mature breeding hogs, and in the spring green leguminous crops may be used. For feeding in connection with grains to breeding hogs in confinement, lime, corn cob charcoal, bone flour and wood ashes are also recommended.

SHEEP MAKE GOOD HELPERS

They Will Feed Off Weeds and Growths All Season That Other Stock Will Not Touch.

Sheep are good farm help. They will range a farm from early spring until late fall feeding off weeds and growths that other stock will not touch. A small flock will mow the orchard and keep the weeds down about windbreaks, fences and buildings. All of this is simply incidental "velvet" as the wool clip pays for the flock's keep. The mutton return is the main source of profit. Besides, the high value of farm land, which compels farmers to fence their acres for hogs and other stock, lightens the expense for keeping sheep.
This year with wool at 10 and 15 cents a pound above normal prices and mutton higher than it has ever been, any farmer in assured hands some return if he gives his flock reasonable care.

POULTRY

PRODUCING EGGS IN SUMMER

Better Methods of Caring for Eggs and Proper Packing Would Reduce Needless Loss.

Losses in eggs during the summer months fall directly upon the farmers. Dealers know that an average of 15 to 38 per cent of eggs marketed during the summer is either a total or a partial loss; hence prices, they say, are based upon good eggs only.

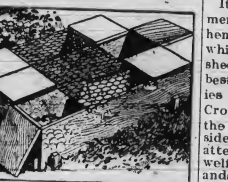

Better methods of caring for the eggs and better packing before they are shipped would reduce this unnecessary loss.
A few definite rules for the prevention of loss in summer eggs are formulated by the poultry division at the Pennsylvania State college: (1) Produce sterile or infertile eggs. (2) Keep eggs in a cool, dry place. (3) Have clean nests and plenty of them. (4) Do not keep the eggs near kerosene or decaying vegetables. They absorb odors readily. (5) Market the eggs frequently. Holding does not improve quality.

KEEP MOTHER HEN CONFINED

Loss of Chicks by Exposure Largely Preventable by Keeping Hen in Ventilated Coop.

It is not good poultry management to allow the mother hen to range unrestricted with her chicks. With such freedom the hen frequently takes her brood through wet grass and, as a result, some are chilled and die, especially the weaker ones, which are like chicks which follow a practice in large and mainly preventable. Furthermore, the food which a brood allowed to range with the hen obtains goes very largely to keep up the heat of the body and the chicks do not make as good growth as they otherwise would.

Chick losses of this nature can be largely prevented by shutting the hen in a coop. Any style of coop which is dry, ventilated and can be closed at night to protect the brood against cats, rats and other animals, and

Mother Hen in Coop.

which, while confining the hen, will allow the chicks to pass in and out freely after they are a few days old, will be satisfactory. The hen should be confined until the chicks are weaned, though a small yard may be attached to the coop, if desired, to allow the hen to exercise. The fence can be raised from the ground far enough to allow the chicks to go in or out, but not high enough for the hen to escape. By using a coop the chicks can find shelter and warmth under the hen at any time and the venting, after a few days, may develop into strong, healthy chicks.

STRICT STANDARD FOR EGGS

When Well-Established Produce of First-Class Fresh Article Will Bring Highest Price.

(By C. B. ANDERSON, Colorado Agricultural College, Fort Collins.)

The day of standardization in the egg market is here. When eggs sold for a cent a piece, the claim "an egg is an egg" was accepted. With our present increased prices, the consumer naturally is asking for greater quality and higher standardization in the products he buys.

A number of our best markets are now demanding that prices shall weigh at least 24 ounces per dozen. They must stand a candling test, be clean, uniform in size, shape and color of shell.

When rigid standards are well established the producer of first-class eggs will receive a premium and will no longer have his prices governed by the ungraded, poorly handled product.

PICK FEATHERS FROM GEESE

As Soon as Fowl Is Killed Dip It in Hot Water Three Times, Then Wrap in Blanket.

Much of the trouble experienced when picking geese may be avoided if the goose, as soon as dead, is dipped in water almost at the boiling point three times and then wrapped tightly in a blanket or other material which will hold the steam. This will thoroughly steam the feathers and down, and it will come off easily. Don't allow the goose to remain wrapped up more than a full minute.

LINCOLN'S TERM OF PEACE.

An Issue that Could Only Be Tried Out By War and Decided By Victory.

(New York Times.)
Peace agitators were as numerous in the War of Secession as today. The supporters of the Union generally described them as Copperheads. There were, however, some loyal but mistaken Federal men who kept bothering President Lincoln, from the best of motives, and begging him at least to consent to a conference with representatives of President Davis so as to arrive at a basis for terms. The President was too clear-sighted not to see that such a conference was certain to do harm and not good, and he took the same view of all proposals for negotiations or attempts of any kind to find out what the Confederates would accept in the effort to compromise. But in 1861 the efforts of these Copperheads had grown to a size that made it advisable for Lincoln to take official notice of their arguments, which he did in his annual message to Congress.

First demonstrating that the national resources were "inexhaustible" and that the sole purpose to maintain the Union was "unchanged," he said:
The manner of continuing the effort remains to be chosen. On careful consideration of all the evidence accessible, it seems to me that no attempt at negotiation with the insurgent leader could result in any good. He would accept nothing short of secession of the Union—precisely what we will not and cannot give. Between him and the issue is distinct, simple and inflexible. It is an issue which only can be tried by war and decided by victory. If we yield, we are beaten; if the Southern people are beaten, we are beaten. Either way it would be the victory and defeat following war. They can, at any moment have peace simply by laying down their arms and submitting to the national authority. The war will cease on the part of the Government whenever it shall have ceased on the part of those who began it."

Again the issue is distinct, simple and inflexible. Again it can only be tried by war and decided by victory. The side which yields, now as then, is beaten. The standards of the world can have peace at any moment by ceasing the war which they began. Our terms of peace are Lincoln's.

The Soldiers' Soul and Body.

We should like to be in the neighborhood if any modern psychologist should succeed in getting the ghost of Genghis Khan or Tamerlane, or Caesar or Napoleon to visit one of the training camps of our American army. It would not be their amazement at the new and incomprehensible weapons and maneuvers which would interest us most, but sheer astonishment at the care bestowed upon the souls and bodies of the soldiers. Even Oliver Cromwell, careful as he was about the spiritual state of his Ironsides, would stand aghast at the attention lavished upon the moral welfare of these hundreds of thousands of American youths. Imagine Alexander the Great spending an evening in a Young Men's Christian Association! O tempora, O mores!

It is attention to the welfare of the soldiers' higher faculties that, more than any or all other features together, marks the progress of the human race, as witnessed in the war now before us in the history of the world has such a sense of responsibility for the morals of its soldiers been acknowledged by any nation. Even the efforts put forth by our Government in the Civil War to prevent military demoralization have been forgotten by comparison. A new spirit is in the world, a new soul in the nation.

There sounds a new note in the grand symphony of civilization! War is horrible. The horror of this ancient world upon the field of battle finds today a hideous parallel. The science of war is the knowledge of how to kill, and killing must be always hideous. The difference between the various epochs cannot be traced, therefore, upon the field of battle; but it can be traced in the camps and the camps of the American army are as different from those of Assyria, Persia, Greece, Rome, a medieval or even modern army, as light from darkness. Our soldiers, first of all, are men, and in order that they may be good soldiers we think they must be good men, which is a revolutionary conviction and an ideal full of promise for the human race.

Jessamine Co., farmers are housing a good crop of tobacco and are plowing for a large crop of wheat.

An unusually good corn crop is assured in Scott county, and tobacco will make a fairly good crop.
In Nicholas county crops have been improved greatly by recent rains. The work of cutting tobacco has begun.
Bourbon county has prospects for a bumper crop of corn. Tobacco is doing nicely since the recent rains.
Ohio county has had a fine season for most all kinds of crops, and corn was never better, and the acreage is the largest ever planted in that county. The farmers there are all smiling.
Clark county has prospects for a full corn crop. This county was hit hard by the drought.

Kentucky Crop News.

Jessamine Co., farmers are housing a good crop of tobacco and are plowing for a large crop of wheat.

An unusually good corn crop is assured in Scott county, and tobacco will make a fairly good crop.

In Nicholas county crops have been improved greatly by recent rains. The work of cutting tobacco has begun.

Bourbon county has prospects for a bumper crop of corn. Tobacco is doing nicely since the recent rains.

Ohio county has had a fine season for most all kinds of crops, and corn was never better, and the acreage is the largest ever planted in that county. The farmers there are all smiling.

Clark county has prospects for a full corn crop. This county was hit hard by the drought.

Dibowski's Cafe
—THAT—
Neat Little Place
For Farmer, Workman, Merchant, Clerk and Professional Man.
Commercial Luncheon from 11 a. m. to 1:30 p. m. Supper 5 to 7 p. m.

LIST OF WINNERS

At The North Kentucky Fair
Last Week—Large Attendance and Good Exhibit.

A very small crowd attended the fair Wednesday, but the show was very good and very attractive for the juvenile element and the pony show was the big feature in the afternoon. The sheep and hog pens were well filled with handsome specimens of that kind of stock, and those interested in the propagation of hogs and sheep spent a good part of the day discussing the fine points of the animals occupying the pens.

The attendance Thursday was considerable, but the increase was not enough to be very encouraging, although everybody looked forward to larger crowds each of the succeeding days.

Friday's crowd was considerably larger than that of the preceding day, and the exhibition of dairy cattle, mules and model animals was on a par with that of any of the past years, the handsome animal exhibited during the day being a horse belonging to the president of the association, John W. Williams.

Saturday was a splendid day for a fair and it seemed that everybody from everywhere was in attendance, and passed the day most delightfully. The show in the ring was not large, but consisted of first-class stock. There were various amusements on the grounds for the young people and they lost no time enjoying them.

The Florence fair is thoroughly established in the hearts of the people for miles around and they will attend it so long as it is held. The attendance may be small some days but when the opportunity offers the loss is made up in short order by the public.

Colt under one year old, Lewis Riddell.

Colt under two years old, Ben Michaels.

Colt two and under three, Chas. Youell, Ed. Clarkson.

Gelding three and under four, Ross Rust.

Aged stallion, Benj. Michaels, Chas. Tanner.

Aged mare, J. E. Williams, H. S. Tanner.

Aged gelding, J. F. Fleischman.

Draft stallion, mare or gelding, same.

Draft mare and colt, Lewis Riddell.

Farm team, J. E. Fleischman, Chas. Youell.

Shed and pony, John E. Williams, Leslie Barlow.

Pony ridden by boy, Leslie Barlow, C. S. Chambers.

Best pony outfit, C. S. Chambers, J. E. Williams.

In the sheep pens Shaw and Easton exhibited Southdown sheep Shaw capturing the bulk of the premiums.

E. H. Blankenbaker and W. C. Lassing were competitors in the Hampshire show and what premiums one did not capture the other did.

J. B. Conrad was a very successful exhibitor of Shropshire, Lennie Busby being the person who prevented him making a clean sweep of the rewards.

F. C. Wiley and Joseph Surface were the contenders in the Oxforddown pens and divided honors about evenly.

JERSEY CATTLE

Aged bull, Joe Scott, Lawrence Kenney.

Joe Scott took all the premiums on this breed of cattle.

PIES

Apple, Mrs. Artie Hafer.

Cocoanut, Mrs. Rita Walton.

Lemon, Mrs. Ollie Goodridge.

Transparent, Ora Ross.

Peach, Mrs. Mary Finnell.

Yellow cream, Myrtle Stephenson.

Chocolate, Mrs. Mary Finnell.

CAKES

Devil's Food, Mrs. Kittie Brown.

Angel Food, Mrs. L. C. Acra.

White Pound, Minta Aylor.

Yellow pound, Mrs. Leslie Barlow.

Nut, Mrs. B. H. Tanner.

Berry, Mrs. Iva Riddell.

Jelly, Miss Eva Smith.

Marble, Mrs. Ollie Goodridge.

Fancy, Mrs. Ora Ross.

Sunshine, Mrs. Agnes Walton.

Knickerbocker, Mrs. Agnes Walton.

Caramel, Mrs. W. P. Beemon.

Chocolate, Mrs. Agnes Walton.

Mare, R. W. Smart, Thos. Gatekill.

Mare or gelding, Best & Powers, Thompson & Berry.

MODEL HORSES.

Three and over, J. R. Fagan.

Thos. Gatekill.

Under 3, Best & Powers, Thompson & Berry.

COMBINED HORSES.

Roadster, J. R. Fagan.

Finest and best mare and one or more colts, Frank Kelly, J. R. Fagan.

Matched horses or gelding, R. W. Smart, Powers & Best.

Hog judging, Robt. Youell, C. S. Acra, Robert Clore.

SCHOOL EXHIBIT.

Black cake, Mary Barnes, Helen Stephenson.

White cake, Mary Barnes, Mary Chambers.

Buttermilk biscuit, Emma Miller, Mary Barnes.

Homemade candy, Union.

SADDLE HORSES.

Colt under one year, Frank Kelly.

J. R. Fagan.

Best colt under two, Shelly Norman, Joe Surface.

Two and under three, J. R. Fagan, A. Thompson.

Three and under four, Powers & Best, Thompson & Berry.

Stallion over four years old, Thompson & Berry, Powers & Best.

Mare over four, Powers & Best, Mrs. N. Samuel.

Mare over four, Powers & Best, Thompson & Berry.

Stable of horses, Thompson & Berry.

HARNESS HORSES.

Stallion over four, J. R. Fagan, Powers & Best.

Mare over four, Powers & Best.

Aged gelding, Powers & Best.

Stallion three and under four, Powers & Best, C. E. Miller.

Mare 3 and under 4, Thos. Gatekill, Thomas & Berry.

Horse, mare or gelding 2 to 3, J. R. Fagan, S. Norman.

Mare or gelding 1 to 2, J. Norman, Joe Surface.

Colt under one, Frank Kelly, S. Norman.

Aged roadster, R. W. Smart, Sweepstakes, Powers & Best, J. A. Fagan, Powers & Best, Lady rider, Powers & Best, Keller Day.

FLORAL HALL.

Worst quilt, Mrs. J. E. Smith.

Calico quilt, Miss Nannie Burkett, Mrs. J. E. Smith.

Crocheted counterpane, Mrs. Mamie Wayland, Mrs. E. Aberling.

Bed spread, Mrs. J. E. Smith, Miss K. Madden.

Dressed doll, Lydia Grant, Beulah Tanner.

Machine sewing, Mrs. J. P. L. Jennings.

Wool Knitting, Miss Pink Cowen.

Silk Knitting, Mrs. J. P. L. Jennings.

Silk Rug, Mrs. Emma Freeman.

Rag Carpet, Ora Ross, Mrs. Ellen Smith.

Stenciling, Miss Lute Yealey, Mrs. W. W. Jennings.

Battenburg, Mrs. Nell Parker, Mrs. John Purcell.

Draw thread, Nannie Lodge, Mrs. F. Riddell.

Irish crochet, E. Aelker, Nannie Lodge.

Flirt Crochet, Mrs. E. Deaful, Mrs. R. C. Erdman.

Fabric Painting, Mrs. John Purcell, Mrs. Marden.

Hand embroidery, Mrs. Nell Parker, Mrs. J. E. Smith.

Sofa pillow, Mrs. R. C. Hall, Mrs. A. L. Grey.

Sofa pillow embroidered white, Mrs. J. E. Smith, Mrs. O. L. Gray.

Danish weaving, Mrs. John Purcell, Nannie Lodge.

Embroidered pillow case, Miss R. Marden, Miss Nell Parker.

Crayon drawing, Louise Zunkel, Helen Ammon.

Pen and pencil drawing, Helen Ammon.

Water color, Helen Ammon.

Oil Painting, figure, Mrs. M. I. Starr.

Oil Landscape, Mrs. John Purcell.

Oil Flowers, Louise Zunkel.

Painting on China, Mrs. E. B. Wade, Gertrude Meiman.

Public Sale!

I will offer at public auction at my home four miles west of Rising Sun, Indiana, known as the old Beatty farm, on

Thursday, Sept. 13, 1917

the following:

Red Chief stallion 6 years old, Black Beauty stallion 1 year old, registered Jack (Jim Corbett) 10 years old, Jack (Mike 3rd) 5 years old, 11-months old Jack eligible to register, registered 9 year old Jennie, 3 year old Jennie eligible to register, Jennie 4 yrs. old (Jack by side 7 weeks old) eligible to register, registered male Duroc hog, 2 Duroc Jersey gilts, Cow 6 years old, 2-year old Holstein bull, 43 Ewes, 9 Ewe lambs, yearling Buck, 4-year old Buck, 2-year old weanling, 2-year old colts.

Sale will begin at 10 a. m.

TERMS—Sums of \$5 and under, cash; over \$5 a credit of nine months at 6 per cent. interest from date of sale will be given.

C. E. Williams.

John R. Woods, Clerk. J. B. White, Auctioneer.

LUNCH STAND ON THE GROUNDS

It's Important
A Message for You.

The U. S. Government has required about 200,000,000 pounds of wool for military purposes; also the same proportion of cotton and if not more, and the soldiers needs are multiplying; this will necessarily cause a great advance in price of clothing. We anticipated this and have bought in advance and are able to sell

Clothing at the Right Price.

Our stock includes a varied line of Men's and Young Men's Suits. Styles are right, patterns that catch the eye, and prices that are within your reach. We offer them from

\$10.00 to \$20.00

Boys' Knee Pants Suits made for service as well as for appearance—all sizes. Price values from

\$2.50 to \$7.50

Raincoats—from the Rough-and-Ready service coat to the Neat, Stylish and Highly Tailored Dress Coat, all styles.

We pride ourselves on our wonderful line of Clothes for the farm. Work Clothes tough, washable materials, roomy and appropriate in Overalls or Kahkis.

Mail Orders Promptly Filled.

Six Cucumbers, Phelps Walton.
Display vegetables, Mrs. Henry Getker, W. N. Utz.
Six stalks tobacco, Will Arnold.

EMBROIDERY.

Display Eyelet, Mrs. Lute Yealey, Mrs. R. C. Hall.
White, Louise Zunkeller, Mrs. Nell Parker.
Eyelet, Mrs. K. Marden, Mrs. E. Oelker.
French, Mrs. K. Marden, Mrs. John Purcell.
Mount Mellick, Mrs. J. E. Smith.
Mrs. P. B. Gaines.
Hardigan, Alva Garnett, Hazel Garnett.
Embroidered shirt waist, Mrs. E. E. Smith, Mrs. Oelker.
Coral Embroidered white, Mrs. P. E. Gaines, Mrs. J. E. Smith.
Coral Embroidered, colored, Mrs. J. E. Smith, Mrs. R. C. Hall.
Walters, Mrs. E. Oelker, Mrs. J. E. Smith.
Knot work, Mrs. John Purcell.
Mrs. C. A. Fulton.
Moire work, Mrs. O. L. Grey, Mrs. R. C. Hall.
Delft work, Mrs. E. L. Grey, Mrs. P. E. Gaines.
Cut work, Mrs. W. W. Lassing, Mrs. J. P. Lassing.
Punch work, Nell Parker, Mrs. J. E. Smith.
Silk quilt, Mrs. J. E. Smith, Mrs. R. C. Hall.

ORANGE FRUIT & VEGETABLES.

Largest and finest lot of fresh fruit and vegetables ever offered in Boone County.

Grapes, Elsie Yeager, Leslie Adams.
Pears, W. N. Utz, Allen Goodridge.
Peaches, W. N. Utz.
Plums, Hubert Conner.
Quinces, Chester Goodridge.
Fruit, Allen Goodridge.
Late potatoes, Chester Goodridge.
Early potatoes, W. W. Tanner.
Sweet potatoes, Phelps Walton.
Display Irish potatoes, W. C. Delph.
Onion, Helen Stephenson.
Turnips, Mrs. Jennie Jones.
Radishes, Ed. Baker.
Peppers, Chester Goodridge.
Pumpkins, Robt. McGlasson.
Largest pumpkin, J. H. Mannin.

COMBINED HORSES, &c.

Stallion four and over, Thomas Gatekill, Thompson & Berry.
Mare four and over, Shelly Norman, C. E. Miller.
Gelding four and over, Thomas Gatekill, Thompson & Berry.
Colt under one, Frank Kelly, C. E. Miller.
Horse, mare or gelding one and under two, Shelly Norman, Joe Surface.
Horse two years and under 3, J. R. Fagan, Shelly Norman.
Horse mare or gelding three and under four, Thompson & Berry, J. R. Fagan.
Fair harness horses, J. R. Fagan, R. W. Smart.
Fair roadsters, R. W. Smart, J. R. Fagan.
Three gaited saddle horse, Shelly Norman, Thompson & Berry.
Fancy turnout, gentleman and lady, J. R. Fagan, R. W. Smart.
Roadster any age, R. W. Smart, J. R. Fagan.
Saddle horse mare or gelding, Thompson & Berry, Thos. Gatekill, Shelly Norman.
Lady driver, Ross Thatcher, T. Gatekill.
Best High Actor, R. W. Smart, Thompson & Berry.
Family buggy horse, Thompson & Berry, A. Schoben.
Consolation and the Keller Day, A. Thompson.

County News Items

Interesting Facts Gathered During the Week by Our Regular Correspondents.

GUNPOWDER.

E. L. Rouse is seriously ill. There will be some tobacco cut this week.

L. T. Utz attended the fair last Saturday and spent Sunday with home folks.

Chicken thieves have been operating near Union and R. O. Smith had five dozen stolen one night recently.

Lionie Tanner and family of near Grange Hall visited her parents Mr. and Mrs. W. P. Utz last Sunday.

John and wife and P. J. Allen and wife broke bread with Mr. and Mrs. Ben Padlock near Hebron, last Sunday.

Lost—On Union pike between the Pleasant Ridge school house and Florence a pair of sheep shearers, Flinder will please return to Linnie Busby.

J. H. Craven and wife, of Latonia, attended the fair last Saturday. Prof. Craven has had charge of the school in Latonia for several years and will manipulate the work there again this year.

RABBIT HASH.

Stephens is very sick with asthma.

Herman Ryke has a new Ford automobile.

Z. T. Kelly and wife visited relatives in Owen county last week.

A number of our people attended the fair at Florence, last Saturday.

Robert Aylor, of East Bend, is supplying us with fine water-melons.

Miss Ruth Williamson, of McVillo, spent several days last week with her sister, Mrs. Raymond Hightower.

Robert Hodges, Howard Aylor, Raymond Hightower and Leo Stephens, were before the draft board, last week.

Murrell McCoskey and his sister, Miss Bernice, left for their home at Little York, Ind., last Monday, after a visit with their aunt, Mrs. Dr. Carlyle.

R. M. Wilson will begin killing beef next Friday and will kill on Friday of each week. Anyone wishing fresh meat will do well to give him a call. Prices are very reasonable.

Mrs. Jennie Riggs, of Birmingham, Ala., who was visiting her parents, Mr. and Mrs. S. N. Riggs, was called home last week because of the serious sickness of her husband.

Mrs. Frances Moler and son left last Tuesday, after a three months' visit with her parents, Mr. and Mrs. R. T. Stephens and her sister, Mrs. T. B. Miller in Gallatin county.

The Gallatin street crossing at the Methodist church has been repaired. The work requiring considerable grading. Chas. Young, contractor.

UNION.

The Corbins who have been real sick are improving.

Miss Emma Love visited Mrs. C. H. Bristow the past week.

Miss Anna Mae Bristow spent Sunday with Miss Mabel Rouse.

Mrs. Ada Love and daughter are visiting Mrs. Ezra Blankenbaker.

Miss Jane Bristow was the Sunday guest of Miss Marietta Love.

Several of the members of Union church attended the all day meeting at Richmond.

Mrs. J. and Mrs. James Head, Miss Mattie Bristow and Warren Utz, were in the city Saturday and visited Chester Park.

FLICKERTOWN.

C. C. Pigg has a pair of work mules for sale.

Geo. Shinkle and family, were pleasant callers here Sunday afternoon.

Chas. Shinkle and Bolivar Shinkle and wife visited at Patriot, Indiana, last week.

Misses Mattie and Jane Voshell, of Independence, Kansas, are visiting at J. W. White's.

Jas. Bruce and family, Lewis Sullivan and family dined with Elbert Sullivan and wife Sunday.

Mrs. J. W. White and daughter, Miss Mattie, and Jane Voshell, and Mary Craig visited at Jasper Utz's, Monday.

CONSTANCE.

The Ladies Aid and Red Cross Unit wishing to show their appreciation of the loyalty and sacrifices our boys are making for their country and homes, gave an ice cream and cake social at the church Sunday night. Those who were drafted were guests of honor. Bro. Carter not being able to be with us, Mr. H. M. Kenyon took charge of the services and made a very good talk.

Harvey Peeno, who enlisted in the Navy, came home Saturday night and was greeted with applause as he came into the church.

A colored man robbed the house of Alfred Dolwick. Mr. Dolwick and the towns people gave chase located the thief up in a tree on the river shore. He was taken to jail in Burlington.

Chester Hood took 23 Constance people in his truck to the convention held in the South Fork church last Tuesday. The convention was a success in every particular. It was quite a distance to go in the truck and have to go over roads that were being repaired. It was a rough trip, but Mr. Hood being a careful driver, some tired and dusty but very satisfied the day and saw quite a good bit of our own county.

FLORENCE.

Miss Ella Judge has been the guest of Mrs. Minnie Baxter the past week.

Miss Nora Cahill, of Hamilton, is the guest of her sister, Mrs. Jerry Conrad.

Mrs. Bert Boyer and daughter spent last Tuesday at Elmer Conley's in Union.

Irene Arnold spent Saturday and Sunday with her grandmother, Mrs. O. M. Ryke, of Rosedale, is giving the school house here a coat of fresh paint.

John Mitchell, of Hartwell, Ohio, spent Sunday with his grandmother, Mrs. Anna Crighter.

Mrs. and Mrs. Richardson were guests of her parents Mr. and Mrs. Emil Smith, Sunday.

Kris Cahill, of Indianapolis, and Leon Kroger, of Hamilton, were guests of relatives here last week.

Mr. Albert Conner, of Covington, was the guest of Mrs. Joe Baxter a few days the past week.

Mrs. Jennie Wilhoit and sons, of Covington, spent a few days last week with her sister, Mrs. F. A. Utz.

Mrs. Harry Aldridge and children, of Covington, were guests of her mother, Mrs. Emma Freeman, last Friday.

Mrs. Chas. Fulton entertained Mr. Clark Honchen, last Saturday. They motored to Falmouth in Mr. Fulton's car.

Milton Goodridge, of LaRange, Oldham county, spent last week here with his brothers, and attended the fair.

Mrs. J. R. Whitson entertained her brother, Walter Plunket, and nephew, and Walter Whitson, of Walton, last Sunday.

Miss Nell Scott has returned after a fortnight's visit with her lemmings.

Mrs. Elmer Lucas and children and Mrs. Arch Lucas and daughter, spent last Sunday with Mr. and Mrs. C. H. Craven, of Devon.

Found on the promenade at the fair four initial links composing a sterling silver bracelet. Owner can have same by calling on Bert Boyer.

Mrs. W. H. Goodridge had as her guests, last Saturday, her cousins, Mrs. Geo. Smith, and her brother, Cecil Finch and wife, of Chicago.

J. W. Hogan and wife entertained a large number of guests last Saturday and Sunday, among them Mr. and Mrs. Jas. W. Howe, of Hamilton, Ohio.

Mrs. John Mayberry entertained Sunday, Mrs. W. H. Goodridge, Misses Ethel and Florence McGuees, Milton Goodridge, Mrs. Geo. Smith and Cecil Finch and wife.

Mr. and Mrs. H. C. Redman had as guests last week her brother, O. G. Caldwell and nephew, Carl Caldwell, of Williamstown, and Miss Lena Blackburn, of Covington.

Edward Baxter, son of Mr. and Mrs. Joseph Baxter and Miss Marie Babington, of Covington, Ohio, were married last Saturday evening. They will make their home at Sharroville.

Will Boyer attended court in Owensport last Monday, and reports seeing the largest crowd he ever beheld. He says the prospect down that way are good for corn, but tobacco looks bad.

It occurred to the Fiscal Court that the Burlington and Florence pike will require considerable repair to keep it from going to pieces this winter. A study in time saves nine, remember.

EDWARD THEODORE KRUTZ.

God, in his wisdom, has seen fit to call another good citizen, an indulgent father, a loving husband and one of Boone county's oldest and best business men.

Mr. Krutz was born June 29th, 1844, near Florence, Indiana, and his early life was spent in that neighborhood.

He was married October 26th, 1866, to Miss Charlotte Rosa Davis, of Paris, this State. To them were born three children, John, who died in infancy, Forest Eugene Krutz and Mrs. Everett L. Helms.

In early manhood he made the "good confession," and through life he was a faithful and consistent member of the Christian church.

His name was first placed on the register of Workum Lodge No. 68, K. of P., of Petersburg, Ky., and when the Masonic Lodge held a charter here, he was a faithful member.

At the time of his death he was senior member of the firm of E. T. Krutz & Son, general merchants, and was President and Director of the Farmers Bank of Petersburg.

His funeral was held at the Christian church at 2 p. m. last Sunday, Rev. Carter and the K. P.'s conducting same, and the crowded building and street was testimonial of the esteem in which the deceased was held by all. The pall-bearers were Geo. Ruth, J. M. Botts and Elmer Alden, remaining charter members of Workum Lodge, and three directors of the bank, Harry Stevens, Dr. J. M. Grant and cashier O. S. Watts.

Card of Thanks.—We desire in this feeble way to express our heartfelt thanks for the many kindnesses shown us in our hour of sorrow, especially to Bro. Carter for the many kindnesses shown Mr. Krutz and family and his tender, consoling words which shall ever be cherished by us; to Mr. Chambers and Workum Lodge, for their services.

Mrs. E. T. Krutz and family.

HAMILTON.

All the sick are improving.

W. W. Grimley and wife attend Florence fair, Saturday.

Two of our boys have been accepted by the city draft board.

Several of our people went to Rising Sun, Saturday, on Mr. Shan non's boat.

Miss Mamie Smith and Master Garland Huff were guests of Miss Beeman Saturday afternoon.

Misses Gladys and Hester Hattieson and Miss Flora Hattieson returned home Sunday after a week's visit with relatives and friends in this neighborhood.

WATERLOO.

Arthur Houston is repairing and painting his house.

The people of this vicinity are busy hauling coal from Bellevue.

Lewis Stearns, of this residence, papered, painted and repaired in general.

Lucy Bruce and Mrs. Lida Creamer, of Mount Vernon, have been visiting relatives here.

Miss Carrie Mae Rice, of Bellevue, spent several days here last week visiting relatives.

Lucian Stephens, of Lexington, spent Thursday night and Friday here with his sister, Mrs. Octavia Ryle.

Miss Beulah Stephens has returned to her home at Union after several weeks' visit with relatives in this vicinity.

Boone Ryle and family and Jas. Houston and family, of Idlewild, spent Sunday here with Mrs. Octavia Ryle.

FRANCESVILLE.

Chas. Muntz is numbered among the sick.

H. Eggleston and wife entertained a number of their relatives, Sunday.

Mr. and Mrs. L. T. Estes, of near Claves, spent Sunday night at J. S. Eggleston's.

Mrs. Carl Beacom, of Taylorsport, were guests at Mike Goodridge's, Sunday.

Edward and Arthur Eggleston and Henry Corer were sightseeing at the Zoo Sunday.

Mr. and Mrs. J. W. Utzinger and son, Howard Lee, spent Sunday at Miss Adelia, near Hebron.

Miss Adelia, Southern entertained Raymond Baker, of Campbell county, the latter part of last week.

Manlius Goodridge and wife and Raymond Goodridge and bride visited relatives at Taylorsport, last Sunday.

Mrs. Chas. Utzinger and little daughter, Miss Irma, of North Bend, called on Mrs. John Utzinger, last Thursday afternoon.

Robert and Mary Stephens, of Misses Mary Elizabeth and Julia and Mr. and Mrs. Crib, of Indiana, were Sunday guests at Chas. Beall's.

Miss Rebecca Dibble, a charming young lady near Rising Sun, arrived here last Saturday for a visit with Misses Amanda Koons and Sadie Koons.

Jerry Estes and granddaughter, Misses Mary and Florence Eggleston, spent several days last week at Shelbyville, guests of Col. Ellsworth and family. They attended the Shelby county fair, while there.

EXEMPTION BOARD

Accepts Twelve More and Exempts Thirty-Seven.

ACCEPTED.

List of persons in the second call of Boone county claims for exemption have been overruled by the local draft board:

492 Charles E. Robinson,
493 Joseph M. Stephens,
86 John H. Shinkle,
435 Stanley M. Parsons,
567 Robert C. Stephens,
169 Earl W. Dye,
400 Kirtley, McWethy,
635 Lloyd C. Waller,
422 Hazel Popham,
420 Edward H. Gross,
580 Gordon Souther,
187 Omer H. Dix.

The following were exempted on account of being married and having others depending upon them:

441 Ernie C. Piercefield,
331 Raymond Johnson,
339 Geo. M. Shinkle,
349 Walter E. Walsener,
582 Harmon P. Slayback,
501 Emil Regenbogen,
71 Leroy C. Beeson,
555 Wm. P. Shinkle,
450 Russell J. Ryan,
156 Otto N. Deck,
287 Albert L. Hodges,
257 Ernest C. Henley,
155 Harry C. Drake,
133 John Spencer Conner,
560 Charles D. Hedges,
303 Jesse L. Hamilton,
563 Aylous C. Scott,
410 James H. Mantz,
58 Richard D. Benton,
136 John W. Contrary,
98 Lacey Kirtley Cropper,
154 Ira Lee Sanders,
292 Oscar Siegel,
407 James M. McCarty,
262 Raymond B. Hightower,
566 Joseph G. Setters,
499 Ernest C. Reeves,
634 Arthur C. Warner,
417 Omer R. Porter,
1 Paul Aylor,
52 J. W. Baker,
36 John Blackburn,
211 Wiley Grubbs,
138 Claude S. Vallandigham,
138 Florent C. Caple.

300 Arthur C. Holton, of Waton, was exempted because of being physically disabled. He was examined and passed upon by an Ohio board.

Three of These Will Go Today.

From the following five men who have been accepted by the draft boards, three will be selected and sent to the cantonment at Louisville today:

Daniel Slayback, 606,
Henry L. Stucky, 596,
Alfred Stanley, 384, 126,
Harvey Sturgeon, 536,
Luther Green Sunday, 548.

Thirty will be selected to send to the same cantonment on the 19th of this month.

Only a few claims for exemptions have been passed upon by the local board.

BIG BONE.

Mrs. Addie Burrows was calling on Mrs. Polk Hamilton, Sunday afternoon.

Mr. Jack's truck came down and took a crowd from here to the fair. All report a good time.

Church—Sunday and Sunday night at the M. E. church, Bro. Hall's last sermon unless Conference sends him back.

G. L. Miller and wife, and Lou Miller and wife went to see the bride and groom Sunday afternoon. Mr. and Mrs. Kenner.

Wood Miller and family had as their guests Sunday, Mr. and Mrs. Jones, Fred H. Holden and wife, Robert Fields, wife and child.

GRANGE HALL.

Mrs. J. M. Stephens is entertaining relatives from the city.

Mrs. Nan Stephens, of Petersburg, is visiting her brother, P. Neal.

W. A. of Big Bone, will meet Saturday, Sept. 26th, with Miss Linnie Ryle.

L. W. Stephens, of Lexington, spent last week here with relatives attending the fair.

Mrs. Susie Utz and granddaughter, Miss Jessie, spent last Sunday night with Mrs. Alice Utz, in Union.

Mrs. Alice Neal, Mrs. Susie Utz, Misses Nell and Nannie Spauld, spent Monday with Mrs. Addie Blankenbaker.

It Ought to be a Go

Charles Youell has agreed to build the Burlington and Locust Grove turnpike, 5.88 miles, for \$11,000, the people along the road to furnish and haul half the necessary stone to be used.

It may be a long time before the land owners out that way will get an adequate proposition as favorable to them and their land as the money they need, but the benefit of the stone, whereas the stone are of no benefit to them and are going to waste as it were.

PETERSBURG.

John Geisler is building a barn for Charlie Moore.

Uncle Sam Henley is not expected to survive much longer.

At this writing this town is without a gallon of coal in the stores.

The potato crop is about a half crop; corn looking fine, garden truck very good.

Burlington pike from here to Idlewild is under way.

J. M. Botts, who was laid up several days last week is able to be at work again.

Only two of our citizens are holding their job in the coffin traveling in Lawrenceburg.

Petersburg Coal Company has a barge of fine Raymond City coal yarded, ready for consumers.

Miss Georgia Aylor is attending the Fendleton county institute in Falmouth. She will teach the primary room in Portland Grace School this season.

T. Krutz departed this life on the 31st of August at 2 o'clock a. m. He has been a citizen of this town for many years and built up a profitable business in the grocery and dry goods lines. He was president of the Farmers Bank, a member of high standing in the I. O. O. F., here and a member of the Christian church. He leaves a wife, one son and a daughter to mourn his departure.

After a brief and appropriate service held in his church on Sunday, September 2, at 2 p. m., by Elders Duncan and Carter, there were placed in the vault to await final interment.

Raymond Witham spent several days in Indianapolis, last week.

Born, to Dr. and Mrs. T. E. Ransom, August 28th, a daughter, Mrs. Maggie Robbins of Detroit, is the guest of her sister, Mrs. E. T. Krutz.

Mrs. Chas. Craig, of East Bend, W. F. Henley.

Quite a large number of out-of-town people attended the funeral of E. T. Krutz, Sunday.

Mr. Frank Witham, of Philadelphia, is the guest of her brother, Eugene Witham and family.

Mrs. Marshall Terrill and children, of Lawrenceburg, are guests of her father, Mr. Falmore Wingate.

Miss Virginia Cook, who has been the guest of Rev. and Mrs. R. H. Carter, returned to her home, Tuesday.

Mr. and Mrs. Ben Belden, Mrs. Diver Belden and Mr. and Mrs. Carl Hunter, of Xenia, Ohio, are guests of Mrs. J. I. McCarty.

The Red Cross room was opened last Wednesday afternoon at the Odd-Fellows Hall, and work was started immediately. The auxiliary will meet there every Wednesday afternoon at two o'clock and the room will be opened several times during the week.

Several kinds of work may be cured there for those who wish to do their work at home.

DEVON.

The annual reunion of the Bristow family was celebrated on Monday, September 3rd at the home of Mr. and Mrs. B. F. Bristow near Little York, Ohio. The weather was fine and the day was spent by all present. At noon a dinner was served on the lawn, consisting of every delicacy which could be found for the occasion. Those present were Mr. and Mrs. J. E. Bristow and son Edmond, of Walton, London Bristow and wife, of Ripley, Ohio; Dr. and Mrs. Chas. Jones and daughter; Nell of Cincinnati; Mr. and Mrs. W. C. Martin, Mrs. J. R. Warner and sons John Jr. and Billy; Miss Pearl Respass and Mrs. Kirtley Adams, all of Covington; Mr. and Mrs. J. B. Coombs and son, Joseph, of Ohio; and Mrs. George F. Eaton Jr., of near Ft. Mitchell, Misses and Mrs. N. S. Bristow, Misses Tow, Sandford, Catherine Bristow, of Bristow, Mr. and Mrs. J. C. Bristow and wife, daughters, Misses Nannie and Anna, Mrs. J. H. Head and daughter, Miss J. H. Head and daughter, Miss Jane, and Mr. Lynn Riazler, all of Union; Mr. and Mrs. H. P. Childress and son, Henry, S. L. Childress and family, of Erlanger; Miss Statira Childress, of Cincinnati; Mr. and Mrs. Rome Ohio; Dr. and Mrs. J. R. Respass and son Rome Jr. Mr. and Mrs. F. B. Bristow and son, James; Mrs. Jane Bristow Miller and daughter, Stella Elizabeth, and Mr. Wm. Norman and sister, Miss Virginia, of this place. At about 3:30 a. m. reported for their homes, hoping on Labor Day of next year they may gather together again at the same happy occasion.

A Fine Horse Dead

It is reported that one of the very fine horses shown at Florence, Ky., last week, died on the road to Lexington, where it was where it was to exhibit this week. The animal was valued at \$1,000.

Dropped One Director

At the annual election of directors of the North Kentucky Fair all the candidates were re-elected except John Cloud, who was succeeded by S. C. Hicks, who represents certain changes desired in the policy of the board.

Conveyance without limit passed thru Burlington, Wednesday before noon, enroute to the Hamilton area, in session at Bellevue.

Big Fish Fry at J. M. Flack's next Saturday evening.

THURSDAY, Sept. 6th, 1917.

GOOD EARTH ROADS

Much Depends on Soil, Construction and Maintenance.

LEADING QUALITIES OF SOILS

From Standpoint of Road Building They Depend on Texture and Structure, Permeability and Capillary Power.

(Prepared by the United States Department of Agriculture.)

Roads constructed by grading the natural soil to the required shape, grade and alignment, without special surfacing of any kind, usually are designated as earth, or dirt, roads. The efficiency of such roads depends (1) on the quality of the soil composing the roadbed, (2) on proper construction, and (3) on adequate maintenance.

Soils. The principal qualities of soils from the standpoint of road construction depend upon texture and structure, permeability and capillary power. Soils usually are classified as clay, sand, loam, gravel, marl or gumbo, according to the material predominating in their composition. Soils composed of two different materials mixed in such proportions that the character of the mixture is decidedly intermediate may be designated conveniently by naming both components, as sand-clay, sand-gumbo, gravelly clay, etc.

Clay. Clay is a soil of very fine texture which results from the complete decomposition of rocks or minerals. Pure clay is very retentive of moisture, and usually becomes plastic and unworkable when wet, but when mixed with other materials, such as sand or gravel, its stability may be increased greatly. In general, a clay road, to be passable, must be kept dry, and since clay is very difficult to drain, it happens seldom that roads composed entirely of clay can be kept in good condition at all seasons of the year. No matter how well such a road may be graded and crowned, the surface absorbs water in wet seasons and subsequent traffic will produce mud. But when the road is shaped and drained properly it will dry out quickly when the weather becomes favorable and may soon be restored to its original shape. On the other hand, clay roads, when very dry, usually produce considerable dust under traffic, and for this reason may become very insanitary in extended dry seasons.

The extent to which clay roads are subject to the objections mentioned above usually varies according to the so-called "slaking" qualities of the clay. Some varieties of clay, when compressed into a ball and placed in water, will continue in the original shape for a considerable time, even if thoroughly saturated and softened, while compressed balls from other varieties will slake or break down almost immediately upon being placed in water. Clays of the first-mentioned variety are called "non-slaking clays," and of the latter, "slaking clays." It has been observed that slaking clays produce more mud in wet weather and more dust in dry weather than those of the non-slaking variety. This characteristic of clays is further considered in the discussion of sand-clay roads appearing in another part of this bulletin, where methods for testing clay are suggested.

Most clays, as they occur in nature, contain more or less sand or gravel, which, as pointed out above, usually has a stabilizing effect by making the clay more easily drained and increasing its bearing power. In fact, the fact that a good quality of clay mixed with coarse sand in such proportions that the clay fills the voids in the sand and cements the individual particles together produces a soil which possesses the good qualities of both materials and which overcomes, to a great extent, the objections to each.

Sand. Sand is composed of granular particles of mineral or stone which occur in nature and which will pass a one-fourth-inch-mesh screen. The one-fourth-inch-mesh screen is fixed arbitrarily as the dividing line between sand and gravel and is generally though not universally accepted as such. Nearly all sand consists essentially of quartz grains that are very hard and durable. But there is no coherence between the different grains, and therefore soils composed principally of sand are unstable when confined in some way. If properly confined and protected from undermining, sand foundations may, under favorable climatic conditions, prove entirely satisfactory for almost any type of road crust, but it is practically impossible, under any circumstances, to make a satisfactory road surface of sand alone. Dry sand offers almost as great resistance to traffic as mud, and except in very wet seasons sandy roads are likely to dry out to a considerable depth. The reason for this is that the capillary power of sand is comparatively low and the ground water elevation may be lowered practically to the prevailing level of surface streams in extended dry seasons.

Sandy roads are at their best when they are kept moist, and for this reason they should be designed with a view to retaining moisture in the surface. Also to effective drainage, as is the case with clay roads. Such roads are usually improved temporarily by means of cement, lime, or leaves or straw. After the water has been absorbed, the surface is again improved by the same means.

especially where clay may be obtained readily and only limited funds are available for the improvement.

Loam. Loam is a soil composed of clay and sand, mixed with a considerable percentage of finely divided vegetable matter or humus. The quality of loam from the standpoint of road building depends largely upon the proportions in which sand and clay are present and on the character of these materials. Loam that contains about 60 per cent of moderately coarse sand and from 20 to 30 per cent of good cementing clay usually will make an excellent road surface for light traffic. Material of this kind is drained easily and is fairly stable, even when wet. Another advantage is that it will not become very dusty under traffic in dry weather and frequently will cement together into a very hard, compact surface. Roads surfaced with such material are commonly called "topsoil roads," because the "topsoil" of the fields possesses the desired characteristics more frequently than that to be obtained from any other source.

Gravel. Gravel is made up of small rounded particles of stone, which occur in nature and are sufficiently coarse to be retained on a one-fourth-inch-mesh screen. Gravelly soils are distributed widely in the United States, and vary widely in quality. In general, when a soil contains as much as 40 to 50 per cent of gravel and sufficient clay or other cementing material to bond the gravel particles together, it provides a very satisfactory material for construction of roads, because it is drained easily and is very stable when compacted.

Marl. Marl is clay containing a relatively large percentage of carbonate of lime. It grades into calcareous clay and is a siliceous limestone, and its value for road building is variable. In general this material has few advantages over the best varieties of ordinary clay for use in constructing a road, unless the percentage of lime carbonate is sufficiently high to give it, when compacted, approximately the character of limestone. The best varieties of marl become very hard and compact when placed in a road surface, and in some localities this material is used extensively for road surfacing.

Gumbo. Gumbo is essentially loam containing a high percentage of clay and decayed vegetable matter and a very low percentage of sand. Gumbo has a strong tendency to absorb and hold water, and therefore is hard to drain. It is harder to handle in a road surface than clay, because the vegetable matter is an added weakness, but if protected from surface water by a proper system of drainage it may be used to construct a fair subgrade for supporting some type of impervious road crust. Gumbo has a relatively high capillary power, and for this reason its occurrence in a roadbed usually will necessitate the use of subdrainage, even under conditions favorable for surface drainage.

AVOID INJURY BY CUTWORMS

Damage Can Be Prevented to Large Extent by Wrapping Stems of Plants With Paper.

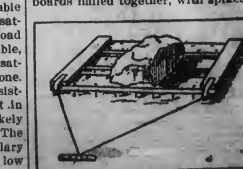

Damage from cutworms can be prevented to a great extent by the use of paper wrappings around the stems of plants set out in the garden. One will scarcely ever lose a tomato, cabbage or other plant protected this way. Let the paper extend below the surface and an inch or more above ground.

In cornfields the poison bait is used. Mix dry a half pound of paris green and 50 pounds of bran. Then stir in a quart of cheap sirup or thin molasses and two gallons of water. This makes a crumbly mash. It will cover two acres of corn rows or other crops scattered thinly over the places where the cutworms are working. Late afternoon is the time to scatter the bait.

HANDY HARROW FOR GARDENS

Implement Designed to Keep Out Weeds Without Much Hard Work—Perfect Mulch Is Made.

Last summer I had the pleasure of seeing one of the neatest and cleanest home gardens I ever saw. All vegetables were planted in straight rows, an exact distance apart. Not a weed was in sight. I was at a loss to know how a garden could be kept so until one day I saw the owner pulling a small homemade hand harrow up and down the rows. It was only a few boards nailed together, with spikes for

Homemade Hand Harrow.

teeth, says a writer in Farm Progress. The harrow is not wide, it went nicely between the rows, and when weighted down made a perfect mulch and destroyer of all weeds.

How much easier it would be to let the children pull a harrow like this up and down your garden rows once a week, than to spend a half hour pulling weeds. After the weeds are pulled, the harrow will make a perfect mulch.
